Similarly, under 5 U.S.C. 553(d)(3), the Assistant Administrator finds for good cause that a 30-day delay in the effective date of this rule would be contrary to the public interest. This rule imposes no additional regulatory burden but does relieve a restriction by providing Gulf shrimp trawlers a choice of certified BRDs that may be used to comply with the BRD requirement that becomes effective on May 14, 1998. To the extent that this rule relieves restrictions by providing a choice, it is not subject to a delay in effective date under 5 U.S.C. 553(d). This rule will be effective May 14, 1998, the implementation date of the BRD requirement.

List of Subjects in 50 CFR Part 622

Fisheries, Fishing, Puerto Rico, Reporting and recordkeeping requirements, Virgin Islands.

Dated: May 13, 1998.

David L. Evans,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 622 is amended as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF, AND SOUTH ATLANTIC

1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. Effective May 14, 1998, through November 16, 1998, in § 622.41, paragraph (h)(2) is suspended and paragraph (h)(3) is added to read as follows:

§ 622.41 Species specific limitations.

* * * * *

(h) * * *

(3) *Certified BRDs.* The following BRDs are certified for use by shrimp trawlers in the Gulf EEZ. Specifications of these certified BRDs are contained in Appendix D to this part.

(i) Fisheye

(ii) Gulf fisheye.

(iii) Jones-Davis.

3. Effective May 14, 1998, through November 16, 1998, in Appendix D to part 622, paragraphs D and E are added to read as follows:

Appendix D to Part 622—Specifications for Certified BRDs

* * * * *

D. *Gulf fisheye.*

1. *Description.* The Gulf fisheye BRD is a cone-shaped rigid frame constructed from

aluminum or steel that is inserted into the top center of the codend, or is offset not more than 15 meshes perpendicular to the top center of the codend, to form an escape opening.

2. *Minimum Construction and Installation Requirements.* The Gulf fisheye is a cone-shaped rigid frame constructed of aluminum or steel rods. The rods must be at least 1/4–inch (6.35–mm) diameter. Any dimension of the escape opening must be at least 5.0 inches (12.7 cm), and the total escape opening area must be at least 36.0 in^2 (232.3 cm^2). The Gulf fisheye must be installed in the codend of the trawl to create an escape opening in the trawl, facing in the direction of the mouth of the trawl, no further forward than 12.5 ft (3.81 m) and no less than 8.5 ft (2.59 m) from the codend tie-off rings. The Gulf fisheye may not be offset more than 15 meshes perpendicular to the top center of the codend.

E. *Jones-Davis.*

1. *Description.* The Jones-Davis BRD is similar to the expanded mesh and the extended funnel BRDs except that the fish escape openings are windows cut around the funnel rather than large-mesh sections. In addition, a webbing cone fish deflector is installed behind the funnel.

2. *Minimum Construction and Installation Requirements.* The Jones-Davis BRD must contain all of the following.

(a) *Webbing extension.* The webbing extension must be constructed from a single piece of 1 5/8–inch (3.5–cm) stretch mesh number 30 nylon 42 meshes by 120 meshes. A tube is formed from the extension webbing by sewing the 42–mesh side together.

(b) *28–inch (71.1–cm) cable hoop.* A single hoop must be constructed of ½-inch (1.3–cm) steel cable 88 inches (223.5 cm) in length. The cable must be joined at its ends by a 3–inch (7.6–cm) piece of ½-inch (1.3–cm) aluminum pipe and pressed with a 3/8–inch (0.95–cm) die to form a hoop. The inside diameter of this hoop must be between 27 and 29 inches (68.6 and 73.7 cm). The hoop must be attached to the extension webbing 17 ½ meshes behind the leading edge. The extension webbing must be quartered and attached in four places around the hoop, and every other mesh must be attached all the way around the hoop using number 24 twine or larger. The hoop must be laced with 3/8–inch (0.95–cm) polypropylene or polyethylene rope for chaffing.

(c) *24–inch (61.0–cm) cable hoop.* A single hoop must be constructed of 3/8–inch (0.95–cm) steel cable 75 ½ inches (191.8 cm) in length. The cable must be joined at its ends by a 3–inch (7.6–cm) piece of 3/8–inch (0.95–cm) aluminum pipe and pressed together with a 1/4–inch (0.64–cm) die to form a hoop. The inside diameter of this hoop must be between 23 and 25 inches (58.4 and 63.4 cm). The hoop must be attached to the extension webbing 39 meshes behind the leading edge. The extension webbing must be quartered and attached in four places around the hoop, and every other mesh must be attached all the way around the hoop using number 24 twine or larger. The hoop must be laced with 3/8–inch (0.95–cm) polypropylene or polyethylene rope for chaffing.

(d) *Funnel.* The funnel must be constructed from four sections of 1 ½-inch (3.8–cm) heat-set and depth-stretched polypropylene or polyethylene webbing. The two side sections must be rectangular in shape, 29 ½ meshes on the leading edge by 23 meshes deep. The top and bottom sections are 29 ½ meshes on the leading edge by 23 meshes deep and tapered 1 point 2 bars on both sides down to 8 meshes across the back. The four sections must be sewn together down the 23–mesh edge to form the funnel.

(e) *Attachment of the funnel in the webbing extension.* The funnel must be installed two meshes behind the leading edge of the extension starting at the center seam of the extension and the center mesh of the funnel's top section leading edge. On the same row of meshes, the funnel must be sewn evenly all the way around the inside of the extension. The funnel's top and bottom back edges must be attached one mesh behind the 28–inch (71.1–cm) cable hoop (front hoop). Starting at the top center seam, the back edge of the top funnel section must be attached four meshes each side of the center. Counting around 60 meshes from the top center, the back edge of the bottom section must be attached 4 meshes on each side of the bottom center. Clearance between the side of the funnel and the 28–inch (71.1–cm) cable hoop (front hoop) must be at least 6 inches (15.2 cm) when measured in the hanging position.

(f) *Cutting the escape openings.* The leading edge of the escape opening must be located within 18 inches (45.7 cm) of the posterior edge of the turtle excluder device (TED) grid. The area of the escape opening must total at least 864 in^2 (5,574.2 cm^2). Two escape openings 10 meshes wide by 13 meshes deep must be cut 6 meshes apart in the extension webbing, starting at the top center extension seam, 3 meshes back from the leading edge and 16 meshes to the left and to the right (total of four openings). The four escape openings must be double selvaged for strength.

(g) *Cone fish deflector.* The cone fish deflector is constructed of 2 pieces of 1 5/8–inch (4.13–cm) polypropylene or polyethylene webbing, 40 meshes wide by 20 meshes in length and cut on the bar on each side forming a triangle. Starting at the apex of the two triangles, the two pieces must be sewn together to form a cone of webbing. The apex of the cone fish deflector must be positioned within 10–14 inches (25.4–35.6 cm) of the posterior edge of the funnel.

(h) *11–inch (27.9–cm) cable hoop for cone deflector.* A single hoop must be constructed of 5/16–inch (0.79–cm)or 3/8–inch (0.95–cm) cable 34 ½ inches (87.6 cm) in length. The ends must be joined by a 3–inch (7.6–cm) piece of 3/8–inch (0.95–cm) aluminum pipe pressed together with a 1/4–inch (0.64–cm) die. The hoop must be inserted in the webbing cone, attached 10 meshes from the apex and laced all the way around with heavy twine.

(i) *Installation of the cone in the extension.* The cone must be installed in the extension 12 inches (30.5 cm) behind the back edge of the funnel and attached in four places. The midpoint of a piece of number 60 twine 4 ft (1.22 m) in length must be attached to the apex of the cone. This piece of twine must be attached to the 28–inch (71.1–cm) cable hoop at the center of each of its sides; the points of attachment for the two pieces of twine must be measured 20 inches (50.8 cm) from the midpoint attachment. Two 8–inch (20.3–cm) pieces of number 60 twine must be attached to the top and bottom of the 11–inch (27.9–cm) cone hoop. The opposite ends of these two pieces of twine must be attached to the top and bottom center of the 24–inch (61–cm) cable hoop; the points of attachment for the two pieces of twine must be measured 4 inches (10.2 cm) from the points where they are tied to the 11–inch (27.9–cm) cone hoop.

Proposed Rules

Federal Register
Vol. 63, No. 96
Tuesday, May 19, 1998

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

7 CFR Part 59

[Docket No. 96–035A]

[Docket No. 97N–0322]

RIN 0583–AC52

Salmonella Enteritidis in Eggs

AGENCIES: Food Safety and Inspection Service, USDA; Food and Drug Administration, HHS.

ACTION: Advance notice of proposed rulemaking; request for comments.

SUMMARY: Eggs contaminated with *Salmonella* Enteritidis (SE) are associated with significant numbers of human illnesses and continue to be a public health concern. SE infected flocks have become prevalent throughout the country, and large numbers of illnesses have been attributed to consumption of mishandled SE-contaminated eggs. As a result, there have been requests for Federal action to improve egg safety. The Food Safety and Inspection Service (FSIS) and the Food and Drug Administration (FDA) share Federal regulatory responsibility for egg safety. However, regulation of shell eggs is primarily the responsibility of FDA. Through joint issuance of this notice, FSIS and FDA are seeking to identify farm-to-table actions that will decrease the food safety risks associated with shell eggs. The agencies want to explore all reasonable alternatives and gather data on the public benefits and the public costs of various regulatory approaches before proposing a farm-to-table food safety system for shell eggs. Interested persons are requested to comment on the alternatives discussed in this advance notice of proposed rulemaking (ANPR), suggest other possible approaches, and provide information that will help the agencies weigh the merits of all alternatives. In addition to the actions contemplated in this ANPR, both agencies are planning to take actions that address adoption of refrigeration and labeling requirements that are designed to reduce the risk of foodborne illness.

DATES: Comments must be received on or before August 17, 1998.

ADDRESSES: Send an original and two copies of comments to: FSIS Docket Clerk, Docket No. 96–035A, Room 102 Cotton Annex Building, 300 12th St, SW., Washington, DC 20250–3700. Reference material cited in this document and any comments received will be available for public inspection in the FSIS Docket Room from 8:30 a.m. to 1:00 p.m. and 2:00 p.m. to 4:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph Stafko, Food Safety and Inspection Service, USDA, Washington, DC, 20250, (202) 720–7774, or Dr. Marilyn Balmer, Center for Food Safety and Applied Nutrition, Food and Drug Administration, HHS, Washington, DC 20204, (202) 205–4400.

SUPPLEMENTARY INFORMATION:

Table of Contents

Background
1. Egg production and marketing.
2. *Salmonella* and the salmonellosis epidemic.
3. *Salmonella* in eggs; the risk.
—Contamination through the shell; current cleaning practices
—Transovarian contamination of eggs with SE
4. Mitigating the risk; current efforts.
—Production: preventing introduction of SE into laying flocks and from hens to eggs.
—Processing and distribution: preventing growth of SE in eggs.
—Rewashing/repackaging: preventing growth of SE in eggs.
—Preparation and consumption: preventing ingestion of SE from eggs.
5. Current regulation of shell eggs.
6. Need for additional information and analysis.
Information Requested

Background

This section provides information on the egg industry, data that associate eggs with an epidemic of cases of human salmonellosis caused by *Salmonella* Enteritidis, and past efforts and current plans to alleviate this public health problem.

1. Egg Production and Marketing

Eggs are a nutrient-dense food that play an important part in most Americans' diets, either alone or as a constituent of another food. On a per capita basis, Americans consume about 234 eggs a year. The National Agriculture Statistics Service (NASS) of the Department of Agriculture (USDA) estimates the total value of the table eggs (eggs produced for human consumption, not hatching) produced in the U.S. in 1995 at $3.96 billion.

The egg industry is fairly stable in terms of overall production. U.S. production has increased only slightly in absolute terms in recent years, from about 60 billion eggs in 1984 to about 63 billion in 1995. About 70 percent are sold as whole "shell" eggs. The remaining 30 percent are processed into liquid, frozen or dried pasteurized egg products, the majority of which are destined for institutional use or further processing into other foods such as cake mixes, pasta, ice cream, mayonnaise, and bakery goods.

International trade is a small but growing part of the U.S. egg market. The U.S. does not import a significant quantity of shell eggs and imports only 0.2 percent of processed egg products. Exports now amount to more than 2 percent of the total U.S. production. In 1996, exports of eggs and egg products reached a market value of nearly $20 million.

There are essentially three kinds of flocks associated with egg production: breeder flocks, multiplier flocks, and laying flocks (including both immature pullets and mature laying hens). There are roughly 300,000 breeding hens (grandparents), 3 million multipliers (parents), and 300 million laying hens. NASS estimates the value of the laying flocks alone to be close to $1 billion.

Geographically, commercial egg production in the western United States is concentrated in California, and in the east it is centered in Ohio, Indiana, and Pennsylvania. According to NASS, which surveys the number of egg laying flocks of 30,000 or more hens, California and Ohio each have about 25 million layers, and Indiana and Pennsylvania each have about 20 million. Other states in which major producers are located

include Iowa, Texas, Minnesota, and Georgia. Twenty-one other states are reported as having fewer than 10 million, but more than 2 million, layers in production.

Egg production is being concentrated in fewer, larger firms. Federal Regulations require commercial flocks of more than 3,000 hens to be registered with USDA. USDA's Agricultural Marketing Service (AMS) currently has 757 such egg producers registered. The United Egg Producers (UEP), a cooperative that provides a variety of services to member egg producers, reports that the number of major producers (those with flocks of 75,000 or more, which produce about 94 percent of America's table eggs) declined in just 3 years from 380 producers in 1994 to 329 producers in 1996.

Modern egg production facilities are increasingly large, "in-line" facilities. They integrate laying, packing, and even processing of egg products at one location. Freshly laid eggs go directly into a processing system where they are cleaned, sorted, and packed for distribution.

A significant portion of production, however, is still "off-line." Off-line operations are those that are not integrated with laying facilities, but rather have eggs shipped from laying facilities at other locations. The fresh eggs are collected and shipped from the laying facilities periodically, usually once a day but sometimes less often. These eggs are frequently placed in coolers at the laying facility before shipment to a facility where they are processed and packed.

Most packers either own or have contractual relationships with their suppliers. Their laying hens are bred and cared for to ensure the largest possible numbers of consistent quality eggs, and are housed together in large hen houses.

Although shell egg cleaning and packing is configured differently in different plants, after collection the eggs generally are (1) washed, (2) rinsed and sanitized, (3) dried, (4) candled, sorted, and graded, (5) packed in cartons and crates onto shipping pallets, and (6) placed in a cooler pending shipment. Eggs that are found to be cracked or otherwise unsuitable for sale as whole shell eggs are by law "restricted." USDA allows a certain percentage of some classes of restricted eggs to be moved in commerce. If restricted eggs sent to a federally inspected facility (often referred to as a "breaker plant") are determined acceptable, they are broken, inspected for wholesomeness, pooled, and then processed into a pasteurized liquid, frozen, or dried egg product.

After packing, shell eggs usually are loaded into refrigerated transports for shipment to market. Some producers use their own trucks, while others contract with trucking firms to deliver eggs to their customers. Some are delivered directly to retail outlets, and others are delivered to warehouses and other intermediate distribution points before going to the retail store or food service facility where they reach the consumer.

2. Salmonella and the Salmonellosis Epidemic

Salmonella is a gram-negative, motile, rod-shaped bacteria that can grow under both aerobic and anaerobic conditions. *Salmonella* has evolved into a successful human pathogen because of its survival characteristics and virulence. The organisms are ubiquitous, and are commonly found in the digestive tracts of animals, especially birds and reptiles. Human illnesses are usually associated with ingestion of food or drink contaminated with *Salmonella*, but infection may also be acquired from an infected person by the fecal-oral route through poor personal hygiene, or from pets.

More than 2,300 different serotypes have been identified and are associated with a variety of animal reservoirs, geographic locations, and frequencies. However, microbiologists are finding that atypical biotypes have emerged that are difficult to identify and detect by conventional means, placing more value on new molecular methods and other technologies for identifying them.[1]

Epidemiologically, salmonellae can be grouped as follows:

1. *Those that infect mainly humans.* These include human pathogens such as *S.* Typhi and *S.* Paratyphi (A and C) which cause typhoid (enteric) and paratyphoid fevers, respectively, the most severe of the *Salmonella* disease*S. S.* Typhi may be found in blood, as well as in stool and urine before enteric fever develops. Typhoid fever has a high mortality rate; the paratyphoid syndrome is generally milder. These diseases are spread through food and water contaminated by feces and urine of patients and carriers.[2]

2. *Those that infect mainly animals.* These include animal pathogens such as *S.* Gallinarum (poultry), *S.* Dublin (cattle), *S.* Abortus-ovis (sheep), and *S.* Choleraesuis (swine). Some of the organisms in this group are also human pathogens and can be contracted through foods.

In general, salmonellae are quite resilient and able to adapt to extremes in environmental conditions. They are resistant to freezing and drying. They are able to grow within a wide temperature range; from extremes as low as 2–4°C (36–39°F), and as high as 54°C (129°F). They have been reported to grow within a pH range of 4.5 to 9.5. Salmonellae do not grow in foods with a water activity of 0.93 or less, and are inhibited by the presence of salt at levels between 3 and 4 percent. Preconditioning to thermal and acid stress has been shown to allow strains to adapt to greater extremes.[3] These properties make many food products more likely to support the growth of these organisms, such as many refrigerated products, fermented foods, and cheeses.

The human infectious dose is highly variable, depending largely on the strain, the food, and the susceptibility of the human host. Recent evidence suggests that as few as one to ten *Salmonella* cells can cause infection in humans. Human diarrheagenic response and enterocolitis result from the migration of the pathogen from the mouth at ingestion to the intestinal tract and mesenteric lymph nodes, and the coinciding production of bacterial enterotoxin. *Salmonella* also produce a cytotoxin that inhibits protein synthesis and causes lysis of host cells, helping the organisms to spread to other tissues.[4]

The Centers for Disease Control and Prevention (CDC), which has classified salmonellosis as a reportable disease since 1943, has found it to be one of the most commonly reported bacterial infections of any kind in the United States. Human salmonellosis is the second most prevalent foodborne disease in the U.S. after illnesses from *Campylobacter* (a generally milder illness associated with raw and undercooked poultry, raw milk, and untreated water as well as improper handling and preparation of food). In 1996, 39,027 confirmed cases of human salmonellosis were reported to CDC by State and local departments of health. Although this number of cases is below the peak year of 1985, when 57,896 cases were reported, the number of cases is significant. From 1985 through 1996, there have been 508,673 reported cases of salmonellosis.[5]

Salmonella usually cause an intestinal infection accompanied by diarrhea, fever, and abdominal cramps starting 6 to 72 hours after consuming a contaminated food or drink. The illness is usually 4 to 7 days in duration, and most people recover without antibiotic treatment. About 2 percent of affected persons may later develop recurring joint pains and arthritis.[6] In

the very young, the elderly, and persons with compromised immune systems, the infection can spread to the bloodstream, and then to other areas of the body such as the bone marrow or the meningeal linings of the brain, leading to a severe and occasionally fatal illness unless treated promptly with antibiotics.[7]

Because many cases are not reported, these cases may represent only a small fraction of the actual number of illnesses that occur. Not all infected persons develop symptoms severe enough that they seek medical attention, and physicians may not have patients' stool analyzed. It is estimated that there are an additional 20 to 100 cases of salmonellosis for every reported case, or some 800,000 to 4 million actual cases each year in the U.S.[8]

The cost to Americans is considerable. The patient-related costs of salmonellosis from medical expenses and loss of income were estimated in 1988 to be about $1,560 per reported case and about $250 for each unreported case.[9] By applying the cost per reported case to the 41,222 cases and probable illnesses reported in 1995, the cost of salmonellosis in 1995 can be estimated to be between $350 million and $1.5 billion.

CDC's surveillance data on isolates reported by State and territorial epidemiologists list close to 600 different serotypes that have caused human illness in the U.S. Based primarily on outbreak data, where Federal, State, and local epidemiologists have sought to identify the source of infection, some serotypes are linked to particular food vehicles. The three illness-causing serotypes most frequently reported—*S.*Typhimurium, *S.* Heidelberg, and *S.* Enteritidis—are most often traced to poultry or eggs when a food vehicle is found.

Salmonella Enteritidis emerged in epidemic proportions in the United States about a decade ago in the northeast. Over the last 20 years, SE-associated illnesses have increased greatly in number. The proportion of reported *Salmonella* isolates that were SE increased from 5 percent in 1976 to 26 percent in 1994.[10] SE was the most frequently reported *Salmonella* serotype in 1994, 1995, and 1996.

CDC surveillance data show that the rates of isolation of SE increased in the U.S. during 1976–1994 from 0.5 to 3.9 per 100,000 population, and that illnesses are occurring throughout the U.S. While the trends for the years 1990–1994 show a decrease in the SE isolation rate in the northeast from 8.9 to 7.0 per 100,000 population, the rate increased approximately threefold for the Pacific region, particularly for southern California, which had rates as high as 14 per 100,000.[11]

From 1985 through 1996, there have been 660 SE outbreaks reported to CDC. Associated with these outbreaks, there have been 77 reported deaths, 2,508 reported hospitalizations, and 25,935 reported cases of illness. The peak year for outbreaks was 1989 with 77 reported. Deaths have occurred in all years. In 1995 and 1996, there were 57 and 51 reported outbreaks respectively with 8 deaths in 1995 and 2 deaths in 1996. The majority of the outbreaks occur in the commercial venue with the implicated food containing undercooked eggs.

There is evidence that this increase in SE infections is global. World Health Organization data show increases in SE on several continents, including North America, South America, Europe, and perhaps Africa.[12] The trend towards centralized large-scale food processing with wide distribution means that when contamination occurs, it can affect large numbers of people over a large area. Although most eggs are consumed individually, large numbers are sometimes pooled during the production or preparation of some foods. This increases the likelihood of SE being in the raw product. This potential was illustrated by a major 1994 SE outbreak attributed to ice cream. FDA reported the most likely cause was contamination of the pasteurized ice cream mix by hauling it in a tanker improperly cleaned after carrying a load of unpasteurized liquid eggs. The ice cream mix was not heat treated after receipt from the contaminated tanker, and the ice cream was distributed widely.[13]

In 1995 surveys, SE phage-type 13A was found to be the predominant phage-type in egg laying flocks in the United States, followed by phage-type 8 and, increasingly, phage-type 4. This represents a significant change since 1991, when phage-type 8 was predominant and phage-type 4 was undetected in laying flocks.[14]

3. Salmonella in Eggs; the Risk

a. Contamination Through the Shell; Current Egg Cleaning Practices

Eggs have long been valued for their natural protective packaging. Having evolved to protect the developing embryonic bird inside, the egg provides an inhospitable environment for *Salmonella* as well as other bacterial contaminants. A fresh egg is fairly resistant to invasive bacteria, a fact relied upon in many countries where shell eggs are not refrigerated. The egg's defenses are both mechanical and chemical.

Mechanically, there are essentially four layers of protection preventing bacteria from reaching the nutrient rich yolk: (1) the shell, (2) the two membranes (inner and outer) between the shell and the albumen, (3) the albumen (eggwhite), and (4) the vitelline (yolk) membrane which holds the yolk.

When laid, the egg shell is covered on the outside by the cuticle, a substance similar in composition to the shell membranes. When the cuticle dries, it seals the pores and hinders initial bacterial penetration. However, the cuticle usually is removed along with debris on the surface of the shell during the cleaning process. Some processors add a thin coating of edible oil or wax to eggs after they are washed and dried to close the shell pores in a manner similar to the cuticle.

The shell, although porous and easily penetrated by bacteria, protects the outer membrane from physical abuse. The dry and much less porous outer shell membrane is much more difficult for bacteria to penetrate. The inner shell membrane and the yolk membrane also present barriers. Perhaps the most substantial line of defense against bacteria is provided by the egg albumen.

In fresh eggs, the albumen has a high viscosity, which both anchors the yolk protectively in the center of the shell and prevents movement of bacteria toward the yolk. (Eggs are stored with the blunt end up to help keep the yolk, which has a lower specific gravity, from drifting toward the inner membrane.) In addition, the albumen has chemical properties that inhibit bacterial growth.

Originally, the potential for *Salmonella* to contaminate shell eggs was primarily a matter of the organisms passing through the shell into the egg's contents because of, mostly, environmental conditions. With salmonellae other than SE, this still is the most likely means of potential contamination of intact shell eggs.[15]

It has long been known that the laying environment can contribute to egg shell contamination. The surface of the egg can become contaminated with virtually any microorganism that is excreted by the birds. Many serotypes of *Salmonella* as well as other bacteria have been isolated from laying flocks. Contact with feces, nesting material, dust, feedstuffs, shipping and storage containers, human beings, and other creatures all contribute to the likelihood of shell contamination. Penetration into the egg contents by both salmonella and spoilage bacteria increases with duration of contact with contaminated material, especially during storage at

high temperatures and high relative humidities. Therefore, eggs should be collected as frequently as possible, and kept as clean and cool as possible (short of freezing, which can damage the shell).

Other sources of shell contamination are always present in the production environment. Producers should clean and sanitize equipment and facilities as necessary to prevent egg contamination, and not rely simply on egg washing to remove contaminants after the fact. One recent study found high levels of *Salmonella* isolates from egg belts, egg collectors, and ventilation fans (64–100 percent of samples on different farms) as compared to isolates from egg shells before collection (8 percent overall).

Cleaning the exteriors of shell eggs to remove fecal material and other debris reduces the risk that pathogenic bacteria will have an opportunity to penetrate the egg shell. The cleaning process provides consumers with clean egg surfaces not likely to promote contamination of the egg by penetration of bacteria through the intact shell or by cross contamination upon cracking open the egg for use.

Most modern egg washing machines are spray-washers. The typical continuous egg washer consists of three stages: a wash chamber where the eggs are washed with warm water and detergent using moving brushes or high pressure jets, a rinse chamber which usually includes a sanitizing agent, and a drying chamber.

If not done properly, washing can contribute to microbial contamination of the egg's contents and may contribute to increased spoilage rates. Organisms have the potential to concentrate in the recirculating wash water, and the liquid can be aspirated into the egg through the shell under certain conditions. In particular, when wash water outside the egg shell is colder than the eggs' contents, as the eggs' contents cool it creates low pressure on the inside of the egg shell that draws liquid outside the shell into the egg through the shell's pores. This observation led to the USDA egg grading requirement that wash water be at least 20° F warmer than the eggs being washed. Typically, U.S. processors use a hot wash water (110–120° F) to ensure temperatures hostile to most organisms that may collect in the wash water as well as to ensure that the 20° F egg-wash water temperature difference is maintained even when cleaning quite warm eggs, which are common in in-line facilities. However, the use of hot water damages or removes the cuticle, which if left intact, helps prevent bacterial contamination.

After washing, the eggs should be quickly and completely dried to reduce the risk that any bacteria remaining on the surface of the eggs are aspirated into the eggs as they cool to ambient temperature. They must be handled carefully thereafter to avoid recontamination.

b. Transovarian Contamination of Egg Contents With SE

The increase in SE outbreaks associated with shell eggs in the 1970's and 1980's raised suspicions of transovarian contamination.[16] This mode of contamination was confirmed by an experiment in which laying hens were infected with SE and found to produce eggs contaminated with the same strain of SE.[17] The site of infection is usually the albumen near the yolk membrane.

Based on USDA data, it can be estimated that such transovarian SE contamination occurs in about 1 out of every 10,000 eggs produced in the U.S. This prevalence is based on a model applying data on the frequency of SE positive eggs from infected flocks to an estimation of the number of infected flocks in the U.S. The frequency of infected eggs in an infected flock can be determined from USDA tests of eggs produced by SE-positive flocks. The number of positive flocks is based on USDA's nationwide survey in 1995 of SE in spent hens at slaughter and unpasteurized liquid eggs at breaker plants. Application of the model resulted in a distribution of prevalences ranging from 0.2 to 2.1 positive eggs per 10,000 with a mean of 0.9 positive eggs per 10,000.[18] The problem is nationwide, although there are some regional differences.[19]

Although a prevalence of 1 in 10,000 seems low, it is significant in terms of exposure. That frequency amounts to about 4.5 million SE-contaminated eggs annually in the U.S., exposing a large number of people to SE.

Salmonellosis outbreaks commonly occur when mishandling permits the SE organisms to multiply and inadequate cooking or mishandling during preparation or service results in live pathogens being ingested with the food. However, the dose required to make a person ill may vary with the individual. The biggest factor in determining whether illness occurs, and how severe it may be, appears to be the age and health of the person ingesting the organisms.

4. Mitigating the Risk; Current Efforts

Mitigation of risks associated with SE in eggs requires analysis of everything in the food production-distribution-consumption continuum from the farm to table that might affect the likelihood that consumers will become ill from SE in eggs.

a. Production: Preventing Introduction of SE Into Laying Flocks and From Hens to Eggs

The Federal government has devoted significant efforts to investigating and controlling SE in laying hens. Between 1990 and 1995, USDA's Animal Plant Health Inspection Service (APHIS) conducted an SE control program (9 CFR Parts 71 and 82; 56 FR 3730; January 30, 1991). Under that program, APHIS restricted the movement of eggs from flocks that tested positive for SE. In cooperation with FDA, CDC, and State authorities, eggs implicated in SE outbreaks were traced back to their farms of origin. If initial tests of manure and egg transport machinery indicated the presence of SE, the flock became a "test flock." Blood and internal organ testing was done on the test flocks, and if any were found positive, the flock was designated "infected." The eggs from test and infected flocks could not be sold as table eggs but could be sent to processors for pasteurization, hard boiling, or export. A flock's status as a "test" or "infected" flock was not lifted until extensive testing, including additional tests of internal organs of birds, detected no SE. Establishments had to clean and disinfect the hen houses before installing replacement flocks.

In 1995, shortly after transfer of the program from APHIS to FSIS, funding for the entire program was removed from the USDA's 1996 appropriations. FDA, which had worked closely with APHIS on its tracebacks, assumed responsibility for all aspects of investigating outbreaks, tracing back egg-associated SE illnesses to particular producers/flocks, diverting eggs, collecting flock data to help track the spread of SE, encouraging better quality control measures by producers, and adoption by States of egg quality assurance programs. State and county health departments usually perform the epidemiological investigations of outbreaks.

The APHIS-sponsored National Poultry Improvement Plan (NPIP), a cooperative Federal-State program, provides assistance to breeders and hatchers on keeping birds free of egg-transmitted diseases. In 1989, an SE control program was developed to reduce the prevalence of SE organisms in hatching eggs and chicks. Participants in the program follow sanitation and other control procedures at breeder farms and hatcheries. Forty-

six SE-positive isolates have been found since its inception, with a decline evident in recent years. Only two were found in 1995, and one in 1996.[20]

A third APHIS program resulted in a variety of voluntary flock control programs that appear to have had some effect in reducing the numbers of infected flocks. In 1992, in the wake of APHIS tracebacks implicating flocks in Pennsylvania, APHIS cooperated with industry representatives, State government officials, and academic experts to develop a program to reduce the prevalence of SE in laying hens. In the *Salmonella* Enteritidis Pilot Program (SEPP), flock owners purchased chicks from hatcheries participating in the NPIP program, imposed strict rodent control measures, cleaned and disinfected hen houses between flocks, controlled feed, and implemented other biosecurity measures. The program relied on APHIS testing of environmental samples to determine positive flocks, and egg testing by commercial laboratories when environmental samples were positive.

In recent years, several other voluntary programs for controlling SE in shell eggs have been developed. California's Egg Quality Assurance Plan calls for producers and processors to apply current good manufacturing practices and to implement risk reduction measures for all hazards throughout the production and processing environments. The New England Risk Reduction Program for SE in eggs is being adopted by producers in Maine and other northeast States. United Egg Producers has developed a "Five Star" program for its members, which requires participants to ensure (1) poultry house cleaning and disinfecting, (2) rodent and pest elimination, (3) proper egg washing, (4) biosecurity measures, and (5) egg refrigeration during transport and storage. UEP has recently added testing provisions for verification. The U. S. Animal Health Association, a professional association of veterinarians, developed "Recommended Best Management Practices for a SE Reduction Program for Egg Producers," guidelines intended for use by producers without a State or industry program. Other States are working on egg quality programs, and an increasing proportion of producers seem to be adopting SE-control programs.

Much remains unknown about how SE infects flocks, and how the organism contaminates eggs. USDA scientists believe that among birds in an SE-infected flock, only a small number are shedding SE organisms at any given time, and that an infected bird might easily lay many normal, uncontaminated eggs, only occasionally laying an egg contaminated with SE. There is speculation that the likelihood of infection or the laying of contaminated eggs also may be related to factors other than environmental conditions, such as the genetics of the birds, the age of the birds, the site of infection in the hen, and whether the birds have been stressed (e.g., because of molting).[21] At this time, it may not be possible to design an SE control program that will remove all possibility of egg-laying chickens producing SE contaminated eggs. The agencies seek comments on this issue.

b. Processing and Distribution: Preventing Growth of SE in Eggs

In addition to the presence of SE in shell eggs, many other factors may influence the number and severity of salmonellosis cases. Key factors are pathogenicity and virulence of the organism, the dose level, and the numbers and susceptibility of the people exposed. In general, the greater the dose, the greater the chance that the person ingesting it will become ill.

The likelihood of SE multiplying depends primarily on the variables of time and temperature, although other factors such as the site of the egg contamination and the presence in the albumen of free iron also appear to play a role.[22] The site of contamination normally is the albumen. Over time, beginning after the egg is laid, the albumen proteins break down, ultimately rendering the albumen watery and less viscous and reducing the mechanical as well as the chemical defenses against bacterial motility and growth. At the same time, the yolk membrane degrades and becomes more porous. This degradation of the albumen and yolk membrane permits bacteria to reach the nutrient-rich yolk and multiply. The rate at which this degradation takes place relates to the temperature of the egg, with degradation delayed at cold temperatures and occurring more rapidly at warm temperatures.[23]

Studies of the growth of SE adjacent to the yolk indicate that there are three distinct phases in the growth curve of SE in eggs. The first phase takes place in the first 24 hours after lay, when the pH of the albumen rises from about 7 to about 9 and, it is suggested, the bacterium have enough iron reserves of their own to support about four generations. Studies suggest the numbers of salmonellae can increase about 10-fold during that initial phase, before entering a lag phase during which numbers remain fairly constant. The length of that lag phase is largely temperature-dependent, and its end, the beginning of the third phase, is signaled by penetration of the yolk membrane by the bacteria and resumption of rapid growth.[24]

Failure to cool eggs clearly contributes to SE multiplication. One study found that SE in eggs artificially inoculated in the albumen and stored at 20 °C (68 °F) grew rapidly after they had been stored for approximately 3 weeks, but that rapid growth occurred within 7 to 10 days when storage temperatures fluctuated between 18 °C (64 °F) and 30 °C(86 °F).[25] A different study of eggs with SE inoculated under the shell membrane found that after only 48 hours at 26 °C (78.8 °F) yolks contained high levels of SE.[26] Although there is consensus on the advisability of keeping eggs cool to prevent SE growth, there is debate on precisely what temperature is required. Because the studies referenced above rely on inoculated eggs, they may not accurately represent naturally occurring strains or the numbers of organisms that occur and grow in eggs under similar conditions. The conclusions suggest that internal egg temperatures of 7 °C (approx. 45 °F) or lower are unlikely to promote SE growth should SE be present in the egg.

Although the studies suggest that there is a delay of at least several days before the egg's natural defenses start breaking down, they also suggest that the rate at which degradation occurs is temperature related, and that eggs should be chilled as soon as possible.[27] The sooner an egg is chilled, the longer its defenses will be retained and the less likely that any SE present will have an opportunity to replicate.

The time it takes for an egg's contents to reach a temperature of 45 °F is affected by many things, including the temperature of the egg when received at the packing plant, heat added during processing, temperature when packed, insulation effect of the packaging, how packed eggs are stacked in coolers during storage and transportation, and the ambient air temperature and air circulation provided at all points after packing.

Egg processing procedures in the U.S. typically result in eggs being warmed. Warming begins as the eggs are loaded onto the conveyance system, and increases as they are washed; surface temperatures of eggs immediately after washing will approach that of the wash water, which is normally about 43–40 °C or 110–120 °F.[28] As noted, hot wash water temperatures are intended to provide adequate cleaning of the shell surface and an adequate temperature differential between the wash water and

the egg. USDA studies have shown that water temperatures colder than the internal egg temperatures cause the eggs' contents to cool leading to a pressure gradient that pulls in water and any bacteria in the water through the shell.[29]

After the eggs emerge from the wash and are dried with forced ambient air, internal temperature at the time they are packed is often in the 70–80 °F range. After packing, most processors hold eggs in coolers at an ambient air temperature of 45–55 °F, and transport eggs at an ambient air temperature of 60 °F or less. However, the ambient air temperature does not correlate to egg temperature. The temperature of the eggs' contents at the time they are transported from the packer will range between 50 °F and 80 °F, depending on the starting temperature, the packaging, how the crates are packed and stacked, and the length of time they are in the cooler before shipping.

The rate at which eggs chill after leaving the processor is similarly dependent on the initial temperature, packaging, loading configurations, and the capability of the refrigeration equipment. Transporters contend that their refrigeration units are designed to maintain—not reduce—temperatures, and that they cannot be relied upon to reduce the temperatures of products being transported. Further, the driver of a truck making multiple deliveries must open the truck door frequently, and if the outside temperature is warm, it would be virtually impossible to maintain the ambient air temperature uniformly throughout the load. Similarly, most retail stores' display cases have been designed to keep products cool, not to cool down products. Eggs received by retail stores are frequently at temperatures well above 45 °F.

Ideally, reliance on the use of ambient air temperature of 45 °F during distribution and retail as a reasonable measure of whether the eggs are being maintained under appropriate conditions would necessitate the eggs being chilled to an internal temperature of 45 °F before they are shipped. Significantly, there are a number of actions processors may take to reduce the temperature at which eggs are packed, and to cool them before shipment, including lowering the wash temperatures and pre-pack chilling of eggs. Recent research has shown that new technologies are available to processors to rapidly cool shell eggs. One study found that carbon dioxide, as a cryogenic gas, can be used instead of air chilling to rapidly chill eggs and results in no increase in cracked sheils.

c. Rewashing/Repackaging: Preventing Growth of SE in Eggs

It appears that eggs are occasionally removed from retail establishments when they are within a few days of the expiration or sell-by date stamped on the carton and returned to the processing plant. These eggs are co-mingled with eggs that are being cleaned for the first time, go through the hot water/sanitizing process again, and are graded. The rewashed eggs are then packed into cartons and are redistributed for sale. These eggs receive a new expiration or sell-by date.

On April 17, 1998, USDA announced that as of April 27, 1998, repackaging of eggs packed under its voluntary grading program will be prohibited while the Department reviews its policies on egg repackaging and engages in any necessary rulemaking. The prohibition on repackaging affects eggs packed in cartons that bear the USDA grade shield. About one-third of all shell eggs sold to consumers are graded by USDA.

In the wake of the USDA action, FDA is considering appropriate measures to take to address this issue. FDA requests comments on how widespread this practice is and on whether any aspect of rewashing/repackaging of eggs significantly increases the risk that consumers will contract SE-related illness from these eggs. FDA notes, for example, that repackaged eggs are subjected to warming during rewashing. Inasmuch as an egg's natural barriers to the multiplication of SE may be compromised at temperatures above 45 °F (see discussion in section 4b), does the warming of shell eggs during rewash significantly increase the risk that SE (if present) will multiply in rewashed/repackaged eggs during distribution or while held for sale, service, or preparation? Does it significantly increase the risk of illness for the consumer if the egg is not thoroughly cooked before consumption?

Are there important aspects, for example, safety risks or otherwise, of rewashed/repackaged eggs that would raise the question whether rewashed/repackaged eggs should be labeled in the same manner as other shell eggs? Are rewashed/repackaged eggs different enough from other shell eggs such that label statements in addition to "expiration" or "sell-by" dates would be necessary to adequately describe the product? If, for some segments of the U.S. population, the standard egg labeling practices are not appropriate for rewashed/repackaged eggs, how should these eggs be labeled to enable consumers to understand the nature of this product and to communicate other important information to the purchaser?

The issue of rewashing and repackaging of eggs also calls attention to current practices regarding the expiration dating of eggs in establishments that function primarily under State regulatory oversight. While a few States have regulations governing expiration dating of eggs, most do not and egg packers determine what expiration dating practices they will employ. Processors that do not use USDA's grading service, and that are not covered by State requirements, typically choose to place a 30- or 45-day expiration date on egg cartons. Some processors do not provide any expiration date. Section 403(a) of the Federal Food, Drug, and Cosmetic Act (FFDCA) states that a food is misbranded if its labeling is false or misleading in any particular. FDA requests comments on the latter two practices described above could violate 403(a) or other provisions of the Act. It also seeks comments on whether the variety of expiration dating practices for eggs could be misleading to consumers given their expectations when they purchase eggs. FDA will evaluate comments received regarding expiration dating and will consider providing guidance to the States on appropriate controls. FDA also requests comments on whether any such guidance should address appropriate practices for use of eggs that are not sold by the expiration date.

d. Preparation and Consumption: Preventing Ingestion of SE from Eggs

Another risk factor is exposure—the number of people who ingest SE organisms from SE-contaminated eggs. Pathogens like SE usually become a public health problem as a consequence of changes in the agent itself, the host, or the environment. Examples of such changes include the types of food people eat, the sources of those foods, and the possible decline in public awareness of safe food preparation. Antibiotic-resistant strains of pathogens are emerging, and people are exposed to new pathogens originating in other regions and other parts of the world. People today have increased life expectancies, and there are increasing numbers of immuno-compromised persons, increasing the population susceptible to severe illness after infection with foodborne pathogens.[30]

Finally, preparation and consumption patterns can greatly influence the likelihood of foodborne illness from eggs. However, SE outbreaks of foodborne illness from eggs continue to be associated with the use of recipes

calling for uncooked eggs or with undercooking of eggs. Low numbers of SE organisms in prepared foods can increase if the foods are held at room temperature or are cross contaminated with other foods. The risk is further amplified in commercial or institutional food service settings where larger quantities of food are served to larger groups of persons over extended periods of time.

As the proportion of food that is eaten outside homes in the U.S. increases, outbreaks associated with these foods increase in importance. They accounted for more than 90 percent of reported foodborne disease outbreaks in the 1990s.

5. Current Regulation of Shell Eggs

Federal authority to regulate eggs for safety is shared by FDA and USDA. FDA has jurisdiction over the safety of foods generally, including shell eggs, under the FFDCA (21 U.S.C. 301, *et seq.*). FDA also has authority to prevent the spread of communicable diseases under the Public Health Service Act (PHSA)(42 U.S.C. 201, *et seq.*). This authority would include the authority to regulate foods when the foods may act as a vector of disease, as is the case with eggs and SE. USDA has primary responsibility for implementing the Egg Products Inspection Act (EPIA)(21 U.S.C. 1031, *et seq.*), although FDA shares authority under the statute (see, for example, 21 U.S.C. 1034). USDA's Food Safety and Inspection Service and Agricultural Marketing Service share responsibilities under the EPIA. FSIS has primary responsibility for the inspection of processed egg products to prevent the distribution into commerce of adulterated or misbranded egg products (7 CFR 2.53), while AMS conducts a surveillance program to ensure proper disposition of restricted shell eggs.

Under Federal regulations, all major commercial egg producers—the 757 producers who have more than 3,000 laying hens and collectively are responsible for close to 94 percent of the nation's eggs—are required to register with AMS. They are subject to periodic on-site visits by AMS to ensure that eggs packed for commercial sale have no more than the percentage of restricted eggs allowed for the grade of eggs being packed, that they are properly labeled, and that proper disposition is made of inedible and restricted eggs. Exempted from this oversight are approximately 80,000 small egg producers.

States may have their own laws governing eggs, as long as they are consistent with Federal laws (e.g., 21 U.S.C. 1052(b)(2)). Generally, State laws and regulations specifically govern egg grading and labeling in each of the States. These laws influence how eggs are packed and shipped for sale and then handled by retail stores, restaurants, and other food service establishments in those jurisdictions.

FDA and FSIS work with the States to encourage uniformity among the State laws affecting food safety in retail and food service establishments. The principal mechanism for this is the *Food Code*, a model code published by FDA intended for adoption by State and local authorities for governing retail food and food service establishments. The provisions of the *Food Code* are modified periodically with input from a broad spectrum of organizations—industry, academia, consumers and government agencies at the Federal, State, and local levels. In addition, training programs on the *Food Code* recommendations have been conducted yearly with State agencies.

The *Food Code* states that "potentially hazardous foods," including shell eggs, should be received and maintained at a temperature of 41 °F or less, or, if permitted by other law to be received at more than 41 °F, be reduced to that temperature within 4 hours. Because eggs are often received at temperatures well above 41 °F, the 1997 edition of the *Food Code* contains an exception for shell eggs, requiring only that they be placed upon receipt in refrigerated equipment that is capable of maintaining food at 41 °F.

The *Food Code* specifies that shell eggs, when prepared for service, are to be cooked to specified temperatures for a specified time. If the egg is not served immediately, hot and cold hold temperatures are specified. The *Food Code* further specifies that pasteurized eggs be substituted in delicatessen and menu items that typically contain raw eggs unless the consumer is informed of the increased risk. Pasteurized egg substitution is specified for eggs that are held before service of vulnerable individuals.

In recent years, many States have enacted laws requiring specified ambient air temperatures for shell egg storage and handling. While many States specify 45 °F or less for that purpose, others retain the 60 °F temperature requirement traditionally required under the USDA grading standards, and some have no requirement. A number of States have stated that they are waiting for USDA implementation of the EPIA shell egg refrigeration requirements before instituting any State law governing shell egg refrigeration.

The egg industry clearly has an interest in finding a way to constructively address the public concern about SE in eggs, and many in the industry have communicated their desire to work with the government toward an effective regulatory solution.

In November 1996, Rose Acre Farms, Inc., submitted a detailed petition (Docket No. 96P–0418) to the Federal agencies that have played a role in the regulation of shell eggs—FDA, FSIS, APHIS, and AMS—requesting that in regulating the presence of pathogens in shell eggs, the agencies "adopt a comprehensive, coordinated regulatory program to replace the patchwork of approaches they currently take." The petitioner acknowledged the need to reduce the prevalence of SE in shell eggs, but advocated a broad-based regulatory program that goes beyond the traceback-and-sanction approach that, the petitioner contended, is both inadequate to protect consumers and unfairly burdens producers. The petitioner called for a collaborative process in developing incentives to encourage improved handling of eggs throughout the farm-to-table cycle and other modifications to promote greater levels of food safety.

In May of 1997, the Center for Science in the Public Interest submitted a petition (Docket No. 97P–0197) requesting that FDA issue regulations requiring that shell egg cartons bear a label cautioning consumers that eggs may contain harmful bacteria and that they should not eat raw or undercooked eggs. The petitioner further requested that all egg producers be required to implement on-farm HACCP programs to minimize the risk that their eggs will be contaminated with SE.

FDA and FSIS are responding to these petitions by initiating such a comprehensive, coordinated process with this ANPR.

Finally, USDA and FDA intend to encourage and assist in additional research on how hens become infected with SE, the factors that relate to infected hens' production of SE-contaminated eggs, better ways to identify specific strains of SE, the virulence and other characteristics of emerging SE strains, the extent of the potential public health risk from SE, and identification of effective controls and intervention strategies.

Because of the number of outbreaks of foodborne illness caused by *Salmonella* Enteritidis that are associated with the consumption of shell eggs, FDA and FSIS have tentatively determined that there are actions that can be taken even at this time to reduce the risk of foodborne illness from shell eggs while

additional measures are being considered pursuant to this ANPR. FSIS intends to act to amend its regulations to require that shell eggs packed for consumer use be stored and transported under refrigeration at an ambient temperature not to exceed 45 °F, and that these packed shell eggs be labeled to indicate that refrigeration is required. FDA intends to act to publish shortly a proposal to (1) require that retail food stores and food service establishments hold shell eggs under refrigeration and (2) require safe handling statements on the labeling of shell eggs that have not been treated to destroy *Salmonella* microorganisms that may be present.

6. Need for Additional Information and Analysis.

In 1991, the EPIA was amended in the wake of publicity about foodborne disease outbreaks attributed to *Salmonella* in shell eggs. The amendment requires, essentially, that shell eggs packed for consumers be stored and transported under refrigeration at an ambient air temperature not to exceed 45 °F. (21 U.S.C. §§ 1034, 1037). Congress also provided that these provisions would be effective only after promulgation of implementing regulations by USDA.

After reviewing the issue in 1996, FSIS concluded and informed Congress that a regulation establishing an ambient air temperature at which eggs must be held and transported would not address the underlying food safety problems, and that the problem could be dealt with effectively only in the context of a broader process examining a variety of issues in addition to ambient air temperatures. As part of the 1998 Appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies (P.L. 105–86), however, Congress provided that $5 million of FSIS' annual appropriation will be available for obligation only after the Agency promulgates a final rule to implement the refrigeration and labeling requirements included in the 1991 EPIA amendments.

FSIS and FDA are now looking at how best to address the food safety concerns associated with shell eggs in the context of their mutual, HACCP-based, farm-to-table food safety strategy. FSIS and FDA believe that comprehensive shell egg regulations must address the public health risks identified; that such regulations must be fully considered in an open, public process; and that each regulation adopted must have been considered in light of available alternatives and be consistent with other laws and regulations.

FSIS and FDA, in furtherance of their commitment to develop a comprehensive strategy for shell eggs, have undertaken the following actions:

(1) *Time-temperature Conference.* A 3-day technical conference on November 18–20, 1996, provided a forum for information on temperature control interventions and verification techniques in the transportation and storage of meat, poultry, seafood, and eggs and egg products. The egg session included many informative technical presentations and policy discussions on the issue of implementing the EPIA's 45 °F ambient temperature requirement. The opportunity to submit written comments to supplement the record was provided.

(2) *Transportation ANPR.* In a related activity, FSIS and FDA published a joint ANPR (61 FR 58786) soliciting information on issues related to ensuring the safety of potentially hazardous foods during transportation. The agencies posed a range of regulatory and non-regulatory options, and solicited information to help them assess the risks and decide what approaches are best suited to addressing those risks. The comment period on this ANPR closed on February 20, 1997. Fifty-two comments have been received.

(3) *Risk Assessment.* The agencies are conducting a quantitative risk assessment for shell eggs. The project is being conducted by a multidisciplinary team of scientists from USDA, FDA, and academia. Begun in December, 1996, it is intended to (a) provide a more definitive understanding of the risks of egg-associated foodborne disease; (b) assist in evaluating risks and ways in which the risks might be reduced; and (c) verify data needs and prioritize data collection efforts. A draft report on risks of SE in eggs and egg products is on the FSIS Homepage and was presented at a technical meeting in September 1997. The draft report of the risk assessment team will be available for public comment and subject to modification based on that input before being made final. Interested persons are encouraged to provide any data or information relevant to the risk assessment for use in the analysis.

(4) *Research.* The Agencies are undertaking efforts to initiate:

—a nationwide surveillance program for SE and SE phage-type 4 to track the spread among layer flocks.

—research (in conjunction with USDA's Agricultural Research Service) on the molecular and virulence comparison of U.S. SE phage-type 4 with isolates from other parts of the world (human and poultry).

(5) *Dialogue.* FDA and FSIS intend to engage affected industry, Federal and State regulatory agencies, and business organizations in an open, on-going dialogue regarding steps they might take voluntarily to address the SE problem and ways in which the Federal agencies might help such efforts.

(6) *Forthcoming FDA/FSIS Actions.* As stated above, because there are actions that can be taken at this time to reduce the risk of foodborne illness from shell eggs, FDA intends to publish shortly a proposal to (1) require that retail food stores and food service establishments hold shell eggs under refrigeration and (2) require safe handling statements on the labeling of shell eggs that have not been treated to destroy *Salmonella* microorganisms that might be present. In that proposal, FDA will solicit comments and information concerning these two matters. FDA requests that comments or information submitted in response to this ANPR also be submitted in response to FDA's proposed rule if such comments or information are relevant to the issues raised therein. In addition, as stated above, FSIS intends to act to amend its regulations to require that shell eggs packed for consumer use be stored and transported at an ambient temperature that does not exceed 45 °F.

Information Requested

FDA and FSIS have available a wide range of mechanisms for administering the laws for which they are responsible. The agencies are interested in the public's views on what regulations may be required to reduce the public health risk of SE in shell eggs, including any performance standards that might be developed.

One approach might be a process-oriented rule similar to the agencies' HACCP regulations for meat, poultry, and seafood. Regulations may be proposed to mandate HACCP-like process controls to reduce the microbiological and other food safety hazards in shell egg production, processing and handling. Such an approach requires each business to develop controls that are best suited to its particular processes and products. The agencies are interested in comments on whether HACCP-like controls could be effective against SE in eggs, in how many producers are presently using HACCP-like controls, and in the overall costs of these controls. The agencies are interested in how such a program would affect small entities.

The agencies may achieve public health objectives by providing guidance to interested parties as a companion to or in lieu of regulations. The agencies

provide a variety of technical information and guidance materials to industries that must comply with Federal laws, to State and local officials, and to consumers. These materials range from general advice to fairly detailed examples or "models" of ways in which a plant may ensure compliance with a particular statutory or regulatory provision. Such guidance may be particularly useful for smaller plants with limited resources.

A third general approach would be a Federal-State cooperative program under which overall regulatory oversight is left primarily to State agencies using mutually agreed-upon standards and procedures and Federal assistance. The agencies frequently work cooperatively with State and local government authorities. FDA currently participates in a formal Federal-State cooperative program for the interstate shipment of two commodities, Grade A milk and shellfish.

The agencies believe that a comprehensive, effective program for the control of SE in shell eggs is likely to require some combination of these three general approaches. The following sets out questions the answers to which, the agencies believe, will help them to shape a program that will be useful in reducing risk at each stage in the shell egg farm-to-table continuum.

Production

Should the patchwork of voluntary quality assurance (QA) programs be made consistent with a single, national standard for flock-based quality assurance programs, and be applicable to all producers? Does there need to be more uniformity among the QA programs to assure consumers that producers in all States are uniformly doing all they can to reduce the frequency of SE-contaminated eggs, and to provide "a level playing field" among competing producers in the various States?

Should the agencies establish minimum QA requirements for all commercial shell egg producers? This might be accomplished through rulemaking or some form of cooperative program with the States. Should the microbiological testing under such a program be done by a third party (someone other than the producer) to ensure test uniformity and the integrity of the program? Should the agencies require the submission of testing data so that they can identify ways to improve the program, including possible justification for regional variations, verify the overall effectiveness of the program, track the prevalence of emerging strains of SE and, as necessary, identify the need for additional testing programs or other interventions required to protect human or animal health? Should a QA program be voluntary?

Processing

In-shell pasteurization of shell eggs is a relatively new technological development by which harmful bacteria are destroyed without significantly altering the nature of the egg. Were this technology viable for broad scale adoption by producers, it could conceivably significantly reduce the risk of foodborne illness through the destruction of any SE in the egg at the time of processing. The agencies seek comments and information that would address the current viability of in-shell pasteurization for eggs. What factors will determine whether and when in-shell pasteurization of eggs could be applied to the whole industry? Comments should address technological and cost factors.

FSIS and FDA believe that there are many interventions that might be applied during processing that would reduce the risk to consumers from SE in shell eggs. The agencies could continue to defer to States, or processors could be required to use only shell eggs from production facilities adhering to a QA program meeting national standards. This would enable each processor to identify and control all hazards, including SE, that might be introduced into the product during processing. The systems would address those factors known to influence SE growth in shell eggs during processing (principally the age and temperature of the eggs), precluding the necessity of developing detailed prescriptive regulations attempting to specify how such control should be achieved. The agencies would like comments on how such processing requirements might best be structured.

Another alternative might be a sliding scale approach similar to that under consideration by the European Union. Under this approach, a specific egg temperature is not required, but a "sell by" date is mandatory, which would vary depending on the temperatures at which eggs are maintained. Assuming packed eggs are transported and stored at an ambient air temperature of 45 °F, the primary determinant of the temperature of eggs in commercial channels will be the temperature of the eggs when they are shipped from the packer. To provide an incentive for processors to chill eggs before shipping, yet retain flexibility to accommodate reasonable alternatives to an absolute temperature requirement, a regulation might prescribe a range of "sell-by" dates based on the egg temperature achieved by the packer. However, such an approach might be difficult to verify and enforce. The agencies would like comments on the feasibility and advisability of this kind of approach.

Retail

FDA intends shortly to propose regulations to require that food retail and food service establishment hold eggs under refrigeration. As explained elsewhere in this document, FDA believes that these actions are measures that can be taken at this time to reduce the risk of foodborne illness from shell eggs. Pursuant to this ANPR, both agencies will consider other matters that affect eggs at retail as part of the comprehensive farm-to-table solution that the agencies ultimately put in place.

The agencies are interested in whether retail stores should require their suppliers to use temperature recording devices, or affix temperature indicating devices on the egg cases or cartons, to help ensure that the eggs have not been subject to temperature abuse during transportation. Could any requirement for delivery at 45 °F be enforced effectively as a matter of contract between the processors (vendors) and the retail stores (purchasers)? Should the agencies consider regulations to effect these changes?

Restaurants and Food Service Operations

Restaurants, food service operators, and many retail stores that prepare food for immediate consumption are regulated primarily by State and local governments. Should the agencies take a more direct role, or should they continue to rely on the *Food Code* to provide guidance on the maintenance and preparation of eggs and encourage State and local authorities to adopt and enforce those standards?

The agencies believe that much of what must be done to reduce the risk of foodborne disease transmission in restaurants and other food service facilities involves education and training. Food service managers play an increasingly important role in food safety, and they must place a high priority on employee hygiene and proper food handling techniques. Thus, the Federal agencies are currently exploring with industry representatives (the major associations representing retail stores and restaurants as well as major food producer groups), representatives of State and local regulatory agencies, and consumer groups the possibility of a partnership

that would build on current programs to develop a comprehensive, national food safety education and training campaign directed at people who work in restaurants and other food service facilities, people who work in retail stores, and at consumers. This campaign would include lesson plans and materials for classroom training that could be used in public school curricula as well as in food service settings.

Household Consumers

A primary tool for reducing the risk of foodborne disease among consumers is education. To ensure that consumers are fully and adequately informed of the significant risks associated with SE in eggs and how to best avoid these risks, FDA shortly will be proposing certain labeling requirements for eggs. The agencies also plan to intensify their consumer education efforts in the coming months and to institute permanent food safety education programs that will help consumers protect themselves from all food safety hazards.

Thus, by this notice, FDA and FSIS are requesting comments and information on a variety of issues concerning ways to reduce the risk to the public health from SE in shell eggs. These issues need to be addressed comprehensively by the agencies. FSIS and FDA welcome discussion and comments on the issues in this notice and other issues related to the subject. The agencies are particularly interested in comments about alternatives that would minimize the impact on small entities.

Done in Washington, DC, on May 11, 1998.

Thomas J. Billy,

Administrator, FSIS.

William B. Schultz,

Deputy Commissioner for Policy, FDA.

Food and Nutrition Service

7 CFR Parts 273 and 274

RIN: 0584–AC61

Food Stamp Program: Electronic Benefits Transfer Benefit Adjustments

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed Rule.

SUMMARY: This rule proposes to revise Food Stamp Program regulations pertaining to State agencies' ability to make adjustments to a recipient account in an Electronic Benefits Transfer (EBT) system, in order to correct a system error or an out-of-balance condition. EBT stakeholders have proposed the changes so that States and their processors can correct errors when they are identified, rather than 10 days after the advance notice has been sent to the household. The changes would enable State agencies to correct errors in a more timely manner, and bring EBT closer in line with current commercial Electronic Funds Transfer (EFT) practices. This rule also proposes to revise the formula

UMI

UMI

for recovering funds under the re-presentation rule.

DATES: Comments must be received on or before July 20, 1998, to be assured of consideration.

ADDRESSES: Comments should be submitted to Jeffrey N. Cohen, Chief, Electronic Benefit Transfer Branch, Benefit Redemption Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, Alexandria, Virginia, 22302. Comments may also be datafaxed to the attention of Mr. Cohen at (703) 605–0232, or by e-mail to jeff__cohen@fcs.usda.gov. Written comments will be open for public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 a.m. to 5 p.m., Monday through Friday) at 3101 Park Center Drive, Alexandria, Virginia, Room 718.

FOR FURTHER INFORMATION CONTACT: Questions regarding this rulemaking should be addressed to Mr. Cohen at the above address or by telephone at (703) 305–2517.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This proposed rule has been determined to be non-significant for purposes of Executive Order 12866 and therefore was not reviewed by the Office of Management and Budget.

Public Law 104–4

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Pub. L. 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, the Food and Nutrition Service generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures to State, local or tribal governments, in the aggregrate, or to the private sector, of $100 million or more in any one year. When such a statement is needed for a rule, Section 205 of the UMRA generally requires the Food and Nutrition Service to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, more cost-effective or least burdensome alternative that achieves the objectives of the rule.

This rule contains no Federal mandates (under the regulatory provisions of Title II of UMRA) for State, local and tribal governments or the private sector of $100 million or more in any one year. Thus this rule is not subject to the requirements of sections 202 and 205 of the UMRA.

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the final rule in 7 CFR part 3015, subpart V and related Notice (48 FR 29115), this Program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Regulatory Flexibility Act

This rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (5 U.S.C. 601–612). Shirley Watkins, the Under Secretary for Food, Nutrition and Consumer Service, has certified that this proposed rule will not have a significant economic impact on a substantial number of small entities. State and local welfare agencies will be the most affected to the extent that they administer the Program.

Paperwork Reduction Act

This rule does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Executive Order 12778

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule is intended to have preemptive effect with respect to any State or local laws, regulations or policies which conflict with its provisions or which would otherwise impede its full implementation. This rule is not intended to have retroactive effect unless so specified in the "Effective Date" paragraph of this preamble. Prior to any judicial challenge to the provisions of this rule or the application of its provisions, all applicable administrative procedures must be exhausted. In the Food Stamp Program the administrative procedures are as follows: (1) For Program benefit recipients—State administrative procedures issued pursuant to 7 U.S.C. 2020(e)(1) and 7 CFR 273.15; (2) for State agencies—administrative procedures issued pursuant to 7 U.S.C. 2023 set out at 7 CFR 276.7 for rules related to non-quality control (QC) liabilities or Part 283 for rules related to QC liabilities; (3) for Program retailers and wholesalers—administrative procedures issued pursuant to 7 U.S.C. 2023 set out at 7 CFR 278.8.

Background

Adjustments

The Food and Nutrition Service (FNS) has been contacted by a number of State agencies and other interested stakeholders regarding its policy on making adjustments to EBT-issued benefits when a system error has resulted in an out-of-balance condition. During normal EBT processing for an authorized transaction, settlement is completed when the transaction acquirer has been properly credited for an amount equal to the amount debited from the household's benefit allotment. System malfunctions, however, can cause an interruption to this process. For purposes of this proposed regulation, an out-of-balance settlement condition exists when system errors or other technical malfunctions cause an interruption to the end-to-end settlement process from acquirer back to issuer, resulting in a settlement condition that does not reflect the authorized transaction. In the commercial EFT environment, such conditions are routinely corrected via a manual adjustment to the customer's account without notification to the account holder. In this proposed rule, an adjustment is defined as a debit or credit transaction initiated to correct a system error or to correct an out-of-balance condition identified in the settlement process. Current food stamp regulations, however, do not allow such adjustments without prior notification to the food stamp household.

Regulations found at 7 CFR 274.12(f)(4) require that State agencies establish a date when the household's benefits become available to them each month. By regulation, State agencies are not allowed to make adjustments to the food stamp allotment after the availability date. This is in keeping with the coupon system which has no mechanism to retrieve benefits after they have been issued to the household. However, FNS recognizes that EBT provides additional tools that were not available in the coupon system. Corrections to technical errors can be made quickly and accurately, where previously, in the paper system, they could not be made. Commercial operating rules for EFT systems and the QUEST EBT operating rules have provisions which require adjustments for system errors. (The QUEST operating rules set forth EBT requirements for those state agencies that choose to issue benefits under the QUEST service mark.) This proposed rule would allow adjustments, after the availability date, to correct a system error.

Proposing this change leads to the need to propose a second change. Section 11(e)(10) of the Food Stamp Act of 1977, as amended, gives households the right to a fair hearing over any action that affects their participation in the program. This section stipulates that to exercise this right households must request a fair hearing in a timely manner following receipt of an individual notice of the agency's action. Further, households have the right to delay the State agency's action and receive benefits at the previous level, pending a decision by the hearing official. Regulations implementing these provisions of the Act and signifying when a notice of action is necessary are found in § 273.15.

With some exceptions, which are specified in the regulation; households must be given an advance notice of 10 days before reduction in benefits can be put in place. The excepted situations in the regulation allow for concurrent benefit adjustment and notice—referred to as adequate notice. That is, State agencies are allowed to notify households at the same time as an action is taken.

The nature of EBT settlement adjustments makes timeliness critical. A 10-day advanced notice, as required by current regulation, could have a negative impact on the State agency's ability to correct the out-of-balance condition. For example, to provide notice 10 days prior to the adjustment action could risk benefits no longer being available since, unlike certification actions, the household has immediate access to the benefits in question. For this reason, in § 273.13(a)(3)(vii), we propose that State agencies be allowed to send an adequate notice when the action is taken. This would allow the error condition to be corrected expeditiously, while preserving the household's right to adequate notice and a fair hearing.

In order to ensure that the rights of the household are protected, this rule proposes to only allow adjustments under the following conditions:

(1) Adjustments would not be allowed against future month benefits, i.e, against those benefits that were not in the account at the time of the original transaction.

(2) In those cases in which a household no longer has benefits available from the issuance month, this rule proposes that the funds may be recovered using the re-presentation procedures set forth in 7 CFR 274.12(l). If, however, there are sufficient benefits remaining to cover only part of the adjustment, the adjustment may be made using the remaining balance, with the difference being subject to the re-presentation procedures.

(3) If the household is no longer receiving benefits, the State agency is under no further obligation to recover the funds.

(4) The household shall be given adequate notice at the time of the adjustment in accordance with procedures set forth in 7 CFR 273.13(a)(3). An adequate notice includes an explanation of the action being taken, the reason for the action, the household's right to a fair hearing, and the household's right to continued benefits.

(5) If the household chooses to have a fair hearing and elects to have benefits continued pending the fair hearing decision, the State agency would be required to re-credit the adjusted amount until the dispute is adjudicated. If the hearing finds in favor of the State agency, the State agency would re-process the adjustment (debit) for the full amount credited at the time of the fair hearing request. If there are no benefits remaining in the household's account at the time the State agency action is upheld, the State agency shall make the adjustment from the next month's benefit. If the household is no longer receiving benefits when the fair hearing decision is rendered, the State agency would be under no further obligation to recover the funds. An adjustment would not be made if the affected retailer is no longer on the EBT system.

(6) Adjustments would only be allowed when auditable documentation is available to substantiate the out-of-balance condition.

Finally, it has come to the Department's attention that EBT regulations do not provide time frames by which system errors must be resolved. The Department, therefore, proposes that all system errors be corrected within 5 business days. After 5 business days, any recovery of funds from a recipient's account must be handled through the re-presentation process. The Department believes that unless the adjustment is made within a reasonable time, recipients will be unable to understand the connection between the original transaction and the adjustment action. The 5-day time frame also ensures that households negatively impacted by a system error will not have to wait unreasonably long periods of time for resolution.

Re-presentations

Current regulations give State agencies the option to implement a re-presentation system to recoup certain losses in instances specified in 7 CFR 274.12(l). Regulations at 7 CFR 274.12(l)(1)(iii) stipulate that the rate of re-presentation be $50 for the first month and $10 or 10 percent—whichever is greater—in subsequent months, until the re-presentation is completely repaid. These amounts were originally selected so that the electronic system would be consistent with the claims process in place in the coupon system. Some State agencies have argued that the variation in the rate of re-presentation for the first month and subsequent months makes it particularly difficult to implement an automated re-presentation system. Currently, only one State agency has implemented re-presentation because of the burden of programming a system which would meet these requirements. Therefore, the Department proposes that the required rate differentiation between the first month and subsequent months be eliminated; the State agency would have the option to debit the benefit allotment of a household following the insufficient funds transaction in an amount equal to at least $10, but no higher than 10 percent of the allotment. This deduction would be repeated on a monthly basis until the re-presentation is completely repaid. State agencies may choose to recover funds at an amount less than 10% of the allotment, but shall apply the lesser repayment amount to all households.

Implementation

The Department is proposing that the provisions of this rulemaking be implemented 30 days after publication of the final rule. The Department also proposes to allow variances resulting from implementation of the provisions of the final rule to be excluded from error analysis for 120 days from the required implementation date, in accordance with 7 CFR 275.12(d)(2)(vii).

List of Subjects

7 CFR Part 273

Administrative practice and procedures, Aliens, Claims, Food stamps, Grant programs—social programs, Penalties, Reporting and recordkeeping requirements, Social security, Students.

7 CFR Part 274

Administrative procedures and practices, Food stamps, Grant programs—social programs, Reporting and recordkeeping requirements.

Accordingly, for the reasons set forth in the preamble, 7 CFR parts 273 and 274 are proposed to be amended as follows:

UMI
VOL
63
ISS
96
MY
19
1998
UMI

1. The authority citation for 7 CFR parts 273 and 274 continues to read as follows:

Authority: 7 U.S.C. 2011–2032.

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

2. In § 273.13, a new paragraph (a)(3)(vii) is added to read as follows:

§ 273.13 Notice of adverse action.

(a) * * *

(3) * * *

(vii) An EBT system-error has occurred during the redemption process, resulting in an out-of-balance settlement condition. The State agency shall adjust the benefit in accordance with § 274.12 of this chapter.

* * * * *

3. In § 273.15, the fourth sentence of paragraph (k)(1) is revised and three new sentences are added after the fourth sentence to read as follows:

§ 273.15 Fair hearings.

* * * * *

(k) *Continuation of benefits.*

(1) * * * If the State agency action is upheld by the hearing decision, a claim against the household shall be established for all overissuances except in the case of an EBT adjustment, in which case another adjustment (debit) shall be made immediately to the household's account for the total amount erroneously credited when the fair hearing was requested. If there are no benefits remaining in the household's account at the time the State agency action is upheld, the State agency shall make the adjustment from the next month's benefits. If the household is no longer receiving benefits at the time of the fair hearing decision, the State agency is under no further obligation to recover the debt. An adjustment shall not be done if the affected retailer is no longer on the EBT system. * * *

* * * * *

PART 274—ISSUANCE AND USE OF COUPONS

4. In § 274.12:

a. Paragraph (f)(4) is revised;

b. Paragraph (f)(7)(iii) is amended by removing the second sentence;

c. Paragraph (l) introductory text is redesignated as the first sentence of paragraph (l)(1) introductory text;

d. Paragraph (l)(1) introductory text is amended by redesignating the last sentence as the introductory text of paragraph (l);

e. Paragraph (l)(1)(iii) is revised;

f. Paragraphs (l)(2), (l)(3), (l)(4), and (l)(5) are redesignated as (l)(3), (l)(4), (l)(5), and (l)(6); and

g. A new paragraph (l)(2) is added.

The revisions and additions read as follows:

§ 274.12 Electronic Benefit Transfer system issuance approval standards.

* * * * *

(f) *Household participation* * * *

(4) *Issuance of benefits.* State agencies shall establish an availability date for household access to their benefits and inform households of this date.

(i) The State agency may make adjustments to benefits posted to household accounts after the posting process is complete but prior to the availability date for household access in the event benefits are erroneously posted.

(ii) A State may make adjustments to an account after the availability date only to correct an auditable, out-of-balance settlement condition that occurs during the redemption process as a result of a system error.

(A) Adjustments shall be made no later than 5 business days after the out-of-balance condition occurred.

(B) Adjustments shall not be made against a future month's benefit. If there are sufficient benefits remaining to cover only part of the adjustment, the adjustment may be made with the remaining balance.

(C) The household must be given, at a minimum, adequate notice in accordance with § 273.13 of this chapter.

(D) Should the household dispute the adjustment, the benefits must be re-credited to the household's account pending resolution.

(E) Should a State agency wish to process an adjustment against future month benefits, such an action shall be in accordance with re-presentation procedures found in paragraph (l) of this section.

(iii) The appropriate management controls and procedures for accessing benefit accounts after the posting shall be instituted to ensure that no unauthorized adjustments are made in accordance with paragraph (f)(7)(iii) of this section.

* * * * *

(l) *Re-presentation.* * * *

(1) * * *

(iii) The State agency may debit the benefit allotment of a household following the insufficient funds transaction in any amount which equals at least $10 or up to 10% of the transaction. This amount will be deducted monthly until the total owed is paid. State agencies may opt to re-present at a level that is less than the 10% maximum, however, this lesser amount must be applied to all households.

(2) When a system-error has resulted in an out-of-balance condition at settlement, and the State agency is unable to recover an erroneous credit as an adjustment, a re-presentation may be made as follows:

(i) the state agency shall debit the benefit allotment of a household monthly in an amount equal to at least $10 or up to 10% of the allotment until the re-presentation is completely paid.

(ii) notice shall be provided prior to the month re-presentation occurs and shall state the amount of the reduction in the benefit allotment.

BILLING CODE 3410–30–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 98–CE–05–AD]

RIN 2120–AA64

Airworthiness Directives; Alexander Schleicher Segelflugzeugbau Model ASW–19 Sailplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt a new airworthiness directive (AD) that would apply to certain Alexander Schleicher Segelflugzeugbau (Alexander Schleicher) Model ASW–19 sailplanes. The proposed action would require inspecting the tow release cable guide fittings for the correct mounting, and, if the fittings are mounted in the front of the bulkhead, moving the fitting to the rear of the bulkhead. The proposed AD is the result of mandatory continuing airworthiness information (MCAI) issued by the airworthiness authority for Germany. The actions specified by the proposed AD are intended to prevent premature release of the tow cable during take-off, which could result in loss of the sailplane.

DATES: Comments must be received on or before June 26, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation

Administration (FAA), Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 98–CE–05–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that applies to the proposed AD may be obtained from Alexander Schleicher Segelflugzeugbau, 6416 Poppenhausen, Wasserkuppe, Federal Republic of Germany. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Mr. Mike Kiesov, Project Officer, Sailplanes/Gliders, Small Airplane Directorate, Aircraft Certification Service, FAA, 1201 Walnut, suite 900, Kansas City, Missouri 64106; telephone: (816) 426–6934; facsimile: (816) 426–2169.

SUPPLEMENTARY INFORMATION

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 98–CE–05–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 98–CE–05–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

The Luftfahrt-Bundesamt (LBA), which is the airworthiness authority for Germany, notified the FAA that an unsafe condition may exist on certain Alexander Schleicher Model ASW–19 sailplanes. The LBA reports that some of the older Model ASW–19 sailplanes were designed with the tow release cable mounted on the front side of the bulkhead per the type design. The LBA has received reports of premature release during towing operations on these Model ASW–19 sailplanes. This inadvertent release is occurring when the tow release cable guide is properly adjusted in the rear position, but is secured to the front of the bulkhead.

This condition, if not corrected, could result in premature release of the sailplane's tow cable during take-off operations with a possible loss of sailplane controllability.

Relevant Service Information

Alexander Schleicher has issued Technical Note No. 18, dated July 3, 1984, which specifies procedures for inspecting the cable guide release fitting for the correct bulkhead mounting. If the cable guide release fitting is mounted on the front of the bulkhead, the service information specifies procedures for moving the cable guide release fitting to the rear of the bulkhead and then adjusting the cable's neutral travel.

The LBA classified this service bulletin as mandatory and issued German AD 84–115, dated July 16, 1984, in order to assure the continued airworthiness of these sailplanes in Germany.

The FAA's Determination

This sailplane model is manufactured in Germany and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the LBA has kept the FAA informed of the situation described above.

The FAA has examined the findings of the LBA; reviewed all available information, including the service information referenced above; and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of the Provisions of the Proposed AD

Since an unsafe condition has been identified that is likely to exist or develop in other Alexander Schleicher Model ASW–19 sailplanes of the same type design registered in the United States, the FAA is proposing AD action. The proposed AD would require inspecting the tow release cable guide fitting for the proper location on the bulkhead. If the cable guide release fitting is mounted on the front of the bulkhead, the proposed AD would require removing the cable guide release fitting, remounting it on the rear of the bulkhead, and adjusting the cable's neutral travel. Accomplishment of the proposed actions would be in accordance with Alexander Schleicher Technical Note No. 18, dated July 3, 1984.

Cost Impact

The FAA estimates that 100 sailplanes in the U.S. registry would be affected by the proposed AD.

Accomplishing the proposed inspection would take approximately 1 workhour per sailplane, at an average labor rate of approximately $60 an hour. Based on these figures, the total cost impact of the proposed inspection on U.S. operators is estimated to be $6,000, or $60 per sailplane.

The proposed modification would take approximately 2 workhours, at an average labor rate of $60 per hour. Parts cost approximately $20 per sailplane. Based on these figures, the total cost impact of the proposed modification on U.S. operators is estimated to be $14,000, or $140 per sailplane.

Compliance Time

The compliance time of the proposed AD is in calendar time instead of hours time-in-service (TIS). The average monthly usage of the affected sailplane ranges throughout the fleet. For example, one owner may operate the sailplane 25 hours TIS in one week, while another operator may operate the sailplane 25 hours TIS in one year. In order to ensure that all of the owners/operators of the affected sailplane have inspected the mount location of the tow release cable guide fitting within a reasonable amount of time, the FAA is proposing a compliance time of 90 days.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore,

UMI
VOL
63
ISS
96
MY
19
1998
UMI

in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

Alexander Schleicher Segelflugzeugbau: Docket No. 98–CE–05–AD.

Applicability: Model ASW–19 sailplanes, serial numbers 19001 through 19405, certificated in any category.

Note 1: This AD applies to each sailplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For sailplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required within the next 90 days after the effective date of this AD, unless already accomplished.

To prevent premature release of the tow cable during take-off, which could result in loss of the sailplane, accomplish the following:

(a) Inspect the tow release cable guide fittings for front or rear mount on the bulkhead of the sailplane in accordance with the Actions section in Alexander Schleicher Technical Note (TN) No. 18, dated July 3, 1984.

Note 2: It is recommended that the maintenance manual pages called out in the INSTRUCTIONS section of Alexander Schleicher TN No. 18 be exchanged with the current pages in the maintenance manual.

(b) If the cable guide fitting is mounted on the front of the bulkhead, prior to further flight, remove the fitting and remount the cable guide fitting on the rear of the bulkhead in accordance with the Actions section in Alexander Schleicher TN No. 18, dated July 3, 1984.

(c) After remounting the cable fitting, prior to further flight, check the neutral travel of the cable and adjust if necessary, in accordance with the Actions section in Alexander Schleicher TN No. 18, dated July 3, 1984.

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the sailplane to a location where the requirements of this AD can be accomplished.

(e) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Small Airplane Directorate, FAA, 1201 Walnut, suite 900, Kansas City, Missouri 64106. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Small Airplane Directorate.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Small Airplane Directorate.

(f) Questions or technical information related to Alexander Schleicher Technical Note No. 18, dated July 3, 1984, should be directed to Alexander Schleicher Segelflugzeugbau, 6416 Poppenhausen, Wasserkuppe, Federal Republic of Germany; telephone: 49.6658.890 or 49.6658.8920; facsimile: 49.6658.8923 or 49.6658.8940. This service information may be examined at the FAA, Central Region, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Note 4: The subject of this AD is addressed in German AD No. 84–115, dated July 16, 1984.

Issued in Kansas City, Missouri, on May 11, 1998.

Marvin R. Nuss,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[Docket No. 98–NM–78–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus Model A300–600 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Airbus Model A300–600 series airplanes. This proposal would require repetitive inspections to detect cracking of the doubler angle and discrepancies of the fasteners that connect the doubler angle and the bottom panel of the center wing box, and corrective actions, if necessary. This proposal is prompted by issuance of mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by the proposed AD are intended to detect and correct fatigue cracking in the doubler angle and discrepancies of the fasteners that connect the doubler angle and the bottom panel of the center wing box. Such cracking and discrepancies could result in reduced structural integrity of the airplane.

DATES: Comments must be received by June 18, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–78–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2110; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 98–NM–78–AD." The postcard will be dated stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–78–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, notified the FAA that an unsafe condition may exist on certain Airbus Model A300–600 series airplanes. The DGAC advises that, during full-scale fatigue testing of the Airbus Model A300 series airplane, cracking was found on the forward doubler angle at the junction with the lower surface of the wing. This cracking originated in the seventh fastener hole, starting from the front, on the face of the doubler angle that is attached to the lower surface of the wing. The DGAC has received reports of cracking in the same location on in-service airplanes, which has been attributed to fatigue caused by the relative movement between the fuselage skin panel and the lower wing skin. Such fatigue cracking, if not corrected, could result in reduced structural integrity of the airplane.

Explanation of Relevant Service Information

Airbus has issued Service Bulletin A300–53–6110, dated April 8, 1997, which describes procedures for performing repetitive detailed visual inspections to detect cracking of the doubler angle, and repetitive detailed external visual inspections to detect discrepancies (i.e., damage, stretching, cracking, or distortion) of the fasteners that connect the doubler angle and the bottom panel of the center wing box. This service bulletin also describes procedures for replacing discrepant fasteners with new fasteners, and performing follow-on corrective actions. (These follow-on actions include performing a rotating probe inspection of the fastener hole to detect cracking or distortion and repairing the fastener hole, if cracking is detected.)

The DGAC classified Airbus Service Bulletin A300–53–6110 as mandatory and issued French airworthiness directive 97–383–240(B), dated December 17, 1997, in order to assure the continued airworthiness of these airplanes in France.

Airbus also has issued Service Bulletin A300–53–6063, dated December 12, 1996, which describes procedures for replacing the existing doubler angle with a longer splice plate and an improved doubler angle. Accomplishment of this replacement would eliminate the need for the repetitive inspections described previously.

FAA's Conclusions

This airplane model is manufactured in France and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require accomplishment of the actions specified in the service bulletin described previously, except as discussed below. This proposed AD also would provide for an optional terminating action for the repetitive inspections.

Operators should note that, in consonance with the findings of the DGAC, the FAA has determined that the repetitive inspections proposed by this AD can be allowed to continue in lieu of accomplishment of a terminating action. In making this determination, the FAA considers that, in this case, long-term continued operational safety will be adequately assured by accomplishing the repetitive inspections to correct cracking before it represents a hazard to the airplane.

Differences Between Proposed Rule and Service Bulletin

Operators should note that, unlike the procedures described in Airbus Service Bulletin A300–53–6110, this proposed AD would not permit further flight if any crack is found in the doubler angle, or if any discrepancy is found in the fastener holes or the fasteners that connect the doubler angle and the bottom panel of the center wing box. The FAA has determined that, because of the safety implications and consequences associated with such cracking or discrepancies, any subject doubler angle that is found to be cracked or any fastener that is found to be discrepant must be replaced prior to further flight.

Operators also should note that, although Airbus Service Bulletin A300–53–6110 specifies that the manufacturer may be contacted for disposition of certain repair conditions, this proposal would require the repair of those conditions to be accomplished in accordance with a method approved by the FAA.

Cost Impact

The FAA estimates that 54 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 2 work hours per airplane to accomplish the proposed inspections, and that the average labor rate is $60 per work hour. Based on these figures, the cost impact of the inspections proposed by this AD on U.S. operators is estimated to be $6,480, or $120 per airplane, per inspection cycle.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Should an operator elect to accomplish the optional terminating

action specified in Airbus Service Bulletin A300–53–6063 that would be provided by this AD action, it would take approximately 109 work hours to accomplish it, at an average labor rate of $60 per work hour. The cost of required parts would be approximately $4,028 per airplane. Based on these figures, the cost impact of that optional terminating action would be $10,568 per airplane.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Airbus Industrie: Docket 98–NM–78–AD.

Applicability: Model A300–600 series airplanes, on which Airbus Modification 11044 or Airbus Modification 11045 (reference Airbus Service Bulletin A300–53–6063, dated December 12, 1996) has not been accomplished, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (f) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To detect and correct fatigue cracking of the doubler angle and discrepancies of the fasteners that connect the doubler angle and the bottom panel of the center wing box, which could result in reduced structural integrity of the airplane, accomplish the following:

(a) Perform a detailed visual inspection to detect cracking of the doubler angle, and a detailed external visual inspection to detect discrepancies of the fasteners that connect the doubler angle and the bottom panel of the center wing box, on the left and right sides of the airplane, in accordance with Airbus Service Bulletin A300–53–6110, dated April 8, 1997, at the time specified in paragraph (a)(1) or (a)(2) of this AD, as applicable. Thereafter, repeat the inspections of the doubler angle and fasteners at intervals not to exceed 2,400 flight cycles.

(1) For airplanes on which a detailed visual inspection has been performed within the last 2,400 flight cycles prior to the effective date of this AD, in accordance with Structural Significant Item (SSI) 57–10–19 of the Airbus A300–600 Maintenance Review Board (MRB) Document: Inspect within 2,400 flight cycles after the most recent SSI inspection.

(2) For airplanes on which a detailed visual inspection has not been performed within the last 2,400 flight cycles prior to the effective date of this AD, in accordance with Structural Significant Item (SSI) 57–10–19 of the Airbus A300–600 Maintenance Review Board (MRB) Document: Inspect at the time specified in paragraph (a)(2)(i), (a)(2)(ii), or (a)(2)(iii), as applicable.

(i) For airplanes that have accumulated 6,600 or more total flight cycles as of the effective date of this AD: Inspect within 750 flight cycles after the effective date of this AD.

(ii) For airplanes that have accumulated more than 3,100 total flight cycles, but less than 6,600 total flight cycles as of the effective date of this AD: Inspect within 1,500 flight cycles after the effective date of this AD.

(iii) For airplanes that have accumulated 3,100 total flight cycles or less as of the effective date of this AD: Inspect prior to the accumulation of 4,600 total flight cycles.

(b) If any discrepancy is found in a fastener that connects the doubler angle and the bottom panel of the center wing box during any detailed external visual inspection performed in accordance with paragraph (a) of this AD: Prior to further flight, remove the discrepant fastener, and perform a rotating probe inspection to detect discrepancies of the fastener holes, in accordance with Airbus Service Bulletin A300–53–6110, dated April 8, 1997.

(1) If no discrepancy is found in any fastener hole, prior to further flight, install a new fastener, in accordance with the service bulletin. Thereafter, repeat the inspections required by paragraph (a) of this AD at intervals not to exceed 2,400 flight cycles.

(2) If any discrepancy is found in any fastener hole, prior to further flight, except as provided by paragraph (e) of this AD, repair in accordance with the service bulletin, and accomplish the actions required by paragraph (c) of this AD.

(c) If any crack is found in the doubler angle during any detailed visual inspection performed in accordance with paragraph (a) of this AD, prior to further flight, modify the doubler angle in accordance with Airbus Service Bulletin A300–53–6063, dated December 12, 1996. Accomplishment of the modification constitutes terminating action for both repetitive inspection requirements of this AD.

(d) Accomplishment of the modification in accordance with Airbus Service Bulletin A300–53–6063, dated December 12, 1996, constitutes terminating action for the repetitive inspection requirements of this AD.

(e) If any discrepancy of a fastener hole is found during any inspection of a discrepant fastener as required by paragraph (b) of this AD, and the service bulletin specifies to contact Airbus for appropriate action: Prior to further flight, repair in accordance with a method approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate.

(f) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

(g) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Note 3: The subject of this AD is addressed in French airworthiness directive 97–383–240(B), dated December 17, 1997.

Issued in Renton, Washington, on May 13, 1998.

John J. Hickey,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 71

Airspace Docket No. 97–AWA–6

RIN 2120 AA66

Proposed Modification of the San Diego Class B Airspace Area; CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to modify the San Diego, CA, Class B airspace area. Specifically, this action proposes to lower the upper limit of the San Diego Class B airspace area from 12,500 feet mean sea level (MSL) to 10,000 feet MSL; expand the western and eastern boundaries of the airspace area; and move the southern boundary north to align with the POGGI Very High Frequency Omnidirectional Range Tactical Air Navigation (VORTAC). The FAA is proposing this action to improve the flow of air traffic, enhance safety, and reduce the potential for midair collision in the San Diego Class B airspace area while accommodating the concerns of airspace users.

DATES: Comments must be received on or before July 20, 1998.

ADDRESSES: Send comments on the proposal in triplicate to the Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC–200, Airspace Docket No. 97–AWA–6, 800 Independence Avenue, SW., Washington DC 20591. Comments may also be sent electronically to the following Internet address: nprmcmts@mail.hq.faa.gov. The official docket may be examined in the Rules Docket, Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Ken McElroy, Airspace and Rules Division, ATA–400, Office of Air Traffic Airspace Management, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify the airspace docket number and should be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 97–AWA–6." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will also be filed in the docket.

Availability of NPRM's

An electronic copy of this document may be downloaded from the FAA regulations section of the Fedworld electronic bulletin board service (telephone: 703–321–3339) or the Federal Register's electronic bulletin board service (telephone: 202–512–1661), using a modem and suitable communications software.

Internet users may reach the FAA's web page at http://www.faa.gov or the Federal Register's web page at http://www.access.gpo.gov/su_docs for access to recently published rulemaking documents.

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Air Traffic Airspace Management, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–8783. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should call the FAA's Office of Rulemaking, (202) 267–9677 for a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, that describes the application procedure.

Background

On December 17, 1991, the FAA published the Airspace Reclassification Final Rule (56 FR 65655). This rule discontinued the use of the term "Terminal Control Area" and replaced it with the designation "Class B airspace area." This change in terminology is reflected in this NPRM.

The Class B airspace area program was developed to reduce the potential for midair collision in the congested airspace surrounding airports with high density air traffic by providing an area wherein all aircraft are subject to certain operating rules and equipment requirements.

The density of traffic and the type of operations being conducted in the airspace surrounding major terminals increases the probability of midair collisions. In 1970, an extensive study found that the majority of midair collisions occurred between a general aviation (GA) aircraft and an air carrier or military aircraft, or another GA aircraft. The basic causal factor common to these conflicts was the mix of aircraft operating under visual flight rules (VFR) and aircraft operating under instrument flight rules (IFR). Class B airspace areas provide a method to accommodate the increasing number of IFR and VFR operations. The regulatory requirements of Class B airspace areas afford the greatest protection for the greatest number of people by giving air traffic control increased capability to provide aircraft separation service, thereby minimizing the mix of controlled and uncontrolled aircraft.

On May 21, 1970, the FAA published the Designation of Federal Airways, Controlled Airspace, and Reporting Points Final Rule (35 FR 7782). This rule provided for the establishment of Class B airspace areas. To date, the FAA has established a total of 29 Class B airspace areas. The FAA is proposing to take action to modify or implement the application of these proven control areas to provide greater protection for air traffic in the airspace areas most commonly used by passenger-carrying aircraft.

The standard configuration of a Class B airspace area contains three

concentric circles centered on the primary airport extending to 10, 20, and 30 nautical miles (NM), respectively. The standard vertical limit of a Class B airspace area normally should not exceed 10,000 feet MSL, with the floor established at the surface in the inner area and at levels appropriate to the containment of operations in the outer areas. Variations of these criteria may be utilized contingent on the terrain, adjacent regulatory airspace, and factors unique to the terminal area.

The coordinates for this airspace docket are based on North American Datum 83. Class B airspace areas are published in Paragraph 3000 of FAA Order 7400.9E dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR section 71.1. The Class B airspace area listed in this document would be published subsequently in the Order.

Related Rulemaking Actions

On June 21, 1988, the FAA published the Transponder With Automatic Altitude Reporting Capability Requirement Final Rule (53 FR 23356). This rule requires all aircraft to have an altitude encoding transponder when operating within 30 NM of any designated Class B airspace area primary airport from the surface up to 10,000 feet MSL. This rule excluded those aircraft that were not originally certificated with an engine-driven electrical system (or those that have not subsequently been certified with such a system), balloons, or gliders.

On October 14, 1988, the FAA published the Terminal Control Area Classification and Terminal Control Area Pilot and Navigation Equipment Requirements Final Rule (53 FR 40318). This rule, in part, requires the pilot-in-command of a civil aircraft operating within a Class B airspace area to hold at least a private pilot certificate, except for a student pilot who has received certain documented training.

Pre-NPRM Public Input

In early 1996 the San Diego Airspace Users Group (SDAUG), an ad hoc committee which represents all major users and the United States Marine Corps (USMC), proposed a review of the current San Diego Class B airspace area. The review was prompted as a result of the addition of diversified Marine helicopter and fixed-wing assets at Naval Air Station Miramar, CA, which was renamed Marine Corps Air Station (MCAS) Miramar on October 1, 1997. The committee recognized a need to provide greater protection for arriving and departing turbojet aircraft at MCAS Miramar, and facilitate a method for easier circumnavigation of the Class B airspace area by nonparticipating aircraft.

The SDAUG analyzed the San Diego Class B airspace area and developed recommendations for modifying the existing airspace design. The group met regularly at various locations throughout the San Diego area for approximately one year, and submitted written comments concerning a modification of the San Diego Class B airspace area.

As announced in the **Federal Register** on August 12, 1996, (61 FR 41818), two pre-NPRM airspace meetings were held on October 2, 1996, in San Diego, CA, and October 16, 1996, in San Marcos, CA. The purpose of these meetings was to provide local airspace users an opportunity to present input on the design of the planned modifications of the San Diego Class B airspace area. All comments received in response to the informal airspace meetings and the subsequent comment periods were considered and/or incorporated into this notice of proposed modification. Verbal and written comments received by the FAA and the Agency's responses are summarized below.

Analysis of Comments

Some commenters expressed concern that lower performance aircraft departing Montgomery Field could not remain clear of the ceiling of the proposed San Diego Class B airspace area without circling over a congested area.

The FAA agreed with this concern and, as a result, removed a portion of airspace from the proposed design southwest of MCAS Miramar. The design as proposed would shift the boundary slightly north in this area and would allow those aircraft operating VFR and departing Runway 28R at Montgomery Field the opportunity to climb straight ahead until past the shoreline, thus providing additional climb mileage.

A comment was received regarding the addition to Area I northeast of MCAS Miramar. The concern was that by adding to Area I as described in the planned modification, aircraft departing Gillespie Field could experience problems remaining clear of the Class B airspace area.

The FAA agrees in part with this comment. The addition of this area to Area I was necessary to contain high performance aircraft within Class B airspace while executing the Tactical Air Navigation System (TACAN) Runway 24R approach at Miramar. However, to mitigate this concern, a portion of the depiction of the VFR flyway in this area was moved one mile, placing it east of a prominent geographical landmark (the island in the middle of the San Vincente Reservoir), which would establish an easily recognizable visual boundary and allow for VFR navigation clear of terrain. The proposed VFR flyway depiction has been modified to pass east of the island in San Vincente Reservoir, providing a clearer visual depiction of the Class B airspace area.

The Proposed Amendment

The FAA proposes to amend 14 CFR part 71 by modifying the San Diego Class B airspace area. Specifically, this proposal (depicted in the attached chart) would lower the upper limit of the San Diego Class B airspace area from 12,500 feet MSL to 10,000 feet MSL, expand the western and eastern boundaries, and move the southern boundary northward to align with the POGGI VORTAC. This change would improve the boundary definition and decrease the overall size of the Class B airspace. The amended design includes a redundant system of boundary depiction to the maximum extent. The primary boundary definition uses latitude and longitude points (Global Positioning System [GPS] waypoints) and, wherever feasible, the boundaries are also aligned with reference to existing ground-based navigational aids and prominent geographical landmarks. The proposed modification of the San Diego Class B airspace area results in net reduction in the size of Class B airspace, while improving the containment of turbo-jet aircraft within the Class B airspace area. This would constitute improved efficiency of the airspace and a clearer definition of Class B airspace area boundaries to aid VFR GA aircraft.

Regulatory Evaluation Summary

Changes to Federal Regulations must undergo several economic analyses. First, Executive Order 12866 directs that each Federal agency shall propose or adopt a regulation only upon a reasoned determination that the benefits of the intended regulation justify its costs. Second, the Regulatory Flexibility Act requires agencies to analyze the economic effect of regulatory changes on small businesses and other small entities. Third, the Office of Management and Budget directs agencies to assess the effect of regulatory changes on international trade. In conducting these analyses, the FAA has determined that this proposed rule: (1) would generate benefits that justify its minimal costs and is not a "significant regulatory action" as defined in the Executive Order; (2) is

not significant as defined in the Department of Transportation's Regulatory Policies and Procedures; (3) would not have a significant impact on a substantial number of small entities; (4) would not constitute a barrier to international trade; and (5) would not contain any Federal intergovernmental or private sector mandate. These analyses are summarized here in the preamble and the full Regulatory Evaluation is in the docket.

The Federal Aviation Administration (FAA) proposes to modify the San Diego International Lindbergh Airport Class B airspace area by lowering the ceiling from 12,500 feet MSL to 10,000 feet MSL, expanding and moving lateral boundaries, and modifying base altitudes. As a result of relocation of turbojet aircraft and helicopters to Marine Corps Air Station (MCAS) Miramar, the FAA has determined that modification of the San Diego Class B airspace area would improve the efficiency of aircraft movement in the airspace and enhance safety for VFR and IFR airspace users.

The proposed modifications would generate several benefits for system users. These benefits include clearer boundaries defining the Class B airspace sub-areas, greater flexibility in navigating the airspace for VFR operators, increased airspace for aircraft transitioning to and from satellite airports, improved containment for turbojet aircraft arriving and departing MCAS Miramar (containment refers to aircraft operating in controlled airspace and receiving ATC separation from other aircraft), and reduced potential for midair collisions in the San Diego terminal area.

The proposed rule would impose minimal costs on FAA or airspace users. Printing of aeronautical charts which reflect the changes to the Class B airspace would be accomplished during a scheduled chart printing, and would result in no additional costs for plate modification and updating of charts. Notices would be sent to all pilots within a 100-mile radius of the San Diego airport at a total cost of $100.00 for postage. No staffing changes would be required to maintain the modified Class B airspace.

The San Diego Class B airspace would be designated by a triple redundant boundary depiction system which uses longitude and latitude (GPS waypoints), existing navaids, and visual references to identify the airspace boundaries. These three options, two of which are available currently, will not cause airspace users to incur any additional equipment costs. In view of the minimal cost of compliance, enhanced safety, and operational efficiency, the FAA has determined that the proposed rule would be cost-beneficial.

Initial Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small businesses and other small entities are not unnecessarily or disproportionately burdened by Federal regulations. The RFA requires a Regulatory Flexibility analysis if a rule will have a significant economic impact on a substantial number of small entities.

The FAA certifies that this proposed rule would impose only minimal additional costs (for notices sent to pilots informing them of the proposed airspace modification) upon potential operators in the San Diego Class B airspace. Therefore, the proposed rule would not have a significant economic impact on a substantial number of small entities.

International Trade Impact Assessment

The proposed rule would not constitute a barrier to international trade, including the export of U.S. goods and services to foreign countries or the import of foreign goods and services into the United States.

Unfunded Mandates Assessment

Title II of the Unfunded Mandates Reform Act of 1995 (the Act), enacted as Public Law 104–4 on March 22, 1995, requires each Federal agency, to the extent permitted by law, to prepare a written assessment of the effects of any Federal mandate in a proposed or final agency rule that may result in the expenditure of $100 million or more (when adjusted annually for inflation) in any one year by State, local, and tribal governments in the aggregate, or by the private sector. Section 204(a) of the Act, 2 U.S.C. 1534(a), requires the Federal agency to develop an effective process to permit timely input by elected officers (or their designees) of State, local, and tribal governments on a proposed "significant intergovernmental mandate." A "significant intergovernmental mandate" under the Act is any provision in a Federal agency regulation that would impose an enforceable duty upon State, local, and tribal governments in the aggregate of $100 million adjusted annually for inflation in any one year. Section 203 of the Act, 2 U.S.C. 1533, which supplements section 204(a), provides that, before establishing any regulatory requirements that might significantly or uniquely affect small governments, the agency shall have developed a plan. That plan, among other things, must provide for notice to potentially affected small governments, if any, and for a meaningful and timely opportunity to provide input in the development of regulatory proposals.

This proposed rule does not contain any Federal intergovernmental or private sector mandates. Therefore, the requirements of Title II of the Unfunded Mandates Reform Act of 1995 do not apply.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by Reference, Navigation (Air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E, AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 3000—Subpart B—Class B Airspace

* * * * *

AWP CA B San Diego, CA [Revised]

San Diego, (Lindbergh Field), CA (Primary Airport)
(lat. 32°44′01″N., long. 117°11′23″W.)

Boundaries

Area A. That airspace extending upward from 4,800 feet MSL to and including 10,000 feet MSL beginning at the intersection of the JLI 262° radial and the eastern edge of Warning Area 291 (W–291) (lat. 32°59′31″N., long. 117°47′25″W.); thence east via the JLI 262° radial to intercept the MZB 325° radial

(lat. 33°02'13"N., long. 117°26'14"W.); thence southeast via the MZB 325° radial to intercept the JLI 257° radial (lat. 32°58'53"N., long. 117°23'27"W.); thence west via the JLI 257° radial to intercept the OCN 200° radial (lat. 32°57'02"N., long. 117°32'35"W.); thence south via the OCN 200° radial to the intersection of the OCN 200° radial and the eastern edge of W–291 (lat. 32°45'23"N., long. 117°37'35"W.); thence northwest via the eastern edge of W–291 to the point of beginning.

Area B. That airspace extending upward from 2,000 feet MSL to and including 10,000 feet MSL beginning at the intersection of the eastern edge of W–291 and the OCN 200° radial (lat. 32°45'23"N., long. 117°37'35"W.); thence north via the OCN 200° radial to intercept the JLI 257° radial (lat. 32°57'02"N., long. 117°32'35"W.); thence east via the JLI 257° radial to intercept the OCN 182° radial (lat. 32°58'25"N., long. 117°25'44"W.); thence south via the OCN 182° radial to intercept the PGY 290° radial (lat. 32°45'02"N., long. 117°26'17"W.); thence east via the PGY 290° radial to the intersection of the PGY 290° radial and the 32°43'22" latitude line (lat. 32°43'22"N., long. 117°20'47"W.); thence east via the 32°43'22" latitude line to intercept the OCN 171° radial (lat. 32°43'22"N., long. 117°19'15"W.); thence south via the OCN 171° radial to intercept the PGY 279° radial (lat. 32°39'14"N., long. 117°18'28"W.); thence west via the PGY 279° to intercept the eastern edge of W–291 (lat. 32°41'27"N., long. 117°35'27"W.); thence northwest along the eastern edge of W–291 to the point of beginning.

Area C. That airspace extending upward from 1,800 feet MSL to and including 10,000 feet MSL beginning at the intersection of the OCN 182° and the JLI 257° radials (lat. 32°58'25"N., long. 117°25'44"W.); thence east via the JLI 257° radial to intercept the MZB 325° radial (lat. 32°58'53"N., long. 117°23'27"W.); thence southeast via the MZB 325° radial to intercept the OCN 167° radial (lat. 32°54'08"N., long. 117°19'31"W.); thence south via the OCN 167° radial to intercept the MZB 310° radial (lat. 32°50'28"N., long. 117°18'30"W.); thence southeast via the MZB 310° radial to the Mission Bay VORTAC; thence west via the MZB 279° radial to intercept the OCN 171° radial (lat. 32°47'48"N., long. 117°20'04"W.); thence south via the OCN 171° radial to the intersection of the OCN 171° radial and the 32°43'22" latitude line (lat. 32°43'22"N., long. 117°19'15"W.); thence west via the 32°43'22" latitude line to intercept the PGY 290° radial (lat. 32°43'22"N., long. 117°20'47"W.); thence west via the PGY 290° radial to intercept the OCN 182° radial (lat. 32°45'02"N., long. 117°26'17"W.); thence north via the OCN 182° radial to the point of beginning.

Area D. That airspace extending upward from 1,800 feet MSL to and including 3,200 feet MSL and that airspace extending upward from 6,800 feet MSL to and including 10,000 feet MSL beginning at the intersection of MZB 325° and the JLI 257° radials (lat. 32°58'53" N., long. 117°23'27" W.); thence southeast direct to the intersection of I–5, I–805, and the JLI 247° radial (lat. 32°54'31" N., long. 117°13'39" W.); thence south direct to the intersection of I–5 and Genessee Avenue (lat. 32°53'13" N., long. 117°13'40" W.); thence south direct to the intersection of Genessee Avenue and Route 52 (lat. 32°50'49" N., long. 117°12'08" W.); thence northwest direct to the intersection of the westerly extension of the Montgomery Field Runway 10L/28R centerline and the OCN 167° radial (lat. 32°53'11" N., long. 117°19'15" W.); thence north via the OCN 167 radial to intercept the MZB 325° radial (lat. 32°54'08" N., long. 117°19'31" W.); thence northwest via the MZB 325° radial to the point of beginning.

Area E. That airspace extending upward from 3,000 feet MSL to and including 10,000 feet MSL beginning at the intersection of the MZB 008° and the JLI 252° radials (lat. 32°58'21" N., long. 117°11'37" W.); thence east via the JLI 252° radial to intercept the OCN 135° radial (lat. 32°59'32" N., long. 117°07'24" W.); thence southeast via the OCN 135° radial to intercept the MZB 027° radial (lat. 32°58'45" N., long. 117°06'29" W.); thence southwest via the MZB 027° radial to intercept the JLI 247° radial (lat. 32°56'45" N., long. 117°07'35" W.); thence southwest via the JLI 247° radial to intercept the MZB 008° radial (lat. 32°55'05" N., long. 117°12'10" W.); thence north via the MZB 008° radial to the point of beginning.

Area F. That airspace extending upward from the surface to and including 3,200 feet MSL and that airspace extending upward from 4,800 feet MSL to and including 10,000 feet MSL beginning at the intersection of I–5, I–805, and the JLI 247° radial (lat. 32°54'31" N., long. 117°13'39" W.); thence southeast direct to the departure end of MCAS Miramar Runway 24R (lat. 32°51'49" N., long. 117°09'55" W.); thence east direct to the approach end of MCAS Miramar Runway 28 centerline (lat. 32°51'57" N., long. 117°07'37" W.); thence east direct to the intersection of the Gillespie Field Class D airspace area and a line extending west from the southern boundary of the MCAS Miramar Class E airspace area (lat. 32°51'14" N., long. 117°03'03" W.); thence southwest direct to the intersection of the Gillespie Field Class D airspace area and the MZB 065° radial (lat. 32°51'00" N., long. 117°03'10" W.); thence west direct to the intersection of Santo Road, Route 52, and the 32°50'25" N. latitude line (lat. 32°50'25" N., long. 117°05'48" W.); thence west via the 32°50'25" N. latitude line to the intersection of 32°50'25" N. latitude line and Route 52 (lat. 32°50'25" N., long. 117°09'50" W.); thence northwest direct to the intersection of Route 52 and I–805 (lat. 32°50'50" N., long. 117°10'40" W.); thence west direct to the intersection of Route 52 and Genessee Avenue (lat. 32°50'49" N., long. 117°12'08" W.); thence northwest direct to the intersection of I–5 and Genessee Avenue (lat. 32°53'13" N., long. 117°13'40" W.); thence north via I–5 to the point of beginning.

Area G. That airspace extending upward from the surface to and including 10,000 feet MSL beginning at the intersection of the OCN 135° and the JLI 247° radials (lat. 32°57'38" N., long. 117°05'10" W.); thence southeast via the OCN 135° radial to intercept the south boundary line of the MCAS Miramar Class E airspace area (lat. 32°52'03" N., long. 116°58'35" W.); thence west along the southern boundary line to the intersection of the southern boundary line and the Gillespie Field Class D airspace area 4.3-mile arc (lat. 32°51'14" N., long. 117°03'03" W.); thence west direct to the approach end of MCAS Miramar Runway 28 (lat. 32°51'57" N., long. 117°07'37" W.); thence west direct to the departure end of MCAS Miramar Runway 24R (lat. 32°51'49" N., long. 117°09'55" W.); thence northwest direct to the intersection of I–5, I–805, and the JLI 247° radial (lat. 32°54'31" N., long. 117°13'39" W.); thence northeast via the JLI 247° radial to the point of beginning.

Area H. That airspace extending upward from 1,800 feet MSL to and including 10,000 feet MSL beginning at the intersection of the OCN 135° and the JLI 247° radial (lat. 32°57'38" N., long. 117°05'10" W.); thence northeast via the JLI 247° radial to intercept the OCN 130° radial (lat. 32°58'33" N., long. 117°02'38" W.); thence southeast via the OCN 130° radial to the PGY 006° radial (lat. 32°54'12" N., long. 116°56'33" W.); thence south via the PGY 006° radial to the southern boundary line of the MCAS Miramar Class E airspace area (lat. 32°52'22" N., long. 116°56'47" W.); thence west along the southern boundary line to intercept the OCN 135° radial (lat. 32°52'03" N., long. 116°58'35" W.); thence northwest via the OCN 135° radial to the point of beginning.

Area I. That airspace extending upward from 3,200 feet MSL to and including 10,000 feet MSL beginning at the intersection of the OCN 130° and the JLI 247° radials (lat. 32°58'33" N., long. 117°02'38" W.); thence northeast via the JLI 247° radial to intercept the OCN 127° radial (lat. 32°59'08" N., long. 117°01'01" W.); thence southeast via the OCN 127° radial to intercept the PGY 010° radial (lat. 32°55'11" N., long. 116°54'52" W.); thence south via the PGY 010° radial to the southern boundary line of the MCAS Miramar Class E airspace area (lat. 32°52'37" N., long. 116°55'24" W.); thence west along the southern boundary line to intercept the PGY 006° radial (lat. 32°52'22" N., long. 116° 56'47" W.); thence north via the PGY 006° radial to intercept the OCN 130° radial (lat. 32°54'12" N., long. 116°56'33" W.); thence northwest via the OCN 130° radial to the point of beginning.

Area J. That airspace extending upward from 4,800 feet MSL to and including 10,000 feet MSL beginning at the intersection of the southern boundary line of the MCAS Miramar Class E airspace area and the OCN 132° radial (lat. 32°52'28" N., long. 116°56'13" W.); thence southeast via the OCN 132° radial to intercept the JLI 201° radial (lat. 32°44'36" N., long. 116°45'59" W.); thence south via the JLI 201° radial to intercept the PGY 083° radial (lat. 32°37'37" N., long. 116°49'08" W.); thence west via the PGY 083° radial to the POGGI VORTAC; thence northeast via the PGY 069 radial to intercept the JLI 207° radial (lat. 32°38'25" N., long. 116°53'13" W.); thence northeast via the JLI 207° radial to intercept the MZB 099° radial (lat. 32°43'45" N., long. 116°50'02" W.); thence west via the MZB 099° radial to the Mission Bay VORTAC; thence via the MZB 310° radial to intercept the OCN 167° radial (lat. 32°50'28" N., long. 117°18'30"

W.); thence north via the OCN 167° radial to intercept the westerly extension of the Montgomery Field Runway 10L/28R centerline (lat. 32°53′11″ N., long. 117°19′15″ W.); thence southeast direct to the intersection of Route 52 and Genessee Avenue (lat. 32°50′49″ N., long. 117°12′08″ W.); thence east direct to the intersection of Route 52 and I–805 (lat. 32°50′50″ N., long. 117°10′40″ W.); thence southeast direct to the intersection of Route 52 and the 32°50′25″ N. latitude line (lat. 32°50′25″ N., long. 117°09′50″ W.); thence east along the 32°50′25″ N. latitude line to the intersection of the 32°50′25″ N. latitude line, Route 52, and Santo Road (lat. 32°50′25″ N., long. 117°05′48″ W.); thence east direct to the intersection of the MZB 065° radial and the Gillespie Field Class D airspace area (lat. 32°51′00″ N., long. 117°03′10″ W.); thence northeast direct to the intersection of the Gillespie Field Class D airspace area and a line extending west from the southern boundary of the MCAS Miramar Class E airspace area (lat. 32°51′14″ N., long. 117°03′03″ W.); thence east via the southern boundary line to the point of beginning.

Area K. That airspace extending upward from 5,800 feet MSL to and including 10,000 feet MSL beginning at the intersection of the OCN 132° and the MZB 091° radials (lat. 32°46′31″ N., long. 116°48′29″ W.); thence east via the MZB 091° radial to intercept the JLI 191° radial (lat. 32°46′22″ N., long. 116°40′14″ W.); thence south via the JLI 191° radial to intercept the PGY 083° radial (lat. 32°38′20″ N., long. 116°42′04″ W.); thence west via the PGY 083° radial to intercept the JLI 201° radial (lat. 32°37′37″ N., long. 116°49′08″ W.); thence north via the JLI 201° radial to intercept the OCN 132° radial (lat. 32°44′36″ N., long. 116°45′59″ W.); thence northwest via the OCN 132° radial to the point of beginning.

Area L. That airspace extending upward from the surface to and including 10,000 feet MSL beginning at the intersection of the OCN 171° and the MZB 279° radials (lat. 32°47′48″N., long. 117°20′04″W.); thence east via the MZB 279° radial to the Mission Bay VORTAC; thence east via the MZB 099° radial to the MZB 099° radial 10 DME fix (lat. 32°45′21″N., long. 117°01′49″W.); thence south direct to the intersection of the MZB 10-mile arc and the easterly extension of the Lindbergh Field Runway 09/27 centerline (lat. 32°42′02″N., long. 117°03′11″W.); thence southwest direct to the intersection of the PGY 300° radial and the MZB 10-mile arc (lat. 32°39′47″N., long. 117°05′13″W.); thence northwest via the PGY 300° radial to the PGY 300° radial 13.5 DME fix (lat. 32°43′22″N., long. 117°12′36″W.); thence west direct to the OCN 171° radial 31.4 DME fix (lat. 32°43′22″N., long. 117°19′15″W.); thence north via the OCN 171° radial to the point of beginning; excluding the VFR corridor described as that airspace extending upward from 3,301 feet MSL to, but not including, 4,700 feet MSL in an area beginning at the Mission Bay VORTAC; thence east direct to the intersection of I–8, I–805, and the MZB 099° radial (lat. 32°46′11″N., long. 117°07′55″W.); thence south direct to intersection of I–5 and Highway 94 (lat. 32°42′49″N., long. 117°08′51″W.); thence southerly via I–5 to the intersection of I–5 and the MZB 10-mile arc (lat. 32°39′00″N., long. 117°06′17″W.); thence clockwise via the MZB 10-mile arc to intersect the Silver Strand Boulevard (lat. 32°37′54″N., long. 117°08′23″W.); thence northwesterly via the Silver Strand Boulevard to the Hotel del Coronado (south end of Coronado Island) (lat. 32°40′51″N., long. 117°10′41″W.); thence north direct to the point of beginning.

Area M. That airspace extending upward from 1,800 feet MSL to and including 10,000 feet MSL beginning at the MZB 099° radial 10 DME fix (lat. 32°45′21″N., long. 117°01′49″W.); thence east via the MZB 099° radial to the MZB 099° radial 13 DME fix (lat. 32°44′53″N., long. 116°58′18″W.); thence south direct to the intersection of the easterly extension of the Lindbergh Field Runway 09/27 centerline and the MZB 13-mile arc (lat. 32°41′11″N., long. 116°59′42″W.); thence southwest direct to the intersection of the MZB 13-mile arc and the PGY 300° radial (lat. 32°38′14″N., long. 117°02′03″W.); thence northwest via the PGY 300° radial to the intersection the PGY 300° radial and the MZB 10-mile arc (lat. 32°39′47″N., long. 117°05′13″W.); thence northeast direct to the intersection of the Lindbergh Field Runway 09/27 centerline and the MZB 10-mile arc (lat. 32 42′02″N., long. 117°03′11″W.); thence north direct to the point of beginning.

Area N. That airspace extending upward from 3,000 feet MSL to and including 10,000 feet MSL beginning at the MZB 099° radial 13 DME fix (lat. 32°44′53″N., long. 116°58′18″W.); thence east via the MZB 099° radial to the MZB 099° radial 15 DME fix (lat. 32°44′34″N., long. 116°55′58″W.); thence south direct to the intersection of the easterly extension of the Lindbergh Field Runway 09/27 centerline and the MZB 15-mile arc (lat. 32°40′37″N., long. 116°57′24″W.); thence southwest direct to the intersection of the MZB 15-mile arc and the PGY 300° radial (lat. 32°37′13″N., long. 116°59′58″W.); thence northwest via the PGY 300° radial to the PGY 300° radial 13 DME fix (lat. 32°38′14″N., long. 117°02′03″W.); thence northeast direct to the intersection of the Lindbergh Field Runway 09/27 centerline and the MZB 13-mile arc (lat. 32°41′11″N., long. 116°59′42″W.); thence north direct to the point of beginning.

Area O. That airspace extending upward from 3,500 feet MSL to and including 10,000 feet MSL beginning at the MZB 099° radial 15 DME fix (lat. 32°44′34″N., long. 116°55′58″W.); thence east via the MZB 099° radial to intercept the JLI 207° radial (lat. 32°43′45″N., long. 116°50′02″W.); thence southwest along the JLI 207° radial to intercept the PGY 069° radial (lat. 32°38′25″N., long. 116°53′13″W.); thence southwest via the PGY 069° radial to the POGGI VORTAC; thence northwest via the PGY 300° radial to intercept the MZB 15-mile arc (lat. 32°37′13″N., long. 116°59′58″W.); thence northeast direct to the intersection of the MZB 15-mile arc and the easterly extension of the Lindbergh Field Runway 09/27 centerline (lat. 32°40′37″N., long. 116°57′24″W.); thence north direct to the point of beginning.

Area P. That airspace extending upward from 4,800 feet MSL to and including 10,000 feet MSL beginning at the intersection of the PGY 279° radial and the eastern edge of W–291 (lat. 32°41′27″N., long. 117°35′27″W.); thence east via the PGY 279° radial to the intersection of the PGY 279° radial, the MZB 10-mile arc, and Silver Strand Boulevard (lat. 32°37′54″N., long. 117°08′23″W.); thence northeast direct to the intersection of the MZB 10-mile arc and I–5 (lat. 32°39′00″N., long. 117°06′17″W.); thence northeast direct to the intersection of MZB 10-mile arc and the PGY 300° radial (lat. 32°39′47″N., long. 117°05′13″W.); thence southeast via the PGY 300° radial to the POGGI VORTAC; thence west via the PGY 264° radial to the eastern edge of W–291 (lat. 32°33′40″N., long. 117°31′13″W.); thence north via the eastern edge of W–291 to the point of beginning.

Area Q. That airspace extending upward from 2,800 feet MSL to and including 10,000 feet MSL beginning at the intersection of the OCN 171° radial 31.4 DME fix (lat. 32°43′22″N., long. 117°19′15″W.); thence east direct to the intersection of the PGY 300° radial 13.5 DME fix (lat. 32°43′22″N., long. 117°12′36″W.); thence southeast via the PGY 300° radial to the intersection of the PGY 300° radial and the MZB 10-mile arc (lat. 32°39′47″N., long. 117°05′13″W.); thence southwest direct to the intersection of the MZB 10-mile arc and I–5 (lat. 32°39′00″N., long. 117°06′17″W.); thence southwest direct to the intersection of the PGY 279° radial, the MZB 10-mile arc, and Silver Strand Boulevard (lat. 32°37′54″N., long. 117°08′23″W.); thence west via the PGY 279° radial to intercept the OCN 171° radial (lat. 32°39′14″N., long. 117°18′28″W.); thence north via the OCN 171° radial to the point of beginning; excluding that airspace contained in the VFR corridor as described in Area L.

Area R. That airspace extending upward from 4,800 feet MSL to and including 10,000 feet MSL beginning at the intersection of the OCN 135° and the JLI 257° radials (lat. 33°01′36″N., long. 117°09′51″W.); thence east via the JLI 257° radial to intercept the OCN 115° radial (lat. 33°03′53″N., long. 116°58′19″W.); thence via the OCN 115° radial to intercept the PGY 019° radial (lat. 33°00′13″N., long. 116°49′06″W.); thence south via the PGY 019° radial to intercept the OCN 121° radial (lat. 32°56′51″N., long. 116°50′29″W.); thence northwest via the OCN 121° radial to intercept the JLI 247° radial (lat. 33°00′25″N., long. 116°57′28″W.); thence southwest via the JLI 247° radial to intercept the MZB 027° radial (lat. 32°56′45″N., long. 117°07′35″W.); thence northeast via the MZB 027° radial to intercept the OCN 135° radial (lat. 32°58′45″N., long. 117°06′29″W.); thence northwest via the OCN 135° radial to the point of beginning.

Area S. That airspace extending upward from 6,800 feet MSL to and including 10,000 feet MSL beginning at the intersection of the JLI 262° and the MZB 325° radials (lat. 33°02′13″N., long. 117°26′14″W.); thence east via the JLI 262° radial to intercept the OCN 115° radial (lat. 33°05′14″N., long. 117°01′43″W.); thence southeast via the OCN 115° radial to intercept the JLI 257° radial (lat. 33°03′53″N., long. 116°58′19″W.); thence west via the JLI 257° radial to intercept the

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 161

[Docket No. RM98–7–000]

Reporting Interstate Natural Gas Pipeline Marketing Affiliates on the Internet

May 13, 1998.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is proposing to amend its Standards of Conduct regulations to require that interstate natural gas pipelines identify the names and addresses of their marketing affiliates on their web sites on the Internet and update the information within three business days of any change. Pipelines would also be required to state the dates the information was last updated.

DATES: Written comments must be received by the Commission by June 19, 1998.

ADDRESSES: File comments with the Office of the Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Stuart Fischer, Office of General Counsel, Federal Energy Regulatory Commission 888 First Street, NE., Washington, DC 20426. Telephone: (202) 208–1033.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in the Public Reference Room at 888 First Street, NE., Room 2A, Washington, DC 20426.

The Commission Issuance Posting System (CIPS) provides access to the texts of formal documents issued by the Commission. CIPS can be accessed via Internet through FERC's Homepage (http://www.ferc.fed.us) using the CIPS Link or the Energy Information Online icon. The full text of this document will be available on CIPS in ASCII and WordPerfect 6.1 format. CIPS is also available through the Commission's electronic bulletin board service at no charge to the user and may be accessed using a personal computer with a modem by dialing 202–208–1397, if dialing locally, or 1–800–856–3920, if dialing long distance. To access CIPS, set your communications software to 19200, 14400, 12000, 9600, 7200, 4800, 2400, or 1200 bps, full duplex, no parity, 8 data bits and 1 stop bit. User assistance is available at 202–208–2474 or by E-mail to CipsMaster@FERC.fed.us.

This document is also available through the Commission's Records and Information Management System (RIMS), an electronic storage and retrieval system of documents submitted to and issued by the Commission after November 16, 1981. Documents from November 1995 to the present can be viewed and printed. RIMS is available in the Public Reference Room or remotely via Internet through FERC's Homepage using the RIMS link or the Energy Information Online icon. User assistance is available at 202-208–2222, or by E-mail to RimsMaster@FERC.fed.us.

Finally, the complete text on diskette in WordPerfect format may be purchased from the Commission's copy contractor, La Dorn System Corporation. La Dorn Systems Corporation is located in the Public Reference Room at 888 First Street, NE., Washington, DC 20426.

Notice of Proposed Rulemaking

May 13, 1998.

The Federal Energy Regulatory Commission (Commission) is proposing to amend its regulations in Part 161.3 to require that interstate natural gas pipelines identify the names and addresses of their marketing affiliates on their web sites on the Internet. By doing so, the Commission will make it easier for the public to identify each interstate gas pipeline's current marketing affiliates. The Commission believes that the new regulation is necessary to further assist its oversight efforts as well as to permit shippers to effectively monitor transportation transactions between pipelines and their affiliated marketers.

I. Background

The Commission, in Order Nos. 497 *et seq.*[1] and Order Nos. 566 *et seq.*[2] established rules intended to prevent interstate natural gas pipelines from providing preferential treatment to their marketing or brokering affiliates. Specifically, the Commission adopted Standards of Conduct (codified at Part 161 of the Commission's regulations)[3] and reporting requirements (codified in sections 161.3(h)(2) and 250.16).[4]

The Standards of Conduct govern the relationships between pipelines and their marketing affiliates. In general, they provide that pipelines and their marketing affiliates must function independently of each other. Pipelines cannot favor their marketing affiliates in providing transportation services or in providing transportation information or transportation discounts not available to non-affiliates.

Currently, there is no requirement in the Commission's regulations for pipelines to report the names of their marketing affiliates or changes in the status of marketing affiliates through, for example, acquisitions of new affiliates, or divestitures, consolidations, or name changes of prior affiliates. While pipelines are required to list all of their affiliated entities, including marketing entities, in their annual Form No. 2 filings, annual data cannot keep abreast of changes, and the Form No. 2 does not require pipelines to identify which entities are "marketing" or "brokering"

[2] Standards of Conduct and Reporting Requirements for Transportation and Affiliate Transactions, Order No. 566, 59 FR 32885 (June 27, 1994), FERC Stats. & Regs. 1991–1996 ¶ 30,997 (June 17, 1994); Order No. 566–A, *order on rehearing*, 59 FR 52896 (October 20, 1994), 69 FERC ¶ 61,044 (October 14, 1994); Order No. 566–B, *order on rehearing*, 59 FR 65707 (December 21, 1994), 69 FERC ¶ 61,334 (December 14, 1994).

[3] 18 CFR 161.3 (1997).

[4] 18 CFR 161.3(h)(2) and 250.16 (1997).

affiliates as defined under section 161.2(c) of the Commission's regulations.[5]

Despite the absence of a specific regulatory requirement to identify marketing affiliates, several pipelines have identified the names of their marketing affiliates in their tariffs and/or standards of conduct and filed updates whenever there were changes in identity. However, two pipelines recently decided to stop listing the names of their marketing affiliates in their standards of conduct because of the administrative burden of filing the information.[6] As discussed below, by requiring the affiliate information to be posted on the Internet, pipelines will be able to provide up-to-date information with minimal administrative burden.

II. Proposed Changes to Regulations

The Commission proposes to add section 161.3(l), which would require pipelines to post on their web sites on the Internet, the names and addresses of their marketing affiliates and to update this information within three business days of any change. A pipeline would also be required to state the date the information was last updated. In Order No. 587 *et seq.*, the Commission began phasing out the use of electronic bulletin boards in favor of posting information on pipeline web sites on the Internet.[7] The standards for Internet posting are set out in section 284.10 of the Commission's regulations, as amended in Order No. 587–G.[8]

III. Discussion

The Commission believes that the new regulation is necessary to further assist its oversight efforts as well as to enable the public to monitor pipeline-affiliate transactions. It is important for the public and the Commission to have an updated picture of the pipelines' marketing affiliates to determine if pipelines are complying with the regulatory requirements. Marketing affiliations change rapidly in today's business climate. In *El Paso* and *Texas Gas*, the pipelines stated that they had made three changes to the lists of their marketing affiliates in the previous year. Moreover, the recent trend of mergers of large pipelines makes it imperative to determine which marketing entities are affiliated with which pipelines.[9] The proposed requirements would ensure that the Commission and the public can identify pipelines' marketing affiliates.

To minimize the burden on pipelines and the Commission's administrative resources, we propose that each pipeline post the names and addresses of its marketing affiliates on the pipeline's web site on the Internet. In this way, the burden on pipelines would be slight, as pipelines already are required to have web sites under Order No. 587–C and would only have to add the affiliate information.

IV. Regulatory Flexibility Act Certification

The Regulatory Flexibility Act of 1980 (RFA)[10] generally requires a description and analysis of rules that will have significant economic impact on a substantial number of small entities. Pursuant to section 605(b) of the RFA, the Commission hereby certifies that the regulations proposed herein will not have a significant adverse impact on a substantial number of small entities. The proposed rules will benefit small entities by making it easier for small customers to monitor pipelines' transactions with their marketing affiliates.

V. Environmental Analysis

The Commission is required to prepare an Environmental Assessment or an Environmental Impact Statement for any action that may have a significant adverse effect on the human environment.[11] The Commission has categorically excluded certain actions from these requirements as not having a significant effect on the human environment.[12] This proposed rule falls within the categorical exclusion which specifies that information gathering, analysis, and dissemination are not major federal actions that have a significant effect on the human environment.[13] The proposed rule also falls under the categorical exclusion for rules concerning the sale, exchange, and transportation of natural gas that requires no construction of facilities.[14] Thus, neither an environmental impact statement nor an environmental assessment is required.

VI. Information Collection Statement

The following collection of information contained in this proposed rule has been submitted to the Office of Management and Budget for review under Section 3507(d) of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507(d). Comments are solicited on the Commission's need for this information, whether the information will have practical utility, the accuracy of the provided burden estimates, ways to enhance the quality, utility, and clarity of the information to be collected, and any suggested methods for minimizing respondents' burden, including the use of automated information techniques.

Estimated Annual Burden:

Data collection	No. of respondents	No. of responses	Hours per response	Total annual hours
FERC–592	74	1	5	370

[5] 18 CFR 161.2(c) (1997).

[6] In *El Paso Natural Gas Pipeline Company*, 79 FERC ¶ 61,086 (1997) (*El Paso*), the pipeline stated that it had revised its standards of conduct three times in the previous year to reflect changes to corporate structure or names of marketing affiliates and believed that such filings were unnecessary. The Commission ruled that El Paso did not have to revise its standards of conduct each time the identity of a marketing affiliate changed. More recently, in *Texas Gas Transmission Corp.*, 83 FERC ¶ 61,048 (1998) (*Texas Gas*), the Commission accepted a pipeline's request to delete the names of its marketing affiliates from its standards of conduct. In *El Paso*, the pipeline stated that the names of its marketing affiliates were publicly available through the capacity allocation log on its electronic bulletin board. In *Texas Gas*, the pipeline stated that it would post on its electronic bulletin board a list of its marketing affiliates.

[12] 18 CFR 380.4 (1997).

[13] 18 CFR 380.4(a)(5) (1997).

[14] 18 CFR 380.4(a)(27) (1997).

Total Annual Hours for Collection (Reporting + Recordkeeping, (if appropriate))=370.

Information Collection costs: The Commission seeks comments on the costs to comply with these requirements. It has projected the average annualized cost per respondent to be the following:

Annualized Capital/Startup Costs	
Annualized Costs (Operations & Maintenance)	$19,492
Total Annualized Costs	$19,492

All pipelines are currently required to maintain web sites and so the Commission estimates that the burden to post the information will be minimal once it has been assembled.

The Office of Management and Budget's (OMB's) regulations require OMB to approve certain information collection requirements imposed by agency rule. The Commission is submitting notification of this proposed rule to OMB.

Title: FERC–592, Marketing Affiliates of Interstate Pipelines.

Action: Proposed collections.

OMB Control No: 1902–0157.

Respondents: Business or other for profit, including small business.

Frequency of Responses: On occasion.

Necessity of the information: The proposed rule revises the requirements contained in 18 CFR 161.3. Pipelines will be required to post their affiliates' names and addresses on the Internet, update this information within three business days of whenever a change takes place, and state the date the information was last updated. These proposed revisions will not change the format of what is currently reported to the Commission. However, the revisions of § 161.3 will require additional information that must be posted on the Internet.

The posting of affiliate information on the Internet meets the Commission's need for access to up-to-date information to monitor self-implementing activities of the pipelines to ensure that transportation services are being carried out in non-discriminatory manner and can also respond to the increased pace of changes in the energy marketplace without unduly burdening market participants. The information is maintained by natural gas pipeline companies involved in transactions with marketing affiliates and their functional equivalents. The Commission through its monitoring activities, collects and analyzes data for use in making decisions. The monitoring activities focus on areas affecting competition such as: preferential treatment to affiliates; cross-subsidization and cost shifting between customers and affiliates; fair access to information; unfair activities and noncompliance with the Commission's regulations.

Additionally, the information is also used by nonaffiliated shippers or others (such as state commissions) to determine whether they have been harmed by affiliate preference and, in some cases, to prepare evidence for formal proceedings following the filing of a complaint.

These data are required to carry out the Commission's policies in accordance with the general authority in Sections 311, 501, and 504 of the Natural Gas Policy Act of 1978 (NGPA) (15 U.S.C. 3301–3432) and Sections 4, 5, 7, 8, 10, 14, 16 and 20 of the Natural Gas Act (NGA) (15 U.S.C. 717–717w). The information required is mandatory.

Internal Review: The Commission has reviewed the requirements pertaining to the standards of conduct for interstate natural gas pipeline companies and their marketing affiliates or brokering companies and determined that the proposed revisions are necessary to ensure nondiscriminatory access to the national pipeline grid through the investigation of complaints and allegations of abuses. Requiring such information assists the Commission to protect customers from excessive transportation rates and service discrimination. As pipelines are permitted to implement more nontraditional forms of pricing and service, the Commission will monitor the industry to ensure the pipelines are not being preferential or unduly discriminatory, charging unjust and unreasonable rates, or providing services that are inadequate or undesirable.

These requirements conform to the Commission's plan for efficient information collection, communication, and management through the advancement of information technology within the natural gas industry. The Commission has assured itself, by means of its internal review, that there is specific, objective support for the burden estimate associated with the information requirement.

Interested persons may obtain information on the reporting requirements by contacting the following: Federal Energy Regulatory Commission, 88 First Street, NE, Washington, DC 20426 [Attention: Michael Miller, Division of Information Services, Phone: (202) 208–1415, fax: (202) 273–0873, email:michael.miller@ferc.fed.us]

For submitting comments concerning the collection of information(s) and the associated burden estimate(s), please send your comments to the contact listed above and to the Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503 [Attention: Desk Officer for the Federal Energy Regulatory Commission, phone: (202) 395–3087, fax: (202) 395–7285]

VII. Comment Procedures

The Commission invites interested persons to submit written comments or other information concerning this proposed rulemaking. All comments in response to this notice must be filed with the Office of the Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, and should refer to Docket No. RM98–7–000. An original and fourteen (14) copies of such comments should be filed with the Commission on or before June 18, 1998. All comments will be placed in the Commission's public files and will be available for inspection in the Commission's public reference room at 888 First Street, NE, Washington, DC, 20426, during business hours. Additionally, comments can be viewed and printed remotely via the Internet through FERC's Homepage using the RIMS link or the Energy Information Online icon. User assistance is available at 202–208–2222, or by E-mail to RimsMaster@FERC.fed.us.

List of Subjects in 18 CFR Part 161

Natural gas, Reporting and recordkeeping requirements.

By direction of the Commission. Commissioner Massey concurred with a separate statement attached.

Linwood A. Watson, Jr.,

Acting Secretary.

In consideration of the foregoing, the Commission proposes to amend Part 161, Chapter I, Title 18 of the *Code of Federal Regulations*, as set forth below.

PART 161—STANDARDS OF CONDUCT FOR INTERSTATE PIPELINES WITH MARKETING AFFILIATES

1. The authority citation for Part 161 continues to read as follows:

Authority: 15 U.S.C. 717–717w, 3301–3432; 42 U.S.C. 7101–7352.

2. In Section 161.3, paragraph (l) is added to read as follows:

§ 161.3 Standards of conduct.

* * * * *

(1) A pipeline must post the names and addresses of its marketing affiliates on its web site on the public Internet and update the information within three business days of any change. A pipeline must also state the date the information was last updated. Postings must conform with the requirements of § 284.10 of this chapter.
(Issued May 13, 1998)

MASSEY, Commissioner, *concurring*:

The general proposal in today's Notice of Proposed Rulemaking has my full support. A requirement that pipelines report on their Internet websites the names of their marketing affiliates or changes in the status of their marketing affiliates is necessary to provide the Commission and the industry with information that may otherwise be unavailable in today's rapidly changing market environment.

The proposal raises one question, however, which I believe should be pursued further. Is the proposed requirement that pipelines update information about their affiliates within three business days of a change in status sufficient to meet the needs of the Commission and the industry at large?

I would prefer a requirement for reporting within 24 hours, and want to make three points related to this issue. First, the NOPR offers no justification for the three day time period. Second, it is widely known that with today's technology, updating information of this nature on a pipeline website is not burdensome. Therefore, the ability to add vital information in a shorter time frame would not be problematic. Finally, the Commission has required companies in the other industries we regulate to make similar updates in a 24-hour time period. For example, the Commission's regulations require electric transmission providers to report to the Commission and on the OASIS each emergency that results in any deviation from the Commission's standards of conduct within 24 hours of the deviation.[1] Pipelines are required to post discounts given to their affiliates within 24 hours of the time at which gas first flows.[2] Hydroelectric power licensees have agreed to reporting deviations from state water quality standards within 24 hours.[3] As the industry contemplates the Commission's proposal, I would welcome comment on this issue.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

18 CFR Part 385

Federal Energy Regulatory Commission.

[Docket No. PL98–1–000]

Public Access to Information and Electronic Filing; Request For Comments and Notice of Intent to Hold technical Conference

May 13, 1998.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Request for Comments for Notice of Intent to Hold Technical Conference.

SUMMARY: The Federal Energy Regulatory Commission (Commission) intends to develop a comprehensive information management system that accepts filings and disseminates information electronically. The Commission seeks public comment to determine the best way to implement its electronic filing initiative. After reviewing the comments, the Commission intends to hold a technical conference to discuss its implementation process.

DATES: Comments are due June 30, 1998.

ADDRESSES: Send comments to: Office of the Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT:
Brooks Carter, Office of the Chief Information Officer, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, (202) 501–8145.
Carolyn Van Der Jagt, Office of the General Counsel, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, D.C. 20426, (202) 208–2246.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in the Public Reference Room at 888 First Street, NE, Room 2A, Washington, DC 20426.

The Commission Issuance Posting System (CIPS) provides access to the texts of formal documents issued by the Commission. CIPS can be accessed via Internet through FERC's Homepage (http://www.ferc.fed.us) using the CIPS Link or the Energy Information Online icon. The full text of this document will be available on CIPS in ASCII and WordPerfect 6.1 format. CIPS is also available through the Commission's electronic bulletin board service at no charge to the user and may be accessed using a personal computer with a modem by dialing 202–208–1397, if dialing locally, or 1–800–856–3920, if dialing long distance. To access CIPS, set your communications software to 19200, 14400, 12000, 9600, 7200, 4800, 2400, or 1200 bps, full duplex, no parity, 8 data bits and 1 stop bit. User assistance is available at 202–208–2474 or by E-mail to CipsMaster@FERC.fed.us.

This document is also available through the Commission's Records and Information Management System (RIMS), an electronic storage and retrieval system of documents submitted to and issued by the Commission after November 16, 1981. Documents from November 1995 to the present can be viewed and printed. RIMS is available in the Public Reference Room or remotely via Internet through FERC's Homepage using the RIMS link or the Energy Information Online icon. User assistance is available at 202–208–2222, or by E-mail to RimsMaster@FERC.fed.us.

Finally, the complete text on diskette in WorkPerfect format may be purchased from the Commission's copy contractor, La Dorn System Corporation. La Dorn Systems Corporation is located in the Public Reference Room at 888 First Street, NE., Washington, DC 20426.

I. Introduction

The growing availability and use of electronic media and the increasing competitiveness of the natural gas, oil, and electric industries are compelling the Federal Energy Regulatory Commission (Commission) to manage its information resources more strategically. Advances in information technology (IT) permit the filing and dissemination of information at a faster rate and more cost-effectively than the traditional paper distribution methods.

The Commission's ultimate goal is to improve its use of IT to reduce regulatory burdens, cut processing times, simplify filing processes, and generate better information for use by its staff, regulated industries, and the public. The Commission views its efforts to implement a system for electronic filing and dissemination of information as a large and complex undertaking. It believes that certain

UMI
VOL
63
ISS
96
MY
19
1998
UMI

aspects of electronic filings could be implemented relatively easily in the near future, whereas, other aspects may take more time to develop.

The Commission requests comments to determine the best way to proceed with developing a faster, more cost-efficient electronic system for accepting, processing, and distributing the myriad of filings that it currently receives on paper. The Commission requests input from the industries it regulates and other interested parties, including software developers and standards setting organizations. After reviewing the comments, the Commission intends to hold a technical conference to discuss its implementation process and to establish various working groups to investigate the requirements necessary for the Commission to achieve its goal of moving towards a more efficient, cost-effective, paperless environment and the options available to meet that goal. The Commission will issue a separate, later notice announcing the date, time, and location for the technical conference.

II. Background

On November 7, 1997, the Chairman of the Commission hosted a round table forum to discuss reform of the Commission's regulatory processes. The November 7 symposium focused on public access to information and standards for electronic filing. The round-table forum included Commission staff and representatives of oil and natural gas pipelines, electric utilities, hydropower interests, customer groups, and other agencies with experience in electronic filing. The symposium featured a presentation by officials of the National Energy Board of Canada, who described their electronic filing program, and an on-line demonstration of the Federal Communication Commission's (FCC) Internet World Wide Web Site.[1] Generally, the symposium participants enthusiastically supported the Commission's endeavors to further proceed with electronic filing.

The Commission previously has developed regulations for electronic filing of certain information as part of its ongoing effort to improve its ability to process information and provide information to the public. Gas pipelines file tariffs electronically and file various portions of their rate cases in specified electronic format.[2] Electric utilities proposing to merge file certain competitive analyses data electronically.[3] Electric utilities and licensees who file FERC Form No. 1 file that form electronically.[4] Other reports and forms also are filed electronically.[5] The Commission further has encouraged those who comment on proposed rules to file copies of their comments in electronic format on diskette and by Internet E-Mail.[6]

The Commission believes that electronic filing should be more efficient and cost-effective for both the Commission and those filing with the Commission. For the filer, electronic filing is faster than paper filing and eliminates the need to arrange for messenger or other services to hand deliver paper copies of the Commission. For the Commission, electronic filing eliminates the need to process paper filings, and electronic files are easier, and take less space to store than paper files.

Perhaps even more important, electronic files provide enhanced retrieval and document processing capability. Electronic files can be posted on the Internet or other electronic mediums for viewing and downloading. Search and other electronic cataloguing programs can be used to find specific information. Finally, portions of electronic files can be copied and pasted into other documents.

III. Request for Comments

The Commission requests comments that address the issues and questions raised below.

A. Filing Format

Establishing the format(s) for electronically filed documents creates numerous complex requirements, including finding a format(s) that: (1) is easy for the filing party to create; (2) is easy for the Commission to process electronically with minimal human interaction; (3) can be quickly and accurately published on the Commission's home page for viewing and downloading using most common browsers; (4) complies with the record retention requirements of the National Archives and Records Administration (NARA); and (5) is searchable and from which text or other information can be exported into other documents or applications. Commenters should consider these issues in their comments.

The filings the Commission presently accepts, processes, and distributes vary from routine text-only filings to complex environmental and engineering data in natural gas certificate and hydroelectronic filings that include tables, graphs, charts, maps, blueprints, and photographs. Some of these documents are small and could be filed electronically relatively easily. However, some filings are quite large and may require different consideration. The Commission believes that certain types of documents common to all industries, such as tariff filings, could be filed in the same format. However, the Commission does not believe that one particular format would be suitable for all times of filings.

Possible electronic filing formats include, but are not limited to: native proprietary and non-proprietary word processing spreadsheet, or text formats; Standard Generalized Markup Language (SGML); Hypertext Markup Language (HTML); Extensible Markup Language (XML); Portable Document Format (PDF); and Rich Text Format (RTF).

Each format option has its own particular advantages and limitations. For example, using numerous native proprietary and non-proprietary formats is the least expensive option for filers. However, the Commission would have to support all the different software products and versions. Further, anyone downloading the filed documents would also need the same capabilities unless the Commission converts the documents into one usable format.[7] Converting files raises several additional concerns. Different formats do not always accurately convert into the new format. Some conversions do not preserve the original fonts; certain text enhancements such as bolding and underlining may be eliminated; or the conversion drops footnote numbers or converts them to text. This also creates the problem of verifying the accuracy of the converted document.

HTML works well for major natural gas certificate filings because it is relatively easy to incorporate graphs, charts, and other types of information into HTML documents. However, each word processing or spreadsheet application converts to HTML according

---

[1] Commission staff also demonstrated the Commission's Internet site, which came on-line on November 10, 1997.

[7] For example, the FCC accepts tariff documents in 44 different formats and converts the documents to PDF files.

to its own specifications and will not always handle sophisticated formatting options. Additionally, hand coding of HTML may be required to improve the presentation of the document.

SGML and XML may be difficult to use and would require users to purchase additional software. Further, the Commission would have to develop the Document Type Definitions for any filings based on those standards. PDF preserves the integrity of the original document, so that the PDF document looks like the document as if it were printed by the original word processing format. It also converts tables and other graphics. However, it has limited search capabilities and filers would have to purchase Adobe Systems Incorporated's software in order to create documents in PDF format.

This is just a partial list of some of the problems and limitations that the Commission perceives as issues in determining the appropriate format(s) for its electronic filing initiative. Below is a list of questions on which the Commission would like comments to assist it in evaluating different formats it could use for electronic filings. This list is not meant to be all inclusive. Commenters are invited to present any additional information that may be relevant to the Commission's investigation. When responding to the questions, the commenter should note if its response is affected by the type of filing it makes and/or by certain industry-specific requirements.[8]

Specifically, the Commission seeks comments on the following: (1) What format(s) should the Commission consider for its different types of filings (please specify)? (2) What are the pros and cons of each format and what should the Commission and/or filer do to remedy the cons? (3) Are there certain filings for which the Commission can implement electronic filing relatively easily in the near future (please specify)? (4) What types of filings will require more time and effort to implement electronic filing (please specify): (5) How do you think the Commission should proceed in selecting which format(s) to use for which filings?

B. Citations

Another problem with electronic filing is maintaining comparability in citation format between electronic and printed versions of a document. The user of an electronic document must be able to locate the appropriate portion of the document cited by someone who used the paper copy.

As discussed above, PDF format is designed to maintain the structure and page formatting of the original document. Another alternative that eliminates the problems of matching page numbers band improves citation accuracy is for the filer to number the paragraphs in the filing. Numbering paragraphs will permit accurate citation because the numbering is not susceptible to changes resulting from margin or printer settings. (6) What citation format should the Commission establish for electronic filings and issued documents?

C. Signatures

The Commission's regulations require that all filings with the Commission must be signed.[9] The existence of such a requirement, created when documents were filed on paper, raises a number of questions when documents are filed electronically. (7) Is the signature requirement important enough to be retained? (8) If the Commission does not require signatures, how would the filing party verify that the contents of the filing are true? (9) If only certain filings need to be signed, should the Commission establish electronic signature requirements for those specific filings (please specify)?

D. Privileged Material

While much of the information filed with the Commission is subject to public disclosure, the Commission's regulations exempt certain information. For example, site-specific historic preservation information in archaeological survey reports is considered non-public information. (10) How should privilege documents be handled? (11) How should documents be filed that are only partially privileged?

E. Methods of Electronic Filing

The Commission currently receives its filings on 3½-inch diskettes formatted for MS–DOS based computers. However, the Commission has found that diskette-type filings: (1) require time-consuming processing; (2) are cumbersome to store; and (3) are susceptible to viruses. In one instance, in Docket No. CP98–97–000 the Commission received, as a demonstration project, a certificate application from Great Lakes Gas Transmission Limited Partnership which was formatted in HTML on a CD–ROM. With some modifications, the Commission posted the application on its Internet site.

There are several methods the Commission can use to accommodate electronic filings. For very simple filings, such as motions to intervene, the Commission can use an HTML form that intervenors can complete interactively. Information from the intervention could be loaded into a service list database, which in turn could be updated on the Commission's web site. In other cases, the Commission could use an HTML form for basic filer information to which the filer would have the ability to attach files and upload them to the Commission via the Internet. (12) which method(s) should the Commission use for electronic filing: (i) the HTML forms approaches discussed below; (ii) computer-to-computer using a leased line/private network; (iii) uploading to the Commission's electronic bulletin board; or (iv) some other method (please specify)? (13) Should the Commission consider different methods for different types of filings (please specify)? (14) How should the Commission handle large filings?

F. The Hearing Process

Electronic filing of documents will affect the Commission's hearing process in a number of ways. Although motions, pleadings, and testimony are filed with the Commission in the same manner as other filings, discovery requests and responses between and among participants generally are not required to be filed. Discovery often involves unique accommodations. For instance, a participant may be invited to review voluminous files of documents related to a particular matter. It may be that only a tiny subset of those documents is eventually introduced at hearing or relied on by witnesses in the proceeding. Exhibits introduced at hearings are also not filed by the participants, but are instead submitted to the court reporter for introduction into the record. Participants at Commission hearings currently rely on paper copies of filed documents, and on paper copies of discovery request, discovery responses, and trial exhibits. (15) How should the discovery process be modified, if at all, to accommodate electronic filing? (16) How should trial exhibits be introduced into the record to accommodate electronic filing? (17) How should trials be conducted if pleadings, testimony, and exhibits have been filed and served electronically?

G. Oaths, Attestations, and Notarization

Certain filings require verification under oath, attestations, or notarization. For example, under Parts 34 of the

[8] The Appendix to this order contains a compendium of the questions contained in the body of the order.

[9] 18 CFR 385.2005 (1997).

Commission's regulations and the Federal Power Act, an application for authority to issue securities requires that the application be signed by an authorized representative and be verified under oath. (18) To the extent such verification is only required by the Commission's regulations and not be statute, are these requirement important enough to be retained? (19) How should the Commission accommodate filings which require verification under oath, attestations, and notarization?

H. Security, Integrity, and Authentication

The security, integrity, and authentication of electronic filings is a significant concern. (20) Should the Commission consider any special authentication or security measures, such as encryption, digital signatures, logon ID's, and passwords? (21) Are special measures only needed for certain documents (please specify)? (22) What steps should the Commission take to detect security breaches in filings? (23) How should the security breaches be handled?

I. Automatic Acknowledgment

The Commission intends to implement an automatic acknowledgment mechanism. (24) How should the Commission provide automatic acknowledgment? (25) Should the receipt be sent to the web browser or by E-Mail? (26) How should the Commission notify the filer of the docket number of an electronic filing in a new proceeding? (27) Would posting the docket number on the Commission's Internet site be sufficient?

J. Service

The Commission's regulations currently do not prevent parties from agreeing to electronic service.[10] The Commission intends to clarify its rules to better facilitate electronic service. Additionally, the Commission presently provides paper copies of its issuances to all parties in a proceeding. It intends to provide electronic service for its issuances in the future. (28) Should the Commission encourage electronic service between parties over the Internet? (29) Should the Commission facilitate electronic service by posting documents on its Internet site or should the party making the filing make it available on its own Internet site? (30) Is it adequate for the Commission to serve notice to the parties in a proceeding that it has issued an order or should it disseminate the order directly to the parties electronically?

[10] *See* 18 CFR 385.2010(f)(2).

IV. Public Comment Procedures

The Commission invites interested persons to submit comments, data views, and other information concerning the matters set out above.

To facilitate the Commission's review of the comments, commenters are requested to provide an executive summary of their position on the issues raised. Commenters are requested to identify the specific question posed that their discussion addresses and to use appropriate headings. Additionally, commenters should double space their comments.

The original and 14 copies of such comments must be received by the Commission before 5:00 p.m., June 30, 1998. Comments should be submitted to the Office of the Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington DC 20426 and should refer to Docket No. PL98–1–000.

Additionally, comments should be submitted electronically. Commenters are encouraged to file comments using Internet E-Mail.

Comments should be submitted through the Internet by E-Mail to comment.rm@ferc.fed.us in the following format: on the subject line, specify Docket No. PL98–1–000; in the body of the E-Mail message, specify the name of the filing entity and the name, telephone number, and E-Mail address of a contact person; and attach the comment in WordPerfect 6.1 or lower format or in ASCII format as an attachment to the E-Mail message. The Commission will send a reply to the E-Mail to acknowledge receipt. Questions or comments on electronic filing using Internet E-Mail should be directed to Brooks Carter at 202 501–8145, E-Mail address brooks.carter@ferc.fed.us.

Commenters also can submit comments on computer diskette in WordPerfect 6.1 or lower format or in ASCII format, with the name of the filer and Docket No. PL98–1–000 on the outside of the diskette.

All comments will be placed in the Commission's public files and will be available for inspection in the Commission's Public Reference room at 888 First Street, NE., Washington, DC 20426, during regular business hours. Additionally, comments can be viewed and printed remotely via the Internet through FERC's Homepage using the RIMS link or the Energy Information Online icon. User assistance is available at 202–208–2222, or by E-mail to RimsMaster@FERC.fed.us.

By direction of the Commission.

Linwood A Watson, Jr.,

Acting Secretary.

Appendix—Index of Questions

For the ease of those submitting comments, the following is a compendium of the questions contained in body of this order:

Filing formats

(1) What format(s) should the Commission consider for its different types of filings (please specify)?

(2) What are the pros and cons of each format and what should the Commission and/or filer do to remedy the cons?

(3) Are there certain filings for which the Commission can implement electronic filing relatively easily in the near future (please specify)?

(4) What types of filings will require more time and effort to implement electronic filing (please specify)?

(5) How do you think the Commission should proceed in selecting which format(s) to use for which filings?

Citations

(6) What citation format should the Commission establish for electronic filings and issued documents?

Signatures

(7) Is the signature requirement important enough to be retained?

(8) If the Commission does not require signatures, how would the filing party verify that the contents of the filing are true?

(9) If only certain filings need to be signed, should the Commission establish electronic signature requirements for those specific filings (please specify)?

Privileged Material

(10) How should privileged documents be handled?

(11 How should documents be filed that are only partially privileged?

Methods of Electronic Filing

(12) Which method(s) should the Commission use for electronic filing: (i) the approaches discussed above; (ii) computer-to-computer using a leased line/private network; (iii) uploading to the Commission's electronic bulletin board; or (iv) some other method (please specify)?

(13) Should the Commission consider different methods for different types of filings (please specify)?

(14) How should the Commission handle large filings?

The Hearing Process

(15) How should the discovery process be modified, if at all, to accommodate electronic filing?

(16) How should trial exhibits be introduced into the record to accommodate electronic filing?

(17) How should trials be conducted if pleadings, testimony, and exhibits have been filed and served electronically?

Oaths, Attestations, and Notarization

(18) To the extent such verification is only required by the Commission's regulations

and not be statute, are these requirements important enough to be retained?

(19) How should the Commission accommodate filings which require verification under oath, attestations, and notarization?

Security, Integrity, and Authentication

(20) Should the Commission consider any special authentication or security measures, such as encryption, digital signatures, logon ID's and passwords?

(21) Are special measures only needed for certain documents (please specify)?

(22) What steps should the Commission take to detect security breaches in filings?

(23) How should the security breaches be handled?

Automatic Acknowledgment

(24) How should the Commission provide automatic acknowledgment?

(25) Should the receipt be sent to the web browser or by E-Mail?

(26) How should the Commission notify the filer of the docket number of an electronic filing in a new proceeding?

(27) Would posting the docket number on the Commission's Internet site be sufficient?

Service

(28) Should the Commission encourage electronic service between parties over the Internet?

(29) Should the Commission facilitate electronic service by posting documents on its Internet site or should the party making the filing make it available on its own Internet site?

(3) Is it adequate for the Commission to serve notice to the parties in a proceeding that it has issued an order, or should it disseminate the order directly to the parties electronically?

BILLING CODE 6717–01–M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR PART 123

[RIN 1515–AB88]

Foreign-Based Commercial Motor Vehicles in International Traffic

AGENCY: Customs Service, Department of the Treasury.

ACTION: Proposed rule.

SUMMARY: This document proposes to revise the Customs Regulations to allow certain foreign-based commercial motor vehicles, which are admitted as instruments of international traffic, to engage in the transportation of merchandise between points in the United States where such transportation is incidental to the immediately prior or subsequent engagement of such vehicles in international traffic. Any movement of these vehicles in the general direction of an export move or as part of the return movement of the vehicles to their base country shall be considered incidental to the international movement. The benefit of this liberalization of current cabotage restrictions inures in particular to both the United States and foreign trucking industries inasmuch as it allows more efficient and economical utilization of their respective vehicles both internationally and domestically.

DATE: Comments must be received on or before July 20, 1998.

ADDRESSES: Written comments (preferably in triplicate) may be addressed to and inspected at the Regulations Branch, U.S. Customs Service, 1300 Pennsylvania Avenue, NW., 3rd Floor, Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT:

Legal aspects: Glen E. Vereb, Office of Regulations and Rulings, 202–927–2320.

Operational aspects: Eileen A. Kastava, Office of Field Operations, 202–927–0983.

SUPPLEMENTARY INFORMATION:

Background

Section 141.4(a), Customs Regulations (19 CFR 141.4(a)), provides that entry as required by 19 U.S.C. 1484(a) shall be made of all merchandise imported into the United States unless specifically excepted. Foreign-based commercial motor vehicles are not among those excepted items listed in § 141.4(b) and would therefore be subject to entry and payment of any applicable duty unless otherwise exempted by law or regulations.

Pursuant to 19 U.S.C. 1322, vehicles and other instruments of international traffic shall be excepted from the application of the Customs laws to such extent and subject to such terms and conditions as may be prescribed in regulations or instructions of the Secretary of the Treasury.

This statutory mandate pertaining to foreign-based commercial motor vehicles is implemented under § 123.14 of the Customs Regulations (19 CFR 123.14). Section 123.14(a) states that to qualify as instruments of international traffic, such vehicles having their principal base of operations in a foreign country must be arriving in the United States with merchandise destined for points in the United States, or arriving empty or loaded for the purpose of taking merchandise out of the United States.

Section 123.14(c), Customs Regulations, states that with one exception, a foreign-based commercial motor vehicle, admitted as an instrument of international traffic under § 123.14(a), shall not engage in local traffic in the United States. The exception, set out in § 123.14(c)(1), states that such a vehicle, while in use on a regularly scheduled trip, may be used in local traffic that is directly incidental to the international schedule.

Section 123.14(c)(2), Customs Regulations, provides that a foreign-based truck trailer admitted as an instrument of international traffic may carry merchandise between points in the United States on the return trip as provided in § 123.12(a)(2) which allows use for such transportation as is reasonably incidental to its economical and prompt departure for a foreign country.

In regard to these cabotage restrictions, Customs has received a petition from the American Trucking Association (ATA) requesting a change in Customs interpretation of its regulations governing the use of foreign-based trucks in local traffic in the United States. This petition is the culmination of joint discussions beginning in July of 1994 between the ATA and the Canadian Trucking Association (CTA) to obtain mutually agreed upon parameters with respect to the liberalization of current truck cabotage restrictions in their respective countries. The proposed amendments would, however, be universally applicable.

By way of additional background, reference is hereby made to a notice published in the Customs Bulletin pursuant to 19 U.S.C. 1625(c)(1) (see 31 Cust. Bull. and Dec. No. 40, 7 (October 1, 1997)), which revised the interpretation of when a foreign-based truck would be considered as used in international traffic under existing § 123.14. However, the proposal provided for herein regarding the use of a foreign-based commercial motor vehicle, including a truck, in permissible local traffic under § 123.14(c) was, of course, not addressed in the Customs Bulletin notice. To effect this change requires an amendment under the Administrative Procedure Act, 5 U.S.C. 553.

Accordingly, Customs has determined to propose such an amendment of § 123.14(c), which would allow certain foreign-based commercial motor vehicles, admitted as instruments of international traffic, to engage in the transportation of merchandise between points in the United States where such local traffic is incidental to the immediately prior or subsequent engagement of such vehicles in international traffic. In addition, this

revision would eliminate the current requirement that such international traffic be regularly scheduled. Furthermore, any movement of these vehicles in the general direction of an export move or as part of the return movement of the vehicles to their base country shall be considered incidental to the international movement.

In conjunction with the proposed amendments to § 123.14, this document also includes proposed conforming amendments to § 123.16 regarding the return of the qualifying vehicles to the United States.

Comments

Before adopting the proposed amendments, consideration will be given to any written comments that are timely submitted to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Branch, 1300 Pennsylvania Avenue, NW., 3rd Floor, Washington, DC.

Regulatory Flexibility Act and Executive Order 12866

The proposed rule would greatly relax current cabotage restrictions for both the U.S. and foreign trucking industries, enabling more efficient and economical use of their respective vehicles both internationally and domestically. As such, under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), it is certified that, if adopted, the proposed amendments will not have a significant economic impact on a substantial number of small entities. Nor would the proposed rule result in a "significant regulatory action" under E.O. 12866.

List of Subjects in 19 CFR Part 123

Administrative practice and procedure, Canada, Common carriers, Customs duties and inspection, Imports, International traffic, Motor carriers, Railroads, Trade agreements, Vehicles.

Proposed Amendments to the Regulations

It is proposed to amend part 123, Customs Regulations (19 CFR part 123), as set forth below.

PART 123—CUSTOMS RELATIONS WITH CANADA AND MEXICO

1. The general authority citation for part 123, and the relevant sectional authority citation, would continue to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 20, Harmonized Tariff Schedule of the United States (HTSUS), 1431, 1433, 1436, 1448, 1624.

* * * * *

Sections 123 13—123.18 also issued under 19 U.S.C. 1322;

* * * * *

2. It is proposed to amend § 123.14 by revising paragraph (c)(1) to read as follows:

§ 123.14 Entry of foreign-based trucks, busses and taxicabs in international traffic.

* * * * *

(c) * * *

(1) The vehicle may carry merchandise or passengers between points in the United States if such carriage is incidental to the immediately prior or subsequent engagement of that vehicle in international traffic. Any such carriage by the vehicle in the general direction of an export move or as part of the return of the vehicle to its base country shall be considered incidental to its engagement in international traffic.

* * * * *

3. It is proposed to amend § 123.16 by revising paragraph (b) to read as follows:

§ 123.16 Entry of returning trucks, busses, or taxicabs in international traffic.

* * * * *

(b) *Use in local traffic.* Trucks, busses, and taxicabs in use in international traffic, which may include the incidental carrying of merchandise or passengers for hire between points in a foreign country, or between points in this country, shall be admitted under this section. However, such vehicles taken abroad for commercial use between points in a foreign country, otherwise than in the course of their use in international traffic, shall be considered to have been exported and must be regularly entered on return.

Approved: March 31, 1998.

Samuel H. Banks,

Acting Commissioner of Customs.

John P. Simpson,

Deputy Assistant Secretary of the Treasury.

RIN 1545–AU99

Return of Partnership Income; Hearing Cancellation

AGENCY: Internal Revenue Service, Treasury.

ACTION: Cancellation of notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of cancellation of a public hearing on proposed regulations relating to partnership returns.

DATES: The public hearing originally scheduled for Tuesday, May 19, 1998, beginning at 10:00 a.m., is cancelled.

FOR FURTHER INFORMATION CONTACT: Mike Slaughter of the Regulations Unit, Assistant Chief Counsel (Corporate), 202) 622–7190 (not a toll-free number).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 6031 and 6063 of the Internal Revenue Code. A notice of proposed rulemaking and notice of public hearing appearing in the **Federal Register** on Monday, January 26, 1998 (63 FR 3677), announced that the public hearing would be held on Tuesday, May 19, 1998, beginning at 10:00 a.m., in the IRS Auditorium, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC.

The public hearing scheduled for Tuesday, May 19, 1998, is cancelled.

Michael L. Slaughter,

Acting Chief, Regulations Unit, Assistant Chief Counsel (Corporate).

RIN 2900–AJ15

Board of Veterans' Appeals: Rules of Practice—Revision of Decisions on Grounds of Clear and Unmistakable Error

AGENCY: Department of Veterans Affairs.

ACTION: Proposed rule.

SUMMARY: The Department of Veterans Affairs (VA) proposes to amend the Rules of Practice of the Board of Veterans' Appeals (Board) to implement the provisions of section 1(b) of Pub. L.

105–111 (Nov. 21, 1997), which permits challenges to Board decisions on the grounds of "clear and unmistakable error" (CUE). The amendments would provide specific application procedures; establish decision standards based on case law; and eliminate as duplicative the Board Chairman's discretionary review under "reconsideration" on the basis of obvious error. These changes are necessary to implement the new statutory provisions, which permit a claimant to demand review by the Board to determine whether CUE exists in an appellate decision previously issued by the Board, with a right of review of such determinations by the U.S. Court of Veterans Appeals.

DATES: Comments must be received on or before July 20, 1998.

ADDRESSES: Mail or hand-deliver written comments to: Director, Office of Regulations Management (02D), Department of Veterans Affairs, 810 Vermont Ave., NW, Room 1154, Washington, DC 20420. Comments should indicate that they are submitted in response to "RIN 2900–AJ15." All written comments will be available for public inspection at the above address in the Office of Regulations Management, Room 1158, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays).

FOR FURTHER INFORMATION CONTACT: Steven L. Keller, Chief Counsel, Board of Veterans' Appeals, Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 565–5978.

SUPPLEMENTARY INFORMATION: The Board of Veterans' Appeals (Board) is an administrative body that decides appeals from denials of claims for veterans' benefits. There are currently 60 Board members, who decide 35,000 to 40,000 such appeals per year.

This document proposes to amend the Board's Rules of Practice to implement the provisions of section 1(b) of Pub. L. 105–111 (Nov. 21, 1997), which permits a claimant to demand review by the Board to determine whether "clear and unmistakable error" (CUE) exists in an appellate decision previously issued by the Board, with a right of review of such determinations by the U.S. Court of Veterans Appeals.

The VA Appeals Process in General

The Secretary of Veterans Affairs decides all questions of law and fact necessary to a decision under a law that affects the provision of benefits by the Secretary to veterans, or the dependents or survivors of veterans. 38 U.S.C. 511(a). The Secretary has delegated most of these decisions to "agencies of original jurisdiction" (AOJs), typically the 58 regional offices (ROs) maintained by the Department of Veterans Affairs (VA). See 38 CFR 2.6(b) (delegation to Under Secretary for Benefits).

Decisions under 38 U.S.C. 511(a) are subject to one review on appeal to the Secretary. 38 U.S.C. 7104(a). Final decisions on those appeals are made by the Board. *Id.* A decision by an AOJ that is not appealed within one year becomes final, and can be reopened only with "new and material evidence." 38 U.S.C. 5108, 7105(c).

The appeals process begins when a claimant files a "notice of disagreement," which must be filed within one year of the decision. 38 U.S.C. 7105 (a) and (b). The VA office that made the decision reviews the claim and, if benefits are not granted, provides the claimant with a "statement of the case." *Id.* 7105(d)(1). The claimant then must file a formal appeal with the Board. *Id.* 7105(d)(3). The Board decides appeals on the entire record in the case. *Id.* 7104(a). The Board may make a final decision—allowing or denying the appeal—or may remand the matter to the AOJ for development of additional factual material. 38 CFR 19.9.

If an appellant does not agree with the Board's final decision, and the notice of disagreement in the case was filed on or after November 18, 1988, the appellant has 120 days to appeal the Board's decision to the U.S. Court of Veterans Appeals. 38 U.S.C. 7266(a); Pub. L. 100–687, Div. A, § 402, reprinted at 38 U.S.C. 7251 note. (As enacted, the Veterans' Judicial Review Act, which established the Court of Veterans Appeals, permitted judicial review of Board decisions only in cases in which a notice of disagreement was filed on or after the effective date of the Act, i.e., November 18, 1988.)

Other Remedies

Once a VA decision has become final—whether by completion or abandonment of the appeals process described above—there are, generally, three ways to revive the claim.

First, if a claimant submits new and material evidence, VA will reopen and reconsider the claim. 38 U.S.C. 5108. Such claims are subject to the full range of appellate procedures described above.

Second, if a claim decision is final because there was never a formal appeal filed with the Board, and the determination was made by an RO, a claimant may allege that the decision was the result of CUE. 38 CFR 3.105(a). Such claims are subject to the full range of appellate procedures described above. *Russell* v. *Principi*, 3 Vet. App. 310 (1992). However, prior to enactment of Pub. L. 105–111, a final unappealed RO decision that is subsequently reopened with new and material evidence and adjudicated on the merits by the Board could not later be the subject of a claim of CUE. *Donovan* v. *Gober*, 10 Vet. App. 404 (1997).

Finally, if there has been a final Board decision on a claim, an appellant may request that the Chairman of the Board order "reconsideration" under 38 U.S.C. 7103. If the Chairman orders reconsideration, the prior decision is vacated, and a panel of Board members makes a new decision based on the entire record. The panel decision is subject to appeal to the Court of Veterans Appeals only if the notice of disagreement filed in connection with the original matter was filed on or after November 18, 1988. The Chairman's decision not to grant reconsideration is not subject to appeal independently of the underlying Board decision. *Mayer* v. *Brown*, 37 F.3d 618, 620 & n.3 (Fed. Cir. 1994) (holding that there was no jurisdiction to review the Chairman's denial of a motion for reconsideration absent jurisdiction over the underlying Board decision, but reserving judgment on the issue of whether the Chairman's decision can ever be subject to judicial review).

Board decisions are not subject to a CUE challenge under 38 CFR 3.105(a). *Smith (William)* v. *Brown*, 35 F.3d 1516, 1521 (Fed. Cir. 1994). Further, unappealed RO decisions can be "subsumed" in subsequent Board decisions, so that the RO decisions are no longer subject to the review otherwise available under 38 CFR 3.105(a). *Donovan* v. *Gober*, 10 Vet. App. 404 (1997).

"Clear and Unmistakable Error"

The term "clear and unmistakable error" originated in veterans regulations some 70 years ago, *see generally Smith (William)* v. *Brown, 35 F.3d 1516, 1524–25 (Fed. Cir. 1994), and is now incorporated in VA regulations governing VA RO determinations. 38 CFR 3.105(a). The term has been interpreted by the Court of Veterans Appeals over the past several years.*

CUE is a very specific and rare kind of error. *Fugo* v. *Brown*, 6 Vet. App. 40, 43 (1993). It is the kind of error, of fact or of law, that when called to the attention of later reviewers compels the conclusion, to which reasonable minds could not differ, that the result would have been manifestly different but for the error. *Fugo*, 6 Vet. App. at 43.

A determination that there was CUE must be based on the record and the law

that existed at the time of the prior decision. *Russell* v. *Principi*, 3 Vet. App. 310, 314 (1992). Either the correct facts, as they were known at the time, were not before the adjudicator or the statutory or regulatory provisions extant at the time were incorrectly applied. *Russell*, 3 Vet. App at 313. With respect to Board decisions issued on or after July 21, 1992, the Court of Veterans Appeals has held that documents which were actually in VA's possession—even though not physically before the adjudicator—are constructively a part of the record. *Bell* v. *Derwinski*, 2 Vet. App. 611 (1992); *Damrel* v. *Brown*, 6 Vet. App. 242, 245–46 (1994).

In order for there to be a valid claim of CUE, there must have been an error in the prior adjudication of the appeal which, had it not been made, would have manifestly changed the outcome at the time it was made. *Russell*, 3 Vet. App. at 313. Thus, even where the premise of error is accepted, if it is not absolutely clear that a different result would have ensued, the error complained of cannot be clear and unmistakable. *Fugo*, 6 Vet. App. at 43–44.

A new medical diagnosis that "corrects" an earlier diagnosis ruled on by previous adjudicators is the kind of "error" that could not be considered an error in the original adjudication. *Russell*, 3 Vet. App. at 314. A claim of CUE that asserts no more than a disagreement as to how the facts were weighed or evaluated is insufficient. *Russell*, 3 Vet. App. at 313. Mere allegations of failure to follow regulations or failure to give due process, or any other general, non-specific claims of error, are insufficient to raise a claim of CUE. *Fugo*, 6 Vet. App. at 44. An allegation that the Secretary did not fulfill the duty to assist is insufficient to raise the issue of CUE. *E.g.*, *Crippen* v. *Brown*, 9 Vet. App. 412, 418 (1996).

Once there is a final decision on the issue of CUE because the RO decision was not timely appealed, or because a Board decision not to revise or amend the original RO decision was not appealed, or because the Court of Veterans Appeals has rendered a decision on the issue in that particular case, that particular claim of CUE may not be raised again. *Russell*, 3 Vet. App. at 315.

The "benefit of the doubt" rule of 38 U.S.C. 5107(b) does not apply to determinations as to whether there was CUE. *Russell*, 3 Vet. App. at 314.

"Two Tracks" for CUE Claims

The Court of Veterans Appeals has held that it has jurisdiction to review claims of CUE with respect to RO determinations based on the regulatory right assigned in 38 CFR 3.105(a). *Russell* v. *Principi*, 3 Vet. App. 310 (1992).

However, the CUE challenge available under 38 CFR 3.105(a) does not apply to Board decisions. *Smith (William)* v. *Brown*, 35 F.3d 1516, 1521 (Fed. Cir. 1994); *Wright* v. *Brown*, 9 Vet. App. 300, 303–04 (1996). Because an RO decision appealed to the Board is "subsumed" in a Board decision on the merits, such an RO decision would no longer be subject to a CUE challenge. *Donovan* v. *Gober*, 10 Vet. App. 404 (1997). The Court has held that even unappealed RO decisions are "subsumed"—and thus not subject to CUE challenges—if such claims are later reopened and decided on the merits by the Board. *Chisem* v. *Gober*, 10 Vet. App. 526 (1997).

The Effect of the Legislation

Section 1(b) of Pub. L. 105–111 changed existing law by providing that a decision by the Board is subject to revision on the grounds of CUE. The statute provides that such review may be instituted by the Board on the Board's own motion or upon request of the claimant, and that such a request may be made at any time after the Board decision is made. The Board is to decide all such requests on the merits, without referral to any adjudicative or hearing official acting on behalf of the Secretary.

The statute also provides that, notwithstanding the notice of disagreement requirements for judicial review (described earlier in this document), judicial review is available with respect to any Board decision on a claim alleging that a previous determination of the Board was the product of CUE if that claim is filed after, or was pending before VA, the Court of Veterans Appeals, the Court of Appeals for the Federal Circuit, or the Supreme Court on the date of the enactment of the Act (November 21, 1997).

The legislative history of H.R. 1090, 105th Congress, which became Pub. L. 105–111, indicates that the Congress expected the Department would implement section 1(b) of the bill in accordance with current definitions of CUE. H.R. Rep. No. 52, 105th Cong., 1st Sess. 3 (1997) (report of House Committee on Veterans' Affairs on H.R. 1090) ("Given the Court's clear guidance on this issue [of CUE], it would seem that the Board could adopt procedural rules consistent with this guidance to make consideration of appeals raising clear and unmistakable error less burdensome"); 143 Cong. Rec. 1567, 1568 (daily ed. Apr. 16, 1997) (remarks of Rep. Evans, sponsor of H.R. 1090, in connection with House passage) ("The bill does not alter the standard for evaluation of claims of clear and unmistakable error").

Implementing Regulations

The proposed regulations restate statutory provisions, restate legal standards reflecting court decisions, and establish procedures for requesting revision of a Board decision.

The proposed regulations would also eliminate the use of the Board's reconsideration process for challenges based on "obvious error," 38 CFR 20.1000(a), while continuing that process based on (1) the discovery of new and material evidence in the form of relevant records or reports of the service department concerned, or (2) an allegation that an allowance of benefits by the Board has been materially influenced by false or fraudulent evidence submitted by or on behalf of the appellant. Since the "obvious error of fact or law" standard of current 38 CFR 20.1000(a) is the same standard as that of CUE, *Smith (William)* v. *Brown*, 35 F.3d 1516, 1526 (Fed. Cir. 1994), and since the new remedy under Pub. L. 105–111 provides for a Board decision and judicial review, there is no longer any need—particularly in light of the Board's limited resources—for what is a duplicative remedy.

Accordingly, the proposed regulations would amend 38 CFR 20.1000, relating to motions for reconsideration, by deleting paragraph (a), which provides that obvious error of fact or law is a basis for reconsideration. The proposed regulations would also amend 38 CFR 20.1001(a), relating to filing motions for reconsideration, to eliminate a reference to allegations of obvious errors of fact or law.

The proposed regulations would create a new subpart O in part 20 of title 38, Code of Federal Regulations, devoted specifically to revision of Board decisions on grounds of CUE.

Proposed Rule 1400 (38 CFR 20.1400) would begin the review process with a motion, either by a party to the decision being challenged or by the Board. In addition, because it would be inappropriate for an inferior tribunal to review the actions of a superior, *Smith (William)* v. *Brown*, 35 F.3d 1516, 1526 (Fed. Cir. 1994); *Duran* v. *Brown*, 7 Vet. App. 216, 224 (1994), the rule would provide that a Board decision on an issue decided by a court of competent jurisdiction on appeal is not subject to revision on the grounds of clear and unmistakable error.

Proposed Rule 1401 (38 CFR 20.1401) would define the terms "issue" and

"party" for purposes of the proposed subpart. Generally, the term "issue" would be defined as a matter upon which the Board made a final decision (other than a decision under the proposed subpart) which was appealable under Chapter 72 of title 38, United States Code, or which would have been appealable if the Notice of Disagreement with respect to such matter had been received by the agency of original jurisdiction on or after November 18, 1988. The purposes of this definition are to clarify (1) that only final, outcome-determinative decisions of the Board are subject to revision on the grounds of CUE, so as to avoid, in the interests of judicial economy, atomization of Board decisions into myriad component parts; and (2) the scope of the finality referred to in proposed Rule 1409(c) (38 CFR 20.1409(c)), discussed later in this document. For example, since a Board remand is in the nature of a preliminary order and does not constitute a final Board decision, *Zevalkink* v. *Brown*, 6 Vet. App. 483, 488 (1994), *aff'd*, 102 F.3d 1236 (Fed. Cir. 1996), cert. denied, 117 S. Ct. 2478 (1997); 38 CFR 20.1100(b), it is not appealable under Chapter 72 of title 38, United States Code, and would not be subject to revision on the grounds of CUE. Similarly, since the jurisdiction of the Court of Veterans Appeals is limited to "decisions" of the Board, 38 U.S.C. 7252(a), individual findings of fact or conclusions of law, 38 U.S.C. 7104(d)(1), would not be subject to revision on the grounds of CUE except as part of such revision of the decision they support. At the same time, as discussed in connection with proposed Rule 1409 later in this document, once there is a final decision on a motion under this proposed subpart, the prior Board decision on the underlying "issue" would no longer be subject to revision on grounds of CUE.

Proposed Rule 1401 would also define "party" as any party to the Board proceeding that resulted in the final Board decision which is the subject of a motion under the proposed subpart. Because 38 U.S.C. 7111(c), as added by Pub. L. 105–111, limits the right to initiate CUE review to the Board and to claimants, the term would not include officials authorized to file administrative appeals pursuant to § 19.51 of this title.

Proposed Rule 1402 (38 CFR 20.1402) would clarify that motions under proposed subpart O are not appeals and, accordingly, not subject to the provisions of parts 19 and 20 of Chapter I, Title 38, Code of Federal Regulations, to the extent those provisions relate to the processing and disposition of appeals.

Proposed Rule 1403 (38 CFR 20.1403) would set forth the standards for what constitutes CUE, as well as the record to be reviewed. The various standards and the specific examples of situations that are not CUE are drawn directly from court opinions cited earlier in this document under the heading "Clear and Unmistakable Error." In addition, the rule would provide that CUE does not include the otherwise correct application of a statute or regulation where, subsequent to the Board decision challenged, there has been a change in the interpretation of the statute or regulation. This latter provision is borrowed in part from 38 CFR 3.105, discussed earlier in this document, relating to CUE in RO decisions. An interpretation of a statute or regulation could, in light of future interpretations—whether by the General Counsel or a court—be viewed as erroneous. That would not, however, be the kind of error required for CUE, i.e., an error about which reasonable persons could not differ. See VAOPGCPREC 25–95, 61 FR 10,063, 10,065 (1996) (holding that the Board's application of a subsequently invalidated regulation in a decision does not constitute obvious error or provide a basis for reconsideration of the decision).

Proposed Rule 1404 (38 CFR 20.1404) would establish filing and pleading requirements for motions for revision of a Board decision based on CUE. The rule would require specific pleading of the error, and provide that motions which fail to do so would be denied, although motions that merely fail to identify the claimant, the Board decision challenged, or the issue(s) being challenged, or which are unsigned, would be dismissed without prejudice to a proper filing. The proposed rule would also provide that a request transmitted to the Board by the Secretary pursuant to 38 U.S.C. 7111(f) (generally relating to claims for CUE filed with the Secretary) would be treated as a motion filed under this rule.

Proposed Rule 1405 (38 CFR 20.1405) would provide that motions to revise Board decisions on the grounds of CUE would be docketed in the order received and be assigned in accordance with the appellate assignment procedures in 38 CFR 19.3. The proposed rule, following the current standards applicable to reconsideration decisions, would prohibit assignment of the motion to any Board member who participated in the decision which is the subject of the motion. 38 U.S.C. 7103(b)(2); 38 CFR 19.11(c). Since a CUE determination must be made on the facts before the Board at the time the original decision was made, the rule would also provide that no new evidence would be considered in connection with the motion (although material included on the basis of proposed Rule 1403(b)(2), discussed above, would not be considered new evidence) and that the Board may, for good cause shown, grant a request for a hearing for the purpose of argument only. Nevertheless, the proposed rule would permit the Board, subject to the limitation on new evidence, to use the various AOJs to ensure completeness of the record. The Board would also be permitted to seek the opinion of the General Counsel, with notice to the party to the decision and an opportunity to respond. In accordance with the specific requirements of the new statute, the rule would prohibit referral of the motion to the AOJ or any hearing officer acting on behalf of the Secretary for the purpose of making a decision. Finally, in order to facilitate judicial review, the rule would require decisions on these motions to include separately stated findings of fact and conclusions of law, and the reasons and bases for those findings and conclusions. Cf. 38 U.S.C. 7104(d); 38 CFR 19.7(b) ("reasons and bases" requirement for appellate decisions).

Proposed Rule 1406 (38 CFR 20.1406), following the new statute, would provide that a decision of the Board that revises a prior Board decision on the grounds of CUE has the same effect as if the decision had been made on the date of the prior decision. The proposed rule would also provide that decisions that discontinue or reduce benefits would be subject to the laws and regulations governing such discontinuances or reductions based solely on administrative error or errors in judgment. See generally 38 U.S.C. 5112(b)(10) (reduction or discontinuance on such bases effective on the date of last payment).

Proposed Rule 1407 (38 CFR 20.1407) would provide special procedural rules in those cases where the Board, on its own motion, reviews a prior decision on the grounds of CUE. The rule would provide for notification to the party to the prior Board decision and that party's representative, with a period of 60 days to file a brief or argument. Nevertheless, failure of a party to so respond would not affect the finality of the Board's decision on the motion.

Proposed Rule 1408 (38 CFR 20.1408) would provide special rules in the case of challenges to Board decisions in simultaneously contested claims. See 38 U.S.C. 7105A. Generally, the rule would require notice to all parties to such

Board decisions, with limited time for non-moving parties to respond.

Proposed Rule 1409 (38 CFR 20.1409), in accordance with the discussion under "Clear and Unmistakable Error" earlier in this document, would provide that, once there is a final decision on a motion under the proposed subpart—whether initiated by a party or by the Board—with respect to a particular issue, the prior Board decision on that issue would no longer be subject to revision on the grounds of CUE and that subsequent motions on such decisions would be dismissed with prejudice. For example, if a party challenged a decision on service connection for failing to apply the proper diagnostic code in the Schedule for Rating Disabilities, 38 CFR part 4, and the Board denied the motion, a subsequent motion which alleged that the Board failed to apply the presumption of sound condition at the time of entry into service, 38 U.S.C. 1111, would be dismissed with prejudice. It would be clearly important that a moving party carefully determine all possible bases for CUE before he or she files a motion under the proposed subpart. Since the effect of a successful challenge is the same no matter when the motion is filed, i.e., the revision has the same effect as if the decision had been made on the date of the earlier decision, there is no particular filing date that must be observed in order to maximize potential benefits. At the same time, because, as the court has observed, CUE is a "very specific and rare kind of error," *Fugo* v. *Brown*, 6 Vet. App. 40, 43 (1993), and because the availability of a CUE challenge does not mean that the issue may be "endlessly reviewed," *Russell* v. *Principi*, 3 Vet. App. 310, 315 (1992) (en banc), we believe that one challenge per decision on an issue is justified not only as a proper statement of the law, but also as a rule serving the interests of judicial economy. The rule would also clarify that a dismissal without prejudice under proposed Rule 1404(a) or a referral to ensure completeness of the record under proposed Rule 1405(e) would not be a final decision of the Board.

Proposed Rule 1410 (38 CFR 20.1410) would provide that, if a Board decision is appealed to a court of competent jurisdiction, the Board will stay any consideration of a motion under this subpart with respect to that Board decision. Generally, once a case has been certified for appeal to the court on a particular issue, the Board no longer has jurisdiction. *Cerullo* v. *Derwinski*, 1 Vet. App. 195 (1991). Processing of the motion under proposed subpart O would continue upon conclusion of the court appeal or an appropriate order from the court.

Proposed Rule 1411 (38 CFR 20.1411) would set forth the relationship between motions under proposed subpart O and certain other statutes. First, in accordance with the discussion under "Clear and Unmistakable Error" earlier in this document, the rule would provide that the "benefit of the doubt" rule of 38 U.S.C. 5107(b) would not apply to determinations as to whether there was CUE. Second, because review under this proposed subpart is limited to the evidence of record at the time of the Board decision challenge, and because a motion under this subpart would be a collateral challenge to a Board decision rather than a "claim" for benefits, *cf. Duran* v. *Brown*, 7 Vet. App. 216, 223–24 (1994) (claim of CUE is a collateral attack on a prior final VA decision), the rule would also provide that a motion under this subpart is not a claim subject to reopening under 38 U.S.C. 5108 (relating to reopening claims on the grounds of new and material evidence). Third, because a motion under proposed subpart O is a statutory challenge to an otherwise final Board decision rather than an "application for benefits," the rule would provide that the notification requirements in 38 U.S.C. 5103(a) (relating to applications for benefits) would not apply to such motions. Finally, because a motion would not be a claim for benefits, and because the notion of a "well-grounded claim" would be irrelevant to a motion under proposed subpart O, the rule would provide that the "duty to assist" requirements in 38 U.S.C. 5107(a) (relating to VA's duty following the filing of a well-grounded claim) would not apply to such motions.

Attorney Fees

The proposed regulations would also add a new paragraph (4) to Rule 609(c) (38 CFR 20.609(c), relating to payment of a representative's fees in connection with VA proceedings), which would provide that the term "issue" referred to in Rule 609(c) would have the same meaning as that term in proposed Rule 1401(a), discussed earlier in this document.

Generally, attorneys may charge a fee in connection with VA proceedings only if (1) there has been a final Board decision on the issue (or issues) involved; (2) the Notice of Disagreement (discussed earlier in this document) which preceded the Board decision with respect to the issue, or issues, involved was received on or after November 18, 1988; and (3) the attorney was retained within one year of the relevant Board decision. 38 U.S.C. 5904(c)(1); 38 CFR 20.609(c).

In the case of a motion under proposed subpart O, it is our view that the issue for purposes of Rule 609 is the issue associated with the Board decision which is being challenged in the motion under proposed subpart O. Accordingly, an attorney could charge a fee in connection with a motion under proposed subpart O if (1) the challenged Board decision was preceded by a notice of disagreement received by the AOJ on or after November 18, 1988, and (2) the attorney was retained not later than one year following the date of the challenged Board decision.

We note that proposed Rule 609(c)(4) would not affect the ability of an attorney to charge a fee in connection with proceedings before a court, because such charges are not subject to VA's jurisdiction.

The Secretary hereby certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. This rule would affect only the processing of claims by VA and would not affect small businesses. Therefore, pursuant to 5 U.S.C. 605(b), this proposed rule is exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

List of Subjects in 38 CFR Part 19

Administrative practice and procedure, Claims, Veterans.

Approved: May 11, 1998.

Togo D. West, Jr.,

Secretary.

For the reasons set out in the preamble, 38 CFR part 20 is proposed to be amended as set forth below:

PART 20—BOARD OF VETERANS' APPEALS: RULES OF PRACTICE

1. The authority citation for part 20 continues to read as follows:

Authority: 38 U.S.C. 501(a).

2. In subpart G, § 20.609, paragraph (c)(4) is added to read as follows:

§ 20.609. Rule 609. Payment of representative's fees in proceedings before Department of Veterans Affairs field personnel and before the Board of Veterans' Appeals.

* * * * *

(c) * * *

(4) For the purposes of this section, in the case of a motion under Subpart O of this part (relating to requests for revision of prior Board decisions on the grounds of clear and unmistakable

error), the "issue" referred to in this paragraph (c) shall have the same meaning as "issue" in Rule 1401(a) (§ 20.1401(a) of this part).

* * * * *

§ 20.1000 [Amended]

3. In subpart K, § 20.1000 is amended by removing paragraph (a) and redesignating paragraphs (b) and (c) as (a) and (b), respectively.

§ 20.1001 [Amended]

4. In subpart K, § 20.1001(a), the second sentence is amended by removing "alleged obvious error, or errors, of fact or law in the applicable decision, or decisions, of the Board or other appropriate".

5. A new subpart O is added to read as follows:

Subpart O—Revision of Decisions on Grounds of Clear and Unmistakable Error

Sec.

20.1400 Rule 1400. Motions to revise Board decisions.
20.1401 Rule 1401. Definitions.
20.1402 Rule 1402. Inapplicability of other rules.
20.1403 Rule 1403. What constitutes clear and unmistakable error; what does not.
20.1404 Rule 1404. Filing and pleading requirements.
20.1405 Rule 1405. Disposition.
20.1406 Rule 1406. Effect of revision.
20.1407 Rule 1407. Motions by the Board.
20.1408 Rule 1408. Special rules for simultaneously contested claims.
20.1409 Rule 1409. Finality and appeal.
20.1410 Rule 1410. Stays pending court action.
20.1411 Rule 1411. Relationship to other statutes.

Subpart O—Revision of Decisions on Grounds of Clear and Unmistakable Error

§ 20.1400 Rule 1400. Motions to revise Board decisions.

(a) Review to determine whether clear and unmistakable error exists in a final Board decision may be initiated by the Board, on its own motion, or by a party to that decision (as the term "party" is defined in Rule 1401(b) (§ 20.1401(b) of this part) in accordance with Rule 1404 (§ 20.1404 of this part).

(b) A Board decision on an issue decided by a court of competent jurisdiction on appeal is not subject to revision on the grounds of clear and unmistakable error.

(Authority: 38 U.S.C. 501(a), 7111)

§ 20.1401 Rule 1401. Definitions.

(a) *Issue.* Unless otherwise specified, the term "issue" in this subpart means a matter upon which the Board made a final decision (other than a decision under this subpart) which was appealable under Chapter 72 of title 38, United States Code, or which would have been so appealable if the Notice of Disagreement with respect to such matter had been received by the agency of original jurisdiction on or after November 18, 1988.

(b) *Party.* As used in this subpart, the term "party" means any party to the proceeding before the Board that resulted in the final Board decision which is the subject of a motion under this subpart, but does not include officials authorized to file administrative appeals pursuant to § 19.51 of this title.

(Authority: 38 U.S.C. 501(a), 7104(a))

§ 20.1402 Rule 1402. Inapplicability of other rules.

Motions filed under this subpart are not appeals and, except as otherwise provided, are not subject to the provisions of parts 19 or 20 of this chapter which relate to the processing and disposition of appeals.

§ 20.1403 Rule 1403. What constitutes clear and unmistakable error; what does not.

(a) *General.* Clear and unmistakable error is a very specific and rare kind of error. It is the kind of error, of fact or of law, that when called to the attention of later reviewers compels the conclusion, to which reasonable minds could not differ, that the result would have been manifestly different but for the error. Generally, either the correct facts, as they were known at the time, were not before the Board, or the statutory and regulatory provisions extant at the time were incorrectly applied.

(b) *Record to be reviewed.*—(1) *General.* Review for clear and unmistakable error in a prior Board decision must be based on the record and the law that existed when that decision was made.

(2) *Special rule for Board decisions issued on or after July 21, 1992.* For a Board decision issued on or after July 21, 1992, the record that existed when that decision was made includes relevant documents possessed by the Department of Veterans Affairs not later than 90 days before such record was transferred to the Board for review in reaching that decision, provided that the documents could reasonably be expected to be part of the record.

(c) *Errors that constitute clear and unmistakable error.* To warrant revision of a Board decision on the grounds of clear and unmistakable error, there must have been an error in the Board's adjudication of the appeal which, had it not been made, would have manifestly changed the outcome when it was made. If it is not absolutely clear that a different result would have ensued, the error complained of cannot be clear and unmistakable.

(d) *Examples of situations that are not clear and unmistakable error.*—(1) *Changed diagnosis.* A new medical diagnosis that "corrects" an earlier diagnosis considered in a Board decision.

(2) *Duty to assist.* The Secretary's failure to fulfill the duty to assist.

(3) *Evaluation of evidence.* A disagreement as to how the facts were weighed or evaluated.

(e) *Change in interpretation.* Clear and unmistakable error does not include the otherwise correct application of a statute or regulation where, subsequent to the Board decision challenged, there has been a change in the interpretation of the statute or regulation.

(Authority: 38 U.S.C. 501(a), 7111)

§ 20.1404 Rule 1404. Filing and pleading requirements.

(a) *General.* A motion for revision of a decision based on clear and unmistakable error must be in writing, and must be signed by the moving party or that party's representative. The motion must include the name of the veteran; the name of the moving party if other than the veteran; the applicable Department of Veterans Affairs file number; and the date of the Board of Veterans' Appeals decision to which the motion relates. If the applicable decision involved more than one issue on appeal, the motion must identify the specific issue, or issues, to which the motion pertains. Motions which fail to comply with the requirements set forth in this paragraph shall be dismissed without prejudice to refiling under this subpart.

(b) *Specific allegations required.* The motion must set forth clearly and specifically the alleged clear and unmistakable error, or errors, of fact or law in the Board decision, the legal or factual basis for such allegations, and why the result would have been manifestly different but for the alleged error. Non-specific allegations of failure to follow regulations or failure to give due process, or any other general, non-specific allegations of error, are insufficient to satisfy the requirement of the previous sentence. Motions which fail to comply with the requirements set forth in this paragraph shall be denied.

(c) *Filing.* A motion for revision of a decision based on clear and unmistakable error may be filed at any time. Such motions should be filed at the following address: Director, Administrative Service (014), Board of

Veterans' Appeals, 810 Vermont Avenue, NW, Washington, DC 20420.

(d) *Requests not filed at the Board.* A request for revision transmitted to the Board by the Secretary pursuant to 38 U.S.C. 7111(f) (relating to requests for revision filed with the Secretary other than at the Board) shall be treated as if a motion had been filed pursuant to paragraph (d) of this section.

(Authority: 38 U.S.C. 501(a), 7111)

§ 20.1405 Rule 1405. Disposition.

(a) *Docketing and assignment.* Motions under this subpart will be docketed in the order received and will be assigned in accordance with § 19.3 of this part (relating to assignment of proceedings). Where an appeal is pending on the same underlying issue at the time the motion is received, the motion and the appeal may be consolidated under the same docket number and disposed of as part of the same proceeding. A motion may not be assigned to any Member who participated in the decision that is the subject of the motion. If a motion is assigned to a panel, the decision will be by a majority vote of the panel Members.

(b) *Evidence.* No new evidence will be considered in connection with the disposition of the motion. Material included in the record on the basis of Rule 1403(b)(2) (§ 20.1403(b)(2) of this part) is not considered new evidence.

(c) *Hearing.*—(1) *Availability.* The Board may, for good cause shown, grant a request for a hearing for the purpose of argument. No testimony or other evidence will be admitted in connection with such a hearing. The determination as to whether good cause has been shown shall be made by the member or panel to whom the motion is assigned.

(2) *Submission of requests.* Requests for such a hearing shall be submitted to the following address: Director, Administrative Service (014), Board of Veterans' Appeals, 810 Vermont Avenue, NW, Washington, DC 20420.

(d) *Decision to be by the Board.* The decision on a motion under this subpart shall be made by the Board. There shall be no referral of the matter to any adjudicative or hearing official acting on behalf of the Secretary for the purpose of deciding the motion.

(e) *Referral to ensure completeness of the record.* Subject to the provisions of paragraph (b) of this section, the Board may use the various agencies of original jurisdiction to ensure completeness of the record in connection with a motion under this subpart.

(f) *General Counsel opinions.* The Board may secure opinions of the General Counsel in connection with a motion under this subpart. In such cases, the Board will notify the party and his or her representative, if any. When the opinion is received by the Board, a copy of the opinion will be furnished to the party's representative or, subject to the limitations provided in 38 U.S.C. 5701(b)(1), to the party if there is no representative. A period of 60 days from the date of mailing of a copy of the opinion will be allowed for response. The date of mailing will be presumed to be the same as the date of the letter or memorandum which accompanies the copy of the opinion for purposes of determining whether a response was timely filed.

(g) *Decision.* The decision of the Board on a motion will be in writing. The decision will include separately stated findings of fact and conclusions of law on all material questions of fact and law presented on the record, the reasons or bases for those findings and conclusions, and an order granting or denying the motion.

(Authority: 38 U.S.C. 501(a), 7104(d), 7111)

§ 20.1406 Rule 1406. Effect of revision

A decision of the Board that revises a prior Board decision on the grounds of clear and unmistakable error has the same effect as if the decision had been made on the date of the prior decision. Revision of a prior Board decision under this subpart that results in the discontinuance or reduction of benefits is subject to laws and regulations governing the reduction or discontinuance of benefits by reason of erroneous award based solely on administrative error or errors in judgment.

(Authority: 38 U.S.C. 7111(b)

§ 20.1407 Rule 1407. Motions by the Board

If the Board undertakes, on its own motion, a review pursuant to this subpart, the party to that decision and that party's representative (if any) will be notified of such motion and provided an adequate summary thereof and, if applicable, outlining any proposed discontinuance or reduction in benefits that would result from revision of the Board's prior decision. They will be allowed a period of 60 days to file a brief or argument in answer. The failure of a party to so respond does not affect the finality of the Board's decision on the motion.

(Authority: 38 U.S.C. 501(a), 7111)

§ 20.1408 Rule 1408. Special rules for simultaneously contested claims.

In the case of a motion under this subpart to revise a final Board decision in a simultaneously contested claim, as that term is used in Rule 3(o) (§ 20.3(o) of this part), a copy of such motion shall, to the extent practicable, be sent to all other contesting parties. Other parties have a period of 30 days from the date of mailing of the copy of the motion to file a brief or argument in answer. The date of mailing of the copy will be presumed to be the same as the date of the letter which accompanies the copy. Notices in simultaneously contested claims will be forwarded to the last address of record of the parties concerned and such action will constitute sufficient evidence of notice.

(Authority: 38 U.S.C. 501(a))

§ 20.1409 Rule 1409. Finality and appeal.

(a) A decision on a motion filed by a party or initiated by the Board pursuant to this subpart will be stamped with the date of mailing on the face of the decision, and is final on such date. The party and his or her representative, if any, will be provided with copies of the decision.

(b) For purposes of this section, a dismissal without prejudice under Rule 1404(a) (§ 20.1404(a) of this part) or a referral under Rule 1405(e) is not a final decision of the Board.

(c) Once there is a final decision on a motion under this subpart relating to a prior Board decision on an issue, that prior Board decision on that issue is no longer subject to revision on the grounds of clear and unmistakable error. Subsequent motions relating to that prior Board decision on that issue shall be dismissed with prejudice.

(d) Chapter 72 of title 38, United States Code (relating to judicial review), applies with respect to final decisions on motions filed by a party or initiated by the Board pursuant to this subpart.

(Authority: 38 U.S.C. 501(a); Pub. L. 105–111)

§ 20.1410 Rule 1410. Stays pending court action.

The Board will stay its consideration of a motion under this subpart upon receiving notice that the Board decision that is the subject of the motion has been appealed to a court of competent jurisdiction until the appeal has been concluded or the court has issued an order permitting, or directing, the Board to proceed with the motion.

(Authority: 38 U.S.C. 501(a))

§ 20.1411 Rule 1411. Relationship to other statutes.

(a) The "benefit of the doubt" rule of 38 U.S.C. 5107(b) does not apply to the Board's decision, on a motion under this subpart, as to whether there was clear and unmistakable error in a prior Board decision.

(b) A motion under this subpart is not a claim subject to reopening under 38 U.S.C. 5108 (relating to reopening claims on the grounds of new and material evidence).

(c) A motion under this subpart is not an application for benefits subject to any duty associated with 38 U.S.C. 5103(a) (relating to applications for benefits).

(d) A motion under this subpart is not a claim for benefits subject to the requirements and duties associated with 38 U.S.C. 5107(a) (requiring "well-grounded" claims and imposing a duty to assist).

(Authority: 38 U.S.C. 501(a))

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[IL169–1b; FRL–6012–8]

Approval and Promulgation of State Implementation Plan; Illinois

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve the March 5, 1998, Illinois State Implementation Plan (SIP) revision request containing amendments to volatile organic material emission control rules for wood furniture coating operations in the Chicago and Metro-East ozone nonattainment areas. In the final rules section of this **Federal Register**, the EPA is approving the State's requests as a direct final rule without prior proposal because EPA views this action as noncontroversial and anticipates no adverse comments. A detailed rationale for approving the State's request is set forth in the direct final rule. The direct final rule will become effective without further notice unless the Agency receives relevant adverse written comment on this proposed rule. Should the Agency receive such comment, it will publish a final rule informing the public that the direct final rule did not take effect and such public comment received will be addressed in a subsequent final rule based on this proposed rule. If no adverse written comments are received, the direct final rule will take effect on the date stated in that document and no further activity will be taken on this proposed rule. EPA does not plan to institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time..

DATES: Written comments on this proposed rule must be received on or before June 18, 1998.

ADDRESSES: Written comments should be mailed to: J. Elmer Bortzer, Chief, Regulation Development Section, Air Programs Branch (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604.

Copies of the State submittal are available for inspection at: Regulation Development Section, Air Programs Branch (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Mark J. Palermo, Environmental Protection Specialist, Regulation Development Section, Air Programs Branch (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–6082.

SUPPLEMENTARY INFORMATION: For additional information see the direct final rule published in the final rules section of this **Federal Register**.

Dated: April 29, 1998.

Barry C. DeGraff,

Acting Regional Administrator.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[MI67–01–7275; FRL–6014–7]

Approval and Promulgation of Implementation Plans; Michigan

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: In this document, the Environmental Protection Agency (EPA) is proposing to correct the State Implementation Plan (SIP) for the State of Michigan regarding the State's emission limitations and prohibitions for air contaminant or water vapor, pursuant to section 110(k)(6) of the Clean Air Act, as amended in 1990.

In the final rules section of this **Federal Register**, the EPA is approving the State's request as a direct final rule without prior proposal because EPA views this action as noncontroversial and anticipates no adverse comments. A detailed rationale for approving the State's request is set forth in the direct final rule. The direct final rule will become effective without further notice unless the Agency receives relevant adverse written comment on this proposed rule within 30 days of this publication. Should the Agency receive such comment, it will publish a document informing the public that the direct final rule did not take effect and such public comment received will be addressed in a subsequent final rule based on this proposed rule. If no adverse comments are received, the direct final rule will take effect on the date stated in that document and no further activity will be taken on this proposed rule. USEPA does not plan to institute a second comment period on this action. Any parties interested in commenting on this document should do so at this time.

DATES: Comments on this proposed action must be received on or before June 18, 1998.

ADDRESSES: Written comments should be sent to: Carlton T. Nash, Chief, Regulation Development Section, Air Programs Branch (AR–18J), U.S. Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604.

Copies of the documents relevant to this action are available for public inspection during normal business hours at the following address: United States Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. (Please telephone Victoria Hayden at (312) 886–4023 before visiting the Region 5 Office.)

FOR FURTHER INFORMATION CONTACT: Victoria Hayden, Regulation Development Section, Air Programs Branch (AR–18J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, Telephone Number (312) 886-4023.

SUPPLEMENTARY INFORMATION: See the information provided in the Direct Final rule of the same title which is located in the Rules Section of this **Federal Register**.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 62

[GA–37–9811b; FRL–6003–9]

Approval and Promulgation of State Plans for Designated Facilities and Pollutants: Georgia

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve the Section 111(d) and 129 State Plan submitted by the Georgia Department of Natural Resources (DNR) for the State of Georgia on November 13, 1997, for implementing and enforcing the Emissions Guidelines applicable to existing Municipal Waste Combustors with capacity to combust more than 250 tons per day of municipal solid waste. The Plan was submitted by the Georgia DNR to satisfy certain Federal Clean Air Act requirements. In the Final Rules Section of this **Federal Register**, EPA is approving the Georgia State Plan submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates that it will not receive any significant, material, and adverse comments. A detailed rationale for the approval is set forth in the direct final rule and incorporated by reference herein. If no significant, material, and adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this proposed rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action.

DATES: Comments on this proposed rule must be received in writing by June 18, 1998.

ADDRESSES: Written comments should be addressed to Scott Martin at the EPA Region Office listed. Copies of the documents relevant to this proposed rule are available for public inspection during normal business hours at the following locations. The interested persons wanting to examine these documents should make an appointment with the appropriate office at least 24 hours before the day of the visit.

Environmental Protection Agency, Region 4, Air Planning Branch, 61 Forsyth Street, SW, Atlanta, Georgia 30303–3104.

Georgia Department of Natural Resources, Air Protection Branch, 4244 International Parkway, Suite 120, Atlanta, Georgia 30354.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 54

[CC Docket No. 96–45; DA 98–872]

Proposed Revision of 1998 Collection Amounts for Schools and Libraries and Rural Health Care Universal Service Support Mechanisms

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Common Carrier Bureau seeks comment on the proposed revision of 1998 collection amounts for the schools and libraries and rural health care universal service support mechanisms.

DATES: Comments in response to this proposed rule are due May 22, 1998.

ADDRESSES: One original and five copies of all comments responsive to this Public Notice must be sent to Magalie Roman Salas, Secretary, Federal Communications Commission, 1919 M Street, N.W., Washington, D.C. 20554. Three copies also should be sent to Sheryl Todd, Accounting Policy Division, Common Carrier Bureau, 2100 M Street, N.W., 8th Floor, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Irene Flannery, Accounting Policy Division, Common Carrier Bureau, (202) 418–7383.

SUPPLEMENTARY INFORMATION: The final rules providing for universal service support for schools, libraries, and health care providers appear in 47 CFR part 54, subparts F and G, which were originally published on June 17, 1997 (62 FR 32862) and amended in rules published on January 3, 1998 (63 FR 2094) and January 27, 1998 (63 FR 3830).

By the Common Carrier Bureau:

Consistent with section 254 of the Communications Act, as amended, and the recommendations of the Federal-State Joint Board on Universal Service, we remain committed to providing support to eligible schools and libraries for telecommunications services, Internet access, and internal connections. We also remain committed to providing the greatest level of support to the most economically disadvantaged schools and libraries. At the same time, however, we strive to ensure a smooth transition to the new universal service support mechanisms and to minimize disruption to consumers. We seek to provide support to schools, libraries, and rural health care providers in a manner that does not require consumers' rates to rise, and without causing rate churn. We thus seek comment on a proposal to implement a gradual phase-in of the schools, libraries, and rural health care universal service support mechanisms that takes advantage, and reflects the timing, of access charge reductions, will provide substantial support and at the same time will minimize disruption to consumers.

As of May 1, 1998, SLC projected that $2.02 billion in discounts have been requested by applicants who have filed through April 28, 1998. RHCC projected that the rural health care support mechanism will require $25 million for the third quarter. Although the local exchange carriers will not file their access tariffs until June 16, 1998, based on preliminary information provided by the local exchange carriers, we estimate that the July 1, 1998 access charge reductions will be approximately $700 million below current levels. Given projected access charge reductions, we estimate that the quarterly collection rate for schools and libraries could rise from $325 million (the second quarter collection rate) to approximately $524 million (We reach this result in the following manner: Long distance carriers pay direct contributions to universal service and, through interstate access charges, indirectly pay for most of the local exchange carrier contributions. Directly and indirectly, long distance carriers are responsible for approximately 82.5 percent of schools and libraries and rural health care contributions. Multiplying $700 million by 1/.825 yields $848 million. We divide $848 million by 4 to find the incremental amount available for each quarter, which is $212 million. We then add $212 million to the average quarterly collection rate for the first half of 1998, $312 million (the average of $300 and 325 million). Accordingly, access charge reductions of $700 million yield $524 million as a quarterly collection rate for the third and fourth

quarters of 1998 without increasing total access and universal service payments by long distance carriers. Accordingly, schools and libraries could be funded at approximately $1.67 billion for the 1998 calendar year. Because the 75-day initial filing window period for the rural health care support mechanism just opened on May 1, 1998, we propose that the quarterly collection rate for the rural health care support mechanism remain at $25 million for the third and fourth quarters of 1998. Accordingly, rural health care providers would be funded at $100 million for the 1998 calendar year.)

We do not seek comment on revising the annual caps adopted in the Universal Service Order. Rather, we seek comment on adjusting the maximum amounts that may be collected and spent during the initial year of implementation in order to ensure that collection rates do not exceed access charge reductions and to prevent rate churn for subscribers. We emphasize that any adjustments should not impact the level of support available to the most economically disadvantaged schools and libraries, and seek comment on ways to ensure that those entities receive adequate support.

We seek comment on directing the Universal Service Administrative Company ("USAC") to collect only as much money as is required by demand, but in no event more than $25 million per quarter for the third and fourth quarters of 1998 to support the rural health care universal service support mechanism, and no more than $524 million per quarter for the third and fourth quarters of 1998 to support the schools and libraries universal service support mechanism. We also seek comment on directing the administrative corporations to neither commit nor disburse more than $100 million for the health care support mechanism or more than $1.67 billion for the schools and libraries support mechanism during the 1998 funding year.

While we have not had an opportunity to review fully the statement of Commissioner Furchtgott-Roth, we do take this opportunity to note that the 60-day congressional review period referenced in that statement does not apply to "any rule promulgated under the Telecommunications Act of 1996 and the amendments made by that Act."

Parties wishing to comment on these issues and the Initial Regulatory Flexibility Analysis below are directed to file comments on or before May 22, 1998, and to follow the following procedures. All filings should reference: Proposed Revision of Maximum Collection Amounts for Schools and Libraries and Rural Health Care Providers, Public Notice, CC Docket No. 96–45, DA 98–872. All interested parties should include the name of the filing party and the date of the filing on each page of their comments. Parties should include a table of contents in all documents regardless of length and should indicate whether they are filing an electronic copy of a submission via the Internet or via diskette. Pleadings must comply with Commission rules. One original and five copies of all comments must be sent to Magalie Roman Salas, Secretary, Federal Communications Commission, 1919 M Street, N.W., Washington, D.C. 20554. Three copies also should be sent to Sheryl Todd, Accounting Policy Division, Common Carrier Bureau, 2100 M Street, N.W., 8th Floor, Washington, D.C. 20554. Copies of documents filed with the Commission may be obtained from the International Transcription Service, 1231 20th Street, N.W., Washington, D.C. 20037, (202) 857–3800. Such documents are also available for review and copying at the FCC Reference Center, Room 239, 1919 M Street, N.W., Washington, D.C., from 9:00 a.m. to 4:30 p.m.

Parties may also file informal comments or an exact copy of formal comments electronically via the Internet at: <http://www.fcc.gov/e-file/ecfs.html>. Only one copy of an electronic submission must be submitted. A party must note whether an electronic submission is an exact copy of formal comments on the subject line and should note in its paper submission that an electronic copy of its comments is being submitted via the Internet. A commenter also must include its full name and Postal Service mailing address in its submission. Parties not submitting an exact copy of their formal comments via the Internet are also asked to submit their comments on diskette. Parties submitting diskettes should submit them to Sheryl Todd, Accounting Policy Division, Common Carrier Bureau, 2100 M Street, N.W., Room 8606, Washington, D.C. 20554. Such a submission should be on a 3.5 inch diskette formatted in an IBM compatible format using WordPerfect 5.1 for Windows or compatible software. The diskette should be accompanied by a cover letter and should be submitted in "read only" mode. The diskette should be clearly labelled with the party's name, proceeding, type of pleading (comment), date of submission, and the name of the electronic file on the diskette. Each diskette should contain only one party's pleadings, preferably in a single electronic file. Electronic submissions are in addition to and not a substitute for the formal filing requirements addressed above.

Ex parte contact. Filing of this petition initiates a permit-but-disclose proceeding under the Commission's rules.

Initial Regulatory Flexibility Analysis

1. The Regulatory Flexibility Act (RFA) [1] requires that an initial regulatory flexibility analysis be prepared for notice-and-comment rulemaking proceedings, unless the agency certifies that "the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities." [2]

2. *Description of the Reasons Why Agency Action Is Being Considered.* This Notice requests comment on adjusting the maximum amounts that may be collected and spent during the initial year of implementation of the universal service support mechanisms for schools, libraries, and rural health care providers in order to ensure that collection rates do not exceed access charge reductions and to prevent rate churn for subscribers. The notice emphasizes that any adjustments should not impact the level of support available to the most economically disadvantaged schools and libraries, and seeks comment on ways to ensure that those entities receive adequate support. As the notice indicates, some parties have already suggested ways to prioritize the distribution of funds if necessary in response to a prior public notice.

3. *Objectives and Legal Basis for the Proposed Action.* The proposed action is supported by sections 1, 4(i) and (j), and 254, of the Communications Act, as amended, 47 U.S.C. §§ 151, 154(i) and (j), and 254. The objective is to provide support to schools, libraries and rural health care providers in a manner that does not require consumers' rates to rise, and without causing rate churn.

4. *Description and Estimate of the Number of Small Entities That May Be Affected by this Notice.* The RFA generally defines "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction" and the same meaning as the term "small business concern" under the Small Business Act, 15 U.S.C. § 632,

[1] The RFA, see 5 U.S.C. § 601 *et seq.*, has been amended by the Contract With America Advancement Act of 1996, Pub. L. No. 104–121, 110 Stat. 847 (1996) (CWAAA). Title II of the CWAAA is the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA).

[2] 5 U.S.C. § 605(b).

unless the Commission has developed one or more definitions that are appropriate to its activities.[3] Under the Small Business Act, a "small business concern" is one that: (1) is independently owned and operated; (2) is not dominant in its field of operation; ar.d (3) meets any additional criteria established by the Small Business Administration (SBA).[4]

5. The SBA has defined a small business for Standard Industrial Classification (SIC) categories 4812 (Radiotelephone Communications) and 4813 (Telephone Communications, Except Radiotelephone) to be small entities having fewer than 1,500 employees.[5] Small incumbent LECs subject to the universal service rules are either dominant in their field of operation or are not independently owned and operated, and consistent with our prior practice they are excluded from the definition of "small entity" and small business concerns. Accordingly, our use of the terms "small entities" and "small business" does not encompass small incumbent LECs. Out of an abundance of caution, however, for regulatory flexibility analysis purposes, we will consider small incumbent LECs within this analysis and use the term "small incumbent LECS" to refer to any incumbent LECs that arguably might be defined by the SBA as "small business concerns."

6. In the final regulatory flexibility analysis (FRFA) in the Universal Service Order, the Commission described and estimated in detail the number of small entities that would be affected by the new universal service rules.[6] These entities included various types of telecommunications carriers and service providers, as well as schools, libraries, rural health care providers and other beneficiaries of the universal service mechanisms. The proposal in this notice would apply to the same entities described in the FRFA. Therefore we incorporate by reference the description and estimate of the number of small entities affected included in the FRFA to the Order.[7]

7. *Description of Projected Reporting, Recordkeeping and Other Compliance Requirements.* The notice does not propose any new reporting or recordkeeping requirements. It proposes to change the existing compliance requirements for universal service by adjusting the amount of support available to schools, libraries, and rural health care providers in the first year of the new universal service support mechanisms and to ensure that the most economically disadvantaged schools and libraries receive adequate support.

8. *Description of Significant Alternatives which could Minimize Any Significant Economic Impact on Small Entities.* The requirements proposed could have a significant economic impact on small telecommunications carriers and providers, including small LECs by reducing the amount of their universal service contributions in the first year of the support mechanisms for schools and libraries, and rural health care providers. In addition the proposed requirements could have a significant economic impact on small schools, libraries, rural health care providers, and small government jurisdictions by reducing the amount of support available during that year. The notice seeks comments on alternative ways of ensuring adequate support for the most economically disadvantaged schools and libraries. We invite specific comment on the impact of the proposed requirements on small entities.

9. *Federal Rules that May Duplicate, Overlap, or Conflict With the Notice.* None.

Federal Communications Commission.

Magalie Roman Salas,

Secretary.

47 CFR Part 73

[MM Docket No. 98–63, RM–9209]

Radio Broadcasting Services; Pottsboro, TX; Durant and Madill, OK

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by Grayson Broadcasting Company requesting the allotment of Channel 273C3 to Pottsboro, Texas; the substitution of Channel 292A for Channel 296A at Durant, Oklahoma, and the modification of Station KLBC's license; the substitution of Channel 296A for Channel 273A at Madill, Oklahoma, and the modification of Station KMAD–FM's license. Channel 273C3, Channel 292A, Channel 296A can be allotted to Pottsboro, Texas, Durant and Madill, Oklahoma, respectively, in compliance with the Commission's minimum distance separation requirements. Channel 273C3 can be allotted to Pottsboro, Texas, without the imposition of a site restriction at coordinates 33–46–20 and 96–40–18. Channel 292A can be allotted to Durant and Channel 296A can be allotted to Madill at the existing transmitter sites of Station KLBC and Station KMAD–FM. The coordinates for Channel 292A at Durant are 34–00–07 and 96–25–19. The coordinates for Channel 296A at Madill are 34–06–24 and 96–46–30.

DATES: Comments must be filed on or before June 29, 1998, and reply comments on or before July 14, 1998.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Andrew S. Kersting, Fletcher, Heald & Hildreth, P.L.C., 11th Floor, 1300 North 17th Street, Rosslyn, Virginia 22209–3801 (Counsel for petitioner).

FOR FURTHER INFORMATION CONTACT: Pam Blumenthal, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 98–63, adopted April 29, 1998, and released May 8, 1998. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC's Reference Center (Room 239), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, ITS, Inc., (202) 857–3800, 1231 20th Street, NW, Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

1998 Biennial Regulatory Review; Form 325–Annual Report of Cable Television Systems

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this Notice of Proposed Rulemaking (*"NPRM"*), the Commission seeks comment on a proposal to eliminate or modify the process of collecting Form 325, "Annual Report of Cable Television Systems." This proceeding is initiated in conjunction with the Commission's 1998 biennial regulatory review. The intended effect of this proceeding is to reduce the regulatory burden on the Commission, as well as cable operators.

DATES: Comments are due on or before June 30, 1998. Reply comments are due on or before July 15, 1998. Written comments by the public on the proposed information collections are due June 9, 1998.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554. In addition to filing comments with the Secretary, a copy of any comments on the information collections contained herein should be submitted to Judy Boley, Federal Communications Commission, Room 234, 1919 M Street, N.W., Washington, DC 20554, to Timothy Fain, OMB Desk Officer, 10236 NEOB, 725—17th Street, N.W., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Sunil Daluvoy, Consumer Protection and Competition Division, Cable Services Bureau, at (202) 418–1032. For additional information concerning the information collection contained in this *NPRM*, contact Judy Boley at 202–418–0214, or via the Internet at jboley@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a synopsis of the *NPRM* in CS Docket No. 98–61, FCC 98–79 which was adopted on April 27, 1998 and released on April 30, 1998. A copy of the complete item is available for inspection and copying during normal business hours in the FCC Reference Center, Room 239, 1919 M Street, N.W., Washington, D.C. 20554. The complete text may be purchased from the Commission's copy contractor, International Transcription Service, Inc., 1231 20th Street, N.W., Washington, D.C. 20036, (202) 857–3800. The complete Notice of Proposed Rulemaking also is available on the Commission's Internet home page (http://www.fcc.gov). The requirements proposed in this Notice have been analyzed with respect to the Paperwork Reduction Act of 1995 (the "1995 Act") and could potentially impose modified information collection requirements on the public. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and the Office of Management and Budget (OMB) to take this opportunity to comment on the proposed modifications to the information collection requirements contained in this *NPRM*, as required by the Paperwork Reduction Act of 1995. Public comments are due June 9, 1998. Written comments must be submitted by OMB on or before July 20, 1998. Comments should address: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

OMB Approval Number: 3060–0061.

Title: Annual Report of Cable Television Systems—Form 325.

Total Estimated Annual Burden to Respondents: 28,000 hours. The average burden to respondents is estimated to be 2 hours per Form 325 filing. 14,000 filings × 2 hours = 28,000 hours.

Total Estimated Annual Cost of Respondents: $14,000. Postage, stationery and photocopying costs pertaining to this filing requirement are estimated to be $1 per form. 14,000 × $1 = $14,000.

Needs and Uses: The Form 325 is a preprinted form that has been used by the Commission to annually collect ownership, community unit, statistical, technical and services information from cable television systems on a physical system basis. Operators of every operational cable television system complete the form to verify, correct and/or furnish the Commission with the most current information on their respective cable systems. Here, we have reported burden estimates to respondents as they are currently accounted for in the Commission's Information Collection Budget for Collection Number OMB 3060–0061. Depending on public comment generated in this proceeding, the Commission will either amend the content of Form 325, eliminate the Form 325 filing requirement or will reduce the scope or frequency of the filing requirement.

SUMMARY OF ACTION:

I. Background

1. On April 27, 1998, the Federal Communications Commission ("Commission") adopted a Notice of Proposed Rulemaking which sought comment on our proposal to eliminate or modify Form 325, "Annual Report of Cable Television Systems", which is provided for in 47 CFR § 76.403. The Notice of Proposed Rulemaking is summarized below.

A. Introduction

2. Section 11 of the 1996 Telecommunications Act, instructs the Commission "to conduct a biennial review of regulations that apply to operations and activities of any provider of telecommunications service and to repeal or modify any regulation it determines to be no longer in the public interest." Although Section 11 does not refer to the cable television rules generally, the Commission has determined that the first biennial review presents an opportunity for a thorough examination of all of the Commission's regulations. We believe that consideration of the continuing need for the Form 325 information collection process is consistent with the Section 11 mandate.

B. Discussion

3. Form 325 constitutes the Commission's basic annual reporting requirement for the cable television industry. The form was developed for use on a one time basis in 1966 and was subsequently adopted as an annual filing requirement in 1971. The form was intended to provide the Commission with information that would be of value in the development of rules and policies applicable to the cable television industry. In addition, information as to both individual franchise areas and physical system operations was to be collected for use in connection with individual waiver or enforcement proceedings. The current Form 325 has also been used for two additional purposes: (1) to obtain subscribership data from which to calculate or review cable operator's

annual federal regulatory fee payments; and (2) to assist, through the acquisition of data as to the frequencies used within systems, in the Commission's signal leakage and interference elimination program.

4. The current version of Form 325 is divided into four substantive parts. Part 1 collects the operator's name, address, and tax identification number of each franchised community served by the cable system. Part 2 requests specific information related to each franchised community, including the type of area served, population, subscribers, potential subscribers, cable plant length, and initial date of service. Part 3 outlines frequency and signal distribution information, such as the type and source of programming, and general channel information. Part 4 summarizes the cable system's ancillary services and users.

5. The Commission's rules anticipate that a Form 325 will be mailed annually to each cable system in the country—at present, over 11,000 cable systems. In order to reduce the filing burden and increase the accuracy of the computer database to be assembled from the completed forms, a process was developed whereby each year preprinted and completed forms were to be sent to each operator reflecting the information in the Commission's database. The system operator would then only be required to correct information that had changed since the last filing. Although this process was intended to ease the burden on system operators and to be administratively efficient, it proved to be resource intensive on the part of the Commission, because the returned forms, many of which were deficient in some manner, had to be manually reviewed for technical and administrative accuracy before being entered into the computer system. As available Commission staff resources were reduced and priorities shifted, it became increasingly difficult to complete the data input process. Thus, the form has not been mailed out or data collected since 1994.

6. As a consequence of the above developments we now prepare to either: (1) Abolish this data collection process entirely, or (2) reform the process so that the data that is deemed important may be collected in a more efficient, less resource intensive, manner. In general, it is vital that the Commission have accurate and timely information regarding the cable television industry, both to assist in the enforcement of existing requirements and for broader rulemaking and policy purposes. We seek comment, however, on whether it continues to be important for the Commission to have access to the type of data reported on the current Form 325 and the extent to which this information is available from other sources. For instance, while not subject to accuracy and specificity requirements applicable to a governmental reporting system, information on the basic facts of cable television system operation is available from commercial sources such as S.C. Nielson and Warren Publishing. We seek comment on whether these commercial sources may rely for their information on the availability of the Commission's data base. Similarly, with regard to the signal interference program, the Commission already uses Form 320 (Basic Signal Leakage Performance Report) to gather a cable system's operational parameters in the event interference occurs to over-the-air services. On the other hand, we noted in our leased access proceeding, that the only official source of leased access information was in the Form 325. Given the possible availability of alternative sources of data, we seek comment on whether we should eliminate the current Form 325 entirely or revise it to obtain more focused information.

7. If Form 325 is retained, we seek comment on any changes that should be made to clarify and improve the usefulness of the data collected. For example, the questions and instructions with respect to channel capacity and use data, which is pertinent to a number of Commission's rules, including must-carry, leased access, and channel occupancy, have not always resulted in consistent responses. In addition, Form 325 does not require the operator to submit specific ownership information, which could be relevant to the Commission's horizontal ownership rules, among others. We seek comment on how to obtain more useful consistent or reliable data if the form is retained.

8. In addition, if the Form 325 is retained, we seek comment on ways to make the collection process less burdensome. For example, the data could be collected at less frequent intervals, a sampling process could be developed or an electronic filing system could be developed to reduce the resources devoted to the data collection process. Should, for example, we adopt a data collection process that applies only to cable systems that meet certain geographic, subscriber, channel capacity, or revenue criteria, or should such forms apply to a random subset of cable operators? We note that if data were collected only from systems with over 10,000 subscribers, approximately 80 percent of all subscribers would be covered yet only approximately one-tenth of the present filings would be required.

II. Procedural Matters

A. Initial Regulatory Flexibility Act Analysis For the Notice of Proposed Rulemaking

9. As required by Section 603 of the Regulatory Flexibility Act, 5 U.S.C. 603, the Commission is incorporating an Initial Regulatory Flexibility Analysis (IRFA) of the expected impact on small entities of the policies and proposals in this *NPRM*. Written public comments concerning the effect of the proposals in the *NPRM*, including the IRFA, on small businesses are requested. Comments must be identified as responses to the IRFA and must be filed by the deadlines for the submission of comments in this proceeding. The Secretary shall send a copy of this *NPRM*, including the IRFA, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act.

10. *Reasons Why Agency Action is Being Considered.* Section 11 of the 1996 Telecommunications Act requires the Commission to conduct a biennial review of regulations that apply to operations and activities of any provider of telecommunications service and to repeal or modify any regulation it determines to be no longer in the public interest. Although Section 11 does not specifically refer to cable operators, the Commission has determined that the first biennial review presents an excellent opportunity for a thorough examination of all of the Commission's regulations.

11. *Need for Action and Objectives of the Proposed Rule Change.* The Commission invites comment on whether to eliminate or modify the requirement for cable systems operators to file the current "Annual Report of Cable Television," Form 325, pursuant to Section 76.403 of the Commission's rules ("Section 76.403"), because the Commission believes the current Form 325 provides limited value, imposes unnecessary burdens on the Commission and cable operators, and duplicates existing practices.

12. *Legal Basis.* The authority for the action proposed for this rulemaking is contained in Section 4(i)–(j) of the Communications Act of 1934, as amended.

13. *Description and Estimate of the Number of Small Entities Impacted.* The IRFA directs the Commission to provide a description of and, where feasible, an estimate of the number of small entities that will be affected by the proposed rules. The IRFA defines the term "small

entity" as having the same meaning as the terms "small business," "small organization," and "small business concern" under Section 3 of the Small Business Act. Under the Small Business Act, a small business concern is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

14. The proposal to either eliminate or modify the requirement to file Form 325 applies to all cable system operators. The Commission has developed, with SBA's approval, its own definition of a small cable system operator for rate regulation purposes. Under the Commission's rules, a "small cable company" is one serving fewer than 400,000 subscribers nationwide. Based on our most recent information, we estimate that there were 1439 cable operators that qualified as small cable companies at the end of 1995. Since then, some of those companies may have grown to serve over 400,000 subscribers, and others may have been involved in transactions that caused them to be combined with other cable operators. Consequently, we estimate that there are fewer than 1439 small entity cable system operators that may be affected by the changes we are considering.

15. The Communications Act also contains a definition of a small cable system operator, which is "a cable operator that, directly or through an affiliate, serves in the aggregate fewer than 1% of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed $250,000,000." The Commission has determined that there are 61,700,000 subscribers in the United States. Therefore, we found that an operator serving fewer than 617,000 subscribers shall be deemed a small operator, if its annual revenues, when combined with the total annual revenues of all of its affiliates, do not exceed $250 million in the aggregate. Based on available data, we find that the number of cable operators serving 617,000 subscribers or less totals 1450. Although it seems certain that some of these cable system operators are affiliated with entities whose gross annual revenues exceed $250,000,000, we are unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

16. *Reporting, Recordkeeping, and other Compliance Requirements:* The Commission is proposing to eliminate certain recordkeeping or information collection requirements, and in the alternative, we are proposing to substantially reduce such burdens.

17. *Significant Alternatives Which Minimize the Impact on Small Entities and which are Consistent with Stated Objectives*: The *NPRM* solicits comments on alternatives to elimination of the FCC Form 325. Any significant alternatives presented in the comments will be considered.

18. *Federal Rules which Overlap, Duplicate, or Conflict with the Commission's Proposal:* None.

19. *Report to Congress.* The Commission shall send a copy of this IRFA along with this Notice in a report to Congress pursuant to the Small Business Regulatory Enforcement Fairness Act of 1996, codified at 5 U.S.C. § 801(a)(1)(A). A copy of this IRFA will also be published in the **Federal Register**.

B. Paperwork Reduction Act of 1995 Analysis

20. The requirements proposed in this Notice have been analyzed with respect to the Paperwork Reduction Act of 1995 (the "1995 Act") and could potentially impose modified information collection requirements on the public. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public to take this opportunity to comment on the proposed modifications to the information collection requirements contained in this Notice, as required by the 1995 Act. Public comments are due 21 days from date of publication of this Notice in the **Federal Register**. Comments should address: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information would have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

21. Written comments by the public on the proposed and/or modified information collections are due June 9, 1998. Written comments must be submitted by the Office of Management and Budget ("OMB") on the proposed and/or modified information collections on or before [insert date 60 days after date of publication in the Federal Register.] In addition to filing comments with the Secretary, a copy of any comments on the information collections contained herein should be submitted to Judy Boley, Federal Communications Commission, Room 234, 1919 M Street, N.W., Washington, DC 20554, or via the Internet to jboley@fcc.gov and to Timothy Fain, OMB Desk Officer, 10236 NEOB, 725–17th Street, N.W., Washington, DC 20503 or via the Internet to fain_t@al.eop.gov.

C. Ex Parte Rules

22. This proceeding will be treated as a "permit-but-disclose" proceeding subject to the "permit-but-disclose" requirements under Section 1.1206(b) of the rules. 47 CFR § 1.1206(b), as revised. Ex parte presentations are permissible if disclosed in accordance with Commission rules, except during the Sunshine Agenda period when presentations, ex parte or otherwise, are generally prohibited. Persons making oral ex parte presentations are reminded that a memorandum summarizing a presentation must contain a summary of the substance of the presentation and not merely a listing of the subjects discussed. More than a one or two sentence description of the views and arguments presented is generally required. *See* 47 CFR § 1.1206(b)(2), as revised. Additional rules pertaining to oral and written presentations are set forth in Section 1.1206(b).

D. Filing of Comments and Reply Comments

23. Pursuant to applicable procedures set forth in Sections 1.415 and 1.419 of the Commission's Rules, 47 CFR §§ 1.415 and 1.419, interested parties may file comments on or before June 30, 1998 and reply comments on or before July 15, 1998. To file formally in this proceeding, you must file an original plus four copies of all comments, reply comments, and supporting comments. If you want each Commissioner to receive a personal copy of your comments and reply comments, you must file an original plus nine copies. You should send comments and reply comments to Office of the Secretary, Federal Communications Commission, 1919 M Street, N.W., Washington, D.C. 20554. Comments and reply comments will be available for public inspection during regular business hours in the FCC Reference Center, Room 239, Federal Communications Commission, 1919 M Street N.W., Washington, D.C. 20554. The Cable Services Bureau contact for this proceeding is Sunil Daluvoy at (202) 418–1032 or sdaluvoy@fcc.gov.

24. Parties are also asked to submit comments and reply comments on diskette, where possible. Such diskette

submissions would be in addition to and not a substitute for the formal filing requirements addressed above. Parties submitting diskettes should submit them to Sunil Daluvoy of the Cable Services Bureau, 2033 M Street N.W., Room 700I, Washington, D.C. 20554. Such a submission should be on a 3.5 inch diskette formatted in an IBM compatible form using MS DOS 5.0 and WordPerfect 5.1 software. The diskette should be submitted in "read only" mode. The diskette should be clearly labelled with the party's name, proceeding, type of pleading (comments or reply comments), and date of submission. The diskette should be accompanied by a cover letter.

Federal Communications Commission.

Magalie Roman Salas,

Secretary.

BILLING CODE 6712–01–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

RIN 1018–AE96

Migratory Bird Harvest Information Program; Participating States for the 1998–99 Season

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Fish and Wildlife Service (Service) herein proposes to amend the Migratory Bird Harvest Information Program (Program) regulations. The Service plans to require all States except Hawaii to participate in the Program annually, beginning with the 1998–99 hunting season. This regulatory action will continue to require all licensed hunters who hunt migratory game birds in participating States to register as migratory game bird hunters and provide their name, address, and date of birth to the State licensing authority. Hunters will be required to have evidence of current participation in the Program on their person while hunting migratory game birds in participating States. The quality and extent of information about harvests of migratory game birds must be improved in order to better manage these populations. Hunters' names and addresses are necessary to provide a sample frame for voluntary hunter surveys to improve harvest estimates for all migratory game birds. States will gather migratory bird hunters' names and addresses and the Service will conduct the harvest surveys.

DATES: The comment period for the proposed rule will end on July 20, 1998.

ADDRESSES: Written comments should be sent to the Chief, Office of Migratory Bird Management (MBMO), U.S. Fish and Wildlife Service, 10815 Loblolly Pine Drive, Laurel, MD 20708–4028. The public may inspect comments during normal business hours in Building 158, 10815 Loblolly Pine Drive (Gate 4, Patuxent Wildlife Research Center), Laurel, MD 20708.

FOR FURTHER INFORMATION CONTACT: Paul I. Padding, MBMO, (301)497–5980.

SUPPLEMENTARY INFORMATION: The purpose of this rule is to expand the Program to include all States except Hawaii, beginning in the 1998–99 hunting season.

Background

The purpose of this cooperative Program is to annually obtain a nationwide sample frame of migratory bird hunters, from which representative samples of hunters will be selected and asked to participate in voluntary harvest surveys. State wildlife agencies will provide the sample frame by annually collecting the name, address, and date of birth of each licensed migratory bird hunter in the State. To reduce survey costs and to identify hunters who hunt less commonly-hunted species, States will also request that each migratory bird hunter answer a series of questions to provide a brief summary of his or her migratory bird hunting activity for the previous year. States are required to ask each licensed migratory bird hunter approximately how many ducks (0, 1–10, or more than 10), geese (0, 1–10, or more than 10), doves (0, 1–30, or more than 30), and woodcock (0, 1–30, or more than 30) he or she bagged the previous year, and whether he or she hunted coots, snipe, rails, and/or gallinules the previous year. States that have band-tailed pigeon hunting seasons are also required to ask migratory bird hunters whether they intend to hunt band-tailed pigeons during the current year. States are not required to ask questions about species that are not hunted in the State (for example, Maine does not allow dove hunting, therefore, the State of Maine is not required to ask migratory bird hunters how many doves they bagged the previous year). States will send this information to the Service, and the Service will sample hunters and conduct national hunter activity and harvest surveys.

A notice of intent to establish the Program was published on June 24, 1991 (56 FR 28812). A final rule establishing the Program and initiating a 2-year pilot phase in three volunteer States (California, Missouri, and South Dakota) was published on March 19, 1993 (58 FR 15093). The pilot phase was completed following the 1993–94 migratory bird hunting seasons in California, Missouri, and South Dakota. A State/Federal technical group was formed to evaluate Program requirements, the different approaches used by the pilot States, and the Service's survey procedures during the pilot phase. Changes incorporated into the Program as a result of the technical group's evaluation were specified in an October 21, 1994 final rule (59 FR 53334), that initiated the implementation phase of the Program. Implementation of the Program began with the addition of one State in 1994, three States in 1995 (60 FR 43318), seven States in 1996 (61 FR 46350), and five States in 1997 (62 FR 45706). Final implementation of the Program will be accomplished with the addition of 27 States (all except Hawaii) in this proposed rule.

Currently, all licensed hunters who hunt migratory game birds in participating States are required to have a Program validation, indicating that they have identified themselves as migratory bird hunters and have provided the required information to the State wildlife agency. Hunters must provide the required information to each State in which they hunt migratory birds. Validations are printed on, written on, or attached to the annual State hunting license or on a State-specific supplementary permit. The State may charge hunters a handling fee to compensate hunting-license agents and to cover the State's administrative costs. The Service's survey design calls for hunting-record forms to be distributed to hunters selected for the survey before they forget the details of their hunts. Because of this design requirement, States have only a short time to obtain hunter names and addresses from license vendors and to provide those names and addresses to the Service. Currently, participating States must send the required information to the Service within 30 calendar days of issuance of the migratory bird hunting authorization.

The Service has requested the cooperation of participating States to facilitate obtaining harvest estimates for hunters who are exempted from a permit requirement and those that are also exempted from State licensing requirements. This includes several categories of hunters such as junior hunters, senior hunters, landowners,

and other special categories. Because exemptions and the methods for obtaining harvest estimates for exempt groups vary from State to State, the Service will incorporate these methods into individual memoranda of understanding with participating States. Excluding from the Program those hunters who are not required to obtain an annual State hunting license also excludes their harvest from the estimates. The level of importance of the excluded harvest on the resulting estimates depends on how many hunters are excluded and on the number of birds they bag. If the level of importance is significant, excluding these hunters will result in serious bias. Minimum survey standards are being developed for exempted categories. States may require exempted hunters to obtain permits (e.g., Maryland required exempted hunters to obtain permits upon entry to the Program in 1994).

NEPA Consideration

In compliance with the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(C)), and the Council on Environmental Quality's regulation for implementing NEPA (40 CFR 1500–1508), the Service prepared an Environmental Assessment (EA) on the establishment of the Program and options considered in the "Environmental Assessment: Migratory Bird Harvest Information Program." This EA is available to the public at the location indicated under the **ADDRESSES** caption. Based on review and evaluation of the information in the EA, the Service has determined that amending 50 CFR 20.20 to require all States except Hawaii to participate in the Program annually, beginning with the 1998–99 migratory bird hunting season would not be a major Federal action that would significantly affect the quality of the human environment.

Regulatory Flexibility Act

On June 14, 1991, the Assistant Secretary for Fish and Wildlife and Parks concluded that the rule would not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will affect about 3,300,000 migratory game bird hunters when it is fully implemented. It will require licensed migratory game bird hunters to identify themselves and to supply their names, addresses, and birth dates to the State licensing authority. Additional information will be requested in order that they can be efficiently sampled for a voluntary national harvest survey. Hunters will be required to have evidence of current participation in the Program on their person while hunting migratory game birds.

In total, the Service estimates that the Program information collection will impose costs on society on the order of $4.1 million per year. The Service estimates that hunters will require about 112,000 hours to complete Program forms. At the wage rate, this time is estimated to be valued at $1.5 million (the average estimated cost of time to an individual is less than $0.50). The cost to the States to process and forward the Program information is estimated to be $2.6 million. Service payments of $0.10 per hunter name will mitigate the impact of this requirement on State wildlife budgets to some extent. Several States are imposing additional fees on migratory bird hunter registrations to cover their additional costs. However, the Service notes that the Program costs less than two tenths of one percent of the $3.1 billion migratory bird hunters spent in 1996 for travel, equipment, and hunting rights.

Collection of Information: Migratory Bird Harvest Information Program

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507 (d)), the Service has received approval for this collection of information, with approval number 1018–0015, with the expiration date of August 31, 1998. The information to be collected includes: the name, address, and date of birth of each licensed migratory bird hunter in each participating State. Each licensed migratory bird hunter will also be asked to provide a brief summary of his or her migratory bird hunting activity for the previous year. Hunters' names, addresses, and other information will be used to provide a sample frame for voluntary hunter surveys to improve harvest estimates for all migratory game birds. The Service needs and uses the information to improve the quality and extent of information about harvests of migratory game birds in order to better manage these populations.

All information is to be collected once annually from licensed migratory bird hunters in participating States by the State license authority. Participating States are required to forward the hunter information to the Service within 30 calendar days of issuance of the migratory bird hunting authorization. Recent information from participating States indicates that the annual reporting and record-keeping burden for this collection of information averages 2 minutes per response for 3,300,000 respondents, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Thus, the total annual reporting and record-keeping burden for this collection is estimated to be 112,000 hours.

Comments are invited from the public on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the Department's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) the quality, usefulness, and clarity of the information to be collected; and (4) ways to minimize the burden or the collection of information on respondents, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques. Comments and suggestions on the information collection requirements should be sent to the Office of Information and Regulatory Affairs; OMB, Attention: Interior Desk Officer, Washington, DC 20503; and a courtesy copy to the Service Information Collection Clearance Officer, ms-224 ARLSQ, Fish and Wildlife Service, 1849 C Street, NW., Washington, DC 20240.

OMB is required to make a decision concerning the collection of information contained in these proposed regulations between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication. This does not affect the deadline for the public comment on the proposed regulations.

Executive Order 12866

This proposed rule was not subject to OMB review under Executive Order 12866.

Unfunded Mandates

The Service has determined and certifies pursuant to the Unfunded Mandates Act, 2 U.S.C. 1502 *et seq.*, that this rulemaking will not impose a cost of $100 million or more in any given year on local or state governments or private entities.

Civil Justice Reform

The Department has determined that these proposed regulations meet the applicable standards provided in Sections 3(a) and 3(b)(2) of Executive Order 12988.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Reporting and Recordkeeping requirements, Transportation, Wildlife.

For the reasons set out in the preamble, the Service proposes to amend 50 CFR part 20 as set forth below.

PART 20—MIGRATORY BIRD HUNTING

1. The authority citation for part 20 continues to read as follows:

Authority: 16 U.S.C. 703–711, 16 U.S.C. 712, and 16 U.S.C. 742 a–j.

2. Amend § 20.20 by revising paragraphs (a), (b), and (e) to read as follows:

§ 20.20 Migratory Bird Harvest Information Program.

(a) Information collection requirements. The collections of information contained in § 20.20 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1018–0015. The information will be used to provide a sampling frame for the national Migratory Bird Harvest Survey. Response is required from licensed hunters to obtain the benefit of hunting migratory game birds. Public reporting burden for this information is estimated to average 2 minutes per response for 3,300,000 respondents, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Thus the total annual reporting and record-keeping burden for this collection is estimated to be 112,000 hours. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Service Information Collection Clearance Officer, ms-224 ARLSQ, Fish and Wildlife Service, Washington, DC 20240, or the Office of Management and Budget, Paperwork Reduction Project 1018–0015, Washington, DC 20503. (b) General provisions. Each person hunting migratory game birds in any State except Hawaii must have identified himself or herself as a migratory bird hunter and given his or her name, address, and date of birth to the respective State hunting licensing authority and must have on his or her person evidence, provided by that State, of compliance with this requirement.

* * * * *

(e) State responsibilities. The State hunting licensing authority will ask each licensed migratory bird hunter in the respective State to report approximately how many ducks, geese, doves, and woodcock he or she bagged the previous year, whether he or she hunted coots, snipe, rails, and/or gallinules the previous year, and, in States that have band-tailed pigeon hunting seasons, whether he or she intends to hunt band-tailed pigeons during the current year.

Dated: April 7, 1998.

Donald J. Barry,

Acting Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 98–13209 Filed 5–18–98; 8:45 am]

BILLING CODE 4310–55–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 980414095–8095–01; I.D. 040798C]

RIN 0648–AJ37

Fisheries of the Northeastern United States; Dealer Reporting Requirements

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to amend the regulations which require dealers of summer flounder, scup, black sea bass, Atlantic sea scallops, Northeast (NE) multispecies, Atlantic mackerel, squid, and butterfish to report their fish purchases to NMFS. This action would improve weekly monitoring of landings, by species, by requiring dealers to use a call-in Interactive Voice Response (IVR) system to report their purchases to NMFS. The rule would also modify the schedule for the submission by federally permitted dealers of comprehensive written reports. Reporting requirements for party and charter vessels holding a federal summer flounder or scup permit, other than a moratorium permit, would be modified to make them consistent with reporting requirements in other fisheries.

DATES: Comments must be received on or before June 18, 1998.

ADDRESSES: Comments on the proposed rule or proposed IVR system should be sent to Andrew A. Rosenberg, Ph.D., Administrator, Northeast Region, NMFS, One Blackburn Drive, Gloucester, MA 01930. Mark the outside of the envelope, "Comments on Proposed Rule for Dealer Reporting."

Comments on the burden hour estimates for collection-of- information requirements contained in this proposed rule should be sent to Andrew A. Rosenberg, Ph.D., and to the Office of Information and Regulatory Affairs, Attention: NOAA Desk Officer, Office of Management and Budget, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Kelley McGrath, (978) 281-9307 or Gregory Power, (978) 281-9304.

SUPPLEMENTARY INFORMATION: Regulations implementing the fishery management plans for the summer flounder, scup, black sea bass, Atlantic sea scallops, NE multispecies, and Atlantic mackerel, squid, and butterfish fisheries are found at 50 CFR part 648. These fishery management plans were prepared under the authority of the Magnuson-Stevens Fishery Conservation and Management Act. All dealers of summer founder, scup, black sea bass, Atlantic sea scallops, NE multispecies, Atlantic mackerel, *Illex* or *Loligo* squid or butterfish must have been issued and have in their possession a Federal dealer permit in order to purchase such species from fishing vessels. All dealers issued a Federal dealer permit are required to submit weekly reports of all fish purchases to the Administrator, Northeast Region, NMFS (Regional Administrator). To make it easier for federally permitted dealers to comply with weekly reporting requirements and to improve the monitoring of commercial landings, NMFS proposes to modify the dealer reporting requirements.

Several species are now being managed using domestic annual harvest limits, such as annual or seasonal quotas and target or actual total allowable catch (TAC) limits. For example, summer flounder and scup are managed through annual commercial quotas, while the regulated NE multispecies are managed through annual target TACs. Regulated multispecies are defined as a subset of the NE multispecies that includes cod, haddock, pollock, redfish, white hake, yellowtail flounder, witch flounder, windowpane flounder, winter flounder, and American plaice. In order to manage these fisheries effectively, accurate and timely monitoring of landings is required. For the purposes of this proposed rule, species managed by quotas or TACs are referred to as "quota-managed species."

Interactive Voice Response System

This proposed rule would require federally permitted fish dealers to use a NMFS-established IVR system to report weekly purchases of all quota-managed species, except those species deferred from IVR system coverage by the Regional Administrator. This would enable NMFS to determine more quickly when domestic harvest limits have been reached. Species whose purchases would have to be reported weekly through the IVR system include summer flounder, scup, black sea bass, regulated NE multispecies, Atlantic mackerel, *Illex* and *Loligo* squid, and butterfish.

The Regional Administrator would have the authority to defer species from coverage by the IVR system weekly reporting requirements if landings are not expected to reach levels that would cause the applicable target exploitation rate corresponding to a given domestic annual harvest limit, target or actual TAC or annual or seasonal quota specified in the fishery management plan for that species to be achieved. This deferral determination would be based on the purchases reported, by species, in the comprehensive written reports submitted by dealers and other available information. If the Regional Administrator determines that a species should be deferred from the IVR system weekly reporting requirement, he/she would publish notification so stating in the **Federal Register**. If data indicate that landing levels subsequently increase to an extent that this determination ceases to be valid, the Regional Administrator would terminate the deferral by publishing notification in the **Federal Register**. Therefore, it is conceivable that a deferral from the IVR system weekly reporting requirement and a withdrawal of a given deferral could occur in any given fishing year for a given quota-managed species. NMFS anticipates that following a review of landing levels and other applicable information several of the quota-managed species will be deferred from the IVR system weekly reporting requirement at the time of implementation of any final rule.

Dealers would be required to report through the IVR system, on a weekly basis, purchases of those quota-managed species not deferred from coverage. The IVR system would use a toll-free number that federally permitted dealers would call to report weekly purchases of IVR monitored species. For each species requiring IVR monitoring, NMFS proposes to require federally permitted dealers to report the following information weekly through the IVR system: Dealer permit number; dealer code; pounds purchased by species; week in which purchases were made; and state of landing for each species purchased. If no purchases of the IVR monitored species were made during the week, the dealer would be required to submit a report so stating through the IVR system.

Trip-by-Trip Dealer Reports

Currently, federally permitted dealers are required to submit comprehensive trip-by-trip written reports listing all species purchased within 3 days after the end of the reporting week. Because the IVR system would provide timely monitoring of dealer purchases by species, NMFS proposes to amend this requirement to allow dealers 16 days following the end of the reporting week in which to complete and submit the trip-by-trip written reports for all species. In addition to providing dealers with more time to complete these reports, this proposed change would also result in more accurate price information being collected on the written reports. Such pricing information is often unavailable to dealers within 3 days following the end of the reporting week, but is available within 16 days following the end of the reporting week.

Dealers would continue to report the following information, within 16 days following the end of the reporting week, on forms supplied by or approved by the Regional Administrator: Dealer name and mailing address; dealer number; name and permit number or hull number (United States Coast Guard (USCG) documentation number or state registration number, whichever is applicable) of vessels from which fish are landed or received; dates of purchases; trip identifier for fishing trip from which fish are purchased; pounds by species (by market category, if applicable); price per pound, by species (by market category, if applicable) or total value by species (by market category, if applicable); port landed; signature of dealer or other authorized individual; and any other information deemed necessary by the Regional Administrator. If no fish were purchased during the reporting month, the dealer would be required to report that on the required form, which would be submitted within 16 days following the end of the reporting month. Dealers would retain the option of submitting the required information electronically if authorized in writing to do so by the Regional Administrator.

Additional Dealer and Processor Reporting Changes

NMFS proposes to modify five requirements pertaining to dealer reporting. Dealers are currently required to report the Federal permit number of the vessel from which fish are purchased or landed. However, many of the species landed by dealers are not subject to Federal management and are caught by vessels that hold no Federal permits. This requirement would be modified to require dealers to report either the Federal permit number or the hull number (USCG documentation number or state registration number, as appropriate) of the vessels from which fish are purchased or landed.

The existing reporting form, NOAA Form 88-30, specifies market categories for several species. The regulations would be revised to make it clear to dealers that species must be reported by market category, when applicable.

The reporting period for negative written reports (reports stating that no fish were purchased) would be changed from weekly to monthly. Currently, federally permitted dealers are required to submit a weekly written negative report if no purchases of any fish were made during the reporting week. This proposed rule would instead require dealers to submit monthly a written negative report only if no purchases of any fish were made during a reporting month (defined as a calendar month).

NMFS also proposes adding language to amplify an existing prohibition to allow for the collection of biological data (fish lengths) and samples (scales and otoliths for aging) which are necessary to characterize the composition of the landed catch. While most dealers have historically and voluntarily allowed access to their premises for the collection of these vital data, NMFS proposes to revise the regulations so that it is explicit that federally permitted dealers are required to grant such access.

Under current regulations at § 648.7(a)(2)(ii), processors are required to notify the Regional Administrator if the plant processing capacities change by more than 10 percent during any year. NMFS proposes to require that the processor notify the Regional Administrator in writing within 10 days after this change.

Vessel Reporting Change

NMFS further proposes to revise the reporting requirements for any owner of a party or charter vessel issued a federal summer flounder or scup permit, other than a moratorium permit. Currently, owners of party or charter vessels issued

a summer flounder or scup permit, other than a moratorium permit, and carrying passengers for hire are required to submit an accurate daily fishing log report for each trip that lands summer flounder or scup, respectively. This proposed rule would amend the vessel reporting requirements to require these vessels to submit reports for each trip, regardless of the species fished for or retained. This change would make the requirements for party/charter vessels in the summer flounder and scup fisheries consistent with those in the black sea bass, NE multispecies, and Atlantic mackerel, squid, and butterfish fisheries.

Classification

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act (PRA) unless that collection of information displays a currently valid Office of Management and Budget (OMB) control number.

This proposed rule contains collection-of-information requirements subject to the PRA, and clarifies or makes minor modifications to requirements previously approved under OMB control number 0648-0229 (2 minutes per response), OMB control number 0648-0212 (5 minutes per response), OMB Control No. 0648- 0018 (6 minutes per response), and OMB Control No. 0648-0235 (5 minutes per response). The requirement to use an IVR system for weekly dealer reporting has been submitted to OMB for approval under OMB control number 0648-0229 and is estimated to take 4 minutes per response. The response estimates shown include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing, reviewing and submitting the collection of information. Public comment is sought regarding: Whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; the accuracy of the burden estimate; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information, including through the use of automated collection techniques or other forms of information technology. Send comments on these or any other aspects of the collection of information to NMFS and OMB (see ADDRESSES).

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this rule, if adopted as proposed, would not have significant impact on a substantial number of small entities as follows:

The proposed rule would require dealers of summer flounder, scup, black sea bass, Atlantic mackerel, squid, butterfish, and NE multispecies to report their purchases to the National Marine Fisheries Service (NMFS) on a weekly basis through a NMFS-established Interactive Voice Response (IVR) system. The reporting schedule for federally permitted dealers would be modified to extend the submission deadline for comprehensive written reports. These proposed changes would enable NMFS to track landings of quota-managed species on a real time basis through the IVR system, while providing dealers with the convenience of additional time to submit the comprehensive written reports.

Reporting requirements for any owner of a party or charter vessel issued a summer flounder or scup permit, other than a moratorium permit, would be modified making the requirements consistent with those in other fisheries. Currently, owners of a party or charter vessel issued a summer flounder or scup permit, other than a moratorium permit, and carrying passengers for hire are required to submit a report for each trip that lands summer flounder or scup, respectively. This rule would require these vessels to submit reports for each trip, regardless of the species fished for or retained.

Because the information being collected from dealers and vessel owners is regularly compiled for their own business records, providing NMFS with the information is a minimal burden and will not result in a significant economic impact on the dealers or vessel owners.

This rule has been determined to be not significant for the purposes of E.O. 12866.

List of Subjects in 50 CFR Part 648

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: May 14, 1998.

David L. Evans,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Serivce.

For the reasons set out in the preamble, 50 CFR part 648 is proposed to be amended as follows:

PART 648—FISHERIES OF THE NORTHEASTERN UNITED STATES

1. The authority citation for part 648 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. Section 648.2 is amended by adding, in alphabetical order, definitions for "Dealer code", "IVR system", and "Quota- managed species" to read as follows:

§ 648.2 Definitions.

* * * * *

Dealer code means a confidential five-digit number assigned to each dealer required to submit purchases using the IVR system for the purpose of maintaining the integrity of the data reported through the IVR system.

* * * * *

IVR system means the Interactive Voice Response dealer reporting system established by the Regional Administrator for the purpose of monitoring dealer purchases.

* * * * *

Quota-managed species means any species of finfish managed under this part by an annual or seasonal quota or by annual target or actual TAC.

* * * * *

3. In § 648.7 paragraph (a)(2) is redesignated as paragraph (a)(3), new paragraphs (a)(2) and (g) are added, paragraph (b)(1)(iii) is removed, the first sentence of paragraph (a)(1) introductory text, and paragraphs (a)(1)(i), (a)(3)(i), (a)(3)(ii), (b)(1)(i) and (f)(1) are revised to read as follows:

§ 648.7 Recordkeeping and reporting requirements.

(a) *Dealers*—(1) *Detailed weekly report.* Federally permitted dealers must submit to the Regional Administrator, or official designee, a detailed weekly report, within the time periods specified in paragraph (f) of this section, on forms supplied by or approved by the Regional Administrator, a report of all fish purchases, except surf clam and ocean quahog dealers or processors who are required to report only surf clam and ocean quahog purchases. * * *

(i) Summer flounder, scup, black sea bass, Atlantic sea scallop, NE multispecies, Atlantic mackerel, squid and butterfish dealers must provide: Dealer name and mailing address; dealer number; name and permit number or name and hull number (USCG documentation number or state registration number, whichever is applicable) of vessels from which fish are landed or received; trip identifier for trip from which fish are landed or received; dates of purchases; pounds by species (by market category, if applicable); price per pound by species (by market category, if applicable) or total value by species (by market category, if applicable); port landed; and any other information deemed necessary by the Regional Administrator. All report forms must be signed by the dealer or other authorized individual. If no fish are purchased during a reporting week, no written report is required to be submitted. If no fish are purchased

during an entire reporting month, a report so stating on the required form must be submitted.

* * * * *

(2) *Weekly IVR system reports.* (i) Federally permitted dealers purchasing quota-managed species not deferred from coverage by the Regional Administrator pursuant to paragraph (a)(2)(ii) of this section must submit, within the time period specified in paragraph (f) of this section, the following information, and any other information required by the Regional Administrator, to the Regional Administrator or to an official designee, via the IVR system established by the Regional Administrator: Dealer permit number; dealer code; pounds purchased, by species; week in which species were purchased; and state of landing for each species purchased. If no purchases of quota-managed species not deferred from coverage by the Regional Administrator pursuant to paragraph (a)(2)(ii) of this section were made during the week, a report so stating must be submitted through the IVR system in accordance with paragraph (f) of this section.

(ii) The Regional Administrator may defer any quota-managed species from the IVR system reporting requirements if landings are not expected to reach levels that would cause the applicable target exploitation rate corresponding to a given domestic annual harvest limit, target or actual TAC or annual or seasonal quota specified for that species to be achieved. The Regional Administrator shall base any such determination on the purchases reported, by species, in the comprehensive written reports submitted by dealers and other available information. If the Regional Administrator determines that any quota-managed species should be deferred from the weekly IVR system reporting requirements, the Regional Administrator shall publish notification so stating in the **Federal Register**. If data indicate that landing levels have increased to an extent that this determination ceases to be valid, the Regional Administrator shall terminate the deferral by publishing notification in the **Federal Register**.

(3) * * *

(i) Summer flounder, scup, black sea bass, Atlantic sea scallop, NE multispecies, Atlantic mackerel, squid, and butterfish dealers must complete the "Employment Data" section of the Annual Processed Products Report; completion of the other sections of that form is voluntary. Reports must be submitted to the address supplied by the Regional Administrator.

(ii) Surf clam and ocean quahog processors and dealers must provide the average number of processing plant employees during each month of the year just ended; average number of employees engaged in production of processed surf clam and ocean quahog products, by species, during each month of the year just ended; plant capacity to process surf clam and ocean quahog shellstock, or to process surf clam and ocean quahog meats into finished products, by species; an estimate, for the next year, of such processing capacities; and total payroll for surf clam and ocean quahog processing, by month. If the plant processing capacities required to be reported in this paragraph (a)(3)(ii) change more than 10 percent during any year, the processor shall notify the Regional Administrator in writing within 10 days after the change.

(b) *Vessel owners*—(1) *Fishing Vessel Trip Reports*—(i) *Owners of vessels issued a summer flounder, scup, black sea bass, Atlantic sea scallop, NE multispecies, or Atlantic mackerel, squid, and butterfish permits.* The owner or operator of any vessel issued a permit for summer flounder, scup, black sea bass, Atlantic sea scallops, NE multispecies, Atlantic mackerel, squid or butterfish must maintain on board the vessel, and submit, an accurate daily fishing log report for all fishing trips, regardless of species fished for or taken, on forms supplied by or approved by the Regional Administrator. If authorized in writing by the Regional Administrator, vessel owners or operators may submit reports electronically, for example by using a VTS or other system. At least the following information, and any other information required by the Regional Administrator, must be provided: Vessel name; USCG documentation number (or state registration number, if undocumented); permit number; date/time sailed; date/time landed; trip type; number of crew; number of anglers (if a party or charter boat); gear fished; quantity and size of gear; mesh/ring size; chart area fished; average depth; latitude/longitude (or loran station and bearings); total hauls per area fished; average tow time duration; pounds (or count, if a party or charter vessel), by species, of all species landed or discarded; dealer permit number; dealer name; date sold, port and state landed; and vessel operator's name, signature, and operator permit number (if applicable).

* * * * *

(f) *Submitting reports*—(1) *Dealer or processor reports.* (i) Detailed weekly trip reports, required by paragraph (a)(1) of this section, must be postmarked or received within 16 days after the end of each reporting week. If no fish are purchased during a reporting month, the report so stating required under paragraph (a)(1)(i) of this section must be postmarked or received within 16 days after the end of the reporting month.

(ii) Weekly IVR system reports required in paragraph (a)(2) of this section must be submitted via the IVR system by midnight, Eastern time, each Tuesday for the previous reporting week.

(iii) Annual reports for a calendar year must be postmarked or received by February 10 of the following year. Contact the Regional Administrator (see Table 1 to § 600.502 of this chapter) for the address of NMFS Statistics.

* * * * *

(g) *Additional data and sampling.* Federally permitted dealers must allow access to their premises and to make available to an official designee of the Regional Administrator any fish purchased from vessels for the collection of biological data. Such data include, but are not limited to, length measurements of fish and the collection of age structures such as otoliths or scales.

4. In § 648.14 paragraph (a)(8) is revised to read as follows:

§ 648.14 Prohibitions.

(a) * * *

(8) Assault, resist, oppose, impede, harass, intimidate, or interfere with or bar by command, impediment, threat, or coercion any NMFS-approved observer or sea sampler aboard a vessel conducting his or her duties aboard a vessel, or any authorized officer conducting any search, inspection, investigation, or seizure in connection with enforcement of this part, or any official designee of the Regional Administrator conducting his or her duties, including those duties authorized in § 648.7(g).

* * * * *

Notices

Federal Register
Vol. 63, No. 96
Tuesday, May 19, 1998

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of Small and Disadvantaged Business Utilization; Federal Subcontracting Forum, Workshop and Opportunities Fair

AGENCY: U.S. Department of Agriculture (USDA), Office of Small and Disadvantaged Business Utilization.

ACTION: Notice of meeting.

SUMMARY: The Office of Small and Disadvantaged Business Utilization (OSDBU) at the U.S. Department of Agriculture (USDA) will hold a Federal Subcontracting Forum, Workshop and Opportunities Fair on June 24, 1998, from 9:00 AM to 4 PM, in the Jamie L. Whitten Building, 1400 Independence Avenue, SW, Washington, DC 20250. The morning session (9 AM–12 Noon), which will be held in Room 107–A, will consist of presentations from featured guest speakers and the workshop. The subcontracting opportunities fair will take place in the afternoon from 1 PM to 4 PM in the Patio of the building. Participation at the morning session is open to large business concerns and non-profit organizations. Small business concerns are invited to participate in the afternoon session.

Presentation topics will include Best Practices in Subcontracting; the New OFPP Policy Letter on Subcontracting; the Impact of the Adarand Decision on the Federal Subcontracting Program (a surprising new development); An Update on the USDA Subcontracting Program; and the Future of Subcontracting. Among the guest speakers will be Stephen Schooner, Associate Administrator for Procurement Policy at the Office of Federal Procurement Policy (OFPP), and Robert C. Taylor, Manager of the Federal Subcontracting Program at the Small Business Administration (SBA). The workshop will cover the required elements of a subcontracting plan, the reporting of subcontract award data, and other pertinent information pertaining to the Subcontracting Program. Confidential and proprietary information will not be discussed. Participants will have the opportunity to discuss subcontracting issues/concerns during the morning session. Representatives from large business concerns and non-profit organizations will be available at the opportunities fair to discuss subcontracting opportunities. Seating is limited, and reservations are required. Reservations will be taken on a first-come, first-served basis.

DATE: Reservations must be made by June 15, 1998 (fax or e-mail only).

ADDRESS: Confirm by facsimile at (202) 720–3001. Confirm by e-mail at janet.baylor@usda.gov.

FOR FURTHER INFORMATION: Contact Loretta D'Amico, USDA/OSDBU, 1400 Independence Avenue, SW, AG STOP 9501, Washington, DC 20250–9501, telephone: (202) 720–7117, or visit the OSDBU's "What's New" Section on the Internet at www.usda.gov/da/smallbus.html. If you need accommodations to participate in the event, please notify Ms. D'Amico by June 15, 1998 at (202) 720–7117 (v) or through the Federal Information Relay Service at 1–800–877–8339 (voice/tdd).

Sharron L. Harris,

Director, Office of Small and Disadvantaged Business Utilization.

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

Government Owned Inventions Available for Licensing

AGENCY: Agricultural Research Service, USDA.

ACTION: Notice of Government Owned Inventions Available for Licensing.

SUMMARY: The inventions listed below are owned by the U.S. Government as represented by the Department of Agriculture, and are available for Licensing in accordance with 35 U.S.C. 207 and 37 CFR 404 to achieve expeditious commercialization of results of federally funded research and development. Foreign patents are filed on selected inventions to extend market coverage for U.S. companies and may also be available for licensing.

FOR FURTHER INFORMATION CONTACT: Technical and licensing information on these inventions may be obtained by writing to June Blalock, Technology Licensing Coordinator, USDA, ARS, Office of Technology Transfer, Room 415, Bldg. 005, BARC–W, Beltsville, Maryland 20705–2350; telephone: 301–504–5989 or fax: 301–504–5060. Issued patents may be obtained from the Commissioner of Patents, U.S. Patent and Trademark Office, Washington, D.C. 20231.

SUPPLEMENTARY INFORMATION: The inventions available for licensing are:

S.N. 08/580,664, "The Use of Enterobacter Cloacae as an Endophyte for the Control of Diseases Caused by Fungi"

S.N. 08/785,716, "Glutenin Genes and Their Uses"

S.N. 08/890,719, "Production of Antisera Specific to Major Histocompatibility Complex Molecules in Chicken"

S.N. 08/898,999, "Flow Cytometry Nozzle for High Efficiency Cell Sorting"

S.N. 08/906,333, "Method of Using Bile Salts to Inhibit Red Heat in Stored Brine-Cured Hides and Skins"

S.N. 08/908,215, "A Strain of Gypsy Moth Virus with Enhanced Polyhedra and Budded Virus Production"

S.N. 08/918,832, "Restructured Fruit and Vegetable Products and Processing Methods"

S.N. 08/946,888, "Non-Thermal Energy Treatment for the Reduction of Microbial Population in Liquid Food Products"

S.N. 08/974,938, "Biocontrol Agents for Take-All"

S.N. 08/978,761, "The Prediction of Total Dietary Fiber in Cereal Products Using Near-Infrared Reflectance Spectroscopy"

S.N. 08/989,887, "Method and Pressure Gauge Mechanism for Determining and Controlling Moisture Content in Bales of Material Such as Cotton"

S.N. 08/996,136, "Whey Protein Fractionation Using High Pressure or Supercritical Carbon Dioxide"

S.N. 60/061,378, "Unique Whitefly Ketose Reductase/Sorbitol Dehydrogenase Enzyme"

June Blalock,

Technology Licensing Coordinator.

[FR Doc. 98–13303 Filed 5–18–98; 8:45 am]

BILLING CODE 3410–03–P

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

Notice of Intent To Grant Exclusive License

AGENCY: Agricultural Research Service, USDA.

ACTION: Notice of intent.

SUMMARY: Notice is hereby given that the U.S. Department of Agriculture, Agricultural Research Service, intends to grant to Southern States Cooperative, Inc., of Richmond, Virginia, an exclusive license to Plant Variety Protection Certificate Application No. 9800029, Soybean, "Tyrone" filed November 19, 1997. "Tyrone" is a forage soybean cultivar recommended for forage production in the southern states and is not intended for grain production. "Tyrone's" Notice of Availability was published in the **Federal Register** on January 8, 1998.

DATES: **Federal Register** comments must be received on or before July 20, 1998.

ADDRESSES: Send comments to: USDA, ARS, Office of Technology Transfer, Room 415, Building 005, BARC-West, Beltsville, Maryland 20705–2350.

FOR FURTHER INFORMATION CONTACT: June Blalock of the Office of Technology Transfer at the Beltsville address given above; telephone: 301–504–5989.

SUPPLEMENTARY INFORMATION: The Federal Government's patent rights to this invention are assigned to the United States of America, as represented by the Secretary of Agriculture. It is in the public interest to so license this invention as Southern States Cooperative submitted a complete and sufficient application for a license. The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within sixty (60) days from the date of this published Notice, the Agricultural Research Service receives written evidence and argument which establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Richard M. Parry, Jr.,

Assistant Administrator.

BILLING CODE 3410–03–P

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. 98–026N]

Meeting on the Browning of Ground Beef Patties

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice.

SUMMARY: The Food Safety and Inspection Service (FSIS) is holding a public meeting to discuss safe handling measures consumers should take in cooking hamburgers. The results of a study on the browning of ground beef patties before they reach an internal temperature of 160 °F will be presented. The purpose of the meeting is to discuss the food safety issues presented by premature browning, including the question whether color is an appropriate indicator that ground beef is cooked to a safe internal temperature.

DATES: The meeting will be held on May 27, 1998, from 8:30 a.m. to 5 p.m.

ADDRESSES: The meeting will be held at the Arlington Hilton & Towers, 950 North Stafford Street, Arlington, VA, 22203. The hotel is immediately adjacent to the Ballston Metro Station.

FOR FURTHER INFORMATION CONTACT: To register for the meeting and to obtain a copy of the study results on premature browning of ground beef patties, contact Ms. Jennifer Callahan of the FSIS Planning Office at (202) 501–7136 or FAX (202) 501–7642. Participants who require a sign language interpreter or other special accommodation should contact Ms. Callahan at the above numbers by May 22, 1998.

SUPPLEMENTARY INFORMATION: A study was commissioned by FSIS in 1997 to examine laboratory techniques for cooking and color evaluation and to test logistics for ground beef patties. A previous meeting was held to seek public comment on the study design from consumers, public health officials, and other interested persons. The May 27 meeting announced in this notice will focus on the results of the study and other public and private research efforts on premature browning. FSIS is particularly interested in discussing options for educating consumers about the safe cooking of these products.

The meeting is open to the public on a space-available basis. Transcripts of this meeting will be available in the FSIS Docket Office, Room 102, 300 12th Street, SW, Washington, D.C. 20250–3700.

Done in Washington, DC, on May 11, 1998.

Thomas J. Billy,

Administrator.

BILLING CODE 3410–DM–P

DEPARTMENT OF AGRICULTURE

Forest Service

Grazing Permit Reissuance, Sheep Grazing on the Ash Mountain and Iron Mountain Allotments, Absaroka-Beartooth Wilderness, Gallatin National Forest, Park County, MT

AGENCY: Forest Service, USDA.

ACTION: Notice; intent to prepare environmental impact statement.

SUMMARY: The USDA, Forest Service, will prepare an environmental impact statement (EIS) to disclose the environmental effects of reissuing a 10-year term grazing permit to continue authorizing sheep grazing in the Ash Mountain and Iron Mountain Allotments, located in the Hellroaring Creek and Buffalo Creek drainages in the southwest corner of the Absaroka-Beartooth Wilderness, Gallatin National Forest, Gardiner Ranger District, Park County, Montana. The permit reissuance would authorize the continued use of a three-unit rest-rotation grazing system for grazing 1200 ewe/lamb pairs for a 60-day grazing season. Also, the proposed action includes incorporation grizzly bear and riparian habitat protection standards into the new grazing permit, where they had only been implemented via the Annual Operating Plan in the past. The purpose of the proposed action is (1) to continue achieving Gallatin National Forest Land and Resource Management Plan (Forest Plan) objectives for domestic livestock production on the Ash Mountain and Iron Mountain Allotments, and in a manner that protects other resources including vegetation, wildlife, and riparian habitat.

The Forest Plan provides overall guidance for land management activities, including livestock grazing, within the area. This EIS will tier to the Gallatin Forest Plan Final EIS (September, 1987).

DATES: Written comments and suggestions should be received on or before July 6, 1998.

ADDRESSES: Submit written comments and suggestions on the proposed management activities or a request to be placed on the project mailing list to John R. Logan, District Ranger, Gardiner Ranger District, Gallatin National Forest, P.O. Box 5, Gardiner, Montana, 59030.

FOR FURTHER INFORMATION CONTACT: Pat Hoppe, EIS Team Leader, Gardiner Ranger District, Gallatin National Forest, Phone (406) 848–7375.

SUPPLEMENTARY INFORMATION:

Reissuance of a 10-year term grazing permit is proposed on the Ash Mountain and Iron Mountain Allotments. These allotments would be combined and managed as one allotment called the Ash/Iron Mountain Allotment. It would consist of approximately 74,000 acres, of which about 14,000 acres are classified as suitable for livestock grazing. The proposed action includes continuing the use of a three-unit rest-rotation grazing system for 2400 sheep months (1200 ewe/lamb pairs would be grazed July 15 through September 15 each year). This system allows the sheep to graze one unit (pasture) one summer every three years. The other two units would not be grazed two out of the three years. Also, the proposed action includes incorporating grizzly bear and riparian habitat protection standards into the new grazing permit, where they had only been implemented via the Annual Operating Plan in the past.

The Gallatin National Forest Land and Resource Management Plan (Forest Plan) provides the overall guidance for management activities in the potentially affected area through its goals, objectives, standards and guidelines, and management area direction. The purposes of the proposed action are to: (1) continue achieving Gallatin Forest Plan objectives for domestic livestock production on the Ash Mountain and Iron Mountain Allotments, (2) continue providing flexibility in the grazing schedule and better protect vegetation and wildlife habitat by continuing the three-unit rest-rotation system for 2400 sheep months of grazing, and (3) provide stronger administrative control over permitted grazing activities to better assure protection of riparian areas and grizzly bears and to bring the permit into compliance with the Forest Plan. The decision to be made is "should sheep grazing be allowed to continue in the Ash Mountain and Iron Mountain Allotments, and under what conditions."

The project area consists of approximately 74,000 acres of National Forest land located in T7S, R10–12E; T8S, R10–12E; and T9S, R10–11E, P.M. MT. This area is located entirely within the Absaroka-Beartooth Wilderness.

The area of the proposed continuation of grazing would occur within Management Areas 4 and 7. Grazing would occur only on suitable grazing land. Below is a brief description of the applicable management area direction.

Management Area 4—This area includes the Gallatin National Forest portions of the Absaroka-Beartooth Wilderness and Lee Metcalf Wilderness. Occupied grizzly bear habitat is present in much of the area. Livestock grazing is allowed within this management area so long as it is conducted in accordance with wilderness values and grizzly bear standards and guidelines.

Management Area 7—These are riparian zones or areas where vegetation is present that requires either free or unbounded water or soil moistures in excess of what is normally found in the area. Lands within this management area are suitable for livestock grazing as long as soil, water, vegetation, fish, and dependent wildlife species are protected.

The Forest Service will consider a range of alternatives. One of these will be the "no action" alternative, in which none of the proposed activities would be implemented. Additional grazing alternatives will be considered in response to issues and other resource values.

The EIS will analyze the direct, indirect, and cumulative environmental effects of the alternatives. Past, present, and projected activities on both private and National Forest lands will be considered. The EIS will disclose the analysis of site-specific mitigation measures and their effectiveness.

Public participation is an important part of the analysis, commencing with the initial scoping process (40 CFR 1501.7), which began in October, 1997. In addition to this scoping, the public may visit Forest Service officials at any time during the analysis and prior to the decision. The Forest Service is seeking information, comments, and assistance from Federal, State, and local agencies and other individuals or organizations who may be interested in or affected by the proposed action. No public meeting are scheduled at this time.

Comments from the public and other agencies will be used in preparation of the Draft EIS. The scoping process will be used to:

1. Identify potential issues.
2. Identify issues to be analyzed in depth.
3. Eliminate insignificant issues or those which have been covered by a relevant previous environmental analysis, such as the Gallatin Forest Plan EIS.
4. Identify alternatives to the proposed action.
5. Identify potential environmental effects of the proposed action and alternatives (i.e., direct, indirect, and cumulative effects).
6. Determine potential cooperating agencies and task assignments.

Some public comments have already been received in conjunction with earlier scoping efforts on this project. The following principle issues have been identified so far:

1. Livestock grazing may affect sensitive plants.
2. Livestock grazing may adversely increase competition for forage between big game and domestic livestock.
3. Domestic sheep may affect the population of bighorn sheep by transmitting diseases.
4. Livestock grazing may cause conflicts with grizzly bears and indirectly increase bear mortalities.

Other issues commonly associated with livestock grazing include: effects on water quality, riparian habitat, and soils. This list will be verified, expanded, or modified based on public scoping for this proposal.

The Draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and available for public review in July of 1998. At that time, the EPA will publish a Notice of Availability of the Draft EIS in the **Federal Register**. The comment period on the Draft EIS will be 45 days from the date the EPA's notice of availability appears in the **Federal Register**. It is very important that those interested in management of the Ash Mountain and Iron Mountain Allotments participate at that time. To be most helpful, comments on the Draft EIS should be as site-specific as possible. The Final EIS is scheduled to be completed by October, 1998.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp* v. *NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be

waived or dismissed by the courts. *City of Angoon* v. *Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day scoping comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in developing issues and alternatives. To assist the Forest Service in identifying and considering issues on the proposed action, comments should be as specific as possible. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

John R. Logan, District Ranger, is the responsible official for this environmental impact statement. His address is U.S. Forest Service, Gardiner Ranger District, P.O. Box 5, Gardiner, MT 59030.

Dated: May 4, 1998.

David P. Garber,

Forest Supervisor, Gallatin National Forest.

[FR Doc. 98–13285 Filed 5–18–98; 8:45 am]

BILLING CODE 3410–11–M

DEPARTMENT OF AGRICULTURE

Forest Service

Timber Harvest, Reforestation, Road Construction and Road Closure Near Buck Creek, Taylor Creek and Eldridge Creek Drainages; Gallatin National Forest, Gallatin County, Montana

AGENCY: Forest Service, USDA.

ACTION: Notice; intent to prepare environmental impact statement.

SUMMARY: The USDA, Forest Service, will prepare an environmental impact statement (EIS) to disclose the environmental effects of timber harvest, reforestation, and road construction and closure in the vicinity of Buck Creek, Taylor Creek and Eldridge Creek drainages (herein referred to as the Taylor Fork Project), located in the Madison Mountain range, Gallatin National Forest, Hebgen Lake Ranger District, Gallatin County, Montana. The Taylor Fork project is one of several projects being proposed on the Gallatin National Forest to contribute timber volume to facilitate acquisition of approximately 54,000 acres of lands currently owned by Big Sky Lumber Company (BSL) located within the proclamation boundary of the Gallatin National Forest. These lands are checkerboard inholdings that originate as part of the construction grants given to the Northern Pacific Railway Company by the Federal Government in the late 1800's and early 1900's. In addition, this project will contribute toward providing a flow of wood products from National Forest lands.

The Gallatin National Forest Land and Resource Management Plan (Forest Plan) provides overall guidance for land management activities, including timber and road management, within the area. The proposed actions of timber harvest, reforestation, road reconstruction, road construction, and road closures are being considered together because they represent either connected or cumulative actions as defined by the Council on Environmental Quality (40 CFR 1508.25). This EIS will tier to the Gallatin Forest Plan Final EIS (September, 1987).

DATES: Written comments and suggestions should be on or before June 18, 1998.

ADDRESSES: Submit written comments and suggestions on the proposed management activities or a request to be placed on the project mailing list to Stan Benes, District Ranger, Hebgen Lake Ranger District, Gallatin National Forest, P.O. Box 520, West Yellowstone, Montana 59758.

FOR FURTHER INFORMATION CONTACT: Julie Shea, EIS Team Leader, Forest Ecology Group, Gallatin National Forest, Phone (406) 585–1655.

SUPPLEMENTARY INFORMATION: Timber harvest and reforestation is proposed on approximately 560 acres of forested land in the Taylor Fork project area, which has been designated as suitable for timber management by the Gallatin Forest Plan. The timber harvest operations and general administration of National Forest lands will require construction up to 3.0 miles of new roads and reconditioning up to 12.0 miles of existing road. The EIS will also analyze a proposal of restoring up to 50 miles of existing road that currently are not open to public use.

The Gallatin Forest Plan provides the overall guidance for management activities in the potentially affected area through its goals, objectives, standards and guidelines, and management area direction. The primary purpose of this project is to utilize available timber volume within the Taylor Fork area as one of several federal exchange assets to be used to facilitate acquisition of approximately 54,000 acres of lands currently owned by BSL located within the proclamation boundary of the Gallatin National Forest. These lands are checkerboard inholdings that originate as part of the construction grants given to the Northern Pacific Railway Company by the Federal Government in the late 1800's and early 1900's.

Another purpose for the BSL/Taylor Fork Timber Sale proposal is to contribute toward providing a flow of wood products from National Forest lands identified as "suitable" for timber production, as directed in the Gallatin Forest Plan (Forest Plan, pg. II–1). The forested areas being considered for harvest are identified as productive Forest lands available for timber harvest provided grizzly bear habitat objectives are met. The purpose of road construction and reconstruction is to access stands of timber to be harvested. All new roads will be effectively closed to vehicle travel after completion of post-sale activities.

The purpose of closing roads is to minimize future road maintenance costs, reduce sedimentation, and to regulate overall open road density to maintain or improve big game habitat security.

The project area consists of approximately 560 acres of National Forest land located in T8S, R3E, Sec 22 and 26; and T9S, R3E, Sec 10, 11, 15 and 16, P.M. MT. Road work is proposed across private land in T8S, R3E, Sec 27 and 35. The majority of the harvesting would occur within the Taylor Creek and Eldridge Creek area, and south of Buck Creek located in the Madison Mountain range.

The areas of proposed timber harvest and reforestation would occur within Management Area 13. Timber harvest would occur only on suitable timber land. Road construction and reconstruction would occur in this management area plus Management Area 7 when crossing streams. Below is a brief description of the applicable management direction.

Management Area 13—This management area consists of forested, occupied grizzly bear habitat. The productive Forest lands area available for timber harvest provided grizzly bear habitat objectives are met. Management goals for MA 13 include: (1) managing vegetation to provide habitat necessary to recover the grizzly bear; (2) meet grizzly bear mortality reduction goals as established by the Interagency Grizzly Bear Committee; (3) allow a level of timber harvest compatible with Goal 1; and (4) meet State water quality standards and maintain stream channel stability.

Management Area 7—These are riparian zones or areas where vegetation

is present that requires either free or unbounded water or soil moistures in excess of what is normally found in the area. Lands within this management area are suitable for timber harvest as long as soil, water, vegetation, fish, and dependent wildlife species are protected. These suitable lands must also be adjacent to other management areas suitable for timber management.

The Forest Service will consider a range of alternatives. One of these will be the "no action" alternative, in which none of the proposed activities would be implemented. Additional alternatives will examine varying levels and locations for the proposed activities in response to issues and other resource values.

The EIS will analyze the direct, indirect, and cumulative environmental effects of the alternatives. Past, present, and projected activities on both private and National Forest lands will be considered, including the effects caused by recent and past harvesting and road construction on private lands. The EIS will disclose the analysis of site-specific mitigation measures and their effectiveness.

Public participation is an important part of the analysis, commencing with the initial scoping process (40 CFR 1501.7), which will occur during May 1998. In addition to this initial scoping, the public may visit Forest Service officials at any time during the analysis and prior to the decision. The Forest Service will be seeking information, comments, and assistance from Federal, State, and local agencies and other individuals or organizations who may be interested in or affected by the proposed action. No public meetings are scheduled at this time.

Comments from the public and other agencies will be used in preparation of the Draft EIS. The scoping process will be used to:

1. Identify potential issues.
2. Identify issues to be analyzed in depth.
3. Eliminate insignificant issues or those which have been covered by a relevant previous environmental analysis, such as the Gallatin Forest Plan EIS.
4. Identify alternatives to the proposed action.
5. Identify potential environmental effects of the proposed action and alternatives (i.e., direct, indirect, and cumulative effects).
6. Determine potential cooperating agencies and task assignments.

The following principle issues have been identified so far:

1. The potential effect of proposed timber harvest and associated road development on grizzly bear habitat (primarily security and cover).
2. The potential of proposed timber harvest and associated road development activities to displace grizzly bears use within the sale area.
3. The potential for proposed harvest and associated road development to affect water quality and stream conditions.

Other issues commonly associated with timber harvesting and road construction include: effects on native fisheries, old growth habitat, big game species, sensitive wildlife and plant species, cultural resources, soils, and scenery in the area. This list will be verified, expanded, or modified based on public scoping for this proposal.

The Draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and available for public review in August of 1998. At that time, the EPA will publish a Notice of Availability of the Draft EIS in the **Federal Register**. The comment period on the Draft EIS will be 45 days from the date the EPA's notice of availability appears in the **Federal Register**. It is every important that those interested in management of the Taylor Fork project area participate at that time. The Final EIS is scheduled to be completed by mid-November, 1998.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 533 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon* v. *Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F.Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 30-day scoping comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in developing issues and alternatives. To assist the Forest Service in identifying and considering issues, comments should be as specific to this proposal as possible. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

I am the responsible official for this environmental impact statement. My address is Gallatin National Forest, P.O. Box 130, Federal Building, Bozeman, MT 59771.

Dated: May 6, 1998.

David P. Garber,

Forest Supervisor.

[FR Doc. 98–13287 Filed 5–18–98; 8:45 am]

BILLING CODE 3410–11–M

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Annual Retail Trade Report.

Form Number(s): B–151, B–151–A, B–151D, B–153, B–153D.

Agency Approval Number: 0607–0013.

Type of Request: Revision of a currently approved collection.

Burden: 9,817 hours.

Number of Respondents: 23,700.

Avg Hours Per Response: 25 minutes.

Needs and Uses: The Bureau of the Census conducts the Annual Retail Trade Survey to collect annual totals of sales, inventories, inventory valuation methods, purchases, and accounts receivable balances from a sample of retail establishments in the United States. The estimates compiled from this survey are critical to the accurate measurement of total economic activity and are used in computing such indicators of economic well-being as the Gross Domestic Product and the National Income and Product Accounts. Survey results also provide valuable information for economic policy decisions and actions by the government and are widely used by private businesses, trade organizations, professional associations, and others for market research and analysis.

This request for revision informs OMB of a recent change in sample design. This redesign has increased the number of respondents by about 3,000, while decreasing, on average, the number of data requests to each respondent.

Affected Public: Business or other for-profit.

Frequency: Annually.

Respondent's Obligation: Mandatory.

Legal Authority: Title 13, Sections 182, 224, and 225.

OMB Desk Officer: Nancy Kirkendall, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Linda Engelmeier, DOC Forms Clearance Officer, (202) 482–3272, Department of Commerce, room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent on or before June 18, 1998 to Nancy Kirkendall,-OMB Desk Officer, room 10201, New Executive Office Building, Washington, DC 20503.

Dated: May 13, 1998.

Linda Engelmeier,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR Doc. 98–13172 Filed 5–18–98; 8:45 am]

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

Bureau of the Census

Field Representative Exit Questionnaire

ACTION: Proposed collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Pub. L. 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before July 20, 1998.

ADDRESSES: Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Geraldine Burt, Census/Field Division, Room 1684/FOB 3, Washington, DC 20233–4400, and 301–457–1935.

SUPPLEMENTARY INFORMATION:

I. Abstract

Retention of trained field interviewing staff is a major concern for the Census Bureau because of both the monetary costs associated with employee turnover, as well as the potential impact on data quality. The Field Representative Exit Survey is used to collect data from a sample of our former current survey interviewers (field representatives) and Nonresponse Follow-up (NRFU) and Quality Check (QC) interviewers (enumerators) employed during census operations. The purpose of the survey is to determine the reasons for interviewer turnover and what the Bureau might have done or do to influence interviewing staff not to leave.

In addition to using form BC–1294 to collect data from field representatives who have left the Bureau, we will use Form BC–1294(D) to collect data from dress rehearsal and census enumerators on the factors that affected their decision as to whether to stay with an operation until it was completed. Since the nature of census enumerator work differs from current surveys interviewing (short term, intensive and concentrated work rather than continuing and diverse) we could not use the existing questionnaire, "as-is." The questions and response choices on the BC–1294(D) have been tailored to census operations and are more in-depth, although they cover largely the same topics as the BC–1294. Additionally, questions about a supplemental pay plan are included on the BC–1294(D). The 1998 Dress Rehearsal is the Bureau's final opportunity to test its planned operations and procedures in a simulated census environment in preparation for the 2000 Census. Interviewer turnover is of heightened concern during a decennial census because of the short time periods for data collection operations. Because of this heightened concern, Form BC–1294(D) was recently added to this clearance.

The information collected via the survey will help the Census Bureau develop plans to reduce turnover in its current survey and decennial interviewing staff. This in turn should allow for better informed management decisions regarding the field work force and the implementation of more effective pay plans and interviewer training for both current and decennial interviewers. Prior research has suggested a need for a more flexible pay plan for the decennial interviewing staff in order to recruit sufficient number of interviewers and reduce turnover. As part of the 1998 Dress Rehearsal, the Census Bureau will be testing a supplemental pay plan in which pay rates are tied to the local labor market and based partially on interviewer performance and whether interviewers stay to complete their assignments. Questions on the experimental decennial pay plans asked of dress rehearsal enumerators will be used to determine the impact of the variable and supplemental pay rates on enumerator turnover as well as the impact and effectiveness of decennial enumerator training.

II. Method of Collection

The data will be collected by telephone. Interviews with former field representatives should take no more than five (5) minutes. Because of the in-depth nature of some of the questions on the BC–1294(D) and the additional questions on the experimental decennial pay plans, interviews with former NRFU and QC enumerators should take no more than fifteen (15) minutes. We estimate that interviews will be conducted with a total of 160 field representatives and about 2,500 enumerators on a yearly basis.

For former field representatives: Approximately every month, a sample of one-half of all interviewers who voluntarily resigned within the period will be contacted by telephone to complete a questionnaire.

For 1998 Dress Rehearsal enumerators: Beginning approximately two weeks after the start of NRFU and QC operations, all enumerators who have continuously been in a non-pay status for a period of two weeks will be contacted by telephone to complete a questionnaire.

III. Data

OMB Number: 0607–0404.

Form Number: BC–1294, BC–1294(D).

Type of Review: Regular Submission.

Affected Public: Former Bureau Interviewers (Field Representatives and Enumerators).

Estimated Number of Respondents: 160 Former Current Survey Interviewers; 2,500 Former Dress Rehearsal Enumerators.

Estimated Time Per Response: 5 minutes for former current survey interviewers; 15 minutes for dress rehearsal enumerators.

Estimated Total Annual Burden Hours: 13 hours for former current survey interviewers; 625 hours for dress rehearsal enumerators; Total is 638 hours.

Estimated Total Annual Cost: The only cost to respondents is that of their time.

Respondent's Obligation: Voluntary.

Legal Authority: Title 5 USC, Section 3101 and Title 13 USC Section 23.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: May 12, 1998.

Linda Engelmeier,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR Doc. 98–13171 Filed 5–18–98; 8:45 am]

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

Bureau of Export Administration

Procedure to Initiate an Investigation Under the Trade Expansion Act of 1962

ACTION: Proposed collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before July 20, 1998.

ADDRESSES: Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Margaret Cahill, Trade and Industry Analyst, Bureau of Export Administration (BXA), Department of Commerce, Room 3876, 14th and Constitution Avenue, NW, Washington, DC 20230 (telephone no. (202) 482–3795).

SUPPLEMENTARY INFORMATION:

I. Abstract

Upon request, the Department of Commerce shall initiate an investigation to determine the effects of imports of certain commodities on the national security, and will make the findings known to the President for possible adjustments to imports through tariffs. The findings are made publicly available and are reported to Congress. The purpose of this collection of information is to account for the public burden associated with submitting such a request from any interested party, including other government departments or by the Secretary of Commerce.

II. Method of Collection

In written form. A request or application shall describe how the quantity, availability, character and uses of a particular imported article, or other circumstances related to its import affect the national security.

III. Data

OMB Number: N/A.

Form Number: N/A.

Type of Review: Regular submission of a collection in use without OMB approval.

Affected Public: Businesses, other for-profit institutions, Federal Government.

Estimated Number of Respondents: 2.

Estimated Time Per Response: 4.0 hours.

Estimated Total Annual Burden Hours: 8 hours.

Estimated Total Annual Cost: $480 for respondents—no equipment or other materials will need to be purchased to comply with the requirement.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: May 13, 1998.

Linda Engelmeier,

Departmental Forms Clearance Officer, Office of Management and Organization.

BILLING CODE 3510–33–P

DEPARTMENT OF COMMERCE

Bureau of Export Administration

Action Affecting Export Privileges; Summit Marketing, Inc., Order Denying Permission To Apply for or Use Export Licenses

In the Matter of: Summit Marketing, Inc., 52 Blackburn Center, Gloucester, Massachusetts 01930.

On September 26, 1997, Summit Marketing, Inc. was convicted in the United States District Court for the District of Massachusetts on four counts of violating Section 38 of the Arms Export Control Act (currently codified at 22 U.S.C.A. § 2778 (1990 & Supp. 1998)) (the AECA). Specifically, Summit Marketing, Inc. was convicted of knowingly and willfully exporting and attempting to export defense articles to France, for transshipment to Iran, without obtaining the required export licenses from the Department of State.

Section 11(h) of the Export Administration Act of 1979, as amended (currently codified at 50 U.S.C.A. app. §§ 2401–2420 (1991 & Supp. 1998)) (the Act),[1] provides that, at the discretion of the Secretary of Commerce,[2] no person convicted of violating the AECA, or certain other provisions of the United States Code, shall be eligible to apply for or use any license, including any

[1] the Act expired on August 20, 1994. Executive Order 12924 (3 C.F.R., 1994 comp. 917 (1995)), extended by Presidential Notices of August 15, 1995 (3 C.F.R., 1995 Comp. 501 (1996)), August 14, 1996 (3 C.F.R., 1996 Comp. 298 (1997)), and August 13, 1997 (62 *Fed. Reg.* 43629, August 15, 1997), continued the Export Administration Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C.A. §§ 1701–1706 (1991 & Supp. 1998)).

[2] Pursuant to appropriate delegations of authority, the Director, Office of Exporter Services, in consultation with the Director, Office of Export Enforcement, exercises the authority granted to the Secretary by Section 11(h) of the Act.

License Exception, issued pursuant to, or provided by, the Act or the Export Administration Regulations (currently codified at 15 C.F.R. Parts 730–774 (1997)) (the Regulations), for a period of up to 10 years from the date of the conviction. In addition, any license issued pursuant to the Act in which such a person had any interest at the time of conviction may be revoked.

Pursuant to Sections 766.25 and 750.8(a) of the Regulations, upon notification that a person has been convicted of violating the AECA, the Director, Office of Exporter Services, in consultation with the Director, Office of Export Enforcement, shall determine whether to deny that person permission to apply for or use any license, including any License Exception, issued pursuant to, or provided by, the Act or the Regulations, and shall also determine whether to revoke any license previously issued to such a person.

Having received notice of Summit Marketing, Inc.'s conviction for violating the AECA, and following consultations with the Acting Director, Office of Export Enforcement, I have decided to deny Summit Marketing, Inc. permission to apply for or use any license, including any License Exception, issued pursuant to, or provided by, the Act and the Regulations, for a period of eight years from the date of its conviction. The eight-year period ends on September 26, 2005. I have also decided to revoke all licenses issued pursuant to the Act in which Summit Marketing, Inc. had an interest at the time of its conviction.

Accordingly, it is hereby

Ordered

I. Until September 26, 2005, Summit Marketing, Inc., 52 Blackburn Center, Gloucester, Massachusetts 01930, may not, directly or indirectly, participate in any way, in any transaction involving any commodity, software or technology (hereinafter collectively referred to as "item") exported or to be exported from the United States, that is subject to the Regulations, or in any other activity subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, License Exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations; or

C. Benefiting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations.

II. No person may do, directly or indirectly, any of the following:

A. Export or reexport to or on behalf of the denied person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by a denied person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby a denied person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the denied person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the denied person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the denied person, or service any item, of whatever origin, that is owned, possessed or controlled by the denied person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

III. After notice and opportunity for comment as provided in Section 766.23 of the Regulations, any person, firm, corporation, or business organization related to Summit Marketing, Inc. by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be subject to the provisions of this Order.

IV. This Order does not prohibit any export, reexport, or other transaction subject to the Regulations where the only items involved that are subject to Regulations are the foreign-produced direct product of U.S.-origin technology.

V. This Order is effective immediately and shall remain in effect until September 26, 2005.

VI. A copy of this Order shall be delivered to Summit Marketing, Inc. This Order shall be published in the **Federal Register**.

Dated: May 11, 1998.

Eileen M. Albanese,

Director, Office of Exporter Services.

Action Affecting Export Privileges; Sanford B. Groetzinger; Order Denying Permission to Apply for or Use Export Licenses

In the Matter of: Sanford B. Groetzinger currently incarcerated at: Federal Correction Institute, Number 21423038, P.O. Box 7000, Fort Dix, New Jersey 08640, and with an address at: 82 Dennison Street, Gloucester, Massachusetts 01930.

On September 26, 1997, Sanford B. Groetzinger (Groetzinger) was convicted in the United States District Court for the District of Massachusetts on four courts of violating Section 38 of the Arms Export Control Act (currently codified at 22 U.S.C.A. 2778 (1990 & Supp. 1998)) (the AECA). Specifically, Groetzinger was convicted of knowingly and willfully exporting and attempting to export defense articles to France, for transshipment to Iran, without obtaining the required export licenses from the Department of State.

Section 11(h) of the Export Administration Act of 1979, as amended (currently codified at 50 U.S.C.A. app. §§ 2401–2420 (1991 & Supp. 1998)) (the Act),[1] provides that, at the discretion of the Secretary of Commerce,[2] no person convicted of violating the AECA, or certain other provisions of the United States Code, shall be eligible to apply for or use any license, including any License Exception, issued pursuant to, or provided by, the Act or the Export Administration Regulations (currently codified at 15 CFR Parts 730–774 (1997)) (the Regulations), for a period of up to 10 years from the date of the conviction. In addition, any license

[1] The Act expired on August 20, 1994. Executive Order 12924 (3 CFR 1994 Comp. 917 (1995)), extended by Presidential Notices of August 15, 1995 (3 CFR, 1995 comp. 501 (1996)), August 14, 1996 (3 CFR, 1196 Comp. 298 (1997)), and August 13, 1997 (62 FR 43629, August 15, 1997), continued the Export Administration Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C.A. §§ 1701–1706 (1991 & Supp. 1998)).

[2] Pursuant to appropriate delegations of authority, the Director, Office of Exporter Services, in consultation with the Director, Office of Export Enforcement, exercises the authority granted to the Secretary by Section 11(h) of the Act.

issued pursuant to the Act in which such a person had any interest at the time of conviction may be revoked.

Pursuant to Sections 766.25 and 750.8(a) of the Regulations, upon notification that a person has been convicted of violating the AECA, the Director, Office of Exporter Services, in consultation with the Director, Office of Export Enforcement, shall determine whether to deny that person permission to apply for or use any license, including any License Exception, issued pursuant to, or provided by, the Act or the Regulations, and shall also determine whether to revoke any license previously issued to such a person.

Having received notice of Groetzinger's conviction for violating the AECA, and following consultations with the Acting Director, Office of Export Enforcement, I have decided to deny Groetzinger permission to apply for or use any license, including any License Exception, issued pursuant to, or provided by, the Act and the Regulations, for a period of eight years from the date of his conviction. The eight-year period ends on September 26, 2005. I have also decided to revoke all licenses issued pursuant to the Act in which Groetzinger had an interest at the time of his conviction.

Accordingly, it is hereby

Ordered

I. Until September 26, 2005, Sanford B. Groetzinger, currently incarcerated at Federal Correction Institute, Number 21423038, P.O. Box 7000, Fort Dix, New Jersey 08640 and with an address at 82 Dennison Street, Gloucester, Massachusetts 01930, may not, directly or indirectly, participate in any way, in any transaction involving any commodity, software or technology (hereinafter collectively referred to as "item") exported or to be exported from the United States, that is subject to the Regulations, or in any other activity subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, License Exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations; or

C. Benefiting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations.

II. No person may do, directly or indirectly, any of the following:

A. Export or reexport to or on behalf of the denied person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by a denied person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby a denied person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the denied person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the denied person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the denied person, or service any item, of whatever origin, that is owned, possessed or controlled by the denied person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

III. After notice and opportunity for comment as provided in Section 766.23 of the Regulations, any person, firm, corporation, or business organization related to Groetzinger by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be subject to the provisions of this Order.

IV. This Order does not prohibit any export, reexport, or other transaction subject to the Regulations where the only items involved that are subject to the Regulations are the foreign-producted direct product of U.S.-origin technology.

V. This Order is effective immediately and shall remain in effect until September 26, 2005.

VI. A copy of this Order shall be delivered to Groetziner. This Order shall be published in the **Federal Register**.

Dated: May 11, 1998.

Eileen M. Albanese,

Director, Office of Exporter Services.

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC.

Docket Number: 97–095R. *Applicant:* Stanford University, Stanford Medical Center, 300 Pasteur Drive, Room 5302, Palo Alto, CA 94304. *Instrument:* Ultrasound Bone Densitometer. *Manufacturer:* McCue Plc, United Kingdom. *Intended Use:* Original notice of this resubmitted application was published in the **Federal Register** of December 15, 1997.

Docket Number: 98–024. *Applicant:* University of Michigan, Transportation Research Institute, 2910 Baxter Road, Ann Arbor, MI 48109–2150. *Instrument:* (3) Sensor Sets, Model ODIN 4. *Manufacturer:* A.D.C. GmbH, Germany. *Intended Use:* The instrument is intended to be used in a scientific study in which vehicles equipped with these sensors will be driven by human subjects to evaluate the performance of headway control systems. *Application accepted by Commissioner of Customs:* April 21, 1998.

Docket Number: 98–025. *Applicant:* University of California, Berkeley, Berkeley CA 94720. *Instrument:* Electron Detector. *Manufacturer:* Gammadata/Scienta AB, Sweden. *Intended Use:* The instrument will be used in angle-resolved photoemission experiments with the objective of studying the electronic structure and physical properties of superconducting

materials. In addition, the instrument will be used to train graduate students in their thesis research. All results will be made public and published in scientific journals. *Application accepted by Commissioner of Customs:* April 30, 1998.

Frank W. Creel,

Director, Statutory Import Programs Staff.

University of Wisconsin-Madison, et al.; Notice of Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW, Washington, DC

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, is being manufactured in the United States.

Docket Number: 98–011. *Applicant:* University of Wisconsin-Madison, Stoughton, WI 53589. *Instrument:* Hydrostatic Leveling System. *Manufacturer:* Fogale-Nanotech, France. *Intended Use:* See notice at 63 FR 12451, March 13, 1998. *Reasons:* The foreign instrument provides measurements of vertical position from a group of remote sensors (using a water-level reference) with a range of measurement from 6.0 to 8.5 mm and a precision of 1 µm. *Advice received from:* Argonne National Laboratory, April 29, 1998.

Docket Number: 98–015. *Applicant:* Brown University, Providence, RI 02912. *Instrument:* Material Preparation and Crystal Growth System, Model MCGS5. *Manufacturer:* Crystallox, Ltd., United Kingdom. *Intended Use:* See notice at 63 FR 15831, April 1, 1998. *Reasons:* The foreign instrument provides crystal growth using cold crucible or Bridgman technique for materials with very high melting point using 50kW induction heating. *Advice received from:* National Aeronautics and Space Administration, May 5, 1998.

The Argonne National Laboratory and the National Aeronautics and Space Administration advise that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to either of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

University of Texas at Austin; Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C.

Docket Number: 98–001. *Applicant:* University of Texas at Austin, Austin, TX 78712. *Instrument:* IR Image Furnace, Model SC–M35HD. *Manufacturer:* NEC Nichiden Machinery Ltd., Japan. *Intended Use:* See notice at 63 FR 8164, February 18, 1998.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. *Reasons:* The foreign instrument provides growth of oxide monocrystals using the traveling floating melt zone method. The National Aeronautics and Space Administration advised February 2, 1998 that (1) this capability is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use (comparable case).

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

[Docket No. 98040112–8112–01]

American Lumber Standard Committee; Additional Memberships Approved

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice.

SUMMARY: The National Institute of Standards and Technology announces that the Secretary of Commerce approved the request of the American Lumber Standard Commtitee ("the Committee") to allow membership for the National Lumber Grades Authority (NLGA) of Canada under Section 9.3.1 (rules-writing agencies) and for wood treaters under Section 9.3.3 (other interested and affected groups) of DOC Voluntary Product Standard PS 20–94 "American Softwood Lumber Standard."

ADDRESSES: Barbara M. Meigs, Office of Standards Services, National Institute of Standards and Technology, Room 164, Building 820, Gaithersburg, MD 20899.

FOR FURTHER INFORMATION CONTACT: Barbara M. Meigs, telephone: 301–975–4025, fax: 301–926–1559, e-mail: barbara.meigs@nist.gov.

SUPPLEMENTARY INFORMATION: Section 9.3.7 of DOC Voluntary Product Standard PS 20–94 "American Softwood Lumber Standard," developed under procedures published by the Department of Commerce (15 CFR Part 10), provides that the Secretary of Commerce, upon request, may consider making additional appointments to the Committee to ensure that it has a comprehensive balance of interests.

On February 13, 1997, NIST published a notice in the Federal Register (62 FR 6761) announcing that it was considering a request received from the Committee. The Committee, after its annual meeting in December 1996, had sent a letter to NIST requesting that one voting membership for the NLGA of Canada and one for wood treaters be approved. NIST announced a 90-day comment period to allow for public comment on the recommendation.

During the comment period, which ended on May 14, 1997, one current and

one former member of the Committee submitted objections to the NLGA and wood-treaters memberships. On October 29, 1997, after considering the Committee's recommendation and the comments of those who responded to the Federal Register notice, the Secretary of Commerce approved the recommendation of the Committee to allow one principal member and one alternate to represent the NLGA under Section 9.3.1 of PS 20–94 and one principal member and one alternate to represent wood treaters under Section 9.3.3.

Authority: 15 U.S.C. 272.

Dated: May 8, 1998.

Robert E. Hebner,

Acting Deputy Director.

National Institute of Standards and Technology

Notice of Government Owned Inventions Available for Licensing

AGENCY: National Institute of Standards and Technology, Commerce.

SUMMARY: The inventions listed below are owned in whole or in part by the U.S. Government, as represented by the Department of Commerce. The Department of Commerce's ownership interest in the inventions are available for licensing in accordance with 35 U.S.C. 207 and 37 CFR Part 404 to achieve expeditious commercialization of results of Federally funded research and development.

FOR FURTHER INFORMATION CONTACT: Technical and licensing information on these inventions may be obtained by writing to: National Institute of Standards and Technology, Industrial Partnerships Program, Building 820, Room 213, Gaithersburg, MD 20899; Fax 301–869–2751. Any request for information should include the NIST Docket No. and Title for the relevant invention as indicated below.

SUPPLEMENTARY INFORMATION: NIST may enter into a Cooperative Research and Development Agreement ("CRADA") with the licensee to perform further research on the inventions for purposes of commercialization. The inventions available for licensing are:

NIST Docket Number: 97–026.

Title: Method and Apparatus for Diffraction Measurement Using A Scanning X-Ray Source.

Abstract: This invention is jointly owned by the U.S. Government, as represented by the Secretary of Commerce, and Digiray Corporation. The present invention relates to x-ray diffraction measurement by using moving x-ray source x-ray diffraction. The invention comprises a raster-scanned x-ray source, a specimen, a collimator, and a detector. The x-ray source is electronically scanned which allows a complete image of the x-ray diffraction characteristics of the specimen to be produced. The specimen is placed remote from the x-ray source and the detector. The collimator is located directly in front of the detector. The x-rays are diffracted by the specimen at certain angles, which cause them to travel through the collimator and to the detector. The detector may be placed in any radial location relative to the specimen in order to take the necessary measurements. The detector can detect the intensity and/or the wavelength of the diffracted x-ray. All information needed to solve the Bragg equation as well as the Laue equations is available. The x-ray source may be scanned electronically or mechanically. The present invention is used to perform texture analysis and phase identification.

NIST Docket Number: 96–042.

Title: High Strength Polymeric Networks Derived (Meth) Acrylate Resins With Organoflourine Content and Process For Preparing Same.

Abstract: Disclosed are fluorinated materials for use in dental uses and non-dental uses, e.g., adhesives or coatings. Multifunctional monomers and prepolymers with pendant (meth) acrylate groups were prepared from epoxide-ring-opening reactions. Resins based on the fluorinated monomers and prepolymers with diluent comonomers, were photocured as composites with particulate fillers. Fluorine contents of the prepolymers ranged from 15 to 65%. Composites with high transverse strength (up to 120 MPa), low water sorption (as low as 0.11 mass %) and extremely low polymerization shrinkage (as low as 3.4% by volume) were obtained. The fluorinated resins may be employed to produce hydrophobic dental composite materials with high strength and low polymerization shrinkage.

NIST Docket Number: 96–038US.

Title: Fractional Phase Measurement By Polarization-Dependent Spectroscopy.

Abstract: The invention provides an inexpensive, noninvasive optical method of quantitatively determining the volume fraction of anisotroic material in a mixture of anisotropic and isotropic material, and more particularly for determining the volume fraction of noncubic crystalline material in a mixed-phase specimen having noncubic crystalline material intermixed with cubic crystalline material. Polarized light is impinged on the specimen and the reflectance or transmission difference between two orthogonal polarizations directions is measured. In cubic regions the reflectance or transmission is the same along both polarization directions so the contributions to the difference cancel, leaving a signal only from the noncubic regions. The optical difference can be measured as a function of wavelength and critical points in the band structure, including the band gap, can be profiled. From the band structure the film composition can be determined. This measurement is particularly suited to measuring III–V nitride semiconductor specimens having regions with zincblende symmetry mixed with regions of wurtzite symmetry.

NIST Docket Number: 96–025

Title: Broadband, Ultrahigh-Sensitivity Chemical Sensor Based on Intra-Cavity Total Reflection.

Abstract: This NIST invention permits broadband, ultra-sensitive measurement of optical absorption for any state of matter by the cavity ring-down technique using a small, monolithic, total internal reflection ring cavity. It significantly advances the sensitivity, accuracy, and adaptability of optical absorption spectroscopy for decisive qualitative and quantitative chemical analysis, with greatly increased trace analysis capability.

NIST Docket Number: 95–022.

Title: A Time Stamp Service for the National Information Network.

Abstract: This NIST invention consists of a method for applying a signed time-stamp to a document in digital format for the purpose of proving that the document existed on the date it was signed. Any digital-format document can be signed including simple text files, binary files, scanned images, etc. The document can be encrypted or encoded. The time-stamp is accurate to a few milliseconds, and the accuracy is directly traceable to UTC(NIST) in real-time. The signed document can be returned to the sender electronically and the document can also be forwarded automatically to any number of third parties provided only that the third parties are capable of receiving electronic mail.

Dated: May 12, 1998.

Robert E. Hebner,

Acting Deputy Director.

National Institute of Standards and Technology

Announcing a Meeting of the Computer System Security and Privacy Advisory Board

AGENCY: National Institute of Standards and Technology.

ACTION: Notice of meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App., notice is hereby given that the Computer System Security and Privacy Advisory Board (CSSPAB) will meet Tuesday, June 2, 1998, Wednesday, June 3, 1998, and Thursday, June 4, 1998, from 9 a.m. to 5 p.m. The Advisory Board was established by the Computer Security Act of 1987 (Pub. L. 100–235) to advise the Secretary of Commerce and the Director of NIST on security and privacy issues pertaining to federal computer systems. All sessions will be open to the public.

DATES: The meeting will be held on June 2–4, 1998, from 9:00 a.m. to 5:00 p.m.

ADDRESSES: The meeting will take place at the National Institute of Standards and Technology, Gaithersburg, Maryland in the Administration Building in Lecture Room A.

Agenda

- Welcome and Overview.
- Issues Update and Briefings.
- Computer Security Legislation Updates.
- Information Security Briefing.
- Privacy Issues Briefings.
- Crytography Policy Updates.
- Discussion.
- Pending Business.
- Public Participation.
- Agenda Development for September Meeting.
- Wrap-Up.

Public Participation

The Board agenda will include a period of time, not to exceed thirty minutes, for oral comments and questions from the public. Each speaker will be limited to five minutes. Members of the public who are interested in speaking are asked to contact the Board Secretariat at the telephone number indicated below. In addition, written statements are invited and may be submitted to the Board at any time. Written statements should be directed to the CSSPAB Secretariat, Information Technology Laboratory, Building 820, Room 426, National Institute of Standards and Technology, Gaithersburg, MD 20899–0001. It would be appreciated if 35 copies of written material were submitted for distribution to the Board and attendees no later than May 29, 1998. Approximately 20 seats will be available for the public and media.

FOR FURTHER INFORMATION CONTACT: Mr. Edward Roback, Board Secretariat, Information Technology Laboratory, National Institute of Standards and Technology, Building 820, Room 426, Gaithersburg, MD 20899–0001, telephone: (301) 975–3696.

Dated: May 8, 1998.

Robert E. Hebner,

Acting Deputy Director.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Northeast Region Survey of Intent and Capacity To Process Fish and Shellfish

ACTION: Proposed Collection; Comment Request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Pub. L. 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before July 17, 1998.

ADDRESSES: Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW., Washington DC 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Clay Heaton, Mid-Atlantic Fishery Management Council (MAFMC), 300 South New Street, Dover, Delaware 19901–6790, (302) 674–2331.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Fishery Management Plans for Atlantic Surf Clams and Ocean Quahogs, and Atlantic Mackerel, Squid, and Butterfish include requirements that the National Marine Fisheries Service and/or the MAFMC survey domestic processors and joint venture operators annually to establish industry capacity to utilize the managed species.

A survey, required under the squid, mackerel and butterfish regulations at 50 CFR 648.21(b), is used to establish the intent and capacity of the US industry to utilize allowable harvest in a given year. If the US industry is unable to fully utilize the allowed harvest of Atlantic mackerel, the excess may be used in establishing levels of catch for joint ventures and/or direct foreign harvest .

A survey, required under the surf clam and ocean quahog regulations at 50 CFR 648.7(a)(2)(ii), is used to obtain data for use in monitoring present processing activities and estimating future production at the processing plant level. As in previous years, this information is obtained annually through a telephone survey.

Both surveys seek information concerning annual capacity to process theses species; historical amount of product processed; and quantity of product to be processed in the future.

II. Method of Collection

Written and telephone surveys.

III. Data

OMB Number: 0648–0235.

Form Number: None.

Type of Review: Regular submission.

Affected Public: Business and other for-profit organizations.

Estimated Number of Respondents: 54.

Estimated Time Per Response: 15 minutes for the Atlantic mackerel, squid, and butterfish survey; 5 minutes for the Atlantic Surf Clam and ocean quahog survey.

Estimated Total Annual Burden Hours: 10 hours.

Estimated Total Annual Cost to Public: $0 (no capital expenditures required).

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB

approval of this information collection; they also will become a matter of public record.

Dated: May 13, 1998.

Linda Engelmeier,

Departmental Forms Clearance Officer, Office of Management and Organization.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Surf Clam/Ocean Quahog ITQ Transfer Form; Proposed Collection; Comment Request

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before July 20, 1998.

ADDRESSES: Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington DC 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Myles Raizin, NMFS, 1 Blackburn Drive, Gloucester, MA, 01930, (978) 281–9104.

SUPPLEMENTARY INFORMATION:

I. Abstract

Amendment 8 to the Fishery Management Plan for Surf Clams and Ocean Quahogs (FMP) implemented an individual transferable quota (ITQ) system for both fisheries. The FMP, under 50 CFR § 648.70 (b), requires the Regional Administrator, NMFS, Northeast Region, to approve both permanent and temporary transfers of allocations. The Surf Clam/Ocean Quahog ITQ Transfer Form (Form) serves as the official application to the Regional Administrator to effect these transfers. The Form requires names of the transferor and transferee and their respective allocation numbers, and number of 32-bushel cages transferred and corresponding cage tag numbers. New applicants must furnish vessel name, owner name, address, and telephone number, and NMFS will assign them an allocation number. Both the transferor and transferee must sign the form.

II. Method of Collection

Written application.

III. Data

OMB Number: 0648–0238.
Form Number: None.
Type of Review: Regular submission.
Affected Public: Business and other for-profit organizations.
Estimated Number of Respondents: 206.
Estimated Time Per Response: 5 minutes.
Estimated Total Annual Burden Hours: 52 hours.
Estimated Total Annual Cost to Public: $0 (no capital expenditures).

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: May 13, 1998.

Application to Shuck Surf Clams/Ocean Quahogs at Sea; Proposed Collection; Comment Request

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before July 20, 1998.

ADDRESSES: Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington DC 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Myles Raizin, NMFS, 1 Blackburn Drive, Gloucester, MA, 01930, (978)281–9104.

SUPPLEMENTARY INFORMATION:

I. Abstract

Amendment 8 to the Fishery Management Plan for Surf Clams and Ocean Quahogs (FMP) implemented a requirement for vessel owners that desire to use their vessels for shucking either surf clams or ocean quahogs at sea to submit an Application to Process Surf Clams/Ocean Quahogs at Sea (Application) to the Regional Administrator, NMFS, Northeast Region (Regional Administrator). The contents of the application are specified at 50 CFR 648.74(a)(2) and include: Name and address of the applicant, permit number of the vessel, method of calculating the amount of surf clams or ocean quahogs harvested in the shell, vessel dimensions and accommodations, and length of fishing trip. Upon receipt of the application, the Regional Administrator may allow the shucking of surf clams or ocean quahogs at sea if he/she determines that an observer carried aboard the vessel can measure accurately, in bushels, the total amount of surf clams and ocean quahogs harvested in the shell prior to shucking. The calculation of bushels is extremely important since the fisheries operate under a system of individual transferable quotas which are defined in 32-bushel units.

II. Method of Collection

Written application.

III. Data

OMB Number: 0648–0240.
Form Number: None.
Type of Review: Regular submission.
Affected Public: Business and other for-profit organizations.
Estimated Number of Respondents: 2.

Estimated Time Per Response: 5 minutes.

Estimated Total Annual Burden Hours: 2 hours.

Estimated Total Annual Cost to Public: $0 (no capital expenditures).

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: May 13, 1998.

Linda Engelmeier,

Departmental Forms Clearance Officer, Office of Management and Organization.

BILLING CODE 3510–22–P

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Macau

May 12, 1998.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs increasing limits.

EFFECTIVE DATE: May 19, 1998

FOR FURTHER INFORMATION CONTACT: Helen L. LeGrande, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–5850. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The current limits for certain categories are being increased by recrediting unused carryforward applied to the 1997 limits.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 62 FR 66057, published on December 17, 1997). Also see 62 FR 66054, published on December 17, 1997.

Troy H. Cribb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

May 12, 1998.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 9, 1997, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Macau and exported during the period January 1, 1998 through December 31, 1998.

Effective on May 19, 1998, you are directed to increase the limits for the following categories, as provided for under the Uruguay Round Agreement on Textiles and Clothing (ATC):

Category	Adjusted limit [1]
Levels in Group I	
336/836	68,874 dozen.
339	1,559,066 dozen.
340	354,068 dozen.
341	228,367 dozen.
342	103,312 dozen.
345	61,107 dozen.
347/348/847	839,444 dozen.
351/851	78,849 dozen.
359–V [2]	137,751 kilograms.
638/639/838	1,916,176 dozen.
659–S [3]	137,751 kilograms.
Group II	
400–431, 433–438, 440–448, 459pt. [4], 464, and 469pt. [5], as a group.	1,526,865 square meters equivalent.
Sublevel in Group II	
445/446	82,315 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1997.

[2] Category 359–V: only HTS numbers 6103.19.2030, 6103.19.9030, 6104.12.0040, 6104.19.8040, 6110.20.1022, 6110.20.1024, 6110.20.2030, 6110.20.2035, 6110.90.9044, 6110.90.9046, 6201.92.2010, 6202.92.2020, 6203.19.1030, 6203.19.9030, 6204.12.0040, 6204.19.8040, 6211.32.0070 and 6211.42.0070.

[3] Category 659–S: only HTS numbers 6112.31.0010, 6112.31.0020, 6112.41.0010, 6112.41.0020, 6112.41.0030, 6112.41.0040, 6211.11.1010, 6211.11.1020, 6211.12.1010 and 6211.12.1020.

[4] Category 459pt.: all HTS numbers except 6405.20.6030, 6405.20.6060, 6405.20.6090, 6406.99.1505 and 6406.99.1560.

[5] Category 469pt.: all HTS numbers except 5601.29.0020, 5603.94.1010 and 6406.10.9020.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Troy H. Cribb,

Chairman, Committee for the Implementation of Textile Agreements.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products and Silk Blend and Other Vegetable Fiber Apparel Produced or Manufactured in the Philippines

May 12, 1998.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: May 19, 1998.

FOR FURTHER INFORMATION CONTACT: Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–5850. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The current limits for certain categories are being adjusted, variously, for swing, special shift, carryforward and carryforward used.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 62 FR 66057, published on December 17, 1997). Also see 62 FR 64361, published on December 5, 1997.

Troy H. Cribb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

May 12, 1998.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 1, 1997, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man–made fiber textiles and textile products and silk blend and other vegetable fiber apparel, produced or manufactured in the Philippines and exported during the twelve-month period which began on January 1, 1998 and extends through December 31, 1998.

Effective on May 19, 1998, you are directed to adjust the limits for the following categories, as provided for under the Uruguay Round Agreement on Textiles and Clothing:

Category	Adjusted twelve-month limit [1]
Levels in Group I	
237	1,621,830 dozen.
338/339	2,587,680 dozen.
347/348	2,349,631 dozen.
638/639	1,916,606 dozen.
847	740,049 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1997.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Troy H. Cribb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

COMMODITY FUTURES TRADING COMMISSION

Application of the Chicago Mercantile Exchange for Designation as a Contract Market in Pork Composite Futures and Options

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of terms and conditions of proposed commodity futures and options contract.

SUMMARY: The Chicago Mercantile Exchange (CME or Exchange) has applied for designation as a contract market in pork composite futures and options. The Director of the Division of Economic Analysis (Division) of the Commission, acting pursuant to the authority delegated by Commission Regulation 140.96, has determined that publication of the proposals for comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purpose of the Commodity Exchange Act.

DATES: Comments must be received on or before June 18, 1998.

ADDRESSES: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581. In addition, comments may be sent by facsimile transmission to facsimile number (202) 418–5521, or by electronic mail to secretary@cftc.gov. Reference should be made to the CME pork composite futures and options contract.

FOR FURTHER INFORMATION CONTACT: Please contact John Bird of the Division of Economic Analysis, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581, telephone (202) 418–5274. Facsimile number: (202) 418–5527. Electronic mail: jbird@cftc.gov.

SUPPLEMENTARY INFORMATION: Copies of the terms and conditions will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 418–5100.

Other materials submitted by the CME in support of the applications for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR part 145 (1997)), except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Act Compliance Staff of the Office of Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views, or arguments on the proposed terms and conditions, or with respect to other materials submitted by the CME, should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581 by the specified date.

Issued in Washington, DC, on May 12, 1998.

Steven Manaster,

Director.

BILLING CODE 6351–01–M

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Proposed Collection; Comment Request.

SUMMARY: The Acting Deputy Chief Information Officer, Office of the Chief Information Officer, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before July 20, 1998.

ADDRESSES: Written comments and requests for copies of the proposed information collection requests should be addressed to Patrick J. Sherrill, Department of Education, 600 Independence Avenue, S.W., Room 5624, Regional Office Building 3, Washington, DC 20202–4651.

FOR FURTHER INFORMATION CONTACT: Patrick J. Sherrill (202) 708–8196. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U. S. C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early

opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Acting Deputy Chief Information Officer, Office of the Chief Information Officer, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment at the address specified above. Copies of the requests are available from Patrick J. Sherrill at the address specified above.

The Department of Education is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department, (2) will this information be processed and used in a timely manner, (3) is the estimate of burden accurate, (4) how might the Department enhance the quality, utility, and clarity of the information to be collected, and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: May 13, 1998.

Hazel Fiers,

Acting Deputy Chief Information Officer, Office of the Chief Information Officer.

Office of the Under Secretary

Type of Review: New.
Title: An Evaluation of the Comprehensive Regional Assistance Centers.
Frequency: One time.
Affected Public: State, local or Tribal Gov't, SEAs or LEAs.
Reporting and Recordkeeping Hour Burden:
Responses: 2,620.
Burden Hours: 1,140.
Abstract: This evaluation will describe the work of the Comprehensive Centers, identify particularly promising strategies and assess the availability, quality, and effectiveness of the Centers' services. Recipients and non-recipients of Center services will be surveyed, and Center staff, staff of partner organizations, and ED staff will be interviewed.

Office of Energy Efficiency and Renewable Energy

Objective Merit Review of Discretionary Financial Assistance Applications

AGENCY: Department of Energy.
ACTION: Notice of Objective Merit Review Procedure.

SUMMARY: This Notice establishes the procedure followed by program and regional support offices under the purview of the Assistant Secretary for Energy Efficiency and Renewable Energy (ASEE) in conducting the objective merit review of discretionary financial assistance applications.

UMI
VOL
63
ISS
96
MAY
19
1998
UMI

EFFECTIVE DATE: May 19, 1998.

FOR FURTHER INFORMATION CONTACT: Ms. Kathy A. Martin, Office of Energy Efficiency and Renewable Energy, EE–60, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585–0121, (202) 586–9108.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Applicability of Notice
III. Distinction between Solicited and Unsolicited Proposals
IV. Objective Merit Review Procedure
V. Deviations
VI. EE Selection Process

I. Introduction

The Department of Energy (DOE) today gives notice of the procedure for the objective merit review of discretionary financial assistance in the Offices of the Assistant Secretary for Energy Efficiency and Renewable Energy. Financial assistance is provided, in the form of a grant or cooperative agreement, when the principal purpose of the transaction is the transfer of money or property to accomplish a public purpose of support or stimulation as authorized by Federal statute. Discretionary financial assistance is financial assistance provided under a federal statute which authorizes DOE to select the recipient and the project to be supported and to determine the amount to be awarded. This differs from a procurement, which refers to instruments used when the principal purpose of the transaction is the acquisition of supplies or services for the direct benefit of the Government. The procedure implements the objective merit review provisions of the DOE Financial Assistance Rules in (10 Code of Federal Regulations (CFR), § 600.13).

II. Applicability of Notice

The procedure covers the evaluation of all discretionary financial assistance applications within the programs of the DOE Office of Energy Efficiency and Renewable Energy and apply to both solicited and unsolicited applications.

III. Distinction Between Solicited and Unsolicited Proposals

Solicited proposals are direct responses by interested organizations or individuals to published requests issued by DOE for the submission of applications for discretionary financial assistance awards. Solicited proposals are awarded on a competitive basis using the criteria set forth in 10 CFR 600.8. When a proposal is submitted solely on the proposer's initiative and the idea, method or approach which would not be eligible for assistance under a recent, current, or planned solicitation, and if, as determined by DOE, a competitive solicitation would not be appropriate, the proposal is considered an unsolicited proposal. Unsolicited proposals are awarded on a noncompetitive basis using the criteria set forth in 10 CFR 600.6 (c). The two types of proposals are treated differently, as described in paragraph IV. (c), below.

IV. Objective Merit Review Procedure

(a) *Definition and Purpose.* Merit review is the process of evaluating applications for discretionary financial assistance using established criteria. The review is thorough, consistent and independent and is completed by individuals knowledgeable in the field of endeavor for which support is requested. The purpose of the review is to provide advice on the technical and cost-related merits of applications to the Selection Official with decision-making authority over the award of discretionary financial assistance.

(b) *Basic Review Standards.* (1) Initial Review. All financial assistance applications received by EE will be assigned to the respective EE program official who will initially review the document(s) for conformance with the technical and administrative requirements stated in the program rule, notice or solicitation and funding availability. (2) Evaluation. Applications which pass the initial review will be evaluated in accordance with stated evaluation criteria set forth in the program rule, notice, solicitation, or, where appropriate, the unsolicited proposal criteria. Those applications not meeting the evaluation criteria of the program rule, notice, solicitation, or the unsolicited proposal may be returned to the sender to be corrected or modified/supplemented by the sender. Those applications judged to be so inadequate that an evaluation is not warranted will be returned to the sender.

(c) *Criteria for Merit Review.* Applications which pass the initial review and meet the evaluation criteria set forth in the program rule, notice or solicitation are subjected to an objective merit review for discretionary financial assistance. The criteria used for the evaluation of solicited applications must be clearly stated in the solicitation along with the relative importance given to each criterion. The criteria, and other mandatory information specified in 10 CFR 600.8, must be in the solicitation. If an unsolicited proposal is initially favorably evaluated against program/policy factors, it should be considered for an objective merit review for discretionary financial assistance. The criteria used for the evaluation of unsolicited proposals is set forth in 10 CFR 600.6 (c).

(d) *The Merit Review Committee.* (1) The ASEE has the ultimate responsibility for appointments to a merit review committee (the Committee). The ASEE may delegate the appointment authority and decision-making authority (Selection Official function) to Deputy Assistant Secretaries (DAS), Office Directors and Regional Support Office Directors.

(2) The Committee, whether a standing committee or other review committee, shall be comprised of three or more professionally and technically qualified persons. The committee members may be a mixture of federal and non-federal experts. Non-Federal members shall be selected on the basis of their professional qualifications and expertise.

(3) Members of the merit review committee should exclude anyone who, on behalf of the Federal Government, performs any of the following functions:

(i) Providing substantial technical assistance to the applicant;

(ii) Approving/disapproving or having any decision-making role regarding the application;

(iii) Serving as the Contracting Officer (CO) or performing business management functions for the project;

(iv) Auditing the recipient for the project; or

(v) Exercising line authority over anyone ineligible to serve as a reviewer because of the above limitations.

(4) The Selection Official must appoint one member of the merit review committee to serve as chairperson. The chairperson is responsible for:

(i) Obtaining signed certificates of confidentiality from all committee members;

(ii) Preparing the written summary of the evaluation and recommendations for the Selection Official for the applicant's file; and

(iii) Performing the merit review duties of a regular committee member.

(5) The nature of EE's program solicitations will dictate the feasibility of using standing or ad hoc committees. When solicitations are generally being issued to meet specific program objectives with time or subject limitations, EE program offices will use ad hoc committees. Ad hoc committees are also appropriate under the following circumstances:

(i) For small numbers of applications received intermittently;

(ii) For programs of short duration, usually under one year;

(iii) To supplement review by standing committees when the volume of applications is usually large, and for applications with special review requirements.

(6) The regular use of ad hoc committees does not preclude the use of standing committees under the following circumstances:

(i) When required by legislation,

(ii) When a sufficient number of applications on a specific topic are received regularly and there is a sufficient number of qualified experts willing to serve on the committee for a prolonged tenure; and

(iii) When the legislative authority for the particular program involved extends for more than one year.

(7) Field readers may be used as an adjunct to a review committee. Field readers must be fully briefed by the designated Contract Officer's Representative so as to understand the process, including the review criteria, the weight given each criterion, and the fact that any criteria not specified in the solicitation are not to be used to evaluate the applications. The field readers must sign a certificate of confidentiality, as provided in 10 CFR 600.13(d). Field readers should follow, as closely as possible, the procedures that would have been used by a standing committee.

(e) Conflict of Interest. Members of the review committee must act in a manner consistent with 10 CFR 1010.101. Reviewers who do not meet these requirements shall not review, discuss, or make recommendations concerning the application. Review committee members with a conflict of interest shall also absent themselves from all meetings in which the application in question is discussed.

(f) Authorized Uses of Information. The review committee must act in a manner consistent with 10 CFR 600.15 when dealing with applications containing trade secrets, privileged, confidential commercial, and/or financial information, unless the information is unrestricted information available from other sources.

(g) Authority Beyond Evaluation. The Selection Official may decide not to accept a proposal that receives a favorable recommendation from the merit review committee due to policy or program factors. The explanation for the decision not to accept a recommendation from the merit review committee must be documented in writing for the applicant's file and must be prepared and signed by the ASEE or his/her designee.

(h) Written Evaluation Summary. Upon request, applicants are to be furnished a written summary of the evaluation of their application.

V. Deviations

If an EE program office wants to deviate from these procedures for merit review of an application or a class of applications, but will still follow the rules of 10 CFR 600.13, that office must obtain written permission from the ASEE. Permission to use procedures which deviate from 10 CFR 600 must be requested in writing to the responsible DOE Contracting Officer in accordance with 10 CFR 600.4. The Head of Contracting Activity has the authority to approve such procedures for a single case deviation, while the DAS for Procurement and Assistance Management has the authority to approve a class deviation. A deviation may be authorized only upon written determination that the deviation is necessary for any of the reasons set forth in 10 CFR 600.4 (b).

VI. EE Selection Process

Selection of applications for discretionary financial assistance will be based on the Selection Officials' acceptance of the merit review committees' recommendations and the findings of a separate programmatic review of program/policy factors relevant to EE's mission.

Issued in Washington, D.C., on May 13, 1998.

Dan W. Reicher,

Assistant Secretary, Energy Efficiency and Renewable Energy.

[FR Doc. 98–13244 Filed 5–18–98; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Office of Energy Research

Energy Research Financial Assistance Program Notice 98–17; Innovations in Magnetic Fusion Energy Diagnostic Systems

AGENCY: Office of Energy Research, U.S. Department of Energy.

ACTION: Notice inviting grant applications.

SUMMARY: The Office of Fusion Energy Sciences (OFES) of the Office of Energy Research, U.S. Department of Energy (DOE) announces its interest in receiving grant applications for innovative research in magnetic fusion energy diagnostic systems. Research projects are sought that are unique, first of a kind, and provide new scientific insights. Applications for implementation of an *established* diagnostic technique on existing or planned facilities should *not* be submitted in response to this Notice. Successful applications will be funded in FY 1999.

DATES: To permit timely consideration for awards in Fiscal Year 1999, applications submitted in response to this notice must be received no later than 4:30 p.m., August 4, 1998. No electronic submissions of formal applications will be accepted.

ADDRESSES: Completed formal applications referencing Program Notice 98–17 should be forwarded to: U.S. Department of Energy, Office of Energy Research, Grants and Contracts Division, ER–64, 19901 Germantown Road, Germantown, Maryland 20874–1290, ATTN: Program Notice 98–17. The above address must also be used when submitting applications by U.S. Postal Service Express, any commercial mail delivery service, or when hand carried by the applicant.

FOR FURTHER INFORMATION CONTACT: Dr. Darlene Markevich, ER–55 GTN, U.S. Department of Energy, 19901 Germantown Road, Germantown, MD 20874–1290, Telephone: (301) 903–4920 or 3287, or by Internet address, darlene.markevich@mailgw.er.doe.gov.

SUPPLEMENTARY INFORMATION: The Office of Fusion Energy Sciences is interested in receiving applications for innovative diagnostic systems that have the possibility of leading to improved understanding of plasma behavior in tokamaks, innovative confinement concepts, and burning plasma experiments. Research projects are sought that are unique, first of a kind, and provide new scientific insights. Although the main thrust of this initiative is for experimental work, consideration will be given to applications that are directed at a short-term scientific assessment of new diagnostic concepts that are not ready for extensive experimental investigation. Applications for the implementation of an established diagnostic technique on existing or planned facilities should not be submitted in response to this Notice. Also, applications for theory/modeling investigations or initiatives in Inertial Fusion Energy should not be submitted in response to this Notice.

In selecting applications for funding, the DOE Office of Fusion Energy Sciences will give priority to applications that can produce experimental results within three to five years after grant initiation. Except for assessment applications, the detailed description of the proposed project should contain the following items: (1)

A detailed experimental research plan; (2) The specific results or deliverable expected at the end of the grant period; (3) The goal of the experiment; (4) A synopsis of the experimental program plan; (5) Adequacy of the facilities and budget; and (6) A proposed outline on how the diagnostic will be carried to a proof-of-principle (POP) demonstration. An estimated budget for POP demonstration must be included if the POP would be carried out after the end of the normal 3-year project period for a grant.

Applications concerned with scientific assessment of new diagnostic techniques that are not ready for experimental investigation should have a well-defined scope and a duration of no more than six months. These applications will be considered non-renewable. The product of such an assessment would be a clear scientific description of the diagnostic concept, the knowledge of fusion plasma behavior that would be gained from the diagnostic, and a critical analysis of major difficulties to be overcome in developing the concept.

Program Funding

It is anticipated that up to a total of $600,000 of Fiscal Year 1999 Federal funds will be available for new awards resulting from this Notice. Multiple-year funding of grant awards is anticipated, contingent upon the availability of funds. It is intended to support the research through proof-of-principle implementation on an existing fusion facility, consistent with availability of funds. However, future-year funding will depend on suitable experimental progress and the availability of funds. Because of the total amount of anticipated available funding and because of the intent to have a broadly based program, experimental applications with an annual requirement in any year in excess of $300,000 are unlikely to be funded. The cost-effectiveness of the application will be considered when comparing applications with different funding requirements. Applications for scientific assessment of new concepts will be limited to a maximum of $50,000. DOE reserves the right to fund in whole or part any or none of the applications received in response to this Notice.

A parallel request for Field Work Proposals will be issued to DOE Federally Funded Research and Development Centers (FFRDCs). All projects will be evaluated using the same criteria, regardless of the submitting institution.

Collaboration

Applicants to this Notice are encouraged to collaborate with researchers in other institutions, such as universities, industry, non-profit organizations, federal laboratories, and FFRDCs, including the DOE National Laboratories, where appropriate, and to incorporate cost sharing and/or consortia wherever feasible.

An individual may be named as primary principal investigator on only one application submitted in response to this Notice. It is permissible, however, for the same principal investigator to be named as a co-principal investigator on one other application submitted in response to either this Notice, or the corresponding request for Field Work Proposals for this initiative. Collaborative projects involving several research groups at more than one institution may receive larger awards if merited. The program will be competitive and offered to investigators in universities or other institutions of higher education, other non-profit or for-profit organizations, non-Federal agencies or entities, or unaffiliated individuals.

Collaborative research applications may be submitted in several ways:

(1) When multiple private sector or academic organizations intend to propose collaborative or joint research projects, the lead organization may submit a single application which includes another organization as a lower-tier participant (subcontract) who will be responsible for a smaller portion of the overall project. If approved for funding, DOE may provide the total project funds to the lead organization who will provide funding to the other participant via a subcontract arrangement. The application should clearly describe the role to be played by each organization, specify the managerial arrangements and explain the advantages of the multi-organizational effort.

(2) Alternatively, multiple private sector or academic organizations who intend to propose collaborative or joint research projects may each prepare a portion of the application, then combine each portion into a single, integrated scientific application. A separate Face Page and Budget Pages must be included for each organization participating in the collaborative project. The joint application must be submitted to DOE as one package. If approved for funding, DOE will award a separate grant to each collaborating organization.

(3) Private sector or academic applicants who wish to form a collaborative project with a DOE FFRDC may not include the DOE FFRDC in their application as a lower-tier participant (subcontract). Rather, each collaborator may prepare a portion of the proposal, then combine each portion into a single, integrated scientific proposal. The private sector or academic organization must include a Face Page and Budget Pages for their portion of the project. The FFRDC must include separate Budget Pages for their portion of the project. The joint proposal must be submitted to DOE as one package. If approved for funding, DOE will award a grant to the private sector or academic organization. The FFRDC will be funded, through existing DOE contracts, from funds specifically designated for new FFRDC projects. DOE FFRDCs will not compete for funding already designated for private sector or academic organizations. Other Federal laboratories who wish to form collaborative projects may also follow guidelines outlined in this section.

Application Format

To enable all reviewers to read all applications, the application must be limited to a maximum of twenty (20) pages (including text and figures), plus not more than one page each of biographical information and publications of the principal investigator, plus any additional forms required as a part of the standard grant application.

An original and seven copies of each application must be submitted. Due to the anticipated number of reviewers, it would be helpful for each applicant to submit an additional five copies of each application.

Applications will be subjected to formal merit review and will be evaluated against the following criteria, which are listed in descending order of importance as set forth in 10 CFR Part 605:

1. Scientific and/or technical merit of the project;
2. Appropriateness of the proposed method or approach;
3. Competency of the applicant's personnel and adequacy of the proposed resources; and
4. Reasonableness and appropriateness of the proposed budget.

In addition to peer review, funding decisions will be based on program policy factors, such as the relevance of the proposed research to the terms of the announcement and the agency's programmatic needs. General information about development and submission of applications, eligibility, limitations, evaluations and selection processes, and other policies and

procedures may be found in the Application Guide for the Office of Energy Research Financial Assistance Program and 10 CFR Part 605. Electronic access to the Application Guide is possible via the Internet using the following Web site address: http://www.er.doe.gov/production/grants/grants.html

References for Background Information

In order to assist the potential applicant under this Notice, the summary of a recent workshop that addressed measurement needs in fusion devices is provided on the World Wide Web at: http://wwwofe.er.doe.gov/more—html/pdffiles/diag.pdf The summary is intended as background information on measurement needs. New diagnostic techniques that address these measurements are the ones most likely to be considered for funding under this Notice. However, new diagnostic techniques that address other measurements in fusion plasmas will also be considered for funding under this Notice.

For those without access to the World Wide Web, hard copies of the workshop summary may be obtained by contacting Mr. John Sauter at (phone) 301–903–3287, (fax) 301–903–4716, or in writing at U.S. Department of Energy, Office of Energy Research, ER–55, 19901 Germantown Road, Germantown, MD 20874–1290.

The Catalog of Federal Domestic Assistance Number for this program is 81.049, and the solicitation control number is ERFAP 10 CFR Part 605.

Issued in Washington, DC, on May 8, 1998.

Ralph H. DeLorenzo,

Acting Associate Director for Resource Management, Office of Energy Research.

Federal Energy Regulatory Commission

[Docket No. ER98–2645–000]

Alliant Services, Inc., IES Utilities Inc., et al.; Notice of Filing

May 13, 1998.

Take notice that on April 20, 1998, Alliant Services, Inc. (Alliant), on its own behalf and on behalf of IES Utilities Inc., Interstate Power Company, Wisconsin Power & Light Company, South Beloit Water, Gas & Electric Company, Heartland Energy Services and Industrial Energy Applications, Inc. (the IEC Operating Companies), submitted as a compliance filing the System Coordination and Operating Agreement Among IES, IPC, WPL and Alliant and Alliant's Order No. 888–A open access transmission tariff. The filings were made in response to the Commission's Opinion No. 419 approving the merger of the companies. The filings are proposed to take effect on April 21, 1998.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protests with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.211 and 18 CFR 385.214). All such motions and protests should be filed on or before May 22, 1998. Protests will be considered by the Commission to determine the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–512–000]

Destin Pipeline Company, L.L.C.; Notice of Application

May 13, 1998.

Take notice that on May 4, 1998, Destin Pipeline Company, L.L.C. (Destin), Post Office Box 2563, Birmingham, Alabama 35202–2563, filed in Docket No. CP98–512–000 an application pursuant to Section 7(c) of the Natural Gas Act (NGA) for authorization to construct and operate a pipeline extension and appurtenant facilities in the Mississippi Canyon area of the Gulf of Mexico, to serve as gas supply facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Destin proposes to install and operate approximately 31 miles of 24-inch lateral pipeline from Chevron USA Inc.'s (Chevron) Viosca Knoll Block 900 Platform to a sub-sea tie-in to be located near the Main Pass Block 279 Platform, all in Federal Waters, Gulf of Mexico, and appurtenant facilities including a pig launcher and measurement facilities. It is stated that the facilities are designated the Gemini Expansion Facilities and are being installed to gain access to a supply of natural gas from a new deep water prospect named Gemini in Mississippi Canyon Area Blocks 247, 291, and 292. It is asserted that Texaco Exploration and Production Inc. and Chevron have signed agreements with Destin for the transportation of up to 180 Mmcf of gas per day from the Gemini gas supply under Destin's Rate Schedule F–2.

Destin proposes to own, operate and maintain the facilities as part of its pipeline system and to finance the cost of $37.2 million. Destin requests rolled-in rate treatment for the cost of the facilities, asserting that they will be an integral part of its system. Destin requests Commission authorization by July 31, 1998, in order to have the proposed facilities placed in service by March, 1999.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 3, 1998, file with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the NGA and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be

unnecessary for Destin to appear or be represented at the hearing.

Linwood A. Watson, Jr.,

Acting Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 4715–012]

Felts Mills Energy Partners, L.P.; Notice Dismissing Request for Rehearing

May 13, 1998.

On March 17, 1998, the Director, Office of Hydropower Licensing, issued an order granting to the licensee for the Felts Mills Project No. 4715 an extension of time to comply with the requirements of Articles 205 and 405 of its license. On April 17, 1998, New York Rivers United filed a request for rehearing of the Director's order.

Rule 713 of the Commission's Rules of Practice and Procedure provides that rehearing may be sought only with respect to a "final Commission decision or other final order." [1] The Director's order in this case, allowing the licensee additional time to submit its plan and aperture cards, is interlocutory, and is not therefore subject to rehearing.[2] Accordingly, New York Rivers United's request for rehearing is dismissed.[3]

This notice constitutes final agency action. Requests for rehearing by the Commission of this dismissal notice may be filed within 30 days of the date of issuance of this notice, pursuant to 18 CFR 385.713.

Linwood A. Watson, Jr.,

Acting Secretary.

[FR Doc. 98–13201 Filed 5–18–98; 8:45 am]

BILLING CODE 6717–01–M

---

[1] 18 CFR 385.713(b).

[2] *See e.g.*, Wisconsin Valley Improvement Company, 80 FERC ¶ 61,319 (1997).

[3] Even if the rehearing request had not been interlocutory, it would have to be dismissed since a request for rehearing may be filed only by a party to the proceeding. With regard to post-licensing proceedings, the Commission only entertains motions to intervene where the filings at issue entail material changes in the plan of project development or in the terms and conditions of the license, or could adversely affect the rights of property-holders in a manner not contemplated by the license. *See* Kings River Conservation District, 36 FERC ¶ 61,365 (1986). Such was not the case here. Thus, notice of this proceeding was not issued, and motions to intervene were not entertained.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–515–000]

Transcontinental Gas Pipe Line Corporation; Notice of Request Under Blanket Authorization

May 13, 1998.

Take notice that on May 4, 1998, Transcontinental Gas Pipe Line Corporation (Transco), Post Office Box 1396, Houston, Texas 77251, filed in Docket No. CP98–515–000, a request pursuant to Section 157.205 and 157.211 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.211) for authorization to construct and operate a sales tap for Frontier Energy (Frontier), a North Carolina natural gas local distribution and transmission pipeline company, under Trancso's blanket certificate issued in Docket No. CP82–426–000, pursuant to 18 CFR Part 157, Subpart F of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Transco states that the sales tap would consist of two six-inch valve tap assemblies, a meter station with two six-inch meter runs and other appurtenant facilities near milepost 1308.45 on Transco's mainline in Rowan County, North Carolina. Transco further states that Frontier would construct, or cause to be constructed, appurtenent facilities as part of a new "greenfield" natural gas distribution project to enable it to receive gas from Transco at the sales tap and redeliver the gas to serve several counties in northwestern North Carolina which do not have current access to natural gas.

Transco also states that the new sales tap would be used by Frontier to receive up to 45,000 dekatherms of gas per day from Transco. It is stated that the gas delivered through the new sales tap would be received by Frontier for redeliveries in its capacity as a new local distribution company. Transco states that Frontier is not currently a transportation customer of Transco. It is further stated that upon completion of the sales tap, Transco would commence transportation service to Frontier pursuant to Transco's Rate Schedules FT–R or IT and Part 284(G) of the Commission's regulations. Moreover, Transco states that Frontier may have access in the future to Rate Schedule FT service in the event Frontier becomes a replacement shipper for a permanent release of firm capacity or if new firm capacity becomes available through an expansion of Transco's system. Transco states that the addition of the sales tap would have no significant impact on Transco's peak day or annual deliveries, and is not prohibited by Transco's FERC Gas Tariff.

Transco further states that the estimated total costs of Transco's proposed facilities would be approximately $474,000. It is also stated that Frontier would reimburse Transco for all costs associated with such facilities.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

BILLING CODE 6712–01–M

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice and request for comment.

SUMMARY: The FDIC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35). Currently, the FDIC is soliciting comments concerning the following collections of information titled: (1) Recordkeeping and Disclosure Requirements in Connection with Regulation Z (Truth in Lending); (2) Recordkeeping and Disclosure Requirements in Connection with Regulation M (Consumer Leasing); (3) Recordkeeping and Disclosure Requirements in Connection with Regulation E (Electronic Fund Transfers); and (4) Recordkeeping and Disclosure Requirements in Connection with Regulation B (Equal Credit Opportunity).

DATES: Comments must be submitted on or before July 20, 1998.

ADDRESSES: Interested parties are invited to submit written comments to Tamara R. Manly, Management Analyst (Regulatory Analysis), (202) 898–7453, Office of the Executive Secretary, Room 4058, Attention: Comments/OES, Federal Deposit Insurance Corporation, 550 17th Street N.W., Washington, D.C. 20429. All comments should refer to the OMB control number. Comments may be hand-delivered to the guard station at the rear of the 17th Street Building (located of F Street), on business days between 7:00 a.m. and 5:00 p.m. [FAX number (202) 898–3838; Internet address: comments@fdic.gov].

A copy of the comments may also be submitted to the OMB desk officer for the FDIC: Alexander Hunt, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: Tamara R. Manly, as the address identified above.

SUPPLEMENTARY INFORMATION: Proposal to renew the following currently approved collections of information:

1. *Title:* Recordkeeping and Disclosure Requirements in Connection with Regulation Z (Truth in Lending).

OMB Number: 3064–0082.

Frequency of Response: On occasion.

Affected Public: Any businesses or individuals that regularly offer or extend consumer credit.

Estimated Number of Respondents: 6,100.

Estimated Time per Response: 787.

Estimated Total Annual Burden: 4,800,700 hours.

General Description of Collection: Regulation Z (12 CFR 226) prescribes uniform methods of computing the cost of credit, disclosure of credit terms, and procedures for resolving billing errors on certain credit accounts. Regulation Z is issued by the Board of Governors of the Federal Reserve System ("FRB") under the authority of Title I of the Consumer Credit Protection Act (15 U.S.C. 1601 *et seq.*). Section 105 of the Act (15 U.S.C. 1604) designates the FRB as the issuer of the implementing regulations and section 108(a) of the Act (15 U.S.C. 1607) designates the FDIC as having the enforcement responsibilities in the case of insured nonmember banks.

2. *Title:* Recordkeeping and Disclosure Requirements in Connection with Regulation M (Consumer Leasing).

OMB Number: 3064–0083.

Frequency of Response: On occasion.

Affected Pubic: Any businesses engaging in consumer leasing.

Estimated Number of Respondents: 6,100.

Estimated Time per Response: 4.

Estimated Total Annual Burden: 24,400 hours.

General Description of Collection: Regulation M (12 CFR 2123) implements the consumer leasing provisions of the Truth in Lending Act. Regulation M is issued by the Board of Governors of the Federal Reserve System ("FRB") under the authority of Title I of the Consumer Credit Protection Act (15 U.S.C. 1601 *et seq.*). Section 105 of the Act (15 U.S.C. 1604) designates the FRB as the issuer of the implementing regulations, and section 108(a) of the Act (15 U.S.C. 1607) designates the FDIC as having the enforcement responsibilities in the case of insured nonmember banks.

3. *Title:* Recordkeeping and Disclosure Requirements in Connection with Regulation E (Electronic Fund Transfers).

OMB Number 3064–0084.
Frequency of Response: On occasion.
Affected Public: Any users of the electronic fund transfer system.
Estimated Number of Respondents: 6,100.
Estimated Time per Response: 120.4.
Estimated Total Annual Burden: 734,440 hours.
General Description of Collection: Regulation E (12 CFR 205) establishes the rights liabilities, and responsibilities of parties in electronic funds transfers ("EFT") and protects consumers using EFT systems. Regulation E is issued by the Board of Governors of the Federal Reserve System ("FRB") under the authority of Title IX of the Consumer Credit Protection Act (15 U.S.C. 1693.) Section 904 of the Act (15 U.S.C. 1693b) designates the FRB as the issuer of the implementing regulations, and section 917(a) of the Act (15 U.S.C. 1693o) designates the FDIC as having the enforcement responsibilities in the case of insured nonmember banks.

4. *Title:* Recordkeeping and Disclosure Requirements in Connection with Regulation B (Equal Credit Opportunity).
OMB Number: 3064–0085.
Frequency of Response: On occasion.
Affected Public: Any financial institution engaging in credit transactions.
Estimated Number of Respondents: 6,100.
Estimated Time per Response: 43.
Estimated Total Annual Burden: 262,300 hours.
General Description of Collection: Regulation B (12 CFR 202) prohibits creditors from discriminating against applicants on any of the bases specified by the Equal Credit Opportunity Act, establishes guidelines for gathering and evaluating credit information, and requires creditors to give applicants a written notification of rejection of an application. Regulation B is issued by the Board of Governors of the Federal Reserve System ("FRB") under the authority of Title VII of the Consumer Credit Protection Act (15 U.S.C. 1691). Section 703 of the Act (15 U.S.C. 1691b) designates the FRB as the issuer of the implementing regulations, and section 704(a) of the Act (15 U.S.C. 1691c) designates the FDIC as having the enforcement responsibilities in the case of insured nonmember banks.

Request for Comment

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the collection should be modified prior to submission to OMB for review and approval. Comments submitted in response to this notice also will be summarized or included in the FDIC's requests to OMB for renewal of this collection. All comments will become a matter of public record.

Dated at Washington, D.C., this 13th day of May, 1998.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–1209–DR]

Georgia; Amendment to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Georgia, (FEMA–1209–DR), dated March 11, 1998, and related determinations.

EFFECTIVE DATE: May 8, 1998.

FOR FURTHER INFORMATION CONTACT: Madge Dale, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3260.

SUPPLEMENTARY INFORMATION: The notice of a major disaster for the State of Georgia, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of March 11, 1998:

Lincoln and Union Counties for Individual Assistance.

(The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 83.537, Community Disaster Loans; 83.538, Cora Brown Fund Program; 83.539, Crisis Counseling; 83.540, Disaster Legal Services Program; 83.541, Disaster Unemployment Assistance (DUA); 83.542, Fire Suppression Assistance; 83.543, Individual and Family Grant (IFG) Program; 83.544, Public Assistance Grants; 83.545, Disaster Housing Program; 83.548, Hazard Mitigation Grant Program.)

Dennis H. Kwiatkowski,

Deputy Associate Director, Response and Recovery Directorate.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–1217–DR]

Indiana; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Indiana (FEMA–1217–DR), dated May 8, 1998, and related determinations.

EFFECTIVE DATE: May 8, 1998.

FOR FURTHER INFORMATION CONTACT: Madge Dale, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3260.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated May 8, 1998, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), as follows:

I have determined that the damage in certain areas of the State of Indiana, resulting from a severe winter storm on March 9–12, 1998, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, Pub. L. 93–288, as amended ("the Stafford Act"). I, therefore, declare that such a major disaster exists in the State of Indiana.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance and Hazard Mitigation in the designated areas. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance or Hazard Mitigation will be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Gary Pierson of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Indiana to have been affected adversely by this declared major disaster:

Jasper, Lake, LaPorte and Porter Counties for Public Assistance.

All counties within the State of Indiana are eligible to apply for assistance under the Hazard Mitigation Grant Program.

(The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 83.537, Community Disaster Loans; 83.538, Cora Brown Fund Program; 83.539, Crisis Counseling; 83.540, Disaster Legal Services Program; 83.541, Disaster Unemployment Assistance (DUA); 83.542, Fire Suppression Assistance; 83.543, Individual and Family Grant (IFG) Program; 83.544, Public Assistance Grants; 83.545, Disaster Housing Program; 83.548, Hazard Mitigation Grant Program)

FEDERAL EMERGENCY MANAGEMENT AGENCY

Open Meeting; Technical Mapping Advisory Council

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice of meeting.

SUMMARY: In accordance with § 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. 1, the Federal Emergency Management Agency gives notice that the following meeting will be held:

Name: Technical Mapping Advisory Council.

Date of Meeting: May 31 and June 1, 1998.

Place: Renaissance Waverly Hotel, 2450 Galleria Parkway, Atlanta, GA 30339.

Times: 9 am–6 pm on Sunday and 1 pm–5 pm on Monday.

Proposed Agenda

1. Call to order.
2. Announcements.
3. Action on minutes of previous teleconference.
4. Discuss priorities for FEMA's Map Modernization plan.
5. Develop format for the Council's 1998 annual report.
6. Report on elevation certificate.
7. Discuss Letter of Map Amendment recommendations.
8. Discuss hydraulics and its relationship to hydrology.
9. Adjournment.

FOR FURTHER INFORMATION CONTACT: Michael Buckley, P.E., Federal Emergency Management Agency, 500 C Street SW., room 421, Washington, DC 20472, telephone (202) 646–2756 or by facsimile at (202) 646–4596.

SUPPLEMENTARY INFORMATION: This meeting is open to the public with limited seating available on a first-come, first-served basis. Members of the general public who plan to attend the meeting should contact Sally Magee, Federal Emergency Management Agency, 500 C Street SW., room 444, Washington, DC 20472, telephone (202) 646–8242 or by facsimile at (202) 646–4596 on or before May 27, 1998.

Minutes of the meeting will be prepared and will be available upon request 30 days after they have been approved by the next Technical Mapping Advisory Council meeting on September 10 and 11, 1998.

Dated: May 11, 1998.

Michael J. Armstrong,

Associate Director for Mitigation.

BILLING CODE 6718–04–P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than June 3, 1998.

A. Federal Reserve Bank of Kansas City (D. Michael Manies, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198-0001:

1. Rex K. Alexander, Tulsa, Oklahoma, and Ronald F. Tanner, Cornville, Arizona; to acquire voting shares of BOC Bancshares, Inc., Chouteau, Oklahoma, and thereby indirectly acquire voting shares of Bank of Commerce, Chouteau, Oklahoma.

Board of Governors of the Federal Reserve System, May 14, 1998.

Jennifer J. Johnson,

Deputy Secretary of the Board.

[FR Doc. 98–13317 Filed 5–18–98; 8:45 am]

BILLING CODE 6210–01–F

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act. Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 12, 1998.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63102-2034:

1. Central Bancompany, Inc., Jefferson City, Missouri; to acquire 100 percent of the voting shares of Higginsville Bancshares, Inc., Higginsville, Missouri, and thereby indirectly acquire First State Bank of Higginsville/Odessa, Higginsville, Missouri.

2. Diamond Bancorp, Inc., Washington, Missouri; to acquire an additional 1.47 percent, for a total of

5.87 percent, of the voting shares of Cardinal Bancorp II, Inc., St. Louis, Missouri, and thereby indirectly acquire United Bank of Union, Union, Missouri.

Board of Governors of the Federal Reserve System, May 14, 1998.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–F

FEDERAL RESERVE SYSTEM

Notice of Proposals to Engage in Permissible Nonbanking Activities or to Acquire Companies that are Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y, (12 CFR Part 225) to engage *de novo*, or to acquire or control voting securities or assets of a company, including the companies listed below, that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.28 of Regulation Y (12 CFR 225.28) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

Each notice is available for inspection at the Federal Reserve Bank indicated. The notice also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 3, 1998.

A. Federal Reserve Bank of Cleveland (Paul Kaboth, Banking Supervisor) 1455 East Sixth Street, Cleveland, Ohio 44101-2566:

1. FirstMerit Corporation, Akron, Ohio; to acquire Security First Corp., Mayfield Heights, Ohio, and thereby indirectly acquire Security Federal Savings & Loan Association of Cleveland, Cleveland, Ohio, and First Federal Security Bank of Kent, Kent, Ohio, and thereby engage in permissible savings and loan activities, pursuant to § 225.28(b)(4)(ii) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, May 14, 1998.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Fees for Consultation Services for Ship Construction and Renovation

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: This notice announces fees for conducting voluntary inspections of newly constructed or renovated cruise ships. This notice also announces a change in the proposal to charge a fee for consultation on construction and renovation, and to add a new "mega" size category to the sanitation inspection fee schedule.

DATES: Fees for construction and renovation inspections are effective June 18, 1998.

FOR FURTHER INFORMATION CONTACT: Daniel M. Harper, Program Manager, Vessel Sanitation Program, National Center for Environmental Health, telephone (770) 488–3524 or e-mail DMH2@CDC.GOV, or Dave Forney, Public Health Advisor, Division of Environmental Hazards and Health Effects, National Center for Environmental Health, telephone (770) 488–7333 or e-mail DLF1@CDC.GOV.

SUPPLEMENTARY INFORMATION:

Purpose and Background

A notice of request for public comment on a proposal to charge fees for consultation services for ship construction and renovation, and to create a new "Mega" category for the routine sanitary inspection of ships was published in the **Federal Register** on November 17, 1997, [Volume 62, Pages 61336–61338]. A subsequent amendment to extend the comment period an additional 30 days was published in the **Federal Register** on January 13, 1998, [Volume 63, Number 8, Page 1973].

Discussion of Comments

The public notice of the intent to collect fees for consultation services for ship construction and renovation and to create a new "Mega" category for routine inspections provided a 45 day comment period which was extended an additional 28 days at the request of the members of the cruise ship industry. During the comment period, comments were received from two sources, one of which was the International Council of Cruise Lines (ICCL) representing the 17 largest passenger cruise lines that call on major ports in the U.S. and abroad. Discussion of the comments received and CDC's responses follows:

Comment: One commentor stated that the use of Gross Register Tons alone does not correctly indicate a ship's capacity to carry passengers and crew, while the Total Safe Number does, and better reflects the type of ship that is being inspected.

Response: The fees set forth in the public notice were based on Gross Register Tonnage (GRT) of the passenger vessels as reported by Lloyds of London. CDC believes that the use of GRT is a reasonable and equitable method for determining fees since the number and size of the food service areas and the size of the onboard water systems are generally functions of the vessel's GRT. CDC, after considering the commentor's alternative proposal, sees no advantage in the commentor's proposal over CDC's. CDC will continue to periodically review the fee schedule. If actual experience in fee collection indicates that CDC's proposed system does result in substantial inequity, CDC will act promptly to correct the situation.

Comment: One commentor stated that the proposed "Mega" category placed an increased financial burden on these large craft by increasing the basic inspection fee by approximately 31% over what these ships were charged in 1997. In addition, the galley size and complexity on these ships is not significantly different than that found on ships in the Extra Large category.

Response: It has been CDC's experience that the size and complexity of the galleys and water systems aboard ships >90,000 GRT are often greater than those found on smaller ships. It is also our belief that performing sanitation inspections of these ships requires additional staff time and resources. However, we have not quantified the increase in resources. Therefore, CDC agrees to postpone any modifications to the existing category structure until there can be a more thorough evaluation of the time, effort and other factors involved with the inspection of these ships.

Comment: One commentor stated that the fee increase in the FY 98 budget should adequately cover the costs of providing construction consultation services without the creation of a new

fee category and that this is supported by the vessel fee calculation utilized in the CDC's **Federal Register** notice which stipulates that current inspection fees fully fund the VSP Program. The commentor states that the proposed consultation fees are duplicative of the fees already being paid by vessel operators to CDC through the sanitation inspection fees.

Response: Generally, the CDC recoups the costs of the VSP through the collection of fees. The fee schedule for sanitation inspections of passenger cruise ships currently inspected under the VSP was first published in the **Federal Register** on November 24, 1987 (52 FR 45019), and revised in a schedule published in the **Federal Register** on November 28, 1989 (54 FR 48942). Since then, CDC has published the fee schedule annually. The formula historically used to determine the fees has been calculated by dividing the cost of the VSP by the weighted number of annual inspections. With the tremendous expansion of the cruise line industry, and concurrent expansion in the number of ships being constructed and renovated, an increasing percentage of VSP staff time and expense is being spent on providing consultation directly to the individual cruise lines building and renovating ships. In the past, consultations for new construction and renovation have included an extensive review of the ships' blueprints, an on-site shipyard inspection as the ship neared completion, and a final construction inspection. This has contributed to an overall increase in the VSP budget and reduces the inspector time available to conduct routine sanitation inspections. Because these construction consultations and inspections are voluntary and are directed to individual ship owners, builders and operators, CDC feels that the cost of these services should be borne by the individual recipients, and not by the collective cruise lines participating in the vessel sanitation program. CDC did not include the cost of construction consultations or inspections in calculating the average cost per inspection for FY 1998. If CDC added the cost of these voluntary services into the existing formula, the sanitation inspection for ALL vessels would have been substantially higher even though none of the existing ships in the program would have received direct benefit from the consultation.

In order to more equitably distribute the cost of the program among the participants, CDC will charge for all inspections conducted by VSP staff. CDC agrees to postpone charging a fee for plan reviews and consultation during construction and renovation until there can be a more thorough evaluation of the time, effort and other factors involved with this activity. Future program budgets will be determined by dividing the cost of the VSP by the weighted number of all inspections.

Comment: One commentor stated that the proposed fee for consultation is all inclusive of plan review, shipyard inspection and final construction inspection and does not allow an interested cruise line to request a consultation or inspection during a specific individual phase of construction or renovation.

Response: CDC agrees that a consultation or inspection should be available for any or all phases of construction and renovation. Therefore, consultation or inspection services for new construction or renovation will be provided in three phases:

In Phase 1, CDC will:

- Conduct a Plan Review with ship officials in either the Miami or Atlanta VSP offices and provide a written report, with recommendations, to the ship officials following the review.
- Provide written consultations to the appropriate ship officials (owners, builders, sub-contractors, etc.) during the construction phase of the ship.
- Provide these plan reviews and consultations at no cost.

In Phase 2, CDC will:

- Require that requests for shipyard inspections be submitted to VSP Atlanta 45 days prior to travel dates (see Appendix A).
- Require that the shipyard pay CDC for all expenses in connection with the shipyard inspection and make all necessary arrangements for lodging and transportation, which includes airfare and ground transportation.
- Charge a standard inspection fee for the shipyard inspection based on the published fee announced annually in the **Federal Register**. Provide the shipyard with an invoice at the completion of the inspection.
- Provide a written report of the shipyard inspection.

In Phase 3, CDC will:

- Conduct the final construction inspection at a U.S. port prior to the ship entering operational service. The time and place of this inspection will be mutually agreed upon by the builder, owner and VSP staff. This inspection will NOT be scored.
- Provide a written report of the final construction inspection.
- Charge a standard inspection fee for the inspection based on the published fee announced annually in the **Federal Register**. Provide the shipyard with an invoice at the completion of the inspection.

This is a voluntary program for the cruise ship builders/owners and a formal written request must be made for a consultation and/or construction inspection. CDC's ability to honor these requests will be based on the availability of VSP staff. A builder/owner may request any one, two, or all of the consultation and inspection phases.

CDC will assign one inspector as the "project manager" for each request for consultation or renovation of a ship. The project manager will be the single point of contact at VSP for any discussion regarding the ship from the initial plan review through the final construction inspection. CDC will also provide a second inspector to participate in all plan reviews, consultations, and inspections.

Fees

CDC will not charge a fee for plan reviews and consultation but will charge the published standard fee for all inspections conducted by the program (e.g., shipyard, final construction, sanitation, etc.). The inspection fee is based on the existing fee schedule for sanitation inspections of passenger cruise ships, published annually in the **Federal Register**.

FEE SCHEDULE JANUARY 1, 1998–SEPTEMBER 30, 1998

Vessel size and GRT [1]	Inspection fee
Extra Small (<3,001)	$1,075
Small (3,001–15,000)	2,150
Medium (15,001–30,000)	4,300
Large (30,001–60,000)	6,450
Extra Large (>60,000)	8,600

[1] GRT—Gross Register Tonnage in cubic feet, as shown in Lloyd's Register of Shipping.

Applicability

The inspection fees will be applicable to all passenger cruise vessels requesting and receiving services as described in this notice.

Dated: May 13, 1998.

Joseph R. Carter,

Acting Associate Director for Management and Operations, Centers for Disease Control and Prevention (CDC).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 98N–0194]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the information collection provisions of FDA's regulations governing batch certification of color additives manufactured for use in foods, drugs, cosmetics or medical devices in the United States.

DATES: Submit written comments on the collection of information by July 20, 1998.

ADDRESSES: Submit written comments on the collection of information to the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857. All comments should be identified with the docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Margaret R. Schlosburg, Office of Information Resources Management (HFA–250), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–1223.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information listed below.

With respect to the following collection of information, FDA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Color Additive Certification Requests and Recordkeeping—21 CFR Part 80 (OMB Control Number 0910–0216—Extension)

Section 721(a) of the Federal Food, and Drug and Cosmetic Act (the act) (21 U.S.C. 379e(a)) provides that a color additive shall be deemed unsafe unless the additive and its use are in conformity with a regulation that describes the conditions under which the additive may be safely used, or unless the additive and its use conform to the terms of an exemption for investigational use. If a regulation prescribing safe conditions of use has been issued, the additive must be from a batch certified by FDA to conform to the requirements of that regulation and other applicable regulations, unless the additive has been exempted from the certification requirement. Section 721 of the act instructs the Secretary of Health and Human Services (through FDA) to issue regulations providing for batch certification of color additives for which she finds such requirement to be necessary in the interest of protecting the public health. FDA's implementing regulations in part 80 (21 CFR part 80) specify the information that must accompany a request for certification of a batch of color additive and require certain records to be kept pending and after certification. FDA requires batch certification for all color additives listed in 21 CFR part 74 and for all color additives provisionally listed in 21 CFR part 82. Color additives listed in 21 CFR part 73 are exempt from certification.

Under § 80.21, a request for certification must include: Name of color additive, batch number and weight in pounds, name/address of manufacturer, storage conditions, statement of use(s), fee, and signature of requester. The request for certification must also include a sample of the batch of color additive that is the subject of the request. Under § 80.22, the sample must be labeled to show: Name of color additive, batch number and quantity, and name and address of person

requesting certification. A copy of the label or labeling to be used for the batch must accompany the sample. Under § 80.39, the person to whom a certificate is issued must keep complete records showing the disposal of all the color additive covered by the certificate. Such records are to be made available upon request to any accredited representative of FDA until at least 2 years after disposal of all of the color additive.

The request for certification of a batch of color additive is reviewed by FDA's Office of Cosmetics and Colors to verify that all of the required information has been included. Since the information required in the request for certification is unique to the specific batch of color additive involved, it must be generated for each batch. The information submitted with the request helps FDA to ensure that only safe color additives will be used in foods, drugs, cosmetics, and medical devices sold in the United States. The batch number assigned by the manufacturer is a means of temporary identification until a certification lot number has been issued by FDA. After certification, the manufacturer's batch number helps assure that the proper batch of color is indeed being used under the certification lot number issued by FDA. In the case of a batch that has been refused certification for noncompliance with the regulations, the manufacturer's batch number aids in tracing the ultimate disposition of that batch of color additive. The batch weight serves to account for the disposition of the entire batch; for example, it might be used in determining whether uncertified color has been sold under the lot number assigned to the batch by FDA or, in the event of a recall after certification, to determine whether all unused color has been recalled. In addition, the batch weight is the basis for assessing the certification fee. The name and address of the manufacturer of the color additive being submitted for certification allows FDA to contact the person responsible for its manufacture should a question arise concerning compliance with the regulations. Information on storage conditions pending certification is used to evaluate the possibility that the batch could have been inadvertently or intentionally altered in a manner that would make the sample submitted for certification analysis no longer representative of the batch. It is also used when an FDA investigator is sent to the site; the veracity of the storage statements is checked during normal plant inspections. Information on the uses which the person seeking certification proposes that the color be certified for it is to assure that all of the proposed uses are within the limits of the listing regulation. The statement of the fee on the certification request is for accounting purposes so that the person seeking certification can be promptly notified if any discrepancies appear. The information requested on the label of the sample submitted with the certification request is to identify the sample. The regulations require an accompanying copy of the label or labeling to be used for the batch so that FDA can verify that the batch will be labeled appropriately when it enters commerce.

FDA estimates the burden of this collection of information as follows:

TABLE 1.—ESTIMATED ANNUAL REPORTING BURDEN[1]

21 CFR Section	No. of Respondents	Annual Frequency per Response	Total Annual Responses	Hours per Response	Total Hours
80.21	20	152	4,091	0.2	818
80.22	20	152	4,091	0.05	205
Total					1,023

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

TABLE 2.—ESTIMATED ANNUAL RECORDKEEPING BURDEN[1]

21 CFR Section	No. of Recordkeepers	Annual Frequency per Recordkeeping	Total Annual Records	Hours per Recordkeeper	Total Hours
80.39	27	152	4,091	.25	1,023
Total					1,023

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

The estimated total annual burden for this information collection is 2,046 hours. Over the period fiscal year (FY) 1995 to FY 1997, FDA processed an average of 4,091 requests for certification of batches of color additive. Approximately 20 different respondents submitted requests for certification each year over the period FY 1995 to FY 1997. The estimates for the length of time necessary to prepare certification requests and accompanying samples, and to comply with recordkeeping requirements, were obtained from industry program area personnel.

Dated: May 8, 1998.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

BILLING CODE 4160–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Open Meeting for Representatives of Health Professional Organizations

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public meeting.

SUMMARY: The Food and Drug Administration (FDA) is announcing a public meeting with representatives of health professional organizations. The meeting will be chaired by Sharon Smith Holston, Deputy Commissioner for External Affairs. The agenda will include presentations and discussions on the main topic of emerging infectious diseases. FDA staff will make presentations on FDA's involvement in the President's Food Safety Initiative, antimicrobial resistance, and issues in vaccine development and diagnostics. There will also be brief updates on

tobacco and the FDA Modernization Act.

DATES: The meeting will be held on Thursday, May 28, 1998, from 2 p.m. to 4 p.m.

ADDRESSES: The meeting will be held at the Bethesda Holiday Inn, 8120 Wisconsin Ave., Bethesda, MD.

FOR FURTHER INFORMATION CONTACT: Peter H. Rheinstein, Office of Health Affairs (HFY–40), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–6630.

Registration: There is no registration fee, however, space is limited. Persons will be registered in the order in which calls are received. Please call Betty Palsgrove at 301–827–6618 to register.

Registrations also may be transmitted by FAX to 1–800–344–3332 or 301–443–2446. Please include the name and title of the person attending and the name of the organization.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to provide an opportunity for representatives of health professional organizations and other interested persons to be briefed by senior FDA staff. It will also provide an opportunity for informal discussion on these topics of particular interest to health professional organizations.

This public meeting is free of charge; however, space is limited. Registration for the meeting will be accepted in the order received and should be sent to the contact person. Registration should include the name and title of the person attending and the name of the organization being represented, if any.

Dated: May 13, 1998.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

[FR Doc. 98–13410 Filed 5–15–98; 2:58 pm]

BILLING CODE 4160–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

First Party Audit Program

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of industry exchange meeting.

SUMMARY: The Food and Drug Administration (FDA) is announcing an industry exchange meeting to discuss with the regulated industry a new initiative being considered by the agency. The First Party Audit Program (FPAP) is intended to gather information from selected human use pharmaceutical manufacturers regarding their quality assurance measures. This information would be submitted to FDA by those firms and would substitute, in some measure, for information the agency would otherwise obtain from its direct inspectional activities. The industry exchange meeting is intended to present the broad concepts of this initiative, discuss attendant issues, and obtain feedback from all interested parties as to the merits of proceeding with the project. This meeting is cosponsored by the Center for Drug Evaluation and Research's (CDER's) Office of Compliance and the Office of the Commissioner's Industry Small Business and Community Affairs Staff.

DATES: The industry exchange meeting will be held on June 23, 1998, from 9 a.m. to 4 p.m. Registration is required by June 12, 1998.

ADDRESSES: The industry exchange meeting will be held at the Hyatt Regency Bethesda Hotel, One Bethesda Metro Center, Bethesda, MD.

FOR FURTHER INFORMATION CONTACT: C. Russ Rutledge, Center for Drug Evaluation and Research (HFD–325), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–594–2455.

Those persons interested in attending this meeting should FAX or e-mail their registration to C. Russ Rutledge (FAX 301–594–2202 or e-mail via the Internet at "rutledgec@cder.fda.gov"), including name of attendee(s), title, affiliation, mailing address, phone number, fax number, and e-mail address. There is no registration fee for this meeting, but advance registration is required. Interested parties are encouraged to register early because space is limited.

SUPPLEMENTARY INFORMATION: FDA relies in large part on information acquired during inspections of manufacturing facilities, conducted by the agency's investigators, to ensure that firms are meeting the minimum levels of product quality assurance for human drug products. Although the agency believes that full inspection by its investigators is the ideal situation, FDA is evaluating alternative methods of acquiring information it would otherwise directly obtain from traditional onsite inspections. One approach the agency is considering is the FPAP. The first party is the manufacturing firm itself. The concept is to limit program participation to those manufacturers FDA recognizes as having both a quality assurance program that is effective and a record of substantial compliance with FDA requirements. Program participation would be strictly voluntary. Firms the agency selects for the program would supply FDA with information from its self-audits apart from FDA onsite inspections. The agency would use this information along with modified inspections to document minimum levels of assurance of manufacturing quality of the pharmaceuticals produced in that site.

FDA is holding this industry exchange meeting to present the core concepts of FPAP, discuss the relevant issues, and afford interested parties the opportunity to pose questions and provide comments. The agency will consider this public input in deciding on whether and how to proceed with the program, initially on a pilot basis.

The agenda and any other relevant information will be available electronically via the Internet at "http://www.fda.gov/cder/dmpq/fpap.htm" beginning Monday, May 18, 1998.

Dated: May 8, 1998.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Advisory Committee for Pharmaceutical Science; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). The meeting will be open to the public.

Name of Committee: Advisory Committee for Pharmaceutical Science.

General Function of the Committee: To provide advice and recommendations to the agency on FDA regulatory issues.

Date and Time: The meeting will be held on June 23, 1998, 8 a.m. to 5 p.m., and on June 24, 1998, 8:30 a.m. to 5:30 p.m.

Location: Holiday Inn, The Ballrooms, Two Montgomery Village Ave., Gaithersburg, MD.

Contact Person: Kimberly L. Topper, Center for Drug Evaluation and Research (HFD–21), Food and Drug Administration 5600 Fishers Lane, Rockville, MD 20857, 301–443–5455, (For Federal Express Deliveries—Chapman Bldg., 801 Thompson Ave., rm. 200, Rockville, MD 20857) or FDA Advisory Committee Information Line,

1–800–741–8138 (301–443–0572 in the Washington, DC area), code 12539. Please call the Information Line for up-to-date information on this meeting.

Agenda: On June 23 and 24, 1998, the committee will focus on both safety/efficacy and quality topics with a bridging topic (exposure). Specific topics to be discussed include: (1) Nonclinical/nonhuman pharmacology/toxicology research programs to support the drug development and registration process, (2) in vitro drug metabolism to support guidance updating, (3) the revision of the guidance for scale-up and post-approval changes for immediate release drug products, and (4) complex drug substances.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person by June 16, 1998. Oral presentations from the public will be scheduled between approximately 10:30 a.m. and 11 a.m. on June 23, 1998, and between approximately 10:15 a.m. and 10:45 a.m. on June 24, 1998. Time allotted for each presentation may be limited. Those desiring to make formal presentations should notify the contact person before June 16, 1998, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: May 11, 1998.

Michael A. Friedman,

Deputy Commissioner for Operations.

[Docket No. 97N–0451]

Draft Guidance for Industry: Guide to Minimize Microbial Food Safety Hazards for Fresh Fruits and Vegetables; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a notice that appeared in the **Federal Register** of April 13, 1998 (63 FR 18029). The document announced the availability of a proposed guide entitled "Guidance for Industry: Guide to Minimize Microbial Food Safety Hazards for Fresh Fruits and Vegetables." The document was published with some errors. This document corrects those errors.

DATES: Written comments on the proposed guide by June 29, 1998.

FOR FURTHER INFORMATION CONTACT:

Joyce J. Saltsman, Center for Food Safety and Applied Nutrition (HFS–165), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–205–5916, FAX 202–260–9653, e-mail: jsaltsma@bangate.fda.gov, or

Michelle A. Smith, Center for Food Safety and Applied Nutrition (HFS–306), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–205–2975, FAX 202–205–4422, e-mail: msmith1@bangate.fda.gov.

In FR Doc. 98–9636, appearing on page 18029 in the **Federal Register** of Monday, April 13, 1998, the following corrections are made:

1. On page 18029, in the third column, in the first complete paragraph, beginning in the second line from the bottom "WWW (http://www.fda.gov/dockets/dockets.htm)" is corrected to read "WWW (http://www.fda.gov/ohrms/dockets/default.htm)".

2. On page 18030, in the first column, in the last paragraph, beginning in the third line from the bottom "WWW (http://www.fda.gov/dockets/dockets.htm)" is corrected to read "WWW (http://www.fda.gov/ohrms/dockets/default.htm)".

Dated: May 8, 1998.

Health Resources and Services Administration

Advisory Council; Notice of Meeting

In accordance with section 10(a) (2) of the Federal Advisory Committee Act (Public Law 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of June 1998.

Name: Advisory Committee on Infant Mortality.

Date and Time: June 29, 1998; 9:00 a.m.—5:00 p.m.; June 30, 1998; 8:30 a.m.—4:00 p.m.

Place: Bethesda Marriott Hotel, 5151 Pooks Hill Road, Bethesda, Maryland 20814, (301) 897–9400

The meeting is open to the public.

Agenda: Topics that will be discussed include: Low-Birth Weight; Discrepancies in Infant Mortality; the Healthy Start Program and Evaluation; and Early Postpartum Discharge.

Anyone requiring information regarding the Committee should contact Dr. Peter C. van Dyck, Executive Secretary, Advisory Committee on Infant Mortality, Health Resources and Services Administration, Room 18–31, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, Telephone (301) 443–2204.

Persons interested in attending any portion of the meeting or having questions regarding the meeting should contact Ms. Kerry P. Nesseler, Health Resources and Services Administration, Maternal and Child Health Bureau, Telephone (301) 443–2204.

Agenda items are subject to change as priorities dictate.

Jane M. Harrison,

Acting Director, Division of Policy Review and Coordination.

Office of the Secretary

Exxon Valdez Oil Spill Public Advisory Group; Meeting

AGENCY: Department of the Interior, Office of the Secretary.

ACTION: Notice of meeting.

SUMMARY: The Department of the Interior, Office of the Secretary is announcing a public meeting of the Exxon Valdez Oil Spill Public Advisory Group.

DATES: June 1–2, 1998, at 10:30 a.m.

ADDRESSES: Fourth floor conference room, 645 "G" Street, Anchorage, Alaska.

FOR FURTHER INFORMATION CONTACT: Douglas Mutter, Department of the Interior, Office of Environmental Policy and Compliance, 1689 "C" Street, Suite 119, Anchorage, Alaska, (907) 271–5011.

SUPPLEMENTARY INFORMATION: The Public Advisory Group was created by Paragraph V.A.4 of the Memorandum of Agreement and Consent Decree entered into by the United States of America and the State of Alaska on August 27, 1991, and approved by the United States District Court for the District of Alaska in settlement of *United States of America* v. *State of Alaska*, Civil Action

No. A91–081 CV. The agenda will include a review of project proposals submitted for the fiscal year 1999 Work Plan and a discussion of the restoration reserve fund.

Dated: May 13, 1998.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Sport Fishing and Boating Partnership Council; Notice of Meeting

SUMMARY: As provided in Section 10(a)(2) of the Federal Advisory Committee Act, the Service announces a meeting designed to foster partnerships to enhance recreational fishing and boating in the United States. This meeting, sponsored by the Sport Fishing and Boating Partnership Council (Council), is open to the public and interested persons may make oral statements to the Council or may file written statements for consideration.

DATES: June 1, 1998, from 1:30 p.m. to 5:30 p.m.

ADDRESSES: The meeting will be held at the Old Town Holiday Inn Select, 480 King Street, Alexandria, VA 22314, Telephone (703) 549–6080, FAX (703) 684–6508.

Summary minutes of the conference will be maintained by the Coordinator for the Council at 1033 North Fairfax Street, Suite 200, Arlington, VA 22314, and will be available for public inspection during regular business hours within 30 days following the meeting. Personal copies may be purchased for the cost of duplication.

FOR FURTHER INFORMATION CONTACT: Doug Alcorn, Council Coordinator, at 703/836–1392.

SUPPLEMENTARY INFORMATION: The Sport Fishing and Boating Partnership Council (Council) will convene to discuss: (1) The ongoing effort to monitor and evaluate Federal agency activities pursuant to Executive Order 12962 for Recreational Fisheries; (2) the status of the National Outreach Strategic Plan; and (3) the status of Governors' Coalition for Recreational Fisheries, sponsored by Arkansas Governor Mike Huckabee. Under Executive Order 12962, the Council is required to monitor and annually report its findings on 15 Federal agencies' actions and policies for protecting, restoring, and enhancing recreational fishery resources. The Council expects to hear a report from the National Recreational Fisheries Coordination Council on the Federal accomplishments for Fiscal Year 1997. The Council will determine the best approach for fulfilling its role under Executive Order 12962. The Council is also charged by the U.S. Fish and Wildlife Service to develop a National Outreach Strategic Plan by August 1, 1998. This meeting will be to discuss the status of that assignment and instruct the Council's Outreach Committee to proceed accordingly. Arkansas Governor Mike Huckabee is implementing an element of the Council's Recreational Fisheries Initiative, produced last year in concert with more than 100 recreational fisheries stakeholders. The Governor has agreed to convene Governors annually to develop strategies for promoting recreational fishing and boating in their respective states. The discussion of this initiative will conclude by identifying actions needed to support this initiative. Public comment will be sought at the conclusion of discussion of the third agendum.

Dated: April 29, 1998.

John G. Rogers,

Acting Director, Fish and Wildlife Service.

Bureau of Land Management

[NM–067–08–1990–00) (0003)]

Noncompetitive Sale of Public Lands in Eddy County, New Mexico 100623

SUMMARY: The following land has been found suitable for direct sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat 2750, 43 USC 1713), at not less than the appraised fair market value. The land will not be offered for sale until at least 60 days after the date of this notice.

T. 24 S., R. 27 E., NMPM,
Sec. 08: S½SW¼SE¼NE¼SW¼.
Containing approximately 1.25 acres.

The land is hereby segregated from appropriation under the public land laws, including the mining laws, pending disposition of this action or 270 days from date of this notice, whichever occurs first.

The land is being offered by direct sale to the Harley Davis Irrevocable Trust, to correct an encroachment of a house located on the public lands and to resolve a historic unauthorized use.

The patent, when issued, will contain certain reservations to the United States and will be subject to existing rights-of-way. Detailed information concerning these reservations, as well as specific conditions of the sale, are available for review at the Carlsbad Field Office, Bureau of Land Management, 620 East Greene, Carlsbad, New Mexico 88220.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager at 2909 West Second Street, Roswell, New Mexico 88201. Any adverse comments will be evaluated by the District Manager, who may vacate or modify this realty action and issue a final determination. In absence of objections, this realty action will become the final determination of the Department of the Interior.

Dated: May 5, 1998.

Edwin L. Roberson,

Acting District Manager.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[(NM–067–08–1990–00) (0002)]

Noncompetitive Sale of Public Lands in Eddy County, New Mexico 100616

SUMMARY: The following land has been found suitable for direct sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat 2750, 43 USC 1713), at not less than the appraised fair market value. The land will not be offered for sale until at least 60 days after the date of this notice.

T. 22 S., R. 27 E., NMPM
Sec. 10: NE¼.
Containing approximately 160 acres.

The land is hereby segregated from appropriation under the public land laws, including the mining laws, pending disposition of this action or 270 days from date of this notice, whichever occurs first.

The land is being offered by direct sale to the City of Carlsbad to develop a sod farm and tree nursery.

The patent, when issued, will contain certain reservations to the United States and will be subject to existing rights-of-way. Detailed information concerning these reservations, as well as specific conditions of the sale, are available for review at the Carlsbad Field Office, Bureau of Land Management, 620 East Greene, Carlsbad, New Mexico 88220.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager at 2909 West Second Street, Roswell, New Mexico 88201. Any adverse comments will be evaluated by the District Manager, who may vacate or modify this realty action and issue a final determination. In absence of objections, this realty action will become the final determination of the Department of the Interior.

Dated: May 5, 1998.

Edwin L. Roberson,

Acting District Manager.

BILLING CODE 4310–VA–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as Amended

Notice is hereby given that a proposed consent decree in *United States* v. *W.R. Grace & Co.-Conn.*, Civil Action No. 98–2045 (AMW) was lodged on April 30, 1998, in the United States District Court for the District of New Jersey. The proposed Consent Decree will resolve the United States' claims under the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. § 9601 *et seq.*, on behalf of the U.S. Army Corps of Engineers ("ACOE"), U.S. Department of Energy ("DOE"), U.S. Environmental Protection Agency ("EPA") and U.S. Department of the Interior against W.R. Grace & Co.-Conn. ("W.R. Grace"). The Complaint alleges that W.R. Grace is liable under Section 107(a) of CERCLA, 42 U.S.C. 9607.

Pursuant to the Consent Decree, W.R. Grace will pay to the United States $30 million in settlement of both DOE's and ACOE's cleanup costs, $1.5 million in settlement of EPA's costs, and $270,000 to DOE to settle natural resource damage claims. In addition, if the Consent Decree is entered, the United States will also be paid interest that has been accruing on monies that W.R. Grace has maintained in an escrow account since August 1997. That interest is currently approximately $400,000.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *W.R. Grace & Co.-Conn.*, DOJ Ref. #90–11–2–1200.

The proposed consent decree may be examined at the Office of the United States Attorney for the District of New Jersey, Federal Building, 7th Floor, 970 Broad Street, Newark, New Jersey 07102; and at the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, D.C. 20005, (202) 624–0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, D.C. 20005. In requesting a copy please refer to the referenced case and enclose a check made payable to the Consent Decree Library in the amount of

$33.75 (25 cents per page reproduction costs). If a copy of the Consent Decree without the attachments is sufficient, please specify that fact and enclose a check in the amount of $8.50.

Joel M. Gross,

Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Manufacturer of Controlled Substances; Notice of Application

Pursuant to Section 1301.33(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on March 25, 1998, Arenol Corporation, 189 Meister Avenue, Somerville, New Jersey 0887, made application by renewal to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
N-Ethylamphetamine (1475)	I
Difenoxin (9168)	I
Amphetamine (1100)	II
Methamphetamine (1105)	II

The firm plans to manufacture the listed controlled substances to produce pharmaceutical products for its customers.

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the proposed registration.

Any such comments or objections may be addressed, in quintuplicate, to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than July 20, 1998.

Dated: May 6, 1998.

John H. King,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 98–13324 Filed 5–18–98; 8:45 am]

BILLING CODE 4410–09–M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Importation of Controlled Substances; Notice of Application

Pursuant to Section 1008 of the Controlled Substances Import and Export Act (21 U.S.C. 958(i)), the Attorney General shall, prior to issuing a registration under this Section to a bulk manufacturer of a controlled substance in Schedule I or II and prior to issuing a regulation under Section 1002(a) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore, in accordance with Section 1301.34 of Title 21, Code of Federal Regulations (CFR), notice is hereby given that on March 25, 1998, Arenol Corporation, 189 Meister Avenue, Somerville, New Jersey 08876, made application to the Drug Enforcement Administration to be registered as an importer of the basic classes of controlled substances listed below:

Drug	Schedule
Methamphetamine (1105)	II
Phenylacetone (8501)	II

The firm plans to import the listed controlled substances to manufacture pharmaceutical products.

Any manufacturer holding, or applying for, registration as a bulk manufacturer of this basic classes of controlled substances may file written comments on or objections to the application described above and may, at the same time, file a written request for a hearing on such application in accordance with 21 CFR 1301.43 in such form as prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed, in quintuplicate, to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than June 18, 1998.

This procedure is to be conducted simultaneously with and independent of the procedures described in 21 CFR 1301.34(b), (c), (d), (e), and (f). As noted in a previous notice at 40 FR 43745–46 (September 23, 1975), all applicants for registration to import the basic classes of any controlled substances in Schedule I or II are and will continue to be required to demonstrate to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration that the requirements for such registration pursuant to 21 U.S.C. 958(a), 21 U.S.C. 823(a), and 21 CFR 1301.34 (a), (b), (c), (d), (e), and (f) are satisfied.

Dated: May 7, 1998.

John H. King,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 98–13326 Filed 5–18–98; 8:45 am]

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Manufacturer of Controlled Substances, Notice of Registration

By Notice dated January 8, 1998, and published in the Federal Register on February 4, 1998, (62 FR 5818), Isotec,

Inc., 3858 Benner Road, Miamisburg, Ohio 45342, made application by renewal to the Drug Enforcement Administration (DEA) to be registered as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Cathinone (1235)	I
Methacathinone (1237)	I
N-Ethylamphetamine (1475)	I
N,N-Dimethylamphetamine (1480).	I
Aminorex (1585)	I
Methaqualone (2565)	I
Lysergic acid diethylamide (7315).	I
Tetrahydrocannabinols (7370)	I
Mescaline (7381)	I
2, 5-Dimethoxyamphetamine (7396).	I
3,4-Methylenedioxyamphetamine (7400).	I
3, 4-Methylenedioxy-N-ethylamphetamine (7404).	I
3,4-Methylenedioxymeth- amphetamine (7405).	I
4-Methoxyamphetamine (7411)	I
Psilocybin (7437)	I
Psilocyn (7438)	I
N-Ethyl-1-phenylcyclohexylamine (7455).	I
Dihydromorphine (9145)	I
Normorphine (9313)	I
Acetylmethadol (9601)	I
Alphacetylmethadol Except Levo-Alphacetylmethadol (9603).	I
Normethadone (9635)	I
3-Methylfentanyl (9813)	I
Amphetamine (110e)	II
Methamphetamine (1105)	II
Methylphenidate (1724)	II
Amobarbital (2125)	II
Pentobarbital (2270)	II
Secobarbital (2315)	II
1-Phenylcyclohexylamine (7460)	II
Phencyclidine (7471)	II
Phenylacetone (8501)	II
1-Piperidinocyclohexanecarbo-nitrile (8603).	II
Codeine (9050)	II
Dihydrocodeine (9120)	II
Oxycodone (9143)	II
Hydromorphone (9150)	II
Benzoylecgonine (9180)	II
Ethylmorphine (9190)	II
Hydrocodone (9193)	II
Isomethadone (9226)	II
Meperidine (9230)	II
Methadone (9250)	II
Methadone intermediate (9254)	II
Dextropropoxyphene, bulk non-dosage forms) (9273).	II
Morphine (9300)	II
Levo-Alphacetylmethadol (9648)	II
Oxymorphone (9652)	II
Fentanyl (9801)	II

The firm plans to use small quantities of the listed controlled substances to produce standards for analytical laboratories.

DEA has considered the factors in Title 21, United States Code, Section 823(a) and determined that the registration of Isotec, Inc. to manufacture the listed controlled substances is consistent with the public interest at this time. Therefore, pursuant to 21 U.S.C. 823 and 28 CFR §§ 0.100 and 0.104, the Deputy Assistant Administrator, Office of Diversion Control, hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic classes of controlled substances listed above is granted.

Dated: May 6, 1998.

Importer of Controlled Substances Notice of Registration

By Notice dated February 13, 1998, and published in the **Federal Register** on March 5, 1998 (62 FR 10944), Mallinckrodt Chemical Inc., Mallinckrodt & Second Streets, St. Louis, Missouri 63147, made application by renewal to the Drug Enforcement Administration to be registered as an importer of the basic classes of controlled substances listed below:

Drug	Schedule
Coca Leaves (9040)	II
Opium, raw (9600)	II
Opium poppy (9650)	II
Poppy Straw Concentrate (9670)	II

The firm plans to import the listed controlled substances to manufacture bulk finished products.

No comments or objections have been received. DEA has considered the factors in Title 21, United States Code, Section 823(a) and determined that the registration of Mallinckrodt Chemical Inc. to import listed controlled substances is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on May 1, 1971, at this time. Therefore, pursuant to Section 1008(a) of the Controlled Substances Import and Export Act and in accordance with Title 21, Code of Federal Regulations, Section 1301.34, the above firm is granted registration as an importer of the basic classes of controlled substances listed above.

Dated: May 6, 1998.

Manufacturer of Controlled Substances; Notice of Application

Pursuant to § 1301.33(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on February 17, 1998, Roche Diagnostic Systems Inc., 1080 U.S. Highway 202, Somerville, New Jersey 08876–3771, made application by renewal to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Lysergic acid diethylamide (7315)	I
Tetrahydrocannabinols (7370)	I
Phencyclidine (7471)	II
Benzoylecgonine (9180)	II
Methadone (9250)	II
Morphine (9300)	II

The firm plans to manufacture small quantities of the listed controlled substances for incorporation in drug of abuse detection kits.

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the proposed registration.

Any such comments or objections may be addressed, in quintuplicate, to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than July 20, 1998.

Dated: May 7, 1998.

John H. King,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 98–13334 Filed 5–18–98; 8:45 am]

BILLING CODE 4410–09–M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Importation of Controlled Substances; Notice of Application

Pursuant to Section 1008 of the Controlled Substances Import and Export Act (21 U.S.C. 958(i)), the Attorney General shall, prior to issuing a registration under this Section to a bulk manufacturer of a controlled substance in Schedule I or II and prior to issuing a regulation under Section 1002(a) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore, in accordance with Section 1301.34 of Title 21, Code of Federal Regulations (CFR), notice is hereby given that on February 17, 1998, Sigma Chemical Company, Subsidiary of Sigma-Aldrich Company, 3500 Dekalb Street, St. Louis, Missouri 63118, made application by renewal to the Drug Enforcement Administration to be registered as an importer of the basic classes of controlled substances listed below:

Drug	Schedule
Cathinone (1235)	I
Methcathinone (1237)	I
Methaqualone (2565)	I
Ibogaine (7260)	I
Lysergic acid diethylamide (7315)	I
Tetrahydrocannabinols (7370)	I
4-Bromo-2, 5-dimethoxyamphetamine (7391).	I
3,4-Methylenedioxyamphetamine (7400).	I
3,4-Methylenedioxy-N-ethylamphetamine (7404).	I
3,4-Methylenedioxymethamphetamine (7405).	I
4-Methoxyamphetamine (7411)	I
Psilocyn (7438)	I
Normorphine (9313)	I
Amphetamine (1100)	II
Methamphetamine (1105)	II
Methylphenidate (1724)	II
Amobarbital (2125)	II
Pentobarbital (2270)	II
Secobarbital (2315)	II
Phencyclidine (7471)	II
Cocaine (9041)	II
Codeine (9050)	II
Oxycodone (9143)	II
Hydromorphone (9150)	II
Benzoylecgonine (9180)	II
Ethylmorphine (9190)	II
Hydrocodone (9193)	II
Levorphanol (9220)	II
Meperidine (9230)	II
Methadone (9250)	II
Dextropropoxyphene, bulk (non-dosage forms) (9273).	II
Morphine (9300)	II
Thebaine (9333)	II
Opium powdered (9639)	II
Oxymorphone (9652)	II
Fentanyl (9801)	II

The firm plans to repackage and offer as pure standards controlled substances in small milligram quantities for drug testing and analysis.

Any manufacturer holding, or applying for, registration as a bulk manufacturer of these basic classes of controlled substances may file written comments on or objections to the application described above and may, at the same time, file a written request for a hearing on such application in accordance with 21 CFR 1301.43 in such form as prescribed by 21 CFR 1316.47. Any such comments, objections, or requests for a hearing may be addressed to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than (June 18, 1998).

This procedure is to be conducted simultaneously with and independent of the procedures described in 21 CFR 1301.34(b), (c), (d), (e), and (f). As noted in a previous notice at 40 FR 43745–46 (September 23, 1975), all applicants for registration to import basic classes of any controlled substances in Schedule I or II are and will continue to be required to demonstrate to the Deputy Assistance Administrator, Office of Diversion Control, Drug Enforcement Administration that the requirements for such registration pursuant to 21 U.S.C. 958(a), 21 U.S.C. 823(a), and 21 CFR 1301.34(a), (b), (c), (d), (e), and (f) are satisfied.

Dated: May 4, 1998.

John H. King,

Deputy Assistant Administrator, Office of Diversion Control Drug Enforcement Administration.

Manufacturer of Controlled Substances; Notice of Application

Pursuant to Section 1301.33(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on February 20, 1998, Stepan Company, Natural Products Department, 100 W. Hunter Avenue, Maywood, New Jersey 07607, made application by renewal to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classic classes of controlled substances listed below:

Drug	Schedule
Cocaine (9041)	II
Benzoylecgonine (9180)	II

The firm plans to manufacture bulk controlled substances for distribution to its customers.

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the proposed registration.

Any such comments or objections may be addressed, in quintuplicate, to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than July 20, 1998.

Dated: May 5, 1998.

BILLING CODE 4410–09–M

DEPARTMENT OF JUSTICE

Office of Justice Programs

Agency Information Collection Activities: Proposed Collection; Comment Request

ACTION: Notice of information collection under review; (reinstatement, without change, of a previously approved collection for which approval has expired).

Nomination for Young American Medal for Bravery

The Department of Justice, Office of Justice Programs, Bureau of Justice Assistance, has submitted the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. This proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for "sixty days" until July 20, 1998.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this information.

(1) *Type of information:* Reinstatement, without change, of a previously approved collection for which approval has expired.

(2) *The title of the form/collection:* Nomination for Young American Medal for Bravery.

(3) *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* The form number is 1673/1, Office of Justice Programs, United States Department of Justice.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Federal Government, State, Local or Tribal. Other: Individuals or households; Not-for-profit institutions. 42 U.S.C. 1921 et seq. authorizes the Department of Justice to collect information from state governors, chief executives of the U.S. territories, and the mayor of the District of Columbia to implement the Young American Medals Program.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond/reply:* It is estimated that 20 respondents will complete a 3-hour nomination form.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total hour burden to complete the nominations is 60 annual burden hours.

If you have additional comments, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Ellen Wesley, 202–616–3558, Office of Budget and Management Services, Office of Justice Programs, U.S. Department of Justice, 810 7th Street, N.W., Washington, DC 20531.

If additional information is required contact: Mrs. Brenda E. Dyer, Deputy Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Suite 850, Washington Center, 1001 G Street, N.W., Washington, DC 20530, or via facsimile at (202) 514–1534.

Dated: May 12, 1998.

Brenda E. Dyer,

Department Deputy Clearance Officer, United States Department of Justice.

BILLING CODE 4410–18–M

DEPARTMENT OF LABOR

Office of the Secretary

Submission for OMB Review; Comment Request

May 15, 1998.

The Department of Labor (DOL) has submitted the following public information collection requests (ICRs) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chapter 35). A copy of each individual ICR, with applicable supporting documentation, may be obtained by calling the Department of Labor, Departmental Clearance Officer, Todd R. Owen ((202) 219–5096 ext. 143) or by E-Mail to Owen-Todd@dol.gov. Individuals who use a telecommunications device for the deaf (TTY/TDD) may call (202) 219–4720 between 1:00 p.m. and 4:00 p.m. Eastern time, Monday–Friday.

Comments should be sent to Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for BLS, DM, ESA, ETA, MSHA, OSHA, PWBA, or VETS, Office of Management and Budget, Room 10235, Washington, DC 20503 ((202) 395–7316), within 30 days from the date of this publication in the **Federal Register**.

The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Agency: Employment and Training Administration.

Title: Government Performance Results Act (GPRA)—compliant program performance and participant outcomes data system.

OMB Number: 1205–ONEW (New).

Frequency: Quarterly.

Form No.	Affected public	Respondents	Average time per response (in hours)
Data Gathering	State, Local or Tribal Govt. or Federal Government ..	7,500	.5
Report Generation	States	50	5

Total Burden Hours: 16,000.
Total annualized capital/startup costs: 500,000.
Total annual costs (operating/maintaining systems or purchasing services): 225,000.
Description: A GPRA-compliant data collection and reporting system that supplies critical information on the operation of the Trade Adjustment Assistance program and the outcomes for its participants.
Agency: Mine Safety and Health Administration.
Title: Program to Prevent Smoking in Hazardous Areas.
OMB Number: 1219–0041 (Extension).
Frequency: Annually.
Affected Public: Business or other for-profit institutions.
Number of Respondents: 328.
Total Responses: 328.
Estimated Time per Respondent: .5 hour.
Total Burden Hours: 164.
Total annualized capital/startup costs: 0.
Total annual costs: 0.
Description: Coal mine operators are required to develop programs to ensure that any person entering the mine does not carry smoking materials, matches or lighters. The programs are necessary to ensure that a fire or explosion does not occur.

Todd R. Owen,
Departmental Clearance Officer.

DEPARTMENT OF LABOR

Employment and Training Administration

Office of Policy and Research; Proposed Information Collection Request Submitted for Public Comment

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) (44 U.S.C. 3506(c)(2)(A)). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Office of Policy and Research is soliciting comments concerning the proposed extension of the collection of the Occupational Code Request (OCR) information.

A copy of the proposed Information Collection Request (ICR) can be obtained by contacting the office listed below in the addressee section of this notice.

DATES: Written comments must be submitted to the office listed in the addressee section below on or before July 20, 1998. The Department of Labor is particularly interested in comments which:

* Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
* Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
* Enhance the quality, utility, and clarity of the information to be collected; and
* Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

ADDRESSES: Donna Dye, Office of Policy and Research, Employment and Training Administration, Room N–5636, 200 Constitution Avenue, N.W., Washington, D.C., 20210, (202) 219–7161 (this is not a toll free number), FAX (202) 219–9186.

SUPPLEMENTARY INFORMATION:

I. Background

The *Dictionary of Occupational Titles* (DOT) classifies nearly all jobs in the United States economy. However, new jobs are constantly evolving, and old ones are eliminated as technology and other factors change. As the O*NET (Occupational Information Network) system, the automated replacement of the DOT, is in a developmental/transitional phase, the need for Occupational Code Requests (OCRs) remains.

The ETA 741 Form, the Occupational Code Request (OCR), was developed by the Occupational Analysis (OA) program, as a public service to the users of the revised DOT in an effort to help them in obtaining occupational codes, titles and definitions for jobs that they were unable to locate in the DOT. In addition, data provided on the OCR may also be useful indicators of potential occupations that should be studied as part of the new O*NET system.

Use of the OCR is voluntary and is provided only (1) as a uniform guideline to the public and private sectors to submit information, (2) and to assist O*NET in identifying potential changes in occupations or emerging occupations.

II. Current Actions

The Office of Policy and Research, during the development/transitional phase of O*NET (the Occupational Information Network) seeks to provide the both the public and private sectors with needed occupational codes that cannot be located in the DOT. Therefore, the need for continuing an existing collection of this information is requested.

Type of Review: Extension (without change).
Agency: Employment and Training Administration.
Title: Occupational Code Request.
OMB Number: 1205–0137.
Affected Public: Federal Government, State or Local Government; Individuals; and Business or other for-profit/Not-for-profit institutions.
Total Respondents: 57.
Frequency: On occasion.
Average Time per Response: 30 minutes.
Estimated Total Burden Hours: 29 hours.
Total Burden Cost (capital/startup): None.
Total Burden Cost (operating/maintaining): $710.10.

Comments submitted in response to this comment request will be

summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: May 13, 1998.

Gerri Fiala,

Administrator, Office of Policy and Research.

[FR Doc. 98–13258 Filed 5–18–98; 8:45 am]

BILLING CODE 4510–30–M

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Proposed Information Collection Request Submitted for Public Comment and Recommendations; Representative of Miners

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) in minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to the Representative of Miners. MSHA is particularly interested in comments which:

* Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

* Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

* Enhance the quality, utility, and clarity of the information to be collected; and

* Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed below in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

DATES: Submit comments on or before July 20, 1998.

ADDRESSES: Send comments to Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances, 4015 Wilson Boulevard, Room 627, Arlington, VA 22203–1984. Commenters are encouraged to send their comments on a computer disk, or via E-mail to psilvey@msha.gov, along with an original printed copy. Ms. Silvey can be reached at (703) 235–1910 (voice) or (703) 235–5551 (facsimile).

FOR FURTHER INFORMATION CONTACT: George M. Fesak, Director, Office of Program Evaluation and Information Resources, U.S. Department of Labor, Mine Safety and Health Administration, Room 715, 4015 Wilson Boulevard, Arlington, VA 22203–1984. Mr. Fesak can be reached at gfesak@msha.gov (Internet E-mail), (703) 235–8378 (voice), or (703) 235–1563 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

The Federal Mine Safety and Health Act of 1977, 30 U.S.C. 801, *et seq.*, (Mine Act) requires the Secretary of Labor to exercise many of his duties under the Act in cooperation with miners' representatives. The Act also establishes miners' rights which may be exercised through a representative. Title 30, CFR Part 40 contains procedures which a person or organization must follow in order to be designed as a representative of miners.

II. Current Actions

The information is used to identify the designated representative of miners of a specific mine. The Mine Act gives the miner or the representative of miners the right to accompany an MSHA inspector without any loss of pay.

Type of Review: Extension.

Agency: Mine Safety and Health Administration.

Title: 30 CFR 40.3, 40.4, and 40.5, Representative of Miners.

OMB Number: 1219–0042.

Affected Public: Business or other for-profit institutions.

Cite/Reference/Form/etc.: 30 CFR 40.3, 40.4, 40.5.

Total Respondents: 350.

Frequency: On occasion.

Total Responses: 350.

Average Time Per Response: 1 hour.

Estimated Total Burden Hours: 175 hours.

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operating/maintaining): $0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: May 12, 1998.

George M. Fesak,

Director, Program Evaluation and Information Resources.

BILLING CODE 4510–43–M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. ICR–98–24]

Agency Information Collection Activities; Proposed Collection; Comment Request; Fire Brigades (Organizational Statement) (29 CFR 1910.156)

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA–95) (44 U.S.C. 3506(c)(2)(A)). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and impact of collection requirements on respondents can be properly assessed. Currently, the Occupational Safety and Health Administration (OSHA) is soliciting comments concerning the proposed extension of the information collection requirements contained in the standard on Fire Brigades (29 CFR 1910.156). The Agency is particularly interested in comments which:

• Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

DATES: Written comments must be submitted on or before July 20, 1998.

ADDRESSEE: Comments are to be submitted to the Docket Office, Docket No. ICR–98–24, Occupational Safety and Health Administration, U.S. Department of Labor, Room N–2625, 200 Constitution Avenue, NW, Washington, D.C. 20210. Telephone: (202) 219–7894. Written comments limited to 10 pages or less in length may also be transmitted by facsimile to (202) 219–5046.

FOR FURTHER INFORMATION CONTACT: Theda Kenney, Directorate of Safety Standards Programs, Occupational Safety and Health Administration, U.S. Department of Labor, Room N–3605, 200 Constitution Avenue, NW, Washington, DC 20210, telephone: (202) 219–8061. A copy of the referenced information collection request is available for inspection and copying in the Docket Office and will be mailed to persons who request copies by telephoning Theda Kenney at (202) 219–8061, extension 100, or Barbara Bielaski at (202) 219–8076, extension 142. For electronic copies of the Information Collection Request on Fire Brigades (29 CFR 1910.156), contact OSHA's WebPage on the Internet at http://www.osha.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The Occupational Safety and Health Act of 1970 (the Act) authorizes the promulgation of such health and safety standards as are necessary or appropriate to provide safe or healthful employment and places of employment. The statute specifically authorizes information collection by employers as necessary or appropriate for the enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents.

Fighting fires as a member of a fire brigade presents a significant risk of harm to an employee. In fact, fire fighting continues to be one of the Nation's most hazardous occupations. To mitigate the risks of employees fighting fires, OSHA developed a standard for fire brigades in 1980. The Fire Brigade standard does not require the employer to organize a fire brigade. However, if the employer does decide to organize a fire brigade, the provisions of the standard must be met.

There are various types of fire brigades. Some fire brigades merely monitor and assist in evacuation, others perform incipient fire fighting, while others perform Interior structural fire fighting. The tasks, responsibility, training, and personal protective equipment needs differ according to the type of fire brigade organized at the workplace. Therefore, 29 CFR 1910.156, requires employers who have fire brigades to develop and maintain an organizational statement which defines the type of fire brigade being organized and describes the functions that the employer expects the fire brigade to perform.

II. Current Actions

This notice requests Office of Management and Budget (OMB) approval of the information collection requirements contained in the Fire Brigade standard.

Type of Review: Extension of a Currently Approved Collection.

Agency: U.S. Department of Labor, Occupational Safety and Health Administration.

Title: Fire Brigades (Organizational Statement) (29 CFR 1910.156).

OMB Number: 1218–0075.

Agency Number: Docket Number ICR–98–24.

Affected Public: State or local governments; Business or other for-profit.

Number of Respondents: 1,670.

Frequency: Initially, On Occasion.

Average Time per Response: 5 minutes (0.8 hr.).

Estimated Total Burden Hours: 172.

Total Annualized Capital/Startup Costs: $0.

Signed at Washington, DC, this 12th day of May 1998.

Charles N. Jeffress,

Assistant Secretary, Occupational Safety and Health Administration.

[FR Doc. 98–13255 Filed 5–18–98; 8:45 am]

BILLING CODE 4510–26–M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. ICR–98–22]

Proposed Information Collection Request Submitted for Public Comment and Recommendations; OSHA Data Collection System (1218–0209)

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) (44 U.S.C. 3506(c)(2)(A)). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Occupational Safety and Health Administration is soliciting comments concerning the proposed extension of the information collection request for the OSHA Data Collection System. A copy of the proposed information collection request (ICR) can be obtained by contacting the office listed below in the addressee section of this notice.

DATES: Written comments must be submitted to the office listed in the addressee section below on or before July 20, 1998. The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology,

e.g., permitting electronic submissions of responses.

ADDRESSES: Comments are to be submitted to the Docket Office, Docket No. ICR 98–22, U.S. Department of Labor, Room N–2625, 200 Constitution Ave. NW, Washington, DC 20210, telephone (202) 219–7894. Written comments limited to 10 pages or less in length may also be transmitted by facsimile to (202) 219–5046.

FOR FURTHER INFORMATION CONTACT: Dave Schmidt, Office of Statistics, Occupational Safety and Health Administration, U.S. Department of Labor, Room N3647, 200 Constitution Avenue, NW, Washington, DC 20210, telephone: (202) 219–6463. Copies of the referenced information collection request are available for inspection and copying in the Docket Office and will be mailed to persons who request copies by telephoning Dave Schmidt at (202) 219–6463 or Barbara Bielaski at (202) 219–8076. For electronic copies of the OSHA Data Collection Initiative Request, contact OSHA's WebPage on the Internet at http://www.osha.gov/.

SUPPLEMENTARY INFORMATION:

I. Background

To meet many of OSHA's program needs, OSHA is proposing to continue its data initiative to collect occupational injury and illness data and information on number of workers employed and number of hours worked from establishments in portions of the private sector. OSHA will collect 1998 data from 80,000 employers required to create and maintain records pursuant to CFR part 1904. These data will allow OSHA to calculate occupational injury and illness rates and to focus its efforts on individual workplaces with ongoing serious safety and health problems. Successful implementation of the data collection initiative is critical to OSHA's reinvention efforts and the data requirements tied to the Government Performance and Results Act (GPRA).

II. Current Actions

This notice requests OMB approval of the paperwork requirements for the OSHA Data Collection System. Approval is necessary to ensure that the Agency continues to obtain establishment data necessary to carry on with the development and expansion of the new OSHA. This will allow the Agency to deal with a larger number of employers without massive increases in resources, will reduce intrusive interventions in workplaces that are relatively safe, and will lead to improved workplace safety and health for America's workers. In addition, OSHA will to be able to proceed with its GPRA requirements to monitor the results of Agency activities, quantify and evaluate the successes and failure of its various programs based on program results, identify the most efficient and effective program mix, and promote the development of programs and policies based on outcome data.

Type of Review: Extension of currently approved collection.

Agency: Occupational Safety and Health Administration.

Title: OSHA Data Collection System.

OMB Number: 1218–0209.

Agency Number: ICR–98–22.

Affected Public: Business or other for-profit and State, Local or Tribal Government.

Cite/Reference/Form/etc.: OSHA Form 196A and OSHA Form 196B.

Total Respondents: 80,000.

Frequency: Annually.

Average Time per Response: 30 minutes.

Estimated Total Burden Hours: 35,000 hours.

Comments submitted in response to this comment request will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: May 12, 1998.

Charles N. Jeffress,

Assistant Secretary for Occupational Safety and Health.

For electronic copies, contact

OSHA's WebPage on the Internet at http://www.osha.gov/.

SUPPLEMENTARY INFORMATION:

I. Background

The OSHA Act and 29 CFR Part 1904 prescribe that certain employers maintain records of job related injuries and illnesses. The injury and illness records are intended to have multiple purposes. One purpose is to provide data needed by OSHA to carry out enforcement and intervention activities to provide workers a safe and healthy work environment. The data are also needed by the Bureau of Labor Statistics to report on the number and rate of occupational injuries and illnesses in the country.

The data also provide information for employers and employees of the kinds of injuries and illnesses occurring in the workplace and their related hazards. Increased employer awareness should result in the identification and voluntary correction of hazardous workplace conditions. Likewise, employees who are provided information on injuries and illnesses will be more likely to follow safe work practices and report workplace hazards. This would generally raise the overall level of safety and health in the workplace.

OSHA currently has approval from the Office of Management and Budget (OMB) for information collection requirements contained in 29 CFR part 1904. That approval will expire on December 31, 1998, unless OSHA applies for an extension of the OMB approval. This notice initiates the process for OSHA to request an extension of the current OMB approval. This notice also solicits public comment on OSHA's existing paperwork burden estimates from those interested parties and to seek public response to several questions related to the development of OSHA's estimation. Interested parties are requested to review OSHA's estimates, which are based upon the most current data available, and to comment on their accuracy or appropriateness in today's workplace situation.

29 CFR 1904.8, Reporting of Fatality or Multiple Hospitalization Incidents (OMB control number 1218–0007) and 29 CFR 1904.17, Annual OSHA Injury and Illness Survey of Ten or More employers (OMB control number yet to be assigned) are each under separate Information Collection Request (ICR) packages.

II. Current Actions

This notice requests an extension of the current OMB approval of the paperwork requirements in 29 CFR part 1904, Recording and Reporting Occupational Injuries and Illnesses.

Type of Review: Extension of currently approved collection.

Agency: U.S. Department of Labor, Occupational Safety and Health Administration.

Title: Recording and Reporting Occupational Injuries and Illnesses.

OMB Number: 1218–0176

Agency Number: ICR–98–23

Frequency: Recordkeeping.

Affected Public: Business or other for-profit; Farms; Not-for-profit institutions; State and Local Government.

Cite/Reference/Form/etc: 29 CFR Part 1904; OSHA No. 200; OSHA No. 101

Number of Respondents: 1,110,398

Estimated Time Per Respondent: 1.56 hours

Total Burden Hours: 1,741,959 hours

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request. They will also become a matter of public record.

Dated: May 12, 1998.

Charles N. Jeffress,

Assistant Secretary for Occupational Safety and Health.

BILLING CODE 4510–26–M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. NRTL–2–90]

SGS U.S. Testing Company Inc., Applications for Renewal and Expansion of Recognition

AGENCY: Occupational Safety and Health Administration, Labor.

ACTION: Notice of request for renewal and expansion of recognition as a Nationally Recognized Testing Laboratory (NRTL), and preliminary finding.

SUMMARY: This notice announces: (1) the application of SGS U.S. Testing Company Inc. (formerly U.S. Testing Company, Inc., California Division) for renewal of its recognition as an NRTL under 29 CFR 1910.7, and (2) the applications of SGS U.S. Testing Company Inc. for expansion of its recognition as an NRTL under 29 CFR 1910.7, for a new site and to use additional programs and procedures, and presents the Agency's preliminary finding. In addition, this notice formally reflects the name change to SGS U.S. Testing Company Inc.

DATES: The last date for interested parties to submit comments is July 20, 1998.

ADDRESS: Send comments concerning this notice to: NRTL Program, Office of Technical Programs and Coordination Activities, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N3653, Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Bernard Pasquet, NRTL Recognition Program at the above address, or phone (202) 219–7056.

SUPPLEMENTARY INFORMATION:

Notice of Application

Notice is hereby given that SGS U.S. Testing Company Inc. (SGS) has applied to the Occupational Safety and Health Administration (OSHA), pursuant to 29 CFR 1910.7, for renewal and for an expansion of its current recognition as a Nationally Recognized Testing Laboratory (NRTL). When first recognized as an NRTL, the organization's name was U.S. Testing Company, Inc., California Division. SGS informed OSHA of the change in name (see Exhibit 7B), and this notice reflects that change. In regards to the renewal, SGS received its recognition as an NRTL on March 23, 1993 (see 58 FR 15509), for a period of five years ending March 23, 1998. Appendix A to 29 CFR 1910.7 stipulates that the period of recognition of an NRTL is five years and that an NRTL may renew its recognition by applying not less than nine months, nor more than one year, before the expiration date of its current recognition. SGS applied for a renewal of its recognition on March 23, 1997 (see Exhibit 7C), within the time allotted, and retains its recognition pending OSHA's final decision in this renewal process. In regards to the expansions, SGS requests recognition to use additional programs and procedures. However, that use will be subject to certain conditions. SGS also requests recognition for another testing facility (site) in Fairfield, New Jersey, which will become the headquarters of its NRTL operations. The application for this facility is for recognition for testing and certification to the test standards listed below in the section titled "Expansion of Recognition—Additional Facility." The application incorporates the use of the additional programs and procedures, also listed below. The previous application of SGS, pursuant to 29 CFR 1910.7, covered its recognition as an NRTL (56 FR 10045, 3/23/92), which OSHA granted on the date noted above.

The address of the SGS testing facilities covered by this application are:
SGS U.S. Testing Company Inc., 291 Fairfield Avenue, Fairfield, New Jersey 07004.
SGS U.S. Testing Company Inc., 555 Telegraph Road, Los Angeles, California 90040.

Background

This **Federal Register** notice announces the application of SGS U.S. Testing Company Inc. (formerly U.S. Testing Company, Inc., California Division), dated March 23, 1997 (See Exhibit 7C), for renewal of its recognition as an NRTL. This notice also covers the application of SGS, dated April 21, 1997 (see Exhibit 7D), for recognition of its Fairfield, New Jersey testing facility as an NRTL. In letters dated July 27, 1997 and February 4, 1998 (see Exhibits 7E and 7F), SGS also requested recognition to use the additional programs and procedures listed below.

SGS according to the applicant is incorporated in the State of New York, and is 100% owned by SGS North America Inc., which in turn is owned by SGS Societe General de Surveillance S.A., based in Geneva, Switzerland. This same ownership relationship existed at the time SGS was first recognized as an NRTL in March 1993.

Renewal of NRTL Recognition

SGS requests renewal of the recognition of its Los Angeles testing facility for the following standards for which it was previously recognized:

ANSI/UL 1 Flexible Metal Conduit
ANSI/UL 3 Flexible Nonmetallic Tubing for Electric Wiring
ANSI/UL 250 Household Refrigerators and Freezers
ANSI/UL 514A Metallic Outlet Boxes, Electrical
UL 544 Electric Medical and Dental Equipment
ANSI/UL 632 Electrically Actuated Transmitters
ANSI/UL 751 Vending Machines
ANSI/UL 913 Intrinsically Safe Apparatus and Associated Apparatus for Use in Class I, II, and III, Division I, Hazardous (Classified) Locations
ANSI/UL 1012 Power Supplies
UL 1236 Electric Battery Chargers
UL 1270 Radio Receivers, Audio Systems, and Accessories
ANSI/UL 1418 Implosion-Protected Cathode-Ray Tubes for Television-Type Appliances
UL 1459 Telephone Equipment
ANSI/UL 1484 Residential Gas Detectors
ANSI/UL 1571 Incandescent Lighting Fixtures
UL 1604 Electrical Equipment for Use in Class I and II, Division 2 and Class III Hazardous (Classified) Locations

Expansion of Recognition—Additional Facility

SGS requests recognition of its Fairfield, New Jersey testing facility for the following standards when applicable to equipment or materials that will be used in environments under OSHA's jurisdiction. SGS desires recognition for testing and certification of products tested for compliance with these test standards, and OSHA has determined they are appropriate within the meaning of 29 CFR 1910.7(c):

ANSI/UL 94 Tests for Flammability of Plastic Materials for Parts in Devices and Appliances
ANSI/UL 1950 Information Technology Equipment Including Electrical Business Equipment
UL 2601–1 Medical Electrical Equipment, Part 1: General Requirements for Safety
UL 3101–1 Electrical Equipment for Laboratory Use; Part 1: General Requirements
UL 3111–1 Electrical Measuring and Test Equipment, Part 1: General

The recognition of this additional testing facility also incorporates the use of the additional programs and procedures listed below.

Expansion of Recognition—Programs and Procedures

SGS requests expansion of its recognition to use the following additional programs and procedures, based upon the requirements as detailed in the **Federal Register** document titled "Nationally Recognized Testing Laboratories; Clarification of the Types of Programs and Procedures," (60 FR 12980, 3/9/95). This notice describes nine programs or procedures which an NRTL may use in certifying a product, all of which require that the NRTL retain primary control of or responsibility for all aspects of product certification. Each NRTL is automatically approved to use the program called the "Basic Procedure," when it is first recognized.

1. Acceptance of testing data from independent organizations, other than NRTLs.
2. Acceptance of witnessed testing data.

Conditions—Use of Programs and Procedures

The following conditions apply to the recognition to use the additional programs and procedures, and are in addition to the requirements detailed in the previously cited March 9, 1995 **Federal Register** (60 FR 12980):

a. SGS U.S. Testing Company Inc., Fairfield, New Jersey, will review and approve the qualifications of all external organizations prior to SGS U.S. Testing Company Inc. accepting test data from these organizations.

b. SGS U.S. Testing Company Inc., Fairfield, New Jersey, will review and approve the qualifications of all external organizations prior to SGS U.S. Testing Company Inc. using a site of any of these organizations for witnessed test data.

Preliminary Finding

SGS addressed the criteria that have to be met for renewal and for expansion of its recognition as an NRTL. In connection with the renewal and the use of the programs, OSHA carried out an on-site review (evaluation) of the Los Angeles, California, on August 4–5, 1997. OSHA also carried out an on-site review (evaluation) of the Fairfield, New Jersey facility, on June 2–3, 1997. Discrepancies noted by the review team during the on-site review were responded to following its completion and are included as an integral part of the on-site review report (see Exhibits 8). With the preparation of the final review report, the NRTL Program staff was satisfied that SGS had addressed concerns arising from the review. In the cover memo for the report, the staff recommended that the recognition of SGS be renewed, and be expanded to allow the use of the additional programs and procedures, subject to the above conditions. The staff also recommended the recognition of the SGS Fairfield, New Jersey testing facility, which will become the headquarters of its NRTL operations.

Following a review of the application file and the on-site review report, the NRTL Program staff concluded that the applicant appeared to have met the requirements for renewal of its recognition as a Nationally Recognized Testing Laboratory for the Los Angeles, California facility, and for the expansion of recognition to include the Fairfield, New Jersey facility, and for use of the additional programs and procedures, subject to the above conditions. The staff therefore recommended to the Assistant Secretary that the applications be preliminarily approved.

Based upon a review of the complete application, and the recommendations of the staff, including the recommendation in the on-site review report, dated February 27, 1998, the Assistant Secretary has made a preliminary finding that SGS U.S. Testing Company Inc. can meet the requirements as prescribed by 29 CFR 1910.7 for renewal of its recognition, and for the expansion of its recognition to include the additional facility, and to use the additional programs and

procedures, subject to the above conditions.

All interested members of the public are invited to supply detailed reasons and evidence supporting or challenging the sufficiency of the applicant's having met the requirements for expansion of its recognition as a Nationally Recognized Testing Laboratory, as required by 29 CFR 1910.7 and Appendix A to 29 CFR 1910.7. Submission of pertinent written documents and exhibits shall be made no later than the last date for comments (see **DATES** above), and submitted to the address provided above (see **ADDRESS**). Copies of the SGS application, letters and supporting documentation, the on-site review report, and all submitted comments, as received, are available for inspection and duplication (under Docket No. NRTL–2–90) at the Docket Office, Room N2634, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address.

The Assistant Secretary's final decision on whether the applicant (SGS U.S. Testing Company Inc.) satisfies the requirements for renewal and for expansion of its recognition as an NRTL will be made on the basis of the entire record including the public submissions and any further proceedings that the Assistant Secretary may consider to be appropriate in accordance with appendix A to § 1910.7.

Signed at Washington, DC., this 12th day of May, 1998.

Charles N. Jeffress,

Assistant Secretary.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

National Summit on Retirement Savings; Notice of Meeting

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of meeting agenda.

SUMMARY: This document provides notice of the agenda for the National Summit on Retirement Savings, as called for by the Savings Are Vital To Everyone's Retirement (SAVER) Act, which amends Title I of the Employee Retirement Income Security Act of 1974.

DATES: The National Summit on Retirement Savings will be held on Thursday, June 4, 1998, and Friday, June 5, 1998, beginning at 8:45 am E.S.T. on June 4, and ending at 1 pm E.S.T. on June 5.

ADDRESS: The Summit will be held at the Hyatt Regency on Capitol Hill, 400 New Jersey Ave., NW, Washington, DC 20001.

FOR FURTHER INFORMATION CONTACT: Jay Rosenblum, Office of the Assistant Secretary, Pension and Welfare Benefits Administration, US Department of Labor, Room S–2524, 200 Constitution Ave., NW, Washington, DC 20210, (202) 219–8233, or Don Blandin, President, American Savings Education Council, Suite 600, 2121 K Street, NW, Washington, DC 20037–1896, (202) 659–0670. These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: On November 20, 1997, the President signed Public Law 105–92 (1997), the "Savings Are Vital to Everyone's Retirement Act of 1997" (SAVER). The SAVER legislation is aimed at advancing the public's knowledge and understanding of the importance of retirement savings by: (1) Providing a bipartisan National Summit on Retirement Savings co-hosted by the President and the Congressional Leadership in the House and Senate; and (2) establishing an ongoing educational program coordinated by the Department of Labor. The Summit will be held June 4 and 5, 1998 in Washington.

The purpose of the Summit is to: (1) Increase public awareness of the value of personal savings for retirement, (2) advance the public's knowledge and understanding of retirement savings and its importance to the well being of all Americans, (3) facilitate the development of a broad-based, public retirement savings education program, (4) identify the barriers faced by workers who want to save for retirement, (5) identify the barriers which employers, especially small employers, face in assisting their workers in accumulating retirement savings, (6) examine the impact and effectiveness of individual employers who promote personal savings and retirement savings plan participation among their workers, (7) examine the impact and effectiveness of government programs at the Federal, State, and local levels to educate the public about retirement savings principles, (8) develop recommendations for governmental and private sector action to promote pensions and individual retirement savings, and (9) develop recommendations for the coordination of Federal, State, and local retirement savings education initiative.

The Agenda for the National Summit on Retirement Savings follows. This agenda is subject to change.

Thurs, June 4, 1998

7:00am–8:00am Registration at Hotel
8:00am–9:00am Breakfast
9:00am–9:30am Opening Session: Welcome and Remarks By Presiding Officers
9:30am–10:45am Session One: Panel Discussion on Current State—Savings & Education Today

Panelists:

1. Dallas Salisbury, Employee Benefit Research Institute (moderator)
2. Mathew Greenwald, Mathew Greenwald and Associates
3. Josephine Tsao, IBM
4. James Ray, Connerton Ray
5. Craig Hoffman, Corbel & Company
6. Ann Combs, William M. Mercer Companies Inc.

10:45am–11:00am Break
11:00am–12:00pm Keynote Session: Remarks by the President, the Speaker of the House, and other Congressional Leadership
12:00pm–1:00pm Concurrent Breakout Session: Employee and Employer Barriers
1:00pm–2:30pm Lunch with Speakers
2:30pm–3:45pm Concurrent Breakout Session: Employee and Employer Opportunities
3:45pm–4:30pm Free Time
4:30pm–7:15pm White House Reception
7:30pm–9:30pm Dinner and Speeches by Congressional Leadership

Day Two, Fri. 6/5

8:00am–9:00am Working Breakfast with Breakout Groups
9:15am–10:45am Session Two: Panel Discussion on Public and Private-Sector Outreach Activities/Best Practices

Panelists:

1. David Walker, Arthur Andersen LLP (Moderator)
2. Olena Berg, United States Department of Labor
3. Jim Hill, National Association of State Treasurers
4. Horace Holmes, WJLA-TV, Albritton Communications Company
5. Robert L. Reynolds, Fidelity Investments
6. Anthony R. Amato, Hard Rock Cafe International

10:45am–11:00am Break
11:00am–12:15pm Final Session: Summary of Breakout Group Discussions
12:15pm–1:00pm Closing Session: Thank You and Challenge

Public Participation: Participation is limited to invited delegates.

Notice of Meeting

Notice is hereby given that a National Summit on Retirement Savings will be held on Thursday, June 4, 1998, and Friday, June 5, 1998, at the Hyatt Regency on Capitol Hill, 400 New Jersey Ave., NW, Washington, DC 20001.

Signed at Washington, DC, this 13th day of May, 1998

Olena Berg,

Assistant Secretary, Pension and Welfare Benefits Administration, Department of Labor.

[FR Doc. 98–13262 Filed 5–18–98; 8:45 am]

BILLING CODE 4510–29–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–317 AND 50–318]

Baltimore Gas & Electric Company; Calvert Cliffs Nuclear Power Plant Units 1 and 2; Notice of Acceptance for Docketing of the Application for Renewal of Facility Operating Licenses Nos. DPR–53 and DPR–69 for an Additional 20-Year Period

The U.S. Nuclear Regulatory Commission (the Commission) is considering the renewal of operating license Nos. DPR–53 and DPR–69, which authorize Baltimore Gas & Electric Company (BG&E), the applicant, to operate its Calvert Cliffs Nuclear Power Plant (CCNPP), Units 1 and 2 at 2700 megawatts thermal. The renewed licenses would authorize the applicant to operate CCNPP Units 1 and 2 for an additional 20 years beyond the current 40-year period. The current license for Unit 1 expires on July 31, 2014, and the current license for Unit 2 expires on August 13, 2016.

On April 10, 1998, BG&E submitted an application to renew the operating licenses for its CCNPP units. A Notice of Receipt of Application, "Baltimore Gas & Electric Company; Calvert Cliffs Nuclear Power Plant Units 1 & 2; Notice of Receipt of Application for Renewal of Facility Operating Licenses Nos. DPR–53 and DPR–69 for an Additional 20-Year Period," was published in the **Federal Register** on April 27, 1998, (63 FR 20663). The Commission's staff has determined that BG&E has submitted information in accordance with 10 CFR 54.19, 54.21, 54.22, 54.23, and 51.53(c) that is complete and acceptable for docketing. The current Docket Nos. 50–317 and 50–318 for License Nos. DPR–53 and DPR–69 will be retained. If the Commission determines that new license or docket numbers are necessary, any such changes will be published in a subsequent **Federal Register** notice.

The docketing of the renewal application does not preclude requesting additional information as the review proceeds, nor does it predict whether the Commission will grant or deny the application. The license will not be renewed unless the Commission makes the findings required by 10 CFR 54.29. Pursuant to 10 CFR 51.26, as part of the environmental scoping process, the staff intends to hold a public scoping meeting. The details of the public scoping meeting will be included in a future **Federal Register** notice. In addition, the Commission also intends to hold public meetings to discuss the license renewal process and schedule for conducting the review. The Commission will provide prior notice for these meetings.

An opportunity to request a hearing on the application for a renewed license will be the subject of a subsequent **Federal Register** notice.

Detailed information about the license renewal process can be found under the nuclear reactors icon of the NRC's web page, http://www.nrc.gov.

A copy of the application to renew the CCNPP Units 1 and 2 licenses is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW, Washington, DC 20037, and the Local Public Document Room for the CCNPP Units 1 and 2 located in the Calvert County Public Library, 30 Duke Street, Prince Frederick, MD 20678.

Dated at Rockville Maryland, this 8th day of May 1998.

For the Nuclear Regulatory Commission.

Christopher I. Grimes,

Director, License Renewal Project Directorate, Division of Reactor Program Management, Office of Nuclear Reactor Regulation.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–295 and 50–304]

Commonwealth Edison Company; Zion Nuclear Power Station, Units 1 and 2; Notice of Public Meeting

The NRC will conduct a public meeting at the Zion-Benton High School, 3901 21st Street, Zion, Illinois, on June 1, 1998, to discuss the NRC regulatory process for decommissioning and plans developed by Commonwealth Edison Company (CECo, the licensee) to decommission the Zion Nuclear Power Plant located near Zion, Illinois. Zion-Benton High School is located on the southeast corner of Kenosha Road and 21st Street, Zion, Illinois. Parking is provided in the South Parking Lot at the school. The meeting is scheduled for 7–9:00 p.m. and will be chaired by Dr. Donald Moon, Co-Chairman, Community Advisory Panel and President, Shimer College. The meeting will include a presentation by CECo on their planned decommissioning activities. The NRC staff will make a short presentation on the decommissioning process and NRC programs for monitoring decommissioning activities. There will be an opportunity for members of the public to make comments and ask questions of the NRC staff and CECo representatives after the presentations. The meeting will be transcribed.

Regulatory submittals and responses are available for public inspection at the local public document room, located at the Waukegan Public Library, 128 North County Street, Waukegan, IL 60085 and the Commission Public Document Room, 2120 L Street, NW., Washington, D.C. 20037.

For more information, contact Mr. Anthony W. Markley, Project Manager, Non-Power Reactors and Decommissioning Project Directorate, Division of Reactor Program Management, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington DC, 20555–0001, telephone number (301) 415–3165.

Dated at Rockville, Maryland, this 12th day of May 1998.

For The Nuclear Regulatory Commission.

Ramin R. Assa,

Project Manager, Project Directorate III–2, Division of Reactor Program Projects III/IV, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–220]

Niagara Mohawk Power Corporation; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–63, issued to Niagara Mohawk Power Corporation (the licensee), for operation of the Nine Mile Point Nuclear Station, Unit 1 (NMP1) located in the town of Scriba, Oswego County, New York.

The proposed amendment would change Technical Specifications (TSs) 3/4.6.2, "Protective Instrumentation," to reflect modifications to the initiation instrumentation for the Control Room Air Treatment System. Specifically, TS

VOL 63 ISS 96 MY 19 1998 UMI

Tables 3.6.2l and 4.6.2l, "Control Room Air Treatment System Initiation," would be changed to delete the high radiation signal and substitute the following initiating signals from the Reactor Protection System: (1) low-low reactor water level in the reactor vessel, (2) high steam flow in the main steam line, (3) high temperature in the main steam line tunnel, and (4) high pressure in the reactor drywell. TS Table 3.6.2l would specify setpoints for each of these four initiating parameters ([greater than or equal to] 5 inches-indicator scale, [less than or equal to] 105 psid, [less than or equal to] 200 degrees F, and [less than or equal to] 3.5 psig, respectively). TS Table 3.6.2l would indicate for each of the four parameters that the minimum number of tripped or operable trip systems and the minimum number of operable instrument channels per operable trip system are two, and that the four parameters are required to be operable when the reactor mode switch is in the "startup" or "run" positions (but not if in the "shutdown" or "refuel" positions), except that the high drywell pressure signal may be bypassed when necessary for containment inerting. For three of the parameters (low-low reactor water level, high steam flow in the main steam line, and high drywell pressure), TS Table 4.6.2l would require daily sensor checks, quarterly instrument channel tests, and quarterly instrument channel calibrations (except that only the trip circuit need be calibrated and tested at these quarterly frequencies; the primary sensor would be calibrated and tested each operating cycle). For the parameter high temperature in the main steam line tunnel, TS Table 4.6.2l would require an instrument channel test and an instrument channel calibration each operating cycle, not to exceed 24 months. Associated TS "Bases for 3.4.5 and 4.4.5 Control Room Air Treatment System" would also be changed to update the system descriptions consistent with these proposed changes to the automatic initiation circuitry, and to reflect the system's manual start capability. These changes to the TS Bases would include deletion of the statements that (1) the Control Room Air Treatment System is designed "to automatically start upon a receipt of a high radiation signal from one of the two radiation monitors located on the ventilation intake" and that (2) "* * * air intake radiation monitors will be calibrated and functionally tested each operating cycle, not to exceed 24 months, to verify system performance."

During a system design review, the licensee determined that (1) contrary to a commitment in letters to the NRC dated January 31 and March 19, 1984, the NMP1 Control Room Air Treatment System would not automatically initiate during an MSLB [main steam line break] or an LOCA [loss-of-coolant accident], and (2) initiation of the NMP1 Control Room Air Treatment System at the current radiation monitor setpoint of [less than or equal to] 1000 CPM, as required by TS Table 3.6.2l, is not sufficient for compliance with GDC 19 limits for radiological protection of the control room operators. Consequently, on April 21, 1998, the licensee declared the Control Room Air Treatment System inoperable and notified the NRC that a 7 day limiting condition for operation had been entered as specified by TS 3.4.5. On April 27, 1998, the licensee informed the NRC Project Manager that resolution of the inoperability condition would involve modifications more extensive than mere setpoint adjustments, that these modifications should not be implemented while NMP1 is operating, and that the licensee was considering filing an application for an emergency license amendment to allow the modifications to be implemented and the plant restarted after a 7-day outage. NMP1 was shut down on April 28, 1998, in accordance with TS 3.4.5. On May 2, 1998, the licensee filed an application requesting that the NRC amend the NMP1 license by May 8, 1998, on an Emergency basis because "resumption of operation cannot occur until NRC approval of the proposed change." However, on May 11, 1998, the licensee informed the NRC that as a result of the finding by a team of licensee engineers who reviewed the control room ventilation systems, modifications to the NMP1 Control Room Air Treatment System would not be completed and NMP1 determined ready for restart for 2 weeks. Accordingly, the NRC finds that exigent circumstances exist in that the full 30 days normally provided for public comment with respect to the proposed action is not available before NMP1 will be ready to resume power operation.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

Pursuant to 10 CFR 50.91(a)(6) for amendments to be granted under exigent circumstances, the NRC staff must determine that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. *The operation of Nine Mile Point Unit 1, in accordance with the proposed amendment, will not involve a significant increase in the probability or consequences of an accident previously evaluated.*

* * * The proposed modification and associated TS changes involve a system that is intended to detect the symptoms of certain events or accidents and initiate mitigative actions (i.e., the Control Room Air Treatment System). Accordingly, the proposed changes do not affect the probability of any accident initiators previously evaluated. Therefore, the proposed changes will not result in a significant increase in the probability of any accidents previously evaluated.

Currently, TS Table 3.6.2l, "Control Room Air Treatment System Initiation," specifies a setpoint of "≤1000 CPM" for Parameter (1), "High Radiation Ventilation Intake." This requires the continuous radiation monitors located in the outside air intake duct of the Control Room Ventilation System to initiate the Control Room Air Treatment System at a detector count rate of "[less than or equal to] 1000 CPM." The setpoint was established to comply with the radiation dose limits specified in 10 CFR 50, Appendix A, General Design Criterion (GDC) 19 and NUREG–0800, "Standard Review Plan [SRP]," Section 6.4 for control room habitability during an accident, including a Loss of Coolant Accident (LOCA). In the event of an accident, timely initiation and proper operation of the Control Room Air Treatment System minimizes the amount of airborne radioactivity entering the control room. However, based on the results of a current study, initiation of the Control Room Air Treatment System at this setpoint does not provide assurance that personnel occupying the control room under the most limiting Main Steam Line Break (MSLB) accident assumptions would not receive radiation exposures in excess of the GDC 19 and SRP 6.4 limits. It was further determined that, contrary to a 1984 commitment, the Control Room Air Treatment System would not automatically initiate during a LOCA.

To correct this condition, a modification is proposed that will automatically initiate the Control Room Air Treatment System on either a MSLB or LOCA signal. Spare contacts from the RPS logic circuits will be used to provide the initiation signals. Specifically, MSLB automatic initiation of the system will be on main steam line high flow or main steam line tunnel high temperature, and LOCA automatic initiation of the system will be on high drywell pressure or low-low reactor vessel water level. Implementation of this modification will provide automatic initiation of the Control Room Air Treatment System at the onset of both a MSLB and a LOCA, as previously committed.

The MSLB accident has been evaluated for full power operating conditions where radioactive gases released from the turbine building could be drawn into the Control Room Ventilation System and accumulate in the control room. Engineering calculations show that the Control Room Air Treatment System would maintain the dose to the control room operators below the GDC 19 and SRP 6.4 limits during these releases, and the addition of an anticipatory automatic initiation on a MSLB signal (main steam line high flow or main steam line tunnel high temperature) provides assurance that the consequences of the MSLB accident are bounded by the analysis.

The LOCA analysis assumes that radioactive gases are released from the elevated stack and are then drawn back down into the Control Room Ventilation System intake duct. Analysis shows that for the bounding condition, the accumulated dose in the control room for a minimum of 30 days would not be detected by the Control Room Air Treatment System radiation monitors, even at a significantly reduced setpoint. Consequently, the radiation monitors cannot be relied upon to initiate the Control Room Air Treatment System in the event of a LOCA. As a result, an anticipatory automatic initiation of the Control Room Air Treatment System on a LOCA signal (high drywell pressure or low-low reactor vessel water level) is proposed to be added to provide assurance that personnel occupying the control room under the most limiting LOCA assumptions will not receive radiation exposures in excess of the GDC 19 and SRP 6.4 limits.

NMPC has also proposed to delete the requirement to have the Control Room Air Treatment System automatically initiate on a high radiation signal when the reactor mode switch is in the "Refuel" position. This change is acceptable based on 1) neither a LOCA or MSLB is assumed to occur in refuel; 2) for accidents assumed to occur during refueling (fuel handling accident), GDC 19 and SRP 6.4 limits are met without the Control Room Air Treatment System; and 3) the Control Room Air Treatment System can be manually initiated.

In summary, the proposed changes for the Control Room Air Treatment System initiation channels will assure that the NMP1 control room operators will not receive radiation exposures in excess of the limits delineated in GDC 19 and SRP 6.4. Accordingly, the operators will be able to respond to and mitigate the consequences of anticipated accident scenarios. Therefore, the proposed changes will not involve a significant increase in the consequences of an accident previously evaluated.

2. *The operation of Nine Mile Point Unit 1, in accordance with the proposed amendment, will not create the possibility of a new or different kind of accident from any accident previously evaluated.*

* * * The proposed changes do not introduce any new accident initiators and do not involve any alterations to plant configurations which could initiate a new or different kind of accident. The actuation circuit of the Control Room Air Treatment System actuation logic does not control or interface with any primary reactor processes. Addition of the MSLB logic and the LOCA logic will ensure that the Control Room Air Treatment System initiates such that habitability of the control room is not compromised. No new failure modes to existing systems or equipment important to safety are created by this change. Post-installation testing will confirm that the new logic will have no effect on other safety-related circuits and TS required surveillance testing will routinely confirm operability of the Control Room Air Treatment System. Therefore, the changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. *The operation of Nine Mile Point Unit 1, in accordance with the proposed amendment, will not involve a significant reduction in a margin of safety.*

The proposed changes to Sections 3.6.2 and 4.6.2 incorporate modifications to the initiation instrumentation for the Control Room Air Treatment System. * * * As a result of these changes, the requirement to have the Control Room Air Treatment System automatically initiate on a high radiation signal when the reactor mode switch is in the "Refuel" position has been deleted. * * *

The addition of the trip circuit logic from the MSLB accident as well as from the LOCA circuits assures that the control room operator will not be exposed to radiation limits in excess of GDC 19 or SRP 6.4 limits. Additionally, the initiation signal will be automatic at the onset of both accidents, which improves the response time of the Control Room Air Treatment System to the MSLB accident and the LOCA. NMPC has proposed to delete the requirement to have the Control Room Air Treatment System automatically initiate on a high radiation signal when the reactor mode switch is in the "Refuel" position. This change is acceptable based on (1) neither a LOCA nor MSLB is assumed to occur in refuel; (2) for accidents assumed to occur during refueling (fuel handling accident) GDC 19 and SRP 6.4 limits are met without the Control Room Air Treatment System; and (3) the Control Room Air Treatment System can be manually initiated.

In summary, the proposed changes will assure that the Control Room dose established in GDC 19 and SRP 6.4 will not be exceeded. Therefore, the proposed activity does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 14 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 14-day notice period. However, should circumstances change during the notice period, such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 14-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 6D59, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC.

The filing of requests for hearing and petitions for leave to intervene is discussed below.

By June 1, 1998, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If the amendment is issued before the expiration of the 30-day hearing period, the Commission will make a final determination on the issue of no significant hazards consideration. If a hearing is requested, the final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date.

A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and to Mark J. Wetterhahn, Esquire, Winston & Strawn, 1400 L Street, NW, Washington, DC 20005–3502, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated May 2, 1998, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room, located at the Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Dated at Rockville, Maryland, this 12th day of May, 1998.

For the Nuclear Regulatory Commission.

Darl S. Hood,

Senior Project Manager, Project Directorate I–1, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–266 and 50–301]

In the Matter of Wisconsin Electric Power Company (Point Beach Nuclear Plant, Unit Nos. 1 and 2); Exemption

I

Wisconsin Electric Power Company (the licensee) is the holder of Facility Operating License Nos. DPR–24 and DPR–27, which authorize operation of the Point Beach Nuclear Plant, Units 1 and 2, respectively. The licenses provide, among other things, that the licensee is subject to all rules, regulations, and orders of the Commission now or hereafter in effect.

The facility consists of two pressurized-water reactors located at the licensee's site in Manitowoc County, Wisconsin.

II

The Code of Federal Regulations at 10 CFR 50.48, "Fire Protection," requires that nuclear power plants licensed to operate prior to January 1, 1979, meet Appendix R, "Fire Protection Program for Nuclear Power Facilities Operating Prior to January 1, 1979," Sections III.G, III.J, and III.O. Appendix R, Section III.J, "Emergency Lighting," requires that "Emergency lighting units with at least an 8-hour battery power supply shall be provided in all areas needed for operation of safe shutdown equipment and in access and egress routes thereto." Equipment needed for safe shutdown after a fire at Point Beach Nuclear Plant is maintained inside the main power block and several buildings onsite. Emergency lighting is provided inside these buildings for areas needed for operation of safe shutdown equipment and for access and egress routes in accordance with 10 CFR part 50, Appendix R, Section III.J. However, no emergency lighting meeting Section III.J requirements has been installed for outdoor routes between these buildings. Because of cost and maintenance considerations, and after determining that application of Section III.J was not necessary to achieve the underlying purpose of the rule, the licensee submitted an exemption request with respect to these outdoor routes.

The requested exemption from the requirements of Appendix R, Section III.J, would allow the use of hand-held portable lights, in the event that sufficient daylight, normal lighting, or security lighting is not available, when transiting (access and egress routes) between the main power block and buildings separated from the main power block, namely, the diesel generator building (G–03 and G–04), 13.8 kV switchgear building, service water and fire pump house, fuel oil pump house, gas turbine building, and warehouse 3. These buildings contain equipment relied upon in the detailed fire plans to mitigate the consequences of a fire that could affect the capability to place the reactor in cold shutdown. As stated above, emergency lighting is maintained within these structures as required by Appendix R, Section III.J. However, access and egress between these buildings and the main power block require walking outdoors. The areas outside of and between these buildings are paved, commonly used for vehicular traffic, and are maintained clear of snow and other obstructions.

In the worst-case scenarios that postulate a fire concurrent with a loss of offsite power, the hand-held, battery-powered, portable lighting units currently maintained on site in four "abnormal operating procedure" (AOP) packs located in the control room and additional hand-held, battery-powered, portable lighting units maintained by operations personnel would be used, under the proposed exemption, by the operations staff to allow transit between buildings to safely perform the functions required by the fire plans and operations procedures. Each of the four AOP packs contain a hand-held, battery-powered, portable lighting unit in addition to tools. Each hand-held, battery-powered, portable lighting unit is verified to be operable in a monthly surveillance and the batteries are replaced every 6 months.

III

Pursuant to 10 CFR 50.12, the Commission may, upon application by any interested person or upon its own initiative, grant exemptions from the requirements of 10 CFR Part 50 when (1) the exemptions are authorized by law, will not present an undue risk to the public health or safety, and are consistent with the common defense and security, and (2) when special circumstances are present. Special circumstances are present whenever, according to 10 CFR 50.12(a)(2)(ii), "Application of the regulation in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule."

The underlying purpose of 10 CFR part 50, Appendix R, Section III.J, is to provide adequate illumination to assure the capability of performing all necessary safe shutdown functions, as well as to assure personnel movement to and from the equipment and components that must be manually operated by plant personnel to effect safe shutdown during emergencies. In addition, the illumination must have a capability to allow sufficient time for normal lighting to be restored.

To achieve safe shutdown during a plant emergency, personnel may be required to go to and from buildings outside the main power block to control equipment locally, monitor equipment status, or obtain equipment, such as fans or repair materials. Any equipment that would need to be obtained could be carried with one hand or, if necessary, transported on wheeled carts. In the latter case, a minimum of two individuals would be available, one of whom could provide the necessary lighting if needed.

The availability of hand-held, battery-powered portable lights would serve the underlying purpose of the rule with respect to transit between the main power block and the separate buildings identified above, in that the use of such hand-held lights would provide adequate illumination to permit access to and egress from buildings containing safe shutdown equipment and components, yet would not significantly hinder the transportation of equipment if such is necessary during a plant emergency. In addition, such hand-held lights would be available for use during an 8-hour period contemplated by the regulation.

On the basis of its evaluation, the staff concludes that with the availability of hand-held battery-powered portable lights for use during transit between site structures described above, the installation of emergency lighting units with at least an 8-hour battery power supply for these transit routes is not necessary to achieve the underlying purpose of Section III.J of Appendix R to 10 CFR part 50. The licensee's request for an exemption from the requirements of Section III.J to 10 CFR part 50 to allow the use of alternative means of lighting for access and egress routes between the main power block and the diesel generator building, 13.8 kV switchgear building, service water and fire pump house, fuel oil pump house, gas turbine building, and warehouse 3 is acceptable to the staff.

IV

Accordingly, the Commission has determined, pursuant to 10 CFR 50.12, that this exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. The Commission further determines that special circumstances as provided in 10 CFR 50.12(a)(2)(ii) are

THE PAPER AND INK USED IN THE ORIGINAL PUBLICATION MAY AFFECT THE QUALITY OF THE MICROFORM EDITION.

present in that application of the regulation in these particular circumstances is not necessary to achieve the underlying purpose of the rule.

Therefore, the Commission hereby grants the Wisconsin Electric Power Company an exemption from the requirements of 10 CFR part 50, Appendix R, Section III.J, with respect to access and egress routes between the main power block and the diesel generator building, 13.8 kV switchgear building, service water and fire pump house, fuel oil pump house, gas turbine building, and warehouse 3 at Point Beach Nuclear Plant, Units 1 and 2, to the extent alternative means of lighting as described herein are available.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will not have a significant effect on the quality of the human environment (62 FR 46381).

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 7th day of April 1998.

For The Nuclear Regulatory Commission.

Samuel J. Collins,

Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–317 and 50–318]

Baltimore Gas and Electric Company; Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2 Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating Licenses Nos. DPR–53 and DPR–69, issued to Baltimore Gas and Electric Company (the licensee), for operation of the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, located in Calvert County, Maryland.

Environmental Assessment

Identification of the Proposed Action

The proposed action would revise the Technical Specifications (TSs) to reduce the minimum Reactor Coolant System (RCS) total flow rate from 370,000 gpm to 340,000 gpm; reduce the Reactor Protective Instrumentation trip setpoint for Reactor Coolant Flow—Low from greater than or equal to 95% to greater than or equal to 92% of design reactor coolant flow; adjust the reactor core thermal margin safety limit lines to reflect the reduced RCS flow rate; and reduce the lift setting range for the eight Main Steam Safety Valves (MSSVs) with the highest allowable lift setting from the current range of 935 to 1065 psig to a more restrictive range of 935 to 1050 psig. In addition to the changes to the TSs necessary to support an increased number of plugged steam generator tubes, reanalysis of the accident analyses affected by this change identified an Unreviewed Safety Question (USQ) associated with these changes. The USQ results from the determination that the Seized Rotor Event analysis involves an increased percentage of failed fuel cladding. Finally, four reanalyzed events Main Steamline Break (MSLB), Steam Generator Tube Rupture (SGTR) Loss of Coolant Flow, and Boron Dilution) require Nuclear Regulatory Commission approval due to changes to the methodology or assumptions used to analyze these events.

The proposed action is in accordance with the licensee's application for amendment dated January 31, 1997, as supplemented by letters dated February 13, February 28, March 25, April 16, August 16, and September 29, 1997, and January 22, March 17, April 8, and April 21, 1998.

The Need for the Proposed Action

During the 1998 Unit 1 refueling outage, Baltimore Gas and Electric Company (BGE) will perform extensive steam generator tube inspections. Tubes that experience excessive degradation reduce the integrity of the primary-to-secondary pressure boundary. Eddy current examination is used to measure the extent of tube degradation. When the reduction in the tube wall thickness reaches the plugging or repair limit, as specified in the Technical Specifications, the tube is considered defective and a corrective action is taken.

Currently, the Calvert Cliffs TSs allow defective tubes to be plugged and removed from service, or to be repaired using welded sleeving techniques developed by Westinghouse Electric Corporation or Combustion Engineering, Inc. The most widely used tube maintenance technique at many pressurized water reactors, including Calvert Cliffs, is removal of the degraded tube from service by installing plugs at both ends of the tube. The installation of steam generator tube plugs removes the heat transfer surface of the plugged tube from service, and the increased flow resistance leads to a reduction in the primary coolant flow available for core cooling. The minimum primary coolant flow requirements in the TSs are based upon operation with no more than 800 plugged tubes in each steam generator. There is a possibility that the results of steam generator tube inspections in the upcoming refueling outage will necessitate exceeding the 800 plugged tube criteria in at least one of the Unit 1 steam generators. If this is the case, BGE will require implementation of the proposed TSs changes and approval of the USQ prior to Mode 2 entry following the 1998 Unit 1 refueling outage.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed action and concludes that the proposed action will not have a significant effect on the quality of the human environment. To the extent there is any environmental impact from increasing the number of plugged steam generator tubes, such impact results from the increased RCS temperature and the reduced RCS flow rate expected to result from this activity. Reanalysis of the Seized Rotor Event analyses has indicated a greater percentage of fuel pin failures would be expected during these postulated accidents due to the revised coolant temperature and flow rates; the increased number of plugged tubes results in an increase in offsite releases, relative to past analyses.

The licensee's results of the MSLB event reanalysis with reduced RCS flow indicate a reduction in the 0–2 hour thyroid dose at the Exclusion Area Boundary (EAB) from 81 rem to 5 rem, and a decrease in the 0–2 hour whole body dose at the EAB from 0.3 rem to 0.2 rem. The licensee's results of the Seized Rotor Event reanalysis indicate the resultant 0–2 hour EAB thyroid dose increases from 3.6 rem to 12 rem, whereas the whole body dose at the EAB is reduced from 0.4 rem to 0.2 rem. The licensee presented, for the first time, doses at the low population zone (LPZ) for the MSLB and the Seized Rotor Events. These doses were 1.2 rem thyroid and 0.04 rem whole body for the MSLB and 1.0 rem thyroid and 0.04 rem whole body for the Seized Rotor Event. The guideline dose limits for accidents involving fuel failure are the 10 CFR Part 100 limits of 300 rem to the thyroid and 25 rem to the whole body.

The licensee presented the results of an SGTR analysis. Two cases were presented. The first case was based upon primary coolant being at the 100 hour technical specification value for dose equivalent ^{131}I of 1 μCI/g and iodine spiking factor of 500. The

licensee calculated the thyroid and whole body doses at the EAB as 13 rem and 0.55 rem, respectively.

The LPZ doses, which were reported for the first time by the licensee, were calculated as 5 rem thyroid and 0.15 whole body. The second case, which was evaluated, assumed primary coolant was at the maximum instantaneous technical specification value of dose equivalent ^{131} I of 60μCi/g. The results of this case were presented for the first time. The licensee calculated the doses at the EAB as 22 rem thyroid and 0.66 rem whole body. The LPZ doses were calculated as 6 rem thyroid and 0.18 rem whole body.

Even though there is some increase in dose for the Seized Rotor Event, the actual total dose is a fraction of the limits of 10 CFR part 100, as noted above, and there is a low probability of these accidents. This change does not significantly affect the risk of any dominant accident scenario, and the effect on overall risk of an accident at Calvert Cliffs Nuclear Power Plant is insignificant. The change will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed action.

The staff has performed confirmatory calculations of the consequences of an MSLB, SGTR and Seized Rotor Events. The staff has confirmed that the consequences of these accidents will result in offsite doses which are a small fraction of the 10 CFR part 100 dose guidelines. In addition, the staff has determined that the proposed action will not result in an increase in normal radiological effluents from the Calvert Cliffs Nuclear Power Plant such that 10 CFR part 20 and Appendix I to 10 CFR part 50 will continue to be met.

With regard to potential nonradiological impacts, the proposed action does involve features located entirely within the restricted area as defined in 10 CFR part 20. It does not affect nonradiological plant effluents and has no other environmental impact. Accordingly, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

The principal alternative to approving the license amendment request needed to allow plugging up to 2500 tubes per steam generator would be to deny the request and retain the current coolant flow limitations. However, this alternative could reduce operational flexibility as it may prevent a Unit 1 start-up following the upcoming refueling outage, if the steam generator tube inspections necessitate plugging greater than 800 tubes in either of the unit's two steam generators. Furthermore, denial of the amendment would not significantly enhance the protection of the environment as the impacts of this alternative and the proposed action are similar.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statement for the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2 dated April 1973.

Agencies and Persons Consulted

In accordance with its stated policy, on May 5, 1998, the staff consulted with the Maryland State official, Richard I. McLean of the Maryland Department of Natural Resources, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

Based upon the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated January 31, 1997, as supplemented by letters dated February 13, February 28, March 25, April 16, August 16, and September 29, 1997, and January 22, March 17, April 8, and April 21, 1998, which are available for public inspection at the Commission's Public Document Room, The Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Calvert County Library, Prince Frederick, Maryland 20678.

Dated at Rockville, Maryland, this 12th day of May 1998.

For The Nuclear Regulatory Commission.

S. Singh Bajwa,

Director, Project Directorate I–1, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Year 2000 Readiness of Computer Systems at Nuclear Power Plants; Issue

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Issuance.

SUMMARY: The Nuclear Regulatory Commission (NRC) has issued Generic Letter (GL) 98–01 to all holders of operating licenses for nuclear power plants, except those who have permanently ceased operations and have certified that fuel has been permanently removed from the reactor vessel, to require the submittal of written responses that will give the NRC the necessary assurance that addressees are effectively addressing the year 2000 (Y2K) problem in computer systems at their respective facilities. Simply stated, the Y2K problem pertains to the potential for a system or an application to experience date-related problems, such as misreading "00" as the year 1900 rather than 2000. This generic letter requires the following information from addressees, under the provisions of Section 182a of the Atomic Energy Act of 1954, as amended, and 10 CFR 50.54(f): (1) Written confirmation that each addressee is implementing an effective plan to address the Y2K problem and provide for safe operation of their respective facilities prior to January 1, 2000, and (2) written certification that the facilities are Y2K ready with regard to compliance with the terms and conditions of the facility licenses and NRC regulations.

The generic letter is a "rule" for purposes of the Small Business Regulatory Enforcement Fairness Act (5 U.S.C., Chapter 8). The staff has received confirmation from the Office of Management and Budget that the generic letter is a non-major rule.

The generic letter is available in the NRC Public Document Room under accession number 9805050192.

DATES: The generic letter was issued on May 11, 1998.

ADDRESSEES: Not applicable.

FOR FURTHER INFORMATION CONTACT: Matthew Chiramal, at (301) 415–2845.

SUPPLEMENTARY INFORMATION: This generic letter only requires information from addressees under the provisions of Section 182a of the Atomic Energy Act of 1954, as amended, and 10 CFR 50.54(f). The generic letter does not constitute a backfit as defined in 10 CFR 50.109(a)(1) since it does not impose modifications of or additions to

structures, systems or components or to design or operation of an addressee's facility. It also does not impose an interpretation of the Commission's rules that is either new or different from a previous staff position. The staff, therefore, has not performed a backfit analysis.

Dated at Rockville, Maryland, this 11th day of May 1998.

For The Nuclear Regulatory Commission.

David B. Matthews,

Acting Director, Division of Reactor Program Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39985; File No. SR–NASD–98–28]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the National Association of Securities Dealers, Inc. Relating to Approval of Research Reports

May 12, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on April 27, 1998, the NASD Regulation, Inc. ("NASD Regulation") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by NASD Regulation. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

NASD Regulation is proposing to amend Rule 2210, "Communications with the Public," of the Conduct Rules of the National Association of Securities Dealers, Inc. ("NASD" or "Association"), to permit the approval of research reports by a supervisory analyst acceptable to the New York Stock Exchange ("NYSE;") under NYSE Rule 344, "Supervisory Analysts,"[2] to satisfy NASD requirements that research reports be approved by a registered principal. Below is the text of the proposed rule change. Proposed new language is in italics.

2200. Communications with Customers and the Public

2210. Communications with the Public

* * * * *

(b) Approval and Recordkeeping.

(1) Each item of advertising and sales literature shall be approved by signature or initial, prior to use or filing with the Association, by a registered principal of the member. *This requirement may be met, only with respect to corporate debt and equity securities that are the subject of research reports as that term is defined in Rule 472 of the New York Stock Exchange, by the signature or initial of a supervisory analyst approved pursuant to Rule 344 of the New York Stock Exchange.*

* * * * *

II. Self-Regulatory Organizations' Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NASD Regulation included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NASD Regulation has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

a. *Background.* Subparagraph (b)(1) to NASD Rule 2210 regarding Communications with the Public requires each item of advertising and sales literature to be approved by signature or initial of a registered principal of an NASD member prior to use or filing with NASD Regulation. The definition of "sales literature" in subparagraph (a)(2) to NASD Rule 2210 includes research reports.

Paragraph (b) to NYSE Rule 472, "Communications with the Public," requires that research reports be prepared or approved by a supervisory analyst acceptable to the NYSE under NYSE Rule 334. NYSE Rule 472, Supplementary Material .10 defines "research reports" as "* * * an analysis of individual companies, industries, market conditions, securities or other investment vehicles which provide information reasonably sufficient upon which to base an investment decision." In order to become a supervisory analyst under NYSE Rule 344, an applicant may present evidence of appropriate experience and either (i) pass an NYSE Supervisory Analysts Examination, or (ii) successfully complete a specified level of the Chartered Financial Analysts Examination prescribed by the NYSE and pass only that portion of the NYSE Supervisory Analysts Examination dealing with Exchange rules on research standards and related matters.[3]

A joint NASD/NYSE member raised the issue of whether the approval of research reports by a supervisory analyst approved by the NYSE under NYSE Rule 344 could satisfy the NASD requirement that each item of advertising and sales literature be approved by signature or initial of a registered principal prior to use or filing with NASD Regulation.

b. *Discussion.* The NYSE designation of "supervisory analyst" does not constitute a registration category for NASD principals. The NASD Regulation staff reviewed the content outline for the supervisory analyst examination. The particular categories of securities addressed in the "securities analysis" section of the outline are fixed income securities and equity securities. The NASD Regulation staff concluded that the coverage in the supervisory analysts examination of the NYSE communication rules is comparable to the communication materials covered in the NASD principal examination. Thus, NASD Regulation believes that with respect to the level of training and experience necessary for the review of research reports on debt and equity, the level of supervisory analyst registration is comparable to the level of NASD principal registration.

Given that the scope of approval authority is limited to research reports and that the material in the NYSE supervisory analyst examination and the NASD principal examination is comparable in this area, the NASD Regulation staff concluded that the investor protection goals intended by the NASD's current principal review requirement rule could be satisfied by NYSE requirements in this area.

The proposed rule change amends subparagraph (b)(1) to NASD Rule 2210 to state that the requirement that advertising and sales literature be approved by a registered principal of an NASD member firm may be met, with respect to corporate debt and equity securities that are the subject of research

---

[1] 15 U.S.C. 78s(b)(1).

[2] NYSE Rule 344 states that "Supervisory Analysts * * * shall be acceptable to, and approved by, the Exchange." NYSE Rule 344, Supplementary Material .10 sets forth qualifications to be considered by the Exchange.

[3] *See* NYSE Rule 344, Supplementary Material .10.

reports as that term is defined in NYSE Rule 472, by the signature or initial of a supervisory analyst approved pursuant to NYSE Rule 344. Any other material requiring supervisory approval would continue to require approval by an NASD registered principal.

2. Statutory Basis

NASD believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6)[4] of the Act, which require that the rules of the Association be designed to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, in that the proposed rule change, by permitting approval of research reports by a supervisory analyst to satisfy NASD principal approval requirements of such reports according to standards comparable to the NASD requirements, preserves the investor protection goals of the NASD rules and eliminates duplicative regulatory requirements.

B. Self-Regulatory Organization's Statement on Burden on Competition

NASD Regulation does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

NASD Regulation has neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate, up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file a copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to File No. SR–NASD–98–28 and should be submitted by June 9, 1998.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[5]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39981; File No. SR–NYSE–98–11]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the New York Stock Exchange, Inc. To Amend Rule 97, "Limitation on Members' Trading Because of Block Positioning," To Except Transactions That Facilitate Certain Customer Stock Transactions, and To Except Certain Transactions Made To Rebalance an Index Portfolio

May 11, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on March 30, 1998, the New York Stock Exchange, Inc. ("Exchange" or "NYSE") filed with the Securities and Exchange Commission ("Commission") the proposed rule changes as described in Item I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would amend Exchange Rule 97, "Limitation on Members' Trading Because of Block Positioning," to except transactions that facilitate certain customer transactions in: (i) basket of stock; (ii) blocks of stock; (iii) specific stocks within a basket of stocks; and (iv) index component stocks. The proposal would also would except certain transactions made to rebalance an index portfolio.

The following is the text of Exchange Rule 97 marked to reflect the proposed rule change. Additions to the current text appear in italics while deletions appear in brackets.

Limitation on Members' Trading Because of Block Positioning

Rule 97 (a) When a member organization holds any part of a long position in a stock in its trading account resulting from a block transaction it effected with a customer, such member organization may not effect the following transactions for any account in which it has a direct or indirect interest for the remainder of the trading day on which it acquired such position:

(i) a purchase on a "plus" tick if such purchase would result in a new daily high;

(ii) a purchase on a "plus" tick within one-half hour of the close;

(iii) a purchase on a "plus" tick at a price higher than the lowest price at which any block was acquired in a previous transaction on that day; or

(iv) a purchase on a "zero plus" tick of more than 50% of the stock offered at a price higher than the lowest price at which any block was acquired in a previous transaction on that day.

For purposes of the restrictions in subparagraph (iii) and (iv) above, in the case where more than one block was acquired during the day, the lowest price of any such block will be the governing price.

(b) The provisions of paragraph (a) shall not apply to transactions made:

(1) For bona fide arbitrage or to engage in the purchase and sale, or sale and purchase of securities of companies involved in publicly announced merger, acquisition, consolidation, tender, etc.;

(2) To offset a transaction made in error;

(3) To facilitate the conversion of options;

(4) By specialists in the stocks in which they are registered; [or]

(5) To facilitate the sale of a block of stock *or a basket of stocks* by a customer[.];

(6) To facilitate an existing customer's order for the purchase of a block of stock, or a specific stock within a basket of stocks, or a stock which is being added to or reweighed in an index, at or after the close of trading on the Exchange, provided that the facilitating transactions are recorded as such and the transactions in the aggregate do not exceed the number of shares required to facilitate the customer's order for such stock; or

(7) Due to a stock's addition to an index or an increase in a stock's weight in an index, provided that the transactions in the aggregate do not exceed the number of shares required to rebalance the index portfolio.

Supplementary Material

.10 Definitions. A block positioner is a member organization which engages, either regularly or on an intermittent basis, in a course of business of acquiring positions to facilitate the handling of customers; order's on the Floor of the Exchange. For the purposes of this Rule, a block shall mean a quantity of stock having a market value of $500,000 or more which is acquired by a number organization on its own behalf and/or others from one or more buyers or sellers in a single transaction.

For purposes of this Rule, a "basket of stocks" shall mean a group of 15 or more stocks having a total market value of $1 million or more.

For purposes of this Rule, an "index" shall mean a publicly disseminated statistical composite measure based on the price of market value of the component stocks in a group of stocks.

.20–.50 No change.

II. Self-Regulatory Organizations'; Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.

In its filing with the Commission, the Exchange included statements concerning the purposes of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Exchange Rule 97 currently prohibits a member organization that holds any part of a long stock position in its trading account, which position resulted from a block transaction it effected with a customer, from purchasing for an account in which it (*i.e.*, the block positioning member organization) has a direct or indirect interest, additional shares of each stock on a "plus" or "zero plus" tick under certain conditions for the remainder of the trading day on which the member organization acquired the long position. Under Exchange Rule 97, the term "block" is defined as a quantity of stock having a market value of $500,000 or more that was acquired in a single transaction.

The restrictions in Exchange Rule 97 presently do not apply to transactions that: (i) involve bona fide arbitrage or the purchase and sale (or sale and purchase) of securities of companies involved in a publicly announced merger, acquisition, consolidation or tender offer; (ii) offset transaction made in error; (iii) facilitate the conversion of options; (iv) are engaged in by specialists in their specialty stocks; or (v) facilitate the sale of a block of stock by a customer.

Exchange Rule 97 was adopted to address concerns that a member organization might engage in manipulative practices by attempting to "mark-up" the price of a stock to enable the position acquired in the course of block positioning to be liquidated at a profit, or to maintain the market at the price at which the position was acquired. The "tick" restrictions of Exchange Rule 97 are designed to address these specific concerns. The current exceptions under Exchange Rule 97 permit certain types of purchases that are effected for a permitted purpose, but do not include transactions solely effected to increase the block positioner's position.

The Exchange seeks to amend Exchange Rule 97 to provide certain additional exceptions. The proposed additional exceptions would apply to purchases by the block positioning member organization that increase a position in order to: (i) facilitate the sale of a basket of stocks by a customer; and (ii) facilitate an existing customer's order for the purchase of a block of stock, a specific stock within a basket of stocks, or a stock being added to or reweighted in an index, at or after the close of trading on the Exchange. The proposal requires that these facilitating transactions be recorded as such and the transactions in the aggregate may not exceed the number of shares required to facilitate the customer's order for such stock. Finally, the proposal would add an exception for transactions made due to a stock's addition to an index or an increase in a stock's weight in an index provided that the transactions in the aggregate do not exceed the number of shares required to rebalance the index portfolio.

With respect to revised paragraph (b)(5), the proposal would extend the exception, which currently applies to a subsequent facilitation trade of block size ,to a facilitation trade of less than block size provided that the stock was part of a "basket" of stocks being sold by a customer. Proposed Supplementary Material .10, "Definitions," defines the term "basket" as a group of 15 or more stocks having a market value of one million dollars or more.

As to proposed paragraph (b)(6), the proposal would permit a block positioner to purchase stock to increase its position up to the amount required to facilitate a customer's purchase at the close or after-hours of a block of stock, a specific stock within a basket of stocks, or a stock being added to or reweighted in an index, provided the firm has an existing customer's order for the at-the-close or after-hours purchase. This provision will permit a member organization to position stock to effect a cross with a customer at or after the close. The proprietary purchase would be required to be recorded in a manner which identifies them as transactions entered into for the purpose of facilitating the customer buy transaction. Also, the transactions in the aggregate could not exceed the number of shares required to facilitate the customer's order.

The block positioner's purchases exempted under proposed paragraph (b)(6) would, however, remain subject to the limitations on positioning to facilitate customer orders as discussed in Exchange Information Memorandum No. 95–28, "Positioning to Facilitate Customer Orders."[2] These limitations generally preclude a block positioner, that has committed to sell securities after the close to a customer at the closing price, from being in the market on a proprietary basis after 3:40 p.m. when it has left a portion of its positioning to be executed at the close, and such at-the-close proprietary order can be reasonably expected to impact the closing price.

Finally, with regard to proposed paragraph (b)(7), the proposal would allow a block positioner to increase its proprietary portion in a stock where such stock is being added to an index or its weight in an index is being increased. However, purchases in the

[2] *See* Securities Exchange Act Release No. 35837 (June 12, 1995), 60 FR 31749 (June 16, 1995).

aggregate may not exceed the number of shares required to rebalance an index portfolio.

The Exchange believes the proposed exceptions in paragraphs (b)(5) and (b)(6) to facilitate certain customer transactions are appropriate because these types of transactions are effected to accommodate a customer. The Exchange further believes the proposed exception in paragraph (b)(7) for additions to, or increased weigh in, an index is appropriate because such purchases are usually made at the close of trading to obtain the closing price of the index and therefore are indifferent to the price level so long as it represents the closing valuation.

The proposal also would expand the Rule's Supplementary Material, Section .10, "Definitions," to provide definitions for the terms "basket" and "index," which terms are used in proposed paragraphs (b)(5), (b)(6), and (b)(7). The term "basket" would be defined as a group of 15 or more stocks having a total market value of $1 million or more. The Exchange has represented that this definition is consistent with the use of "basket" in the definition of program trading that appears in Exchange Rule 80A. The proposal would define "index" as a publicly disseminated statistical composite measure based on the price or market value of the component stocks in a group of stocks. The Exchange believes this definition would preclude the possibility of a firm creating an "index" for the purpose of circumventing the restrictions of the Rule.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with Section 6(b)(5) of the Act [3] in that it is designed to facilitate transactions in securities, and remove impediment to and perfect the mechanism of a free and open market. The Exchange believes the proposed rule change would permit trading by member organizations, when appropriate, to facilitate customer trading, and would thereby add depth, liquidity, and quality to the market for Exchange-traded securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

[3] 15 U.S.C. 78f(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the Exchange consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street N.W., Washington D.C. 20549. Copies of the submissions, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room in 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–NYSE–98–11 and should be submitted by June 9, 1998.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[4]

Margaret H. McFarland,

Deputy Secretary.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Application of Servant Air, Inc. for New Certificate Authority

AGENCY: Department of Transportation.

ACTION: Notice of order to show cause (Order 98–5–21) Docket OST–97–3022.

SUMMARY: The Department of Transportation is directing all interested persons to show cause why it should not issue an order (1) finding Servant Air, Inc., fit, willing, and able, and (2) awarding it a certificate of public convenience and necessity to engage in interstate scheduled air transportation of persons, property, and mail, using aircraft with no more than nine passenger seats.

DATES: Persons wishing to file objections should do so no later than June 2, 1998.

ADDRESSES: Objections and answers to objections should be filed in Docket OST–97–3022 and addressed to the Department of Transportation Dockets SVC–124.1, Room PL–401), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590 and should be served upon the parties listed in Attachment A to the order.

FOR FURTHER INFORMATION CONTACT: Mrs. Kathy Lusby Cooperstein, Air Carrier Fitness Division (X–56, Room 6401), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366–2337.

Dated: May 13, 1998.

Charles A. Hunnicutt,

Assistant Secretary for Aviation and International Affairs.

BILLING CODE 4910–62–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

FAA Approval of Noise Compatibility Program and Determination on Revised Noise Exposure Maps

AGENCY: Federal Aviation Administration.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on a new noise compatibility program for Charlotte/Douglas International Airport submitted by the City of Charlotte, North Carolina, under the provisions of Title I of the Aviation Safety and Noise Abatement act of 1979

(Pub. L. 96–193) (hereinafter referred to as "the Act") and 14 CFR Part 150. These findings are made in recognition of the description of Federal and nonfederal responsibilities in Senate Report No. 96–52 (1980). On September 30, 1997, the FAA determined that the noise exposure maps, submitted by the City of Charlotte under 14 CFR Part 150 were in compliance with applicable requirements. On March 30, 1998, the Administrator approved the new noise compatibility program for Charlotte/Douglas International Airport. This new study revised and updated the existing noise compatibility program that was approved by the FAA on May 18, 1990. The City of Charlotte has also requested under Part 150, Section 150.35(f), that FAA determine that revised noise exposure maps submitted with the noise compatibility program and showing noise contours as a result of the implementation of the noise compatibility program are in compliance with applicable requirements of FAR Part 150. The FAA announces its determination that the revised noise exposure maps for Charlotte/Douglas International Airport for the years submitted with the noise compatibility program are in compliance with applicable requirements of FAR Part 150 effective April 28, 1998.

EFFECTIVE DATE: The effective date of the FAA's approval of the new noise compatibility program for Charlotte/Douglas International Airport is March 30, 1998. The effective date of the FAA's determination on the revised noise exposure maps is April 28, 1998.

FOR FURTHER INFORMATION CONTACT: Thomas M. Roberts; Atlanta Airports District Office; Federal Aviation Administration; Campus Building; 1701 Columbia Avenue, Suite 2–260; College Park, Georgia 30337–2747, Telephone 404/305–7153. Documents reflecting this FAA action may be reviewed at this same location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to a new noise compatibility program for Charlotte/Douglas International Airport, effective March 30, 1998. This new study revises and updates an existing noise compatibility program approved by the FAA on May 18, 1990. Under Section 104(a) of the Act an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) Part 150 is a local, not a federal, program. The FAA does not substitute its judgement for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of the Part 150 program recommendations is measured according to the standards expressed in Part 150 and the Act and is limited to the following determinations:

1. The noise compatibility program was developed in accordance with the provisions and procedures of FAR Part 150.

2. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

3. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical users, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

4. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of the airport noise compatibility program are delineated in FAR Part 150, Section 150.5. Approval is not a determination concerning the acceptability of land uses under federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environment assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where federal funding is sought, requests for project grants must be submitted to the FAA Atlanta Airports District Office in Atlanta, Georgia.

The City of Charlotte, North Carolina, submitted to the FAA on August 26, 1997, the noise exposure maps, descriptions, and other documentation produced during the noise compatibility study. The Charlotte/Douglas International Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on September 30, 1997. Notice of this determination was published in the **Federal Register** on October 17, 1997.

The Charlotte/Douglas International Airport study contains a proposed noise compatibility program consisting in part of measures that were implemented under the approved 1990 noise compatibility program, as amended. These measures are recommended for continuation. New measures are recommended which may be initiated before or immediately upon approval of the program by the FAA. Additional measures are recommended to further abate noise or mitigate its effect on persons and noise-sensitive land uses. These measures are divided into Phase I and Phase II implementation programs. Phase I assumes no further runway development. Phase II assumes the construction of the proposed third parallel runway and the extension of runway 18R/36L. The proposed third parallel runway and the extension to runway 18R/36L are included in the Part 150 analysis because FAA guidelines require the inclusion of all development projects anticipated to occur within the next 5 years. The noise compatibility program measures are divided into noise abatement (air traffic), land use (preventive) and noise mitigation (corrective) actions. It was requested that the FAA evaluate and approve this material as a noise computability program as described in Section 104(b) of the Act. The FAA begin its review of the program on September 30, 1997, and was required by a provision of the Act to approve or disapprove such program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180 days shall be deemed to be an approval of such program.

Phase I of the submitted program contained seven noise abatement measures, which consist of two continuations, two deletions, and three additions to the approved 1990 noise compatibility program; nine land use measures, which consist of three

continuations, three deletions, and three additions to the approved 1990 noise compatibility program; and seven noise mitigation measures, which consist of four continuations, one completion, and two additions to the 1990 noise compatibility program. Phase II of the submitted program contained two new noise abatement measures and two new noise mitigation measures. The FAA completed its review and determined that the procedural and substantive requirements of the Act and Part 150 have been satisfied. The overall program, therefore, was approved by the Administrator, effective March 30, 1998.

Of the overall 21 specific measures requiring federal action, 19 were approved without exception. Two land use measures were partially approved subject to the recommendation related to the introduction of noncompatible residential development is not meeting Part 150 criteria. The approved measures included such items as: the continuation of periodic noise monitoring, provision for monthly reports on late night (11 p.m. to 7 a.m.) runway utilization, variance from noise compatibility program assumptions to the Tower and frequent nighttime users; designation of runways 18R and 18L as the preferred for takeoffs by turbojet and large four-engine prop aircraft between 11 p.m. and 7 a.m. when runway 23 or runway 5 cannot be used for reasons of wind, weather, operational necessity, or required runway length; designation of locations and procedures for engine runups; modification to current operating procedures for turbojet and large four-engine prop aircraft departing runways 36R and 36L to initiate turns at 2.5 and 2.6 DME north of the CLT VOR/DME respectively; continuation of the 1990 noise compatibility program land use planning which recommends amending local land use planning policies to reduce the development of noncompatible land uses within the airport environs; continuation of the 1990 noise compatibility program land use measure to rezone undeveloped property to airport compatible land use and limit the density of residential development permitted within noise contours; dedication of avigation easement as a condition of approval for the development of property located in the airport environs; pursuit of the establishment of an airport overlay district that corresponds to the airport environs; pursuit of an amendment of the state building code to authorize the City of Charlotte and Mecklenburg County to raise the minimum building standards (noise level reduction) for new residential construction in the airport overlay district; development of the full disclosure of property location within the airport environs for potential buyers; continuation of the public information program that is a part of the approval 1990 noise compatibility program; continuation of the sound insulation program for sensitive public buildings used for instruction (schools) and assembly (churches) within the 65 DNL contour; continuation of the sound insulation program of residential property within the 65 DNL contour; within the 70–75 DNL noise contour, offers of purchase assurance, sound insulation of residences, purchase of aviation easements or acquisition of noncompatibility property; acquisition of mobile homes located within the 70 DNL noise contour; exercise of the option to purchase avigation easement, sound insulate or acquire homes within the 65 DNL noise contours where sound insulation is infeasible or not cost effective; establishment of departure turn for third parallel runway 17; establishment of departure turn for the third parallel runway 35; insulation of eligible dwellings within the 2001 noise compatibility program/noise exposure map 65 DNL noise contour, and acquisition of mobile homes within the 65 DNL noise contour of the 2001 noise compatibility program/noise exposure map. These determinations are set forth in detail in the Record of Approval endorsed by the Administrator on March 30, 1998.00000

The FAA also has completed its review of the revised noise exposure maps and related descriptions submitted by the City of Charlotte. The specific maps under consideration are dated February 27, 1998, in the submission. The FAA has determined that these maps for the Charlotte/Douglas International Airport are in compliance with applicable requirements. This determination is effective April 28, 1998. FAA's determination on an airport operator's noise exposure maps is limited to a finding that the maps were developed in accordance with the procedures contained in Appendix A of FAR Part 150. Such determination does not constitute approval of the data, information or plans.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under Section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of Section 107 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies with which consultation is required under Section 103 of the Act. The FAA has relied on the certification by the airport operator, under Section 150.21 of FAR Part 150, that the statutorily required consultation has been accomplished.

Copies of the noise exposure maps and of the FAA's evaluation of the maps, and copies of the record of approval and other evaluation materials and documents which comprised the submittal to the FAA are available for examination at the following locations:

Federal Aviation Administration, Atlanta Airports District Office, Campus Building, 1701 Columbia Avenue, Suite 2–260, College Park, Georgia 30337–2747.

Mr. T.J. Orr, Aviation Director, Charlotte/Douglas International Airport, Charlotte, North Carolina.

Questions on either of these FAA determinations may be directed to the individual named above under the heading **FOR FURTHER INFORMATION CONTACT.**

Issued in Atlanta, Georgia on April 28, 1998.

Dell T. Jernigan,

Manager, Atlanta Airports District Office, ATL–ADO.

Federal Aviation Administration

[Summary Notice No. PE–98–9]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application,

processing, and disposition of petitions for exemptions (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before June 8, 1998.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rule Docket (AGC–200), Petition Docket No. _____, 800 Independence Avenue, SW., Washington, DC 20591.

Comments may also be sent electronically to the following internet address: 9–NPRM–CMTS@faa.dot.gov.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–200), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–3132.

FOR FURTHER INFORMATION CONTACT: Tawana Matthews (202) 267–9783 or Terry Stubblefield (202) 267–7624, Office of Rulemaking (ARM–1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, DC, on May 13, 1998.

Donald P. Byrne,

Assistant Chief Counsel for Regulations.

Petitions for Exemption

Docket No.: 29168.
Petitioner: Continental Airlines, Inc.
Sections of the FAR Affected: 14 CFR 121.417(c)(2)(i)(A).
Description of Relief Sought: To permit Continental and Continental Micronesia to use video-based differences training in lieu of physical hands-on training to accomplish the training and qualification of crewmembers on the automatic Type III emergency overwing exits installed on Boeing 737–600, –700, and –800 airplanes, when the crewmembers previously have been trained and qualified on Type III emergency overwing exits installed on other versions of Boeing 737 aircraft.

Docket No.: 29166.
Petitioner: Roger Aviation Company.
Sections of the FAR Affected: 14 CFR 142.15(d).
Description of Relief Sought: To permit Roger Aviation Company to conduct simulator training under part 142 with a Frasca 242 flight training device (FTD) without that FTD meeting the requirements of an advanced FTD as defined in § 142.3.

Dispositions of Petitions

Docket No.: 27307.
Petitioner: Comair Airlines, Inc.
Sections of the FAR Affected: 14 CFR 121.433(c)(1)(iii), 121.441(a)(1) and (b)(1) and appendix F to part 121.
Description of Relief Sought/ Disposition: To permit Comair to combine recurrent flight and ground training and proficiency checks for its pilots in a single annual training and proficiency evaluation program.
Grant, April 30, 1998, Exemption No. 5734C.

Docket No.: 29173.
Petitioner: Captain Joe R. McCabe.
Sections of the FAR Affected: 14 CFR 121.383(c).
Description of Relief Sought/ Disposition: To permit the petitioner to act as a pilot in operations conducted under part 121 after reaching his 60th birthday.
Denial, April 20, 1998, Exemption No. 6757.

Docket No.: 28174.
Petitioner: Air Carriage.
Sections of the FAR Affected: 14 CFR 135.143(c)(2).
Description of Relief Sought/ Disposition: To permit the petitioner to operate certain aircraft under the provisions of part 135 without a TSO–C112 (Mode S) transponder installed on those aircraft.
Grant, April 20, 1998, Exemption No. 6108A.

Docket No.: 28597.
Petitioner: U.S. Helicopters, Inc.
Sections of the FAR Affected: 14 CFR 135.143(c)(2).
Description of Relief Sought/ Disposition: To permit U.S. Helicopters to operate certain aircraft under the provisions of part 135 without a TSO–C112 (Mode S) transponder installed on those aircraft. In addition, in your letter, you include a revised list of aircraft to be covered by the extension.
Grant, April 20, 1998, Exemption No. 6452A.

Docket No.: 29167.
Petitioner: Captain David F. Specht.
Sections of the FAR Affected: 14 CFR 121.383(c).
Description of Relief Sought/ Disposition: To permit the petitioner to act as a pilot in operations conducted under part 121 after reaching his 60th birthday.
Denial, April 20, 1998, Exemption No. 6755.

Docket No.: 29171.
Petitioner: Mr. Thomas Bentley.
Sections of the FAR Affected: 14 CFR 121.383(c).
Description of Relief Sought/ Disposition: To permit the petitioner to act as a pilot in operations conducted under part 121 after reaching your 60th birthday.
Denial, April 20, 1998, Exemption No. 6756.

Docket No.: 25550.
Petitioner: Department of the Army.
Sections of the FAR Affected: 14 CFR 91.169(a)(2) and (c).
Description of Relief Sought/ Disposition: To permit the U.S. Army to file instrument flight rules flight plans in accordance with the regulations prescribed by the U.S. Army.
Grant, April 30, 1998, Exemption No. 6528A.

Docket No.: 27785.
Petitioner: Chevron U.S.A., Inc.
Sections of the FAR Affected: 14 CFR 135.143(c)(2).
Description of Relief Sought/ Disposition: To permit Chevron to operate without a TSO–C112 (Mode S) transponder installed on its aircraft operating under the provisions of part 135.
Grant, April 30, 1998, Exemption No. 5948B.

Docket No.: 28206.
Petitioner: Silver Moon Aviation.
Sections of the FAR Affected: 14 CFR 135.143(c)(2).
Description of Relief Sought/ Disposition: To permit the petitioner to operate certain aircraft without a TSO–C112 (Mode S) transponder installed.
Grant, April 30, 1998, Exemption No. 6122A.

Docket No.: 28307.
Petitioner: Bombardier Business Aircraft.
Sections of the FAR Affected: 14 CFR 135.337(a)(2), and (3), and (b)(2); and 135.339(b) and (c) and appendix H to part 121.
Description of Relief Sought/ Disposition: To permit certain instructors employed by Bombardier and listed in a part 135 certificate holder's approved training program to act as simulator instructors for that

certificate holder under part 135 without having received ground and flight training in accordance with that certificate holder's training program approved under subpart H of part 135. That exemption also permits simulator instructors employed by Bombardier and listed in a certificate holder's approved training program to serve in advanced simulators without being employed by the certificate holder for 1 year, provided the instructors receive applicable training in accordance with the provisions of this exemption.

Grant, April 30, 1998, Exemption No. 6446A.

Docket No.: 29176.

Petitioner: Col. Marcus F. Cooper, Jr.

Sections of the FAR Affected: 14 CFR 121.383(c).

Description of Relief Sought/ Disposition: To permit the petitioner to act as a pilot in operations conducted under part 121 after reaching his 60th birthday.

Denial, April 30, 1998, Exemption No. 6759.

Docket No.: 28499.

Petitioner: Sky Helicopters, Inc.

Sections of the FAR Affected: 14 CFR 135.143(c)(2).

Description of Relief Sought/ Disposition: To permit Sky Helicopters to operate certain aircraft under the provisions of part 135 without a TSO–C112 (Mode S) transponder installed on those aircraft

Grant, April 30, 1998, Exemption No. 6430A.

Docket No.: 26017.

Petitioner: ERA Aviation, Inc.

Sections of the FAR Affected: 14 CFR 43.3(a) and 135.443(b)(3).

Description of Relief Sought/ Disposition: To permit ERA to allow appropriately trained and certificated pilots employer by ERA to install and remove an approved emergency rescue hoist on its Aerospatiale AS332 Super Puma helicopters.

Disposition, Date, Exemption No. 6760.

Docket No.:

Petitioner:

Sections of the FAR Affected: 14 CFR.

Description of Relief Sought/ Disposition: To permit.

Disposition, Date, Exemption No.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Rule on Application 98–01–C–00–MHK To Impose and Use the Revenue From a Passenger Facility Charge (PFC) at Manhattan Regional Airport, Manhattan, KS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Manhattan Regional Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

DATES: Comments must be received on or before June 18, 1998.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Federal Aviation Administration, Central Region, Airports Division, 601 E. 12th Street, Kansas City, MO 64106.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Ken Black, Airport Manager, Manhattan Regional Airport, at the following address: City of Manhattan, Kansas, Manhattan Regional Airport, 5500 Fort Riley Blvd., Suite 120, Manhattan Kansas 66502–9721.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the City of Manhattan, Manhattan Regional Airport. under section 158.23 of Part 158.

FOR FURTHER INFORMATION CONTACT: Lorna Sandridge, PFC Program Manager, FAA, Central Region, 601 E. 12th Street, Kansas City, MO 64106, (816) 426–4730. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invite public comment on the application to impose and use the revenue from a PFC at the Manhattan Regional Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

On May 1, 1998, the FAA determined that the application to impose and use the revenue from a PFC submitted by the City of Manhattan, Kansas, was substantially complete within the requirements of section 158.25 of Part 158. The FAA will approve or disapprove the application, in whole or in part, no later than July 31, 1998.

The following is a brief overview of the application.

Level of the proposed PFC: $3.00.

Proposed charge effective date: June, 1998.

Proposed charge expiration date: January, 2004.

Total estimated PFC revenue: $401,978.

Brief description of proposed project(s): Construction of Access Road (Phase 1); Installation of Part 139 Signage; Construct Terminal Building; Terminal Building Site Development; Construct Service Road; Update the Airport Master Plan; Rehabilitate Apron.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT.**

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Manhattan Regional Airport. Issued in Kansas City, Missouri on May 1, 1998.

George A. Hendon,

Manager, Airports Division, Central Region.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Rule on Application To Impose and Use the Revenue From a Passenger Facility Charge (PFC) at Outagamie County Airport, Appleton, WI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Outagamie County Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

DATES: Comments must be received on or before June 18, 1998.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Minneapolis Airports District

Office, 6020 28th Avenue South, Room 102, Minneapolis, Minnesota 55450.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Debra Giuffre, Airport Manager of the Outagamie County Airport at the following address: W6390 Challenger Drive, Suite 201, Appleton, WI 54915.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the County of Outagamie under section 158.23 of Part 158.

FOR FURTHER INFORMATION CONTACT: Sandra E. DePottey, Program Manager, Minneapolis Airports District Office, 6020 28th Avenue South, Room 102, Minneapolis, MN 55450, 612 713–4363. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Outagamie County Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

On April 16, 1998 the FAA determined that the application to impose and use the revenue from a PFC submitted by County of Outagamie was substantially complete within the requirements of section 158.25 of Part 158. The FAA will approve or disapprove the application, in whole or in part, no later than July 18, 1998.

The following is a brief overview of the application.

PFC application number: 98–03–C–00–ATW.

Level of the proposed PFC: $3.00.

Proposed charge effective date: January 1, 1999.

Proposed charge expiration date: April 1, 2004.

Total estimated PFC revenue: $3,909,000,00.

Brief description of proposed projects: Electrical vault expansion, Emergency generator, Airport rescue and firefighting vehicle (ARFF), Access road construction, Runway end blast pads, Taxiway A reconstruction, Acquire snow removal equipment: rotary blower, front end loader with plow, truck with plow, truck with plow dump box and spreader, Construct taxiway J connector.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT.**

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Outagamie County Airport, W6390 Challenger Drive, Suite 201, Appleton, WI 54915.

Issued in Des Plaines, Illinois on May 12, 1998.

Benito De Leon,

Manager, Planning and Programming Branch, Airports Division, Great Lakes Region.

National Highway Traffic Safety Administration

[Docket No. NHTSA–98–3851]

Notice of Receipt of Petition for Decision that Nonconforming 1995 Mercedes-Benz C280 Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of receipt of petition for decision that nonconforming 1995 Mercedes-Benz C280 passenger cars are eligible for importation.

SUMMARY: This notice announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a decision that a 1995 Mercedes-Benz C280 that was not originally manufactured to comply with all applicable Federal motor vehicle safety standards is eligible for importation into the United States because (1) it is substantially similar to a vehicle that was originally manufactured for importation into and sale in the United States and that was certified by its manufacturer as complying with the safety standards, and (2) it is capable of being readily altered to conform to the standards.

DATES: The closing date for comments on the petition is June 18, 1998.

ADDRESSES: Comments should refer to the docket number and notice number, and be submitted to: Docket Management, Room PL–401, 400 Seventh St., SW, Washington, DC 20590. [Docket hours are from 10 am to 5 pm].

FOR FURTHER INFORMATION CONTACT: George Entwistle, Office of Vehicle Safety Compliance, NHTSA (202–366–5306).

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable Federal motor vehicle safety standards.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR Part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

Wallace Environmental Testing Laboratories, Inc. of Houston, Texas ("Wallace") (Registered Importer 90–005) has petitioned NHTSA to decide whether 1995 Mercedes-Benz C280 passenger cars are eligible for importation into the United States. The vehicle which Wallace believes is substantially similar is the 1995 Mercedes-Benz C280 that was manufactured for importation into, and sale in, the United States and certified by its manufacturer, Daimler Benz, A.G., as conforming to all applicable Federal motor vehicle safety standards.

The petitioner claims that it carefully compared the non-U.S. certified 1995 Mercedes-Benz C280 to its U.S. certified counterpart, and found the two vehicles to be substantially similar with respect to compliance with most Federal motor vehicle safety standards.

Wallace submitted information with its petition intended to demonstrate that the non-U.S. certified 1995 Mercedes-Benz C280, as originally manufactured, conforms to many Federal motor vehicle safety standards in the same manner as its U.S. certified counterpart, or is capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that the non-U.S. certified 1995 Mercedes-Benz C280 is identical to its U.S. certified counterpart with respect to compliance with Standards Nos. 102 *Transmission Shift Lever Sequence * * **, 103 *Defrosting and Defogging Systems*, 104 *Windshield Wiping and Washing Systems*, 105 *Hydraulic Brake Systems*, 106 *Brake Hoses*, 109

New Pneumatic Tires, 113 *Hood Latch Systems*, 116 *Brake Fluid*, 124 *Accelerator Control Systems*, 201 *Occupant Protection in Interior Impact*, 202 *Head Restraints*, 204 *Steering Control Rearward Displacement*, 205 *Glazing Materials*, 207 *Seating Systems*, 209 *Seat Belt Assemblies*, 210 *Seat Belt Assembly Anchorages*, 212 *Windshield Retention*, 216 *Roof Crush Resistance*, 219 *Windshield Zone Intrusion*, and 302 *Flammability of Interior Materials*.

Additionally, the petitioner states that the non-U.S. certified 1995 Mercedes-Benz C280 complies with the Bumper Standard found in 49 CFR Part 581.

Petitioner also contends that the vehicle is capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays:* (a) substitution of a lens marked "Brake" for a lens with an ECE symbol on the brake failure indicator lamp; (b) recalibration of the speedometer/odometer from kilometers to miles per hour or its replacement with one already so calibrated.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment:* (a) installation of U.S.-model headlights and turn signal lenses; (b) installation of U.S.-model taillight lenses and side markers; (c) installation of a high mounted stop lamp.

Standard No. 110 *Tire Selection and Rims:* installation of a tire information placard.

Standard No. 111 *Rearview Mirror:* inscription of the required warning statement on the passenger side rearview mirror.

Standard No. 114 *Theft Protection:* installation of a warning buzzer in the steering lock assembly. The petitioner states that the vehicle is already equipped with a warning buzzer microswitch.

Standard No. 118 *Power Window Systems:* rewiring of the power window system so that the window transport is inoperative when the ignition is switched off.

Standard No. 206 *Door Locks and Door Retention Components:* (a) replacement of the rear door lock buttons; (b) modification of the door lock assemblies so that the doors do not open when the locking mechanism is engaged and the door release handle is pulled.

Standard No. 208 *Occupant Crash Protection:* (a) installation of a safety belt warning system through replacement of the driver's seat belt latch and the addition of a seat belt warning buzzer; (b) replacement of the driver's and passenger's side air bags and knee bolsters with U.S.-model components on vehicles that are not already so equipped. The petitioner states that the vehicle is equipped with Type II at both front and rear outboard designated seating positions, and with a lap belt in the rear center designated seating position.

Standard No. 214 *Side Impact Protection:* installation of reinforcing beams.

Standard No. 301 *Fuel System Integrity:* installation of a rollover valve in the fuel tank vent line between the fuel tank and the evaporative emissions collection canister.

Additionally, the petitioner states that all vehicles will be inspected prior to importation to assure compliance with the Theft Prevention Standard found in 49 CFR Part 541.

The petitioner also states that a vehicle identification number plate must be affixed to the vehicle to meet the requirements of 49 CFR Part 565.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket number and be submitted to: Docket Management, Room PL–401, 400 Seventh St., SW, Washington, DC 20590. [Docket hours are from 10 am to 5 pm]. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A) and (b)(1); 49 CFR 593.8; delegations of authority at 49 CFR 1.50 and 501.8.

Issued: May 14, 1998.

Marilynne Jacobs,

Director, Office of Vehicle Safety Compliance.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable Federal motor vehicle safety standards.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then

publishes this decision in the **Federal Register**.

Wallace Environmental Testing Laboratories, Inc. of Houston, Texas ("Wallace") (Registered Importer 90–005) has petitioned NHTSA to decide whether 1997 Porsche Boxster passenger cars are eligible for importation into the United States. The vehicle which Wallace believes is substantially similar is the 1997 Porsche Boxster that was manufactured for importation into, and sale in, the United States and certified by its manufacturer, as conforming to all applicable Federal motor vehicle safety standards.

The petitioner claims that it carefully compared the non-U.S. certified 1997 Porsche Boxster to its U.S. certified counterpart, and found the two vehicles to be substantially similar with respect to compliance with most Federal motor vehicle safety standards.

Wallace submitted information with its petition intended to demonstrate that the non-U.S. certified 1997 Porsche Boxster, as originally manufactured, conforms to many Federal motor vehicle safety standards in the same manner as its U.S. certified counterpart, or is capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that the non-U.S. certified 1997 Porsche Boxster is identical to its U.S. certified counterpart with respect to compliance with Standards Nos. 102 *Transmission Shift Lever Sequence* * * *, 103 *Defrosting and Defogging Systems*, 104 *Windshield Wiping and Washing Systems*, 105 *Hydraulic Brake Systems*, 106 *Brake Hoses*, 109 *New Pneumatic Tires*, 113 *Hood Latch Systems*, 116 *Brake Fluid*, 124 *Accelerator Control Systems*, 201 *Occupant Protection in Interior Impact*, 202 *Head Restraints*, 204 *Steering Control Rearward Displacement*, 205 *Glazing Materials*, 206 *Door Locks and Door Retention Components*, 207 *Seating Systems*, 209 *Seat Belt Assemblies*, 210 *Seat Belt Assembly Anchorages*, 212 *Side Impact Protection*, 216 *Roof Crush Resistance*, 219 *Windshield Zone Intrusion*, and 302 *Flammability of Interior Materials*.

Petitioner also contends that the vehicle is capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays:* (a) Substitution of a lens marked "Brake" for a lens with an ECE symbol on the brake failure indicator lamp; (b) replacement of the speedometer/odometer with one calibrated in miles per hour.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment:* Installation of U.S.-model taillamp assemblies and front sidemarkers. The petitioner states that the vehicle is equipped with conforming headlights, turn signal lenses, and a high mounted stoplamp.

Standard No. 110 *Tire Selection and Rims:* Installation of a tire information placard.

Standard No. 111 *Rearview Mirror:* Inscription of the required warning statement on the passenger side rearview mirror.

Standard No. 114 *Theft Protection:* Installation of a warning buzzer in the steering lock assembly. The petitioner states that the vehicle is already equipped with a warning buzzer microswitch.

Standard No. 118 *Power Window Systems:* Rewiring of the power window system so that the window transport is inoperative when the ignition is switched off.

Standard No. 208 *Occupant Crash Protection:* (a) Installation of a safety belt warning system through replacement of the driver's seat belt latch and the addition of a seat belt warning buzzer; (b) replacement of the driver's and passenger's side air bags and knee bolsters with U.S.-model components on vehicles that are not already so equipped. The petitioner states that the vehicle is equipped with Type II seat belts at both front designated seating positions. The petitioner notes that the vehicle is a 2-seater.

Standard No. 301 *Fuel System Integrity:* Installation of a rollover valve in the fuel tank vent line between the fuel tank and the evaporative emissions collection canister.

Additionally, the petitioner states that bumper shocks and bumper pads must be added to the rear bumper of the non-U.S. certified 1997 Porsche Boxster for it to comply with the Bumper Standard found in 49 CFR part 581.

The petitioner also states that a vehicle identification number plate must be affixed to the vehicle to meet the requirements of 49 CFR part 565.

The petitioner finally states that all vehicles will be inspected prior to importation to assure compliance with the Theft Prevention Standard found in 49 CFR part 541.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket number and be submitted to: Docket Management, Room PL–401, 400 Seventh St., SW, Washington, DC 20590. [Docket hours are from 10 am to 5 pm]. It is requested but not required that 10 copies be submitted.

BILLING CODE: 4910–59–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–98–3848; Notice 1]

Beall Trailers of Washington, Inc.; Petition for Temporary Exemption From Federal Motor Vehicle Safety Standard No. 224

Beall Trailers of Washington, Inc., of Kent, Washington, ("Beall"), a wholly-owned subsidiary of Beall Corporation, has petitioned for a one-year temporary exemption from Motor Vehicle Safety Standard No. 224 *Rear Impact Protection*. The basis of the petition is that compliance would cause substantial economic hardship to a manufacturer that has tried in good faith to comply with the standard.

This notice of receipt of the petition is published in accordance with agency regulations on the subject and does not represent any judgment by the agency about the merits of the petition.

Beall manufacturers and sells dump body trailers. It produced a total of 311 trailers in 1997, of which 124 were dump body types. Standard No. 224 requires, effective January 26, 1998, that all trailers with a GVWR of 4536 Kg or more, including dump body types, be fitted with a rear impact guard that conforms to Standard No. 223 *Rear impact guards*. Beall states that "alterations may have to be made to the trailer chassis or even raising the dump box to provide space for the retractable guard," indicating that a guard that retracts when the dump body is in operation is the solution it is seeking in order to comply. According to Beall's application, the company has "placed significant resources (time and money)

towards the design of an acceptable guard. We have involved Montana State University professors from their Mechanical Engineering department. We have conducted Finite Element Analysis and traditional methods of design arriving at a plastically deforming guard that meets the standard, for nonasphalt carrying applications." The deforming guard does not retract, thus cannot be used on dump body trailers. It believes that its problem is similar to that experienced by other manufacturers manufacturing dump trailers. The company states that "devices used in other countries do not meet FMVSS 224." It continues to study "hinged/retractable devices" but must overcome lack of space for a retracted device. It will strive to develop a device that would comply with Federal requirements while an exemption is in effect.

If an exemption is not granted, substantial economic hardship will result. First, it would lose a trailer that accounts for 40 percent of its overall production. In addition, "some percentage of the remaining 60% would be lost since our customers typically purchase matching truck mounted dump bodies which may also be lost." It also believes that 31 of its 63 employees would have to be laid off if its application is denied. Maintenance of full employment would be in the public interest it argues. Beall's net income was $39,317 in 1996 and $72,213 in 1996. In the first 10 months of 1997, its net income before income taxes was $697,040. If the application is denied, it foresees a net loss of $71,445 for 1998.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket and notice number, and be submitted to: Docket Management, National Highway Traffic Safety Administration, room PL–401, 400 Seventh Street, SW, Washington, DC 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date below will be considered, and will be available for examination in the docket at the above address both before and after that date, between the hours of 10 a.m. and 5 p.m. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: June 8, 1998.

Authority: 49 U.S.C. 30113; delegations of authority at 49 CFR 1.50 and 501.4

Issued on: May 13, 1998.

BILLING CODE 4910–69–M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

Petition for Exemption From the Vehicle Theft Prevention Standard; Nissan

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Grant of petition for exemption.

SUMMARY: This notice grants in full the petition of Nissan North America, Inc., (Nissan) for an exemption of a high-theft line (whose nameplate is confidential) from the parts-marking requirements of the Federal Motor Vehicle Theft Prevention standard. This petition is granted because the agency has determined that the antitheft device to be placed on the line as standard equipment is likely to be as effective in reducing and deterring motor vehicle theft as compliance with the parts-marking requirements.

DATES: The exemption granted by this notice is effective beginning with the (confidential) model year.

FOR FURTHER INFORMATION CONTACT: Ms. Rosalind Proctor, Office of Planning and Consumer Programs, NHTSA, 400 Seventh Street, SW., Washington, DC 20590. Ms. Proctor's telephone number is (202) 366–0846. Her fax number is (202) 493–2739.

SUPPLEMENTARY INFORMATION: In a letter dated November 26, 1997, Nissan North America, Inc., (Nissan) requested exemption from the parts-marking requirements of the theft prevention standard for a motor vehicle line. The nameplate of the line and the model year of introduction are confidential. The letter requested an exemption from parts-marking pursuant to 49 CFR part 543, Exemption from Vehicle Theft Prevention Standard, based on the installation of an antitheft device as standard equipment for the entire line.

Nissan's submittal is considered a complete petition, as required by 49 CFR 543.7, in that it met the general requirements contained in § 543.5 and the specific content requirements of § 543.6. Nissan requested confidential treatment for the information submitted in support of its petition. In a letter to Nissan dated January 13, 1998, the agency granted the petitioner's request for confidential treatment of most aspects of its petition.

In its petition, Nissan provided a detailed description and diagram of the identity, design, and location of the components of the antitheft device for the new line. This antitheft device includes an engine-immoblizer system. The antitheft device is activated by turning the ignition switch to the "OFF" position using the proper ignition key.

In order to ensure the reliability and durability of the device, Nissan conducted tests based on its own specified standards. Nissan provided a detailed list of the tests conducted. Nissan stated its belief that the device is reliable and durable since the device complied with Nissan's specified requirements for each test.

Nissan compared the device proposed for its vehicle line with devices which NHTSA has determined to be as effective in reducing and deterring motor vehicle theft as would compliance with the parts-marking requirements. Nissan's proposed device, as well as other comparable devices that have received full exemptions from the parts-marking requirements, lack an audible or visible alarm. Therefore, these devices cannot perform one of the functions listed in 49 CFR 542.6(a)(3), that is, to call attention to unauthorized attempts to enter or move the vehicle. However, theft data have indicated a decline in theft rates for vehicle lines that have been equipped with antitheft devices similar to that which Nissan proposes. In these instances, the agency has concluded that the lack of a visual or audio alarm has not prevented these antitheft devices from being effective protection against theft.

On the basis of this comparison, Nissan has concluded that the antitheft device proposed for its vehicle line is no less effective than those devices in the lines for which NHTSA has already granted full exemptions from the parts-marking requirements.

Based on the evidence submitted by Nissan, the agency believes that the antitheft device for the Nissan vehicle line is likely to be as effective in reducing and deterring motor vehicle theft as compliance with the parts-marking requirements of the theft prevention standard (49 CFR part 541).

The agency believes that the device will provide four of the five types of performance listed in 49 CFR 543.6(a)(3): promoting activation; preventing defeat or circumvention of the device by unauthorized persons; preventing operation of the vehicle by

unauthorized entrants; and ensuring the reliability and durability of the device.

As required by 49 U.S.C. 33106 and 49 CFR 543.6(a)(4) and (5), the agency finds that Nissan has provided adequate reasons for its belief that the antitheft device will reduce and deter theft. This conclusion is based on the information Nissan provided about its antitheft device, much of which is confidential. This confidential information included a description of reliability and functional tests conducted by Nissan for the antitheft device and its components.

For the foregoing reasons, the agency hereby grants in full Nissan's petition for exemption for the vehicle line from the parts-marking requirements of 49 CFR part 541. The agency notes that 49 CFR part 541, appendix A–I identifies those lines that are exempted from the theft prevention standard for a given model year. Advance listing, including the release of future product nameplates, is necessary in order to notify law enforcement agencies of new models exempted from the parts-marking requirements of the Theft Prevention Standard. Therefore, since Nissan has been granted confidential treatment for the nameplate of its vehicle, the confidential status of the nameplate will be protected until, but no later than, June 1, prior to the model year of its introduction into the marketplace. At that time, Appendix A–I will be revised to reflect the nameplate of Nissan's exempted vehicle line.

If Nissan decides not to use the exemption or this line, it must formally notify the agency, and, thereafter, the line must be fully marked as required by 49 CFR 541.5 and 541.6 (marking of major component parts and replacement parts).

NHTSA notes that if Nissan wishes in the future to modify the device on which this exemption is based the company may have to submit a petition to modify the exemption. Section 543.7(d) states that a part 543 exemption applies only to vehicles that belong to a line exempted under this part and equipped with the antitheft device on which the line's exemption is based. Further, § 543.9(c)(2) provides for the submission of petitions "to modify an exemption to permit the use of an anthitheft device similar to but differing from the one specified in that exemption."

The agency wishes to minimize the administrative burden which § 543.9(c)(2) could place on exempted vehicle manufacturers and itself. The agency did not intend in drafting part 543 to require the submission of a modification petition for every change to the components or design of an antitheft device. The significance of many such changes could be de minimis. Therefore, NHTSA suggests that if the manufacturer contemplates making any changes the effects of which might be characterized as *de minimis*, it should consult the agency before preparing and submitting a petition to modify.

Authority: 49 U.S.C. 33106; delegation of authority at 49 CFR 1.50.

Issued on: May 12, 1998.

L. Robert Shelton,

Associate Administrator for Safety Performance Standards.

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration Office of Hazardous Materials Safety

Notice of Applications for Exemptions

AGENCY: Research and Special Programs Administration, Office of Hazardous Materials Safety, DOT.

ACTION: List of Applicants for Exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Safety has received the applications described herein. Each mode of transportation for which a particular exemption is requested is indicated by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo aircraft only, 5—Passenger-carrying aircraft.

DATES: Comments must be received on or before June 18, 1998.

ADDRESS COMMENTS TO: Dockets Unit, Research and Special Programs Administration, Room 8421, DHM–30, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the exemption application number.

FOR FURTHER INFORMATION CONTACT:

Copies of the applications (See Docket Number) are available for inspection at the New Docket Management Facility, PL–401, at the U.S. Department of Transportation, Nassif Building, 400 7th Street, SW, Washington, DC 20590.

This notice of receipt of applications for new exemptions is published in accordance with Part 107 of the Hazardous Materials Transportations Act (49 U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, DC, on May 14, 1998.

J. Suzanne Hedgepeth,

Director, Office of Hazardous Materials, Exemptions and Approvals.

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration, Office of Hazardous Materials Safety

Notice of Applications for Modification of Exemption

AGENCY: Research and Special Programs Administration, Office of Hazardous Materials Safety, DOT.

ACTION: List of Applications for Modification of Exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Safety has received the applications described herein. This notice is abbreviated to expedite docketing and public notice. Because the sections affected, modes of transportation, and the nature of application have been shown in earlier **Federal Register** publications, they are not repeated here. Requests for modifications of exemptions (e.g. to provide for additional hazardous materials, packaging design changes, additional mode of transportation, etc.) are described in footnotes to the application number. Application numbers with the suffix "M" denote a modification request. These applications have been separated from the new applications for exemptions to facilitate processing.

DATES: Comments must be received on or before June 3, 1998.

ADDRESS COMMENTS TO: Dockets Unit, Research and Special Programs Administration, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the exemption number.

FOR FURTHER INFORMATION: Copies of the applications are available for inspection in the Dockets Unit, Room 8426, Nassif Building, 400 7th Street SW, Washington, DC.

Application No.	Docket No.	Applicant	Modification of exemption
10672–M		Burlington Packaging, Inc., Brooklyn, NY (See Footnote 1)	10672
11352–M		PepsiCo, Inc., Arlington, TX (See Footnote 2)	11352
11396–M		Laidlaw Environmental Services Inc., Columbia, SC (See Footnote 3)	11396
11624–M		Laidlaw Environmental Services Inc., Columbia, SC (See Footnote 4)	11624
11686–M		Bridgeview, Inc., Morgantown, PA (See Footnote 5)	11686

Application No.	Docket No.	Applicant	Modification of exemption
12055–M	RPSA–1998–3731	M.D. Cryogenics, Inc., Pearland, TX (See Footnote 6)	12055

[1] To modify the exemption to provide for alternative absorbent material and plastic ringlock on specially-designed composite type packaging.
[2] To authorize party-status and additional classes of hazardous materials.
[3] To modify the exemption to provide for cargo vessel as an additional mode of transportation for use in transporting various Class 3 material.
[4] To modify the exemption to provide for cargo vessel as an additional mode of transportation for use in transporting various Class 3 material.
[5] To modify the exemption to provide for several modifications to existing plastic bags.
[6] To reissue the exemption originally issued on an emergency basis to authorize the transportation of portable tanks that are incorrectly marked and are involved in off-shore operations.

This notice of receipt of applications for modification of exemptions is published in accordance with Part 107 of the Hazardous Materials Transportations Act (49 U.S.C. 1806; 49 CFR 1.53 (e)).

Issued in Washington, DC, on May 13, 1998.

J. Suzanne Hedgepeth,

Director, Office of Hazardous Materials, Exemptions and Approvals.

Revocation of Marine Control Surveyors, Inc. Customs Gauger Approval

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of Revocation of Customs Gauger Approval.

SUMMARY: Marine Control Surveyors, Inc., of Groves, Texas, a Customs approved gauger, under Section 151.13 of the Customs Regulations (19 CFR 151.13), was found not operating in compliance with Customs laws and regulations. Specifically, Marine Control Surveyors, Inc. does not have a valid bond filed with Customs as required under Section 151.13(b)(8) of the Customs Regulations. Accordingly, pursuant to 151.13(k) of the Customs Regulations, notice is hereby given that the Customs commercial gauger approval of Marine Control Surveyors, Inc. has been revoked with prejudice.

EFFECTIVE DATE: April 30, 1998.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Parker, Science Officer, Laboratories and Scientific Services, U.S. Customs Service, 1300 Pennsylvania Ave., NW., Suite 5.5–B, Washington, DC 20229 at (202) 927–1060.

Dated: May 5, 1998.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Announcement Number 99004]

Human Immunodeficiency Virus (HIV) Prevention Projects and HIV Prevention Community Planning Guidance

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services.

ACTION: Request for comments.

SUMMARY: CDC is preparing to announce the availability of fiscal year 1999 funds to provide support for HIV prevention projects through State and local health departments. This program announcement will assist the Nation's disease prevention efforts by supporting HIV prevention activities and the community planning process to best target resources and activities. CDC invites comments from organizations and individuals on the draft of this announcement which is included. Based on comments received, the final announcement will be published later this year. Also included for comment is the HIV prevention community planning guidance document. This document will be included in the application kit for applicants for HIV prevention funding.

DATES: Submit written comments in response to this notice to: Jessica Gardom, Division of HIV/AIDS Prevention, National Center for HIV/STD/TB Prevention (NCHSTP), Centers for Disease Control and Prevention (CDC), Mailstop E–58, 1600 Clifton Road, NE., Atlanta, GA 30333.

Comments must be received on or before June 18, 1998.

SUPPLEMENTARY INFORMATION: The following is a complete text of the draft program announcement for HIV Prevention and HIV Prevention Community Planning Guidance.

Human Immunodeficiency Virus (HIV) Prevention Projects

Purpose

The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 1999 funds for cooperative agreement programs for Human Immunodeficiency Virus (HIV) Prevention. This program addresses the Healthy People 2000 priority area of HIV Infection. The purpose of this program is to assist public health departments (1) to reduce or prevent the transmission of HIV by reducing or preventing behaviors or practices that place persons at risk for HIV infection; and (2) to reduce associated morbidity and mortality of HIV-infected persons by increasing access to early medical intervention.

Eligible Applicants

Eligible applicants are health departments of States and their bona fide agents that currently receive CDC HIV prevention funds under Program Announcement 804. This includes the 50 States, six cities (Chicago, Houston, Los Angeles, New York, Philadelphia, and San Francisco), the District of Columbia, Puerto Rico, American Samoa, the Virgin Islands, the Federated States of Micronesia, Guam, the Northern Mariana Islands, the Republic of the Marshall Islands, and the Republic of Palau.

Availability of Funds

Approximately $250 million is expected to be available in FY 1999 to fund 65 awards. It is expected that the awards will range from approximately $60,000 to approximately $24,000,000. It is expected that the awards will begin on or about January 1, 1999. Awards will be funded for a 12-month budget period within a project period of 5 years.

Continuation awards within an approved project period will be made on the basis of satisfactory progress as evidenced by required reports and the availability of funds. Funding estimates may change. Should funds available for this program either increase or decrease significantly during the project period, funding may be awarded competitively.

A. Direct Assistance

You may request Federal personnel, equipment, or supplies as direct assistance, in lieu of a portion of financial assistance.

B. Use of Funds

Funds may not be used to supplant State or local health department funds available for HIV Prevention. Funds may not be used to provide direct medical care (e.g., ongoing medical management, medications, etc.). With documented opportunity for comment by the HIV Community Planning Groups (CPGs), funds awarded for HIV Prevention activities may be used to support HIV/AIDS Surveillance and HIV Sero epidemiology projects. CDC must approve the use of prevention funds for surveillance and the activities supported must directly improve and support HIV prevention activities or the community planning process. The CPG comments on the use of prevention funds may be addressed in the overall letter of concurrence submitted with the application. A separate letter(s) of concurrence must be submitted if the request to use prevention funds for these activities occurs at a later time.

C. Funding Preferences

In 1999, current levels of funding will be maintained for all project areas. Priority will be given to funding activities and interventions identified through the HIV Prevention Community Planning process.

Program Requirements

A comprehensive HIV prevention program includes the following components:

A. A participatory HIV prevention community planning process, in accordance with the guidelines and requirements in the HIV Prevention Community Planning Guidance;

B. Epidemiologic and behavioral HIV/AIDS surveillance, as well as collection of other health and demographic data relevant to HIV risks, incidence, or prevalence;

C. HIV prevention counseling, testing, referral, and partner notification (CTRPN), with strong linkages to medical care, treatment, and other needed services;

D. Health education and risk reduction (HE/RR) activities, including individual-, group-, and community-level interventions;

E. Increasing access to diagnosis and treatment of other STDs;

F. School-based efforts for youth;

G. Public information programs;

H. Quality assurance and training;

I. Laboratory support for HIV prevention;

J. HIV prevention capacity-building activities, including expansion of the public health infrastructure by contracting with non-governmental organizations, especially community-based organizations;

K. An HIV prevention technical assistance assessment and plan;

L. Evaluation of major program activities, interventions, and services.

All of these components except B, E, and F are funded under this announcement. In conducting activities to achieve the purpose of this program announcement, the recipient will be responsible for the activities under A and CDC will be responsible for conducting the activities under B.

A. Required Recipient Activities

1. HIV Prevention Community Planning

All recipients must:

• Develop a comprehensive HIV Prevention Plan for their jurisdictions

through a participatory process as described in the Guidance on HIV Prevention Community Planning (included in application kit).

• Justify discrepancies between the plan and the proposed program activities.

HIV prevention community planning is an ongoing, iterative planning process that is (1) evidence-based (i.e., based on HIV/AIDS and other epidemiologic data, including STD and behavioral surveillance data; qualitative data; ongoing program experience; program evaluation; and a comprehensive needs assessment process) and (2) incorporates the views and perspectives of the groups at risk for HIV infection, as well as providers of HIV prevention services. In HIV prevention community planning, recipients share responsibilities for developing a comprehensive prioritized HIV prevention plan with other State and local agencies, non-governmental organizations, and representatives of communities and groups at risk for HIV infection.

Persons at risk for HIV infection and persons with HIV infection should play a key role in identifying prevention needs not adequately met by existing programs and in planning culturally competent services. Priority setting accomplished through a participatory process will result in programs that are responsive to high priority, community-validated needs within defined populations. Refer to the Guidance on HIV Prevention Community Planning in the application kit.

2. Counseling, Testing, Referral, and Partner Notification (CTRPN)

a. General

All recipients must:

• Provide CTRPN services consistent with the current CDC HIV Counseling, Testing, and Referral Standards and Guidelines.

The major functions of CTRPN programs are to provide individuals a convenient opportunity to: (1) Learn their current HIV sero status; (2) participate in counseling to help initiate and maintain behavior change to avoid infection or, if already infected, to prevent transmission to others; (3) obtain referral to additional prevention, medical care, and other needed services; and (4) provide prevention services and referral for sex and needle-sharing partners of infected persons.

b. Counseling and Testing

All recipients must:

• Routinely offer, on a voluntary basis with informed consent, confidential client-centered HIV prevention counseling and HIV laboratory testing services.

• Provide, unless prohibited by law or regulation, anonymous opportunities for persons to receive client-centered HIV prevention counseling and HIV laboratory testing.

• Implement and maintain a written policy for contacting clients, especially those who are infected with HIV or at high risk of becoming infected, but have not returned to receive their HIV test results and post-test counseling.

• Develop, implement, and maintain a mechanism for assessing the proportion of tested clients who return to receive HIV test results and post-test counseling in both confidential and anonymous testing programs.

• When low return rates (e.g., less than 90% return for sero positives or less than 75% return for sero negatives) are identified, reasons for the low rate must be documented and steps must be taken to correct factors that are contributing to the low rates.

HIV prevention counseling must be client-centered; i.e., tailored to the behaviors, circumstances, and special needs of the person being served. Client-centered counseling is conducted in an interactive manner, responsive to individual client needs. The focus is on developing realistic prevention goals and strategies rather than simply providing information. HIV prevention counseling should be:

• Culturally competent;

• Sensitive to issues of sexual identity;

• Developmentally appropriate; and

• Linguistically specific.

Recipients are encouraged to give priority to providing services in areas with high rates of HIV sero prevalence or AIDS incidence and sites serving clientele known to have high rates of HIV infection or risk behavior.

The availability of anonymous services may encourage some persons at risk for HIV infection to seek services that they would otherwise be reluctant to access. Counseling for clients who test positive in anonymous testing sites should include information about the benefits of receiving follow-up services under a confidential system, information about how to enter such a system, and strong encouragement to access such services.

Some clients who are HIV infected or at high risk of infection may require prevention case management, which includes multiple counseling sessions. Recipients should provide additional prevention counseling to meet the needs of these clients. Funds awarded through the cooperative agreement can be used to support such ongoing counseling and prevention case management in coordination with patient care systems such as the Ryan White funded early intervention services.

If recipients opt to charge for services, they should do so on a sliding scale. No one should be denied services because of an inability to pay. Funds generated from charging clients should be used to support HIV prevention program activities and services.

For additional guidance on the implementation of these services, refer to the attachments.

c. Referral and Linkages With Other Service Providers

All recipients must:

• Develop, implement, and maintain a system to ensure clients who are HIV positive receive appropriate counseling, and are entered and maintained in an appropriate system of care, which includes prevention services.

• Develop, implement, and maintain a mechanism for assessing the proportion of HIV-seropositive persons referred for specific additional services who complete their referrals (i.e., are seen by and receive services from the persons or organizations to which they are referred).

Clients who are at increased risk for HIV infection and clients who are infected with HIV often need many services such as further HIV prevention counseling, evaluation of immune system function, early medical intervention for HIV infection, STD screening and treatment, substance abuse counseling and treatment, tuberculosis testing and treatment, and family planning. These services should be provided at the testing site, if possible.

All clients who are found to be HIV-infected at any CTRPN service site should receive:

• A CD4+ cell test, an initial viral load staging, or the current recommended test to determine stage of illness; and appropriate medical management;

• An assessment of medical eligibility, for treatment;

• Counseling about the benefits of early medical treatment opportunities, either on-site or through referral, to receive appropriate medical therapies including STD diagnosis and treatment and TB skin testing;

• Prevention case management;

• Referral for substance abuse treatment, if indicated;

• Referrals for all indicated services;

• Follow-up to ensure that referrals have been successfully accomplished.

If these services are not available at the HIV testing site, individuals must be referred to another service provider.

Information about services available through referral should be regularly updated so that counselors can refer clients for services currently available in the local area. A system that (1) links counseling and testing sites with other health, medical, and psychosocial service providers and (2) provides feedback to the health department on completion of referrals is an essential component of current HIV prevention program standards of care.

Funds provided through this cooperative agreement cannot be used to provide ongoing clinical and therapeutic care of HIV-infected persons. Support for such services should be obtained from other sources of funding, or the services should be obtained through referral to local providers.

d. Partner Notification

All recipients must:

• Establish standards, implement, and maintain procedures for confidential voluntary notification of sex and needle-sharing partners of HIV-infected persons, consistent with the CDC Partner Notification Guidance, to be published.

• Maintain their good faith effort to notify spouses of infected persons as required by law and as certified to CDC.

• Develop, implement, and maintain a mechanism to determine that notification and appropriate follow up of partners has been completed.

• Develop, implement, and maintain a system to assess the partner notification program and improve its function.

In a comprehensive HIV prevention program, partner notification is essential for ensuring that sex and needle-sharing partners of HIV-infected persons are notified about their risk and offered HIV prevention counseling, testing, and referrals. Partner notification is a primary prevention service with the following objectives:

(1) To confidentially inform partners of their possible exposure to HIV;

(2) To provide partners with client-centered prevention counseling that assists and supports them in their efforts to reduce their risks of acquiring HIV or, if infected, of transmitting HIV infection; and

(3) To minimize or delay disease progression by identifying HIV infected partners as early as possible in the course of their HIV infection and assisting them in obtaining appropriate preventive, medical, and other support services.

Partner notification programs should include the following components, ensuring that they are consistent with State and Federal laws:

(1) Client Referral: In client-referral, the HIV-infected person notifies his or her sex or needle-sharing partners of their exposure to HIV. Program staff will provide the client with counseling and support on techniques to confidentially notify and refer their sex or needle-sharing partners to client-centered HIV prevention counseling.

(2) Provider Referral: In provider referral, a health professional who has been specially trained to provide the service notifies the HIV-infected individual's sex or needle-sharing partners of their exposure to HIV. In situations where the HIV-infected person chooses provider referral, program staff will offer assistance in confidentially notifying those partners and offering them counseling, testing, and referral services.

(3) Spousal Notification: The Ryan White CARE Re-authorization Act of 1996, Pub. L. 104–146, Section 8(a), requires that States take administrative or legislative action to require a good faith effort be made to notify a spouse of a known HIV-infected patient that such a spouse may have been exposed to the human immunodeficiency virus and should seek testing. The statute defines a spouse as any individual who is the marriage partner, as defined by State law, of an HIV-infected person, or who has been the marriage partner of that person at any time within the 10-year period prior to the diagnosis of HIV infection. All HIV Prevention Cooperative Agreement recipients must comply with these requirements. Currently, all States and territories have certified to CDC that they will require a good faith effort as required by law.

The partner notification program should be evaluated periodically to do the following:

• Help identify barriers and gaps in service delivery, as well as define the HIV-infected population, so that services can be better directed towards target populations;

• Plan, refine, and target program intervention strategies;

• Analyze and refine resource allocation;

• Provide population-specific feedback to health departments, community-based organization staff, community planning groups, and other community prevention partners; and

• Identify technical assistance needs including training.

All individual data will be maintained at the State and local jurisdiction to assist in developing and monitoring local services. The jurisdiction must adhere to strict protection and confidentiality of client and partner records.

3. Health Education/Risk Reduction (HE/RR)

All recipients must:

• Implement an array of HE/RR activities, and provide resources to minority and other community-based organizations (CBOs) to implement HE/RR activities, in accordance with the priority target populations and interventions identified in their Comprehensive HIV Prevention Plan.

• Ensure interventions are culturally competent, developmentally appropriate, linguistically specific, and sensitive to sexual identity.

• Briefly report to CDC the rationale (e.g., scientific or programmatic basis) for each of the HE/RR interventions implemented.

HE/RR programs and services are efforts to reach persons at increased risk of becoming HIV-infected or, if already infected, of transmitting the virus to others, with the goal of reducing the risk of these events occurring. These programs should be directed to persons whose behaviors or personal circumstances place them at high risk. Examples of high risk groups include men who have or have had sex with men; persons who exchange sex for drugs, money, housing, or food; persons with a newly diagnosed STD; youth who are engaging or are likely to engage in high-risk behavior; women who are sex partners of persons who engage in high-risk behavior; persons in the correctional and criminal justice systems; or homeless persons in high-risk situations.

High priority interventions (as identified by the community planning group) at the individual, group, and community levels should have priority for support with funds awarded through this cooperative agreement. The following are brief descriptions of these programs:

a. Individual Level Interventions include a range of one-on-one client services. Individual prevention counseling assists clients in assessing their own behavior and planning individual behavior change, supports and sustains behavior change, and facilitates linkages to services that support behaviors and practices that prevent the transmission of HIV. Project areas are encouraged to provide, either onsite or through referral, additional prevention counseling, as appropriate to the needs of these clients.

Prevention case management is an individual level intervention directed at persons who need highly individualized support, including substantial

psychosocial, interpersonal skills training, and other support, to remain sero negative or to reduce the risk of HIV transmission to others. HIV prevention case management services are not intended to be substitutes for medical case management or extended social services.

Prevention case management services should complement ongoing HIV prevention services such as HIV antibody counseling, testing, referral, and partner notification and early medical intervention programs. Coordination with HIV counseling and testing clinics, STD clinics, TB testing sites, substance abuse treatment programs, and other health service agencies is essential to successfully recruiting or referring persons at high risk who are appropriate for this type of intervention. See the HIV Prevention Case Management Guidance, September 1997.

b. Group Level Interventions shift the delivery of service from the individual to groups of varying sizes. Group level interventions are intended for persons at increased risk of becoming infected or, if already infected, of transmitting the virus to others. They provide education and support in group settings to promote and reinforce safer behaviors and to provide interpersonal skills training in negotiating and sustaining appropriate behavior change. The content of the group session should be consistent with the format, i.e., groups can meet one time or on an on-going basis. One-time sessions can provide participants an opportunity to hear and learn from one another's experiences, role play with peers, and offer and receive support. Ongoing sessions may offer stronger social influence with potential for developing emergent norms that can support risk reduction. Multiple sessions may be needed for persons at high risk of HIV infection. A group level intervention can include more tailored individual level interventions with some of the group members.

c. Community Level Interventions are directed at changing community norms to increase community support of behaviors known to reduce the risk for HIV infection and transmission. While individual and group level interventions also may be taking place within the community, interventions that target the community are unique in their purpose and are likely to lead to different strategies than other types of interventions. Community level interventions aim to reduce risky behaviors by changing attitudes, norms, and practices through health communications, social (prevention) marketing, community mobilization and organization, and community-wide events.

The primary goals of these programs are to promote healthy behaviors, to change factors that affect the health of community residents, and ultimately, to improve health status. The community may be defined in terms of a neighborhood, region, or some other geographic area, but only as a mechanism to access the social networks that may be located within those boundaries. These networks may be changing and overlapping, but should represent some degree of shared communications, activities, and interests.

Community level interventions are designed to affect social norms or shared beliefs held by members of the community. Specific activities include, for example:

- Identifying and describing (through needs assessments and ongoing feedback from the community) structural, environmental, behavioral, and psycho social facilitators and barriers to risk reduction in order to develop plans to enhance facilitators and minimize or eliminate barriers;
- Persuading community members who are at risk of acquiring or transmitting HIV infection to accept and use HIV prevention measures; and
- Informing community members—regardless of their personal risk level—of their important role in HIV prevention in their communities.

d. Street and community outreach programs are one type delivery method for the interventions described above. They are defined by their locus of activity and by the content of their offerings. These programs reach persons at high risk, individually or in small groups, on the street or in community settings. The programs provide them with prevention messages, information materials, and other services, and assist them in obtaining other HIV prevention services such as HIV-antibody counseling and testing, HIV risk-reduction counseling, STD and TB treatment, substance abuse prevention and treatment, family planning services, tuberculin testing, and HIV medical intervention. Refer to Guidelines for Health Education and Risk Reduction Activities, U.S. Department of Health and Human Services, Public Health Service, April 1995.

4. Public Information (PI) Programs

The purposes of public information programs and activities funded through this cooperative agreement are to build general support for safe behavior, to dispel myths about HIV/AIDS, to address barriers to effective risk reduction programs, and to support efforts for personal risk reduction. In addition to informing general audiences, public information programs should assist in informing persons at risk of infection of how to obtain specific prevention and treatment services, such as CTRPN and STD screening and treatment. Public information programs and messages should be based on an assessment of needs in each State and local area. Messages to communicate through public information programs may include how HIV is and is not transmitted; how to avoid becoming infected; what the impact of other STDs is on the risk of HIV transmission; what to do if you think you might be infected; the benefits of knowing your sero status, including early diagnosis and treatment for HIV disease; and how to talk to your children, friends, and neighbors about HIV prevention.

Give priority to materials directed to hard-to-reach audiences and populations heavily affected by the HIV epidemic. Submit any newly developed public information resources and materials to the National AIDS Information Clearinghouse so that they can be incorporated into the current database for access by other organizations and agencies.

5. Quality Assurance and Staff Training

All recipients must:

- Develop and implement a mechanism for assessing the performance and training needs of staff providing HIV prevention services, especially those staff providing HIV prevention counseling and partner notification. Staff training should be guided by the assessment.
- Develop comprehensive written quality assurance procedures and staff performance standards and make them available to all program staff. Management should ensure these policies and procedures are followed.
- Develop and implement a quality assurance system for all counseling and testing providers, with special attention to assuring that seropositive clients learn their test results.
- Develop and implement a mechanism for assessing the proportion of HIV-seropositive persons referred for additional services who complete their referrals. Review data and improve process as necessary.
- Develop and implement a mechanism to determine that notification and follow up of partners has been completed. Review data and improve process as necessary.
- Develop and implement a mechanism to assure HE/RR activities

UMI
VOL
63
ISS
96
MY
19
1998
UMI

are culturally competent, developmentally appropriate, linguistically specific, and sensitive to sexual identity.

• Develop and maintain a mechanism to ensure the consistency, accuracy, and relevance of information provided to the public through local hotlines including information about referral services.

Quality assurance is essential to make certain that delivery of quality HIV prevention services is consistent and to ensure interventions are delivered in accordance with established standards. Quality assurance programs include measures to maintain high performance expectations of staff and that appropriate, competent, and sensitive methods are used for counseling, referral of clients, and providing other risk reduction messages. These quality assurance procedures and staff training should extend to the organizations providing HIV prevention activities through contracts.

Quality assurance and staff training is an ongoing process. An important component of this process is routine, periodic observation during counseling sessions and subsequent feedback to reinforce specific strengths noted and address any deficiencies detected. Performance standards that define expectations for the context and delivery of the counseling massages should be developed.

Feedback from client satisfaction surveys should be used routinely as a factor in assessing the services provided.

6. HIV Prevention Capacity-Building Activities

Recipients must:

• Develop, implement, and maintain a plan to provide financial assistance to CBOs and other HIV prevention providers that includes provisions for ensuring that funds are awarded on a timely basis.

• Issue Requests for Proposals (RFPs) within 90 days of the receipt of the notice of grant award. Multi-year assistance is allowable, provided the initial award was made competitively.

In order to build capacity, health departments should provide financial and technical assistance to strengthen their own infrastructure and that of non-governmental organizations to deliver effective HIV prevention interventions. Some examples of capacity building activities are implementing systems to ensure quality and integration of services (particularly HIV, STD, TB, and drug treatment), strengthening laboratory capacity, improving community needs assessments, funding community-based organizations to provide services, and providing technical assistance in all aspects of program planning and operations.

7. HIV Prevention Technical Assistance Assessment and Plan

Recipients must:

• Assess their own needs, as well as the needs of community-based organizations in their jurisdiction, for technical assistance in the areas of HIV prevention program planning, implementation, and evaluation.

• Develop, implement, and maintain a plan to provide the technical assistance indicated by the assessment.

Recipients should identify their own current and projected technical assistance needs and the needs of the jurisdiction's community-based providers, for program planning, implementation, and evaluation. Recipients should develop and implement a plan to provide ongoing technical assistance for HIV prevention and early medical intervention services in their communities, as indicated by the assessment. These should include planning, implementing, and evaluating prevention programs, activities, and services. Technical assistance should include the active monitoring of services and programs provided by CBOs.

Program management, strategies for meeting the HIV prevention needs of populations at high risk, and strategies for overcoming barriers to prevention should be priority areas for technical assistance programs.

8. Evaluation of Major Program Activities, Interventions, and Services

Evaluation is essential to monitor progress, measure program success, and strengthen programs and program activities. To this end, recipients need to conduct evaluation activities that will assess their progress in HIV prevention efforts and will contribute to the planning, implementation, and evaluation of effective HIV prevention programs.

The evaluation activities described here are listed as six phases. It is expected that there will be a range in recipient capacity and resources to conduct evaluations and that some recipients will have already conducted some of the phases. Therefore, although the phases are listed in an idealized sequence, recipients should implement the phases in a manner that reflects their current evaluation achievements, capacity, activities, resources, and needs. Each year, in their annual CDC funding applications, recipients should submit progress reports and data pertaining to the phases they implemented during the previous year and establish objectives for the upcoming year. As grantees implement new phases of evaluation, those phases that were previously initiated should be continued.

CDC is creating a *CDC Evaluation Guidance* that will be disseminated to recipients. The guidance is designed to assist recipients in preparing their application and implementing evaluation activities described in this announcement. To this end, the guidance provides an overview of CDC's evaluation model, upon which this announcement is based; describes recipient evaluation activities and data collection for each phase; lists references for technical assistance and training to build recipient capacity to implement these activities; and contains definitions of key terms.

All recipients should include the following evaluation activities in their programs:

a. Phase I: Development of a Comprehensive Evaluation Plan

Recipients should develop a comprehensive plan for evaluation of health department and health department-funded HIV program services and interventions. The plan should describe what will be done each year over the next five years. Phases II through IV describe the five types of evaluation in which grantees should engage. The plan should be clear, specific, and realistic.

b. Phase II: Evaluation of HIV Prevention Community Planning

Recipients should track and keep records on an ongoing basis in the following areas pertaining to the community planning process and development and implementation of the Comprehensive HIV Prevention Plan, using the Evaluation Guidance tools.

(1) Recruitment of community planning group members and representation of affected communities and areas of expertise on the community planning group (Community Planning Core Objectives 1 and 2).

(2) Application of a needs assessment and an epidemiologic profile to determine target groups and HIV prevention strategies (Community Planning Core Objective 3).

(3) Application of scientific knowledge in the selection and formulation of intervention strategies (Community Planning Core Objective 4).

(4) Developing goals and measurable objectives for the planning process and monitoring progress on the objectives.

(5) Assessing the cost of the process.

(6) Assessing the extent to which resources allocated by the health department match the epidemiologic profile.

(7) Assessment of the extent to which the final version of the Comprehensive HIV Prevention Plan is used in the recipient health department's budget decisions and in the health department's planning and development of HIV prevention program activities (Community Planning Core Objective 5).

c. Phase III: Program Design Evaluation

Prior to launching new program activities, recipients should assess the quality of program activity designs to ensure that the proposed interventions are scientifically sound, the implementation system is well organized, and stated goals are clear and feasible. (Factors to be evaluated are discussed in the section on Evaluation Reporting Format.)

d. Phase IV: Process Evaluation of HIV Prevention Programs

Conduct process evaluation through:

- Ongoing data collection and monitoring regarding the implementation of health department and health department-funded program activities.
- Assessment of the congruency between the intended and actual implementation of health department and health department-funded program activities.
- Use evaluation findings in order to improve program activities as indicated by the data.

e. Phase V: Outcome Evaluation

Outcome evaluation for this announcement is defined as the assessment of the effects of an intervention on the individuals who were targeted in the intervention. For example, changes in knowledge, attitudes, or behavior are usually outcome variables.

Recipients whose award is more than $1 million are expected to carry out at least one outcome evaluation during the five-year period. Outcome evaluation may be most easily achieved for the following types of interventions: HIV counseling and testing, referral, individual-level counseling, group-level counseling, and institution-based programs. *CDC Evaluation Guidance* (to be published) will describe recommended outcome evaluation designs and emphasize those designs that are cost-efficient and practically feasible to implement.

f. Phase VI: Impact Evaluation

Impact evaluation is the assessment of the effects beyond the outcome. For example, assessment of the cumulative effect of all HIV prevention activities in the jurisdiction is an impact evaluation.

CDC plans to conduct national impact evaluation studies using HIV/AIDS surveillance and other public health data sets. Recipients are not required to perform their own impact evaluation (but may do so if they wish and resources permit); however, recipients must participate in CDC's HIV prevention effectiveness indicators project.

9. Other Activities

Recipients must:

a. Have the capability to access the Internet and to download documents about HIV from CDC and other sites.

b. Ensure participation of appropriate representatives (governmental and non-governmental) in national or regional planning and implementation meetings.

Recipients should budget funds provided through this cooperative for these efforts. For example, travel funds should be available for community planning co-chairs to travel to the HIV Co-chairs meeting.

B. CDC Activities

1. Provide consultation and technical assistance in all aspects of the comprehensive HIV prevention program, including the community planning process, and planning, conducting, and evaluating HIV prevention and intervention activities.

2. Provide up-to-date information including diffusion of best-practices in all areas of the diagnosis, treatment, surveillance, and prevention of HIV.

3. Provide assistance to improve systems that monitor disease and reporting trends.

4. In consultation with recipients, assess training needs and determine how best to meet those needs. For HIV Prevention, CDC, in concert with State and local health departments, will provide training, either directly or through its network of STD/HIV prevention training centers, for persons who supervise, manage, and perform partner notification and other outreach activities and for staff who provide direct patient care.

5. Facilitate the adoption and adaptation of effective prevention intervention models among project areas through workshops, conferences, written communications.

6. Assist recipients in evaluating their program performance, in meeting their objectives, and in complying with cooperative agreement requirements.

7. Coordinate multi State approaches to HIV prevention and intervention.

8. Support individual project areas by providing technical assistance in the development of new or innovative models for behavioral and clinical interventions and the evaluation of them.

Application Content

A. General

Develop applications in accordance with CDC 0.1246E, information contained in the program announcement, and the instructions and format provided below.

Sequentially number all pages in the application and attachments, include a table of contents reflecting major categories and corresponding page numbers. Submit the original and each copy of the application unstapled and unbound. Provide only those attachments directly relevant to this application. All materials must be single spaced, printed in 12 CPI font, unreduced, on 8½" by 11" paper, with at least 1" margins, and printed on one side only.

B. Cross-Program Activities

Submit a brief statement addressing major HIV, STD, and TB cross-program issues. In this statement summarize progress made in the last 12 months and the current level of shared activities across HIV, STD, and TB programs. Discuss plans to improve coordination across HIV, STD, and TB programs over the next 12 months, including plans to increase collaboration in surveillance and any other efforts to improve program coordination.

C. HIV Prevention Community Planning (Not To Exceed 20 Pages)

1. National Community Planning: Progress Report and 1999 Objectives

Provide a brief summary of progress in accomplishing the following national community planning core objectives. Also, please summarize steps that will be taken over the next 12 months to accomplish the national core objectives.

a. Fostering the openness and participatory nature of the community planning process.

(1) Describe any efforts in the past 12 months in recruiting, training, and supporting community planning group members, and methods used to obtain input from outside group membership. Briefly profile the number of HIV prevention community planning groups convened in the jurisdiction. If the jurisdiction convenes other county or regional groups that provide input to a community planning group, please

describe this structure. Briefly describe any changes in the planning structure of your jurisdiction. Also briefly describe any mechanisms used during the past 12 months for coordination with other planning activities, e.g., Ryan White Title I and II, STD, TB.

(2) Describe any new or additional steps to be taken in each of these areas in the next 12 months to foster the openness and participatory nature of the community planning process.

b. Ensuring that the community planning groups reflect the diversity of the epidemic in your jurisdiction, and that expertise in epidemiology, behavioral science, health planning and evaluation are included in the process.

(1) Summarize the characteristics and expertise represented by members of the community planning groups over the past 12 months. Discuss any gaps in representation and approaches that have been used during the past 12 months to address the gaps. Briefly describe any methods used to obtain input from outside group membership. Do not include any information that might link HIV status to any individual.

(2) Please describe planned activities for the next 12 months including plans for addressing any gaps in representation.

c. Ensuring that priority HIV prevention needs are determined based on an epidemiologic profile and a needs assessment.

(1) Briefly describe the process that was used or steps that were taken over the past 12 months to develop or modify the epidemiologic profile and the needs assessment. Briefly describe how priority populations were identified from the epidemiologic profile and needs assessment.

(2) Describe plans for updating or modifying the Epi profile and needs assessment over the next 12 months.

d. Ensuring that interventions are prioritized based on explicit consideration of priority needs, outcome effectiveness, cost effectiveness, social and behavioral science theory, and community norms and values.

(1) Briefly describe the process that was used to prioritize interventions over the past 12 months.

(2) Describe any changes planned in the prioritization process in the next 12 months.

e. Fostering strong, logical linkages between the community planning process, plans, application for funding and HIV prevention resources.

(1) Briefly describe the linkage between this application for funding and allocation of CDC HIV prevention resources and the HIV Prevention Plan.

(2) Describe any changes planned in the next 12 months.

(3) Describe linkages between planned expenditures (as reported in the budget tables), epidemiological statistics, and plans for addressing any gaps between budget levels and epidemiologic statistics.

2. Community Planning Technical Assistance and Evaluation

a. Technical Assistance

(1) Briefly describe any technical assistance provided to the community planning group in the past 12 months.

(2) Describe areas of needed technical assistance and planned methods for obtaining this assistance in the next 12 months.

b. Evaluation

(1) Briefly describe how the community planning process was evaluated over the past 12 months and the major conclusions of the evaluation.

(2) Describe plans to evaluate the community planning process over the next 12 months.

3. Comprehensive HIV Prevention Community Plan

Please provide as an attachment, the current version of your Comprehensive HIV Prevention Plan. For areas without a jurisdiction-wide planning group, include regional plans and a jurisdiction-wide summary of recommendations and conclusions. If the jurisdiction has developed a separate document that updates and describes refinements or changes to the original Comprehensive HIV Prevention Plan, please attach both the original Plan and the supplementary document that updates the Plan. Include the proposed activities for 1999, letters of concurrence/non-concurrence from each community planning group in the jurisdiction, a line item budget and narrative justification, and relevant attachments. (The Comprehensive Plan or the jurisdiction-wide summary are attachments to the application and are not included in the page limit for this section.)

a. Priority populations and interventions. List the populations identified in the HIV Prevention Community Plan in rank order. For each of these populations list the recommended interventions (e.g., CTRPN, HE/RR) in rank order. For each intervention, list goals recommended in the plan. Please use the following format:

Population #1
Intervention #1
Goals
Intervention #2
Goals
Population #2

D. HIV Prevention Program (Not to Exceed 30 Pages)

1. Progress Report for 1998

Summarize progress during the past year in achieving objectives related to each of the programmatic activities listed below. For each activity, describe progress toward achieving program objectives, related training and quality assurance activities, program evaluation findings, changes or adjustments resulting from evaluation findings, and reasons for not attaining an objective.

a. HIV CTRPN;
b. HE/RR (including individual level interventions, group level interventions, community level interventions, and street and community outreach);
c. Public Information Programs;
d. Evaluation Activities;
e. HIV prevention capacity building activities;
f. Quality assurance and training;
g. Other activities.

2. Budget Tables

Complete the Table of Estimated Expenditures for 1998 HIV Prevention funding, indicating 1998 HIV prevention allocations by intervention, population, and race/ethnicity. This is used to report to Congress and Office of Management and Budget on use of tax dollars, targeted programs, and to justify need for additional support.

3. Program Goals, Objectives, and Activities

a. 5-Year Programmatic Goals

Based on the past 5 years' activities, provide overall programmatic goals for the next five-year period. These are intended to provide a general framework-objectives and activities will be developed annually, when each of the next budget period program applications are written.

b. 1999 Priority Populations and Interventions

List the priority populations identified by the recipient in rank order. For each of these populations, list the interventions the grantee plans to fund in rank order. For each intervention list the goals. For each goal, state realistic, specific, time-phased, and measurable objectives to be achieved during the next 12 months. Outline strategies and activities to be undertaken and services to be provided to achieve objectives. Include, as needed, training, quality assurance, and capacity-building objectives related to each intervention. Please use the following format:

Population #1
Intervention #1
Goals
Objectives
Activities
Intervention #2
Goals
Objectives
Activities
Population #2
Intervention #1

c. Linkages Between Primary and Secondary HIV Prevention Activities

Briefly describe the linkages that will be developed and maintained between primary and secondary prevention services in the jurisdiction. Provide goals and realistic, specific, time phased, and measurable objectives for the next 12 months. Outline strategies and activities to be undertaken to achieve these objectives.

d. Linkages With Other HIV Prevention Related Activities

Briefly describe the program's proposed linkages with other HIV prevention-related activities (e.g., epidemiologic and behavioral surveillance; research; substance abuse, STD, and family planning programs; and program evaluation activities) and the prevention program strategies proposed in this application. Provide goals and realistic, specific, time phased, and measurable objectives for the next 12 months. Outline strategies and activities to be undertaken to achieve these objectives.

e. Coordination of HIV Prevention Services and Programs

Briefly describe the program's plans for coordination among public and non-governmental agencies to provide HIV prevention services and programs. Provide goals and realistic, specific, time phased, and measurable objectives for the next 12 months. Outline strategies and activities to be undertaken to achieve these objectives.

f. Technical Assistance

Briefly describe your need, as well as the needs of the community-based organizations in your jurisdiction, for technical assistance in the areas of HIV prevention program design, implementation, and evaluation. Describe plans for addressing these technical assistance needs. Provide goals and realistic, specific, time phased, and measurable objectives for the next 12 months. Outline strategies and activities to be undertaken to achieve these objectives.

g. Program Evaluation

Each year, in their annual CDC funding applications, recipients should submit progress reports and data pertaining to the phases they implemented during the previous year and establish objectives for the upcoming year. As grantees implement new phases of evaluation, those phases that were previously initiated should be continued.

4. Explain Any Differences Between the Priority Populations, Interventions, and the Proposed Program Activities and Those Recommended in the Comprehensive HIV Prevention Plan (e.g., other funding sources are supporting an activity, other providers are meeting a need, public health interest, legal constraints)

E. Concurrence of HIV Prevention Community Planning Groups

Recipients must submit letters of concurrence or non-concurrence from each HIV prevention community planning group convened within the jurisdiction. The letters should indicate the extent to which the recipient and the HIV prevention community planning groups have successfully collaborated in developing the comprehensive HIV prevention plan and have reviewed and agree upon the program priorities contained in this application. The letter should describe the process used to obtain concurrence, including a description of the process used for review of the application by the community planning group, the time frame allotted for the review, who from the community planning group reviewed it (co-chairs, members, subcommittee chairs), and the quality of the concurrence (e.g., without reservation, with minor concerns, with important concerns). At a minimum, the letters should be signed by the co-chairs on behalf of the groups. There should be letters from each of the community planning groups described above. If a letter of concurrence includes reservations or a statement of concern/issues, address those concerns in the application. Letters of non-concurrence must cite specific reasons for the non-concurrence. In situations where the community planning group does not concur with the program priorities identified in the funding application and the recipient is proposing to implement activities or allocate Federal resources based on other priorities, a justification must be provided by the recipient as to why the priorities identified through the community planning process are not being implemented.

Instances of planning group concerns or non-concurrence will be evaluated on a case-by-case basis. After consultation, CDC will determine what action, if any, may be appropriate.

F. Budget Information

In accordance with Form CDC 0.1246E, provide a line item budget and narrative justification for all requested costs that are consistent with the purpose, objectives, and proposed program activities. Within this budget, please provide the documentation requested for each cost category:

1. Line item breakdown and justification for all personnel, i.e., name, position title, annual salary, percentage of time and effort, and amount requested.

2. Line item breakdown and justification for all contracts, including: (1) Name of contractor, (2) period of performance, (3) method of selection (e.g., competitive or sole source), (4) description of activities, (5) target population and (6) itemized budget.

3. Requests for any new Direct Assistance Federal assignees, include:

a. The number of assignees requested;

b. A description of the position and proposed duties;

c. The ability or inability to hire locally with financial assistance;

d. Justification for request;

e. An organizational chart and the name of the intended supervisor;

f. The availability of career-enhancing training, education, and work experience opportunities for the assignee(s) and;

g. Assignee access to computer equipment for electronic communication with CDC.

4. Complete CDC budget tables. Note: Following receipt of your 1999 award, additional budgetary information may be requested.

Submission and Deadline

(To be provided with final version)

Evaluation Criteria

A. All applications will be reviewed by CDC program consultants for determination of progress toward stated objectives and for compliance with program guidance. In addition, each application will also receive an external review by an independent team of governmental and non-governmental representatives to determine technical acceptability. The purposes of this external review will be to evaluate each application individually against to the following criteria:

1. The need for support as documented in the Epidemiologic Profile and Needs Assessment including

UMI

1998
UMI

(1) the degree to which trends in reported AIDS cases and HIV sero prevalence show the need for increased HIV prevention activities and services, and (2) the extent of unmet prevention needs as identified through the needs assessment in the Comprehensive HIV Prevention Plan.

2. Determine progress and continued compliance with the Community Planning Guidance and this document.

3. The extent to which the short-term and long-term objectives are realistic, measurable, time-phased, and related to the project's Comprehensive HIV Prevention Plan.

4. The quality of the recipient's plan for conducting program activities, the potential effectiveness of the proposed methods in meeting the stated objectives, and previous success in implementing activities and services. This includes the degree to which the proposed program activities and methods are science-based (i.e., theory-predicted or based on findings of scientific research) and the likelihood that the recipient can effectively implement the proposed activities and services.

5. The quality of the proposed evaluation plan.

6. The extent to which the budget request is clearly explained, is adequately justified, and is consistent with the intended use of Federal funds.

7. The degree to which the applicant has met the CDC Policy requirements regarding the inclusion of women, ethnic, and racial groups in the proposed research. This includes:

a. The proposed plan for the inclusion of both sexes and racial and ethnic minority populations for appropriate representation.

b. The proposed justification when representation is limited or absent.

c. A statement as to whether the design of the study is adequate to measure differences when warranted.

d. A statement as to whether the plans for recruitment and outreach for study participants include the process of establishing partnerships with communities) and recognition of mutual benefits.

B. In addition, the external review will:

1. Recommend specific actions for CDC to ensure that project areas are developing, implementing, and refining technically acceptable prevention plans.

2. Recommend technical assistance or other support to further a project area's progress in implementing community planning.

3. Identify innovative or promising practices in HIV prevention and community planning and recognize successes.

4. Determine national progress in implementing HIV prevention community planning and potential technical assistance needs in 1999.

Other Requirements

A. Technical Reporting Requirements

A report describing progress in HIV prevention community planning and HIV prevention program activities is required annually with the application for funding.

An original and two copies of a financial status report (FSR) are required no later than 90 days after the end of each budget period and a final report after the project period. Submit the all reports to the Grants Management Branch, CDC.

Statistical reports of HIV-antibody counseling and testing activities (OMB [Office of Management and Budget] Approval No. 0920–0280) are required 45 days after the end of each quarter. Project areas are required to collect and report data for each episode of counseling or testing funded by CDC on all of the following variables: Project area, site type, site number, date of visit, sex, race/ethnicity, age, reason for visit, risk for HIV infection, whether test is anonymous or confidential, whether client accepted testing, results of test, whether post-test counseling occurred, date of post-test counseling and state, county, and zip code of client residence. Data should be collected in a manner consistent with and not in place of client-centered counseling. Project areas may collect other information to meet local data and evaluation needs. Project areas may use CDC scan form for reporting or a local form with data reported electronically. Project areas are encouraged to report data at client record level. Project areas may request technical assistance to achieve this.

For other requirements, see the following attachments.

B. AR98–1 Human Subjects Requirements

C. AR98–2 Requirements for Inclusion of Women and Racial and Ethnic Minorities in Research

D. AR98–4 HIV/AIDS Confidentiality Provisions

E. AR98–5 HIV Program Review Panel Requirements

F. AR98–6 Patient Care

G. AR98–7 Executive Order 12372 Review

H. AR98–8 Public Health System Reporting Requirements

I. AR98–9 Paperwork Reduction Act Requirements

J. AR98–10 Smoke-Free Workplace Requirements

K. AR98–11 Healthy People 2000

L. AR98–12 Lobbying Restrictions

Authority and Catalog of Federal Domestic Assistance Number

This program is authorized under sections 317, 301, and 311 of the Public Health Service Act (42 U.S.C. 241(a) and 247(b)), (42 U.S.C. 241) and (42 U.S.C. 243), as amended. The Catalog of Federal Domestic Assistance (CFDA) number for this project is 93.940.

Where To Obtain Additional Information

Please refer to Program Announcement 99004 when you request information. For a complete program description, information on application procedures, an application package, and business management technical assistance, contact: Kevin Moore, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Announcement Number 99004, Centers for Disease Control and Prevention (CDC), Room 300, Mailstop E–15, 255 East Paces Ferry Road, NE., Atlanta, GA 30305–2209; Telephone (404) 842–6550; Email address KGM1@CDC.GOV; See also the CDC home page on the Internet: http://www.cdc.gov.

For program technical assistance, contact your project officer or Jessica Gardom, Division of HIV/AIDS Prevention, National Center for HIV/STD/TB Prevention (NCHSTP), Centers for Disease Control and Prevention (CDC), Mailstop E–58, 1600 Clifton Road, NE., Atlanta, GA 30333; Telephone (404) 639–5248; Email address JCG3@CDC.GOV.

Dated: May 13, 1998.

Joseph R. Carter,

Acting Associate Director for Management and Operations, Centers for Disease Control and Prevention (CDC).

Guidance: HIV Prevention Community Planning for HIV Prevention Cooperative Agreement Recipients

Essential Components of a Comprehensive HIV Prevention Program

To implement a comprehensive HIV prevention program, State, local, and territorial health departments that receive HIV Prevention Cooperative Agreement funds should assure that efforts in their jurisdictions include all of the following essential components:

1. A community planning process, known as HIV prevention community planning, in accordance with this guidance;
2. Epidemiologic and behavioral surveillance, as well as compilation of other health and demographic data relevant to HIV risks, incidence, or prevalence;
3. HIV counseling, testing, referral, and partner notification (CTRPN) with strong linkages to medical care, treatment, and other needed services;
4. Health education and risk reduction (HE/RR) activities, including individual-, group-, and community-level interventions;
5. Accessible diagnosis and treatment of other sexually transmitted diseases;
6. Accessible diagnosis and treatment of tuberculosis and other opportunistic infections;
7. School-based efforts for youth;
8. Public information programs;
9. Training and quality assurance;
10. Laboratory support;
11. HIV prevention capacity-building activities, including expansion of the public health infrastructure by contracting with non-governmental organizations, especially community-based organizations;
12. An HIV prevention technical assistance assessment and plan; and
13. Evaluation of major program activities, interventions, and services.

This guidance addresses the first of these components, HIV prevention community planning, and outlines the minimum standards that CDC requires of its health departments in the implementation of the community planning process. Definitions and programmatic standards and guidelines referenced in this guidance are further described in the materials included with the 1999 HIV prevention cooperative agreement program announcement number 99004.

Financial Support of HIV Prevention Community Planning

HIV prevention cooperative agreement funds should be used to support all aspects of the community planning process, including:

1. Supporting planning group meetings, public meetings, and other means for obtaining community input;
2. Facilitating involvement of all community planning group members in the planning process, particularly those persons with and at risk for HIV infection;
3. Supporting capacity development for inclusion,* representation** and parity*** of community representatives and other planning groups members to participate effectively in the process;
4. Providing technical assistance to health departments and community planning groups;
5. Supporting infrastructure for the HIV prevention community planning process;
6. Collecting, analyzing, and disseminating relevant data; and
7. Evaluating the community planning process.

Goal of HIV Prevention Community Planning

The goal of HIV prevention community planning is to improve the effectiveness of State, local, and Territorial health departments' HIV prevention programs by strengthening the scientific basis, relevance, and focus of prevention interventions. CDC monitors progress in meeting this goal through the following five core objectives:

Core Objectives:

1. Fostering the openness and participatory nature of the community planning process.
2. Ensuring that the community planning group(s) reflects the diversity of the epidemic in the jurisdiction, and that expertise in epidemiology, behavioral science, health planning, and evaluation are included in the process.
3. Ensuring that priority HIV prevention needs are determined based on an epidemiologic profile and a needs assessment.
4. Ensuring that interventions are prioritized based on explicit consideration of priority needs, outcome effectiveness, cost and cost effectiveness, theory, and community norms and values.
5. Fostering strong, logical linkages between the community planning process, application for funding, and allocation of CDC HIV prevention resources.

Definition of HIV Prevention Community Planning

HIV prevention community planning is an ongoing, iterative planning process that is (1) evidence-based (i.e., based on HIV/AIDS and other epidemiologic data, including STD and behavioral surveillance data; qualitative data; ongoing program experience; program evaluation; and a comprehensive needs assessment process) and (2) incorporates the views and perspectives of groups at risk for HIV infection for whom the programs are intended, as well as providers of HIV prevention and STD treatment services. Together, representatives of affected populations, epidemiologists, behavioral scientists, HIV/AIDS prevention service providers, STD treatment providers, health department staff, and others analyze the course of the epidemic in their jurisdiction, assess HIV prevention needs, determine their priority prevention needs, identify HIV prevention interventions to meet those needs, and develop comprehensive HIV prevention plans that are directly responsive to the epidemics in their jurisdictions. These comprehensive HIV prevention plans address all the essential components of a comprehensive HIV prevention program described in the section Essential Components of a Comprehensive HIV Prevention Program, or explain why a particular component is missing.

Prioritizing HIV prevention needs is a critical part of program planning. Community planning group members are expected to follow a logical, evidence-based process in order to determine the highest priority prevention needs in their jurisdiction. These prioritized prevention needs are particularly important to the health department in allocating prevention

---

* Inclusion, representation, and parity are fundamental tenets of HIV prevention community planning. Inclusion is defined as the assurance that the views, perspectives, and needs of all affected communities are included and involved in a meaningful manner in the community planning process. This is the assurance that the community planning process is inclusive of all the needed perspectives.

** Representation, is the assurance that those who are representing a specific community truly reflect that community's values, norms, and behaviors. This is the assurance that those representatives who are included in the process are truly able to represent their community. At the same time, these representatives should be able to participate as group members in objectively weighing the priority prevention needs of the jurisdiction.

*** Parity, is the condition whereby all members of the HIV prevention community planning group have the skills and knowledge for input and participation, as well as equal voice in voting and other decision-making activities. This is ensuring that those representatives who are included in the process can participate equally in the decision-making process.

dollars. Specific high priority HIV prevention needs (both populations and interventions) identified in the comprehensive HIV prevention plan are then operationalized in the health department's application to CDC for Federal HIV prevention funds. There should be strong, logical linkages between the community planning process, the comprehensive HIV prevention plans, the health department's application for Federal funds, and the allocation of Federal HIV prevention resources by the health department.

To meet this definition, community planning groups must focus primarily on the tasks of planning. Once a comprehensive plan has been developed, the community planning group should periodically review it to determine whether or not it is necessary to:

1. Seek additional information to clarify and focus prevention priorities;
2. Define potential methods for obtaining needed additional information;
3. Give additional attention to strengthening specific recommendations in the plan, such as
   a. The linkages between primary prevention activities and secondary prevention, STD treatment, drug treatment, and medical services;
   b. Development of an in-depth plan for coordination of health department HIV prevention activities with the prevention activities of other governmental and non-governmental agencies in the jurisdiction;
   c. Conducting an assessment of technical assistance needs in the jurisdiction and developing a plan for meeting the needs;
4. Review program implementation information that would inform the planning process and potentially affect the priorities in the plan, e.g., progress reports from contractors, process evaluation data from other program activities;
5. Monitor any shifts in incidence;
6. Conduct new or additional needs assessment, resource inventories, focus groups, etc.;
7. Review new research findings on intervention effectiveness and determine the impact, if any, on the plan; and
8. Consider how new biomedical or prevention technologies might best be utilized.

These reviews may result in additional objectives for the community planning group in the upcoming year and an updated or revised comprehensive plan. Community planning groups may choose to take a long-term approach to their planning process, in one year reviewing the plan and developing action steps to strengthen it; in the next, focusing on implementing the steps and revising the plan; in the next, focusing on a particular population for which more information is needed; in the third, returning to the basic community planning steps. The planning process should be flexible, taking a long-term approach and negotiating meaningful tasks for the planning group that contribute and enhance the comprehensive plan. The important, overall goal of HIV prevention community planning is to have in place a comprehensive HIV prevention plan that is current, evidence based, adaptable as new information becomes available, tailored to the specific needs of each jurisdiction, and widely distributed in an effort to provide a road map for prevention that can be used by all prevention providers in the jurisdiction.

Principles of HIV Prevention Community Planning

The following principles trace their origins to several sources: HIV prevention program assessments conducted by CDC staff; CDC's Planned Approach to Community Health (PATCH) program; CDC's Assessment Protocol for Excellence in Public Health (APEX/PH) project; the ASTHO/NASTAD/CSTE State Health Agency Vision for HIV Prevention; the June 1994 External Review of CDC's HIV Prevention Strategies by the CDC Advisory Committee on the Prevention of HIV Infection; experience and recommendations of health departments and non-governmental organizations; the health promotion, community development, behavioral and social sciences literature; and CDC and its partners' experience in implementing community planning since 1994.

All Grantees Are Required To Adhere to the Following Principles

1. HIV prevention community planning reflects an open, candid, and participatory process, in which differences in cultural and ethnic background, perspective, and experience are essential and valued.
2. HIV prevention community planning is characterized by shared priority setting between health departments administering and awarding HIV prevention funds and the communities for whom the prevention services are intended.
3. Priority setting accomplished through a community planning process produces programs that are responsive to high priority, community-validated needs within defined populations. Persons at risk for HIV infection and persons with HIV infection play a key role in identifying prevention needs not adequately met by existing programs and in planning for needed services that are culturally appropriate. HIV prevention programs developed with input from affected communities are likely to be successful in garnering the necessary public support for effective implementation and in preventing the transmission of HIV infection.
4. Representation on a community planning group includes:
   a. Persons who reflect the characteristics of the current and projected epidemic in that jurisdiction (as documented by the epidemiologic profile) in terms of age, gender, race/ethnicity, socioeconomic status, geographic and metropolitan statistical area (MSA)-size distribution (urban and rural residence), and risk for HIV infection. In addition to reflecting the characteristics outlined above, these representatives should articulate for, and have expertise in understanding and addressing, the specific HIV prevention needs of the populations they represent. At the same time, these representatives should be able to participate as group members in objectively weighing the priority prevention needs of the jurisdiction.
   b. State and local health departments, including the HIV prevention and STD treatment programs.
   c. State and local education agencies.
   d. Other relevant governmental agencies (e.g., substance abuse, mental health, corrections).
   e. Experts in epidemiology, behavioral and social sciences, program evaluation, and health planning.
   f. Representatives of key non-governmental and governmental organizations providing HIV prevention and related services (e.g., STD, TB, substance abuse prevention and treatment, mental health services, HIV care and social services) to persons with or at risk for HIV infection.
   g. Representatives of key non-governmental organizations relevant to, but who may not necessarily provide, HIV prevention services (e.g., representatives of business, labor, and faith communities).
5. The HIV prevention community planning process attempts to accommodate a reasonable number of representatives without becoming so large that it cannot effectively function. To assure needed input without becoming too large to function, HIV prevention community planning group(s) seek additional avenues for

obtaining input on community HIV prevention needs and priorities, such as holding well-publicized public meetings, conducting focus groups, and convening ad hoc panels. This is especially important for obtaining input relevant to marginalized populations that may be difficult to recruit and retain as members of the planning group (e.g., injecting drug users).

6. Nominations for membership are solicited through an open process and candidates are selected, based on criteria that has been established by the health department and the community planning group. The nomination and selection of new community planning group members occurs in a timely manner to avoid vacant slots or disruptions in planning. In addition, the recruitment process for membership in the HIV prevention community planning process is proactive to ensure that socioeconomically marginalized groups, and groups that are under served by existing HIV prevention programs, are represented.

7. All members of the HIV prevention community planning group(s) are offered a thorough orientation, as soon as possible after appointment. The orientation includes:

a. Understanding the roles and responsibilities outlined in this document,

b. Understanding the procedures and ground rules used in all deliberations and decision making,

c. Understanding the specific policies and procedures for decision-making, resolving disputes, and avoiding conflict of interests that are consistent with the principles of this guidance and are developed with input from all parties. These policies and procedures address:

1. Process for making decisions within the planning group (vote, consensus, etc.),

2. Conflict(s) of interest for members of the planning group(s),

3. Disputes within and among planning group(s),

4. Differences between the planning group(s) and the health department in the prioritization and implementation of programs/services, and

5. A process for resolving these disputes in a timely manner when they occur.

d. Understanding HIV prevention interventions and comprehensive prevention programs.

Orienting new members is an ongoing process that may include mentoring new members throughout the year.

8. Health departments assure that HIV prevention community planning group(s) have access to current information related to HIV prevention and analyses of the information, including potential implications for HIV prevention in the jurisdiction. Sources of information include evaluations of program activities, programmatic research, social and behavioral sciences, and other sources, especially as it relates to the at-risk population groups within a given community and the priority needs identified in the comprehensive plan.

9. Identification, interpretation, and prioritization of HIV prevention needs reflect the epidemiologic profile, needs assessment, and culturally relevant and linguistically appropriate information obtained from the communities to be served, particularly persons with or at risk for HIV infection.

10. Priority setting for specific HIV prevention strategies and interventions is based on specific criteria outlined in this document and each criterion should be formally considered by the HIV prevention community planning group(s) during priority-setting deliberations.

11. The HIV prevention community planning process produces a comprehensive HIV prevention plan, jointly developed by the health department and the HIV prevention community planning group(s), which includes specific, high priority HIV prevention strategies and interventions targeted to defined populations. Each health department's application for CDC funds addresses the plan's high priority elements that are most appropriately met by HIV prevention cooperative agreement funds. The comprehensive plan includes the essential elements listed in the section Essential Elements of a Comprehensive HIV Prevention Plan.

12. Because the plan is comprehensive, it should be distributed widely as a resource to guide programmatic activities and resources outside of those supported with CDC Federal HIV prevention funds.

13. The HIV prevention community planning process is evaluated to ensure that it is meeting the core objectives of community planning.

Steps in the HIV Prevention Community Planning Process

The steps of the HIV prevention community planning process follow:

1. Epidemiologic Profile: Assess the extent, distribution, and impact of HIV/AIDS and other STDs in defined populations in the community, as well as relevant risk behaviors. In defining at-risk populations, special attention should be paid to distinguishing behavioral, demographic, and racial/ethnic characteristics. This is the starting point for defining future HIV prevention needs in defined, targeted populations within the health department's jurisdiction. Other methods for segmenting audiences for prevention messages may also be used.

2. Needs Assessment/Resource Inventory: Assess existing community resources for HIV prevention and STD treatment to determine the community's capability to respond to the epidemic. These resources should include fiscal, personnel, and program resources, as well as support from public (Federal, State, county, municipal), private, and volunteer sources. This inventory should attempt to identify HIV prevention and STD treatment programs and activities according to the high-risk populations defined in the epidemiologic profile. The needs assessment/resource inventory should be based on a variety of sources (both qualitative and quantitative), should be collected using different assessment strategies (e.g., surveillance; survey; formative, process, and outcome evaluation of programs and services; outreach and focus group(s); public meetings), and should incorporate information from both providers and consumers of services. Techniques such as over sampling may be needed to collect valid information from certain at-risk populations.

3. Gap Analysis: Identify met and unmet HIV prevention and STD treatment needs within the high-risk populations defined in the epidemiologic profile and needs assessment/resource inventory. Findings from the needs assessment about high-risk populations (e.g., size of population, impact of HIV/AIDS, risk behaviors) and from the resource inventory about existing services should assist in identifying priority prevention needs. For example, if a large number of clients are turned away each day from an STD clinic that has a high HIV sero positivity rate, then there is clearly a gap in HIV prevention services.

4. Intervention Inventory: Identify potential strategies and interventions that can be used to prevent new HIV infections within the high-risk populations defined in the needs assessment;

5. Prioritization: Prioritize (rank order) HIV prevention needs in terms of: (1) High-risk populations; and (2) interventions and strategies for each high-risk population based on the following criteria:

a. Documented HIV prevention needs based on the current and projected impact of HIV/AIDS and other STDs in

defined populations in the health department's jurisdiction;

b. Outcome effectiveness of proposed strategies and interventions (either demonstrated or probable);

c. Available information on the relative costs and effectiveness of proposed strategies and interventions (either demonstrated or probable);

d. Sound scientific theory (e.g., behavior change, social change, and social marketing theories) when outcome effectiveness information is lacking;

e. Values, norms, and consumer preferences of the communities for whom the services are intended;

f. Availability of other governmental and non-governmental resources (including the private sector for HIV prevention); and

g. Other State and local determining factors.

Each criterion should be considered by the HIV prevention community planning group(s) during priority-setting deliberations. At a minimum, the community planning groups must provide a clear, concise, logical statement as to why each population and intervention given high priority was chosen.

6. Plan Development: Develop a comprehensive HIV prevention plan consistent with the high priority needs identified through the community planning process. The plan must contain all of the elements described in the following section, Essential Elements of a Comprehensive HIV Prevention Plan. CDC does not require a new plan each year. Plans may cover more than one year. However, project areas are expected periodically to review, revise, and refine the plans, as indicated by any new or enhanced surveillance data, intervention research, needs assessment, program policy, or technology. (See Definition of HIV Prevention Community Planning)

7. Evaluation: Evaluate the effectiveness of the planning process. Health departments should track and keep records on an ongoing basis in the following areas pertaining to the community planning process and development and implementation of the comprehensive HIV prevention plan:

a. Recruitment of community planning group members and representation of affected communities and areas of expertise on the community planning group (Community Planning Core Objectives 1 and 2).

b. Application of a needs assessment and an epidemiologic profile to determine target groups and HIV prevention strategies (Community Planning Core Objective 3).

c. Application of scientific knowledge in the selection and formulation of intervention strategies (Community Planning Core Objective 4).

d. Developing goals and measurable objectives for the planning process and monitoring progress on the objectives.

e. Assessing the cost of the process.

f. Assessing the extent to which resources allocated by the health department match the epidemiologic profile.

g. Assessment of the extent to which the final version of the Comprehensive HIV prevention plan is used in the health department's budget decisions and in the planning and development of HIV prevention program activities (Community Planning Core Objective 5).

8. Update: Use program evaluation data and updated or revised epidemiologic, needs assessment, intervention research, program policy, and technologic data to improve the next year's planning process and to update, as appropriate, the comprehensive plan. (See Definition of HIV Prevention Community Planning)

Essential Elements of a Comprehensive HIV Prevention Plan

The HIV prevention community planning process should produce a comprehensive HIV prevention plan, jointly developed by the health department and the HIV prevention community planning group(s), which includes specific, high priority HIV prevention strategies and interventions targeted to defined populations.

The necessary elements of a comprehensive HIV prevention plan include the following:

1. Epidemiologic Profile: An HIV/AIDS epidemiologic profile that outlines the epidemic in that jurisdiction. The profile includes data from a variety of sources (demographic and socioeconomic data, reported AIDS cases, reported HIV infections from areas with confidential reporting, HIV sero prevalence and sero incidence surveys/studies (where available), HIV risk behaviors, and surrogate markers for HIV risk behaviors, e.g., sexually transmitted disease (STD) and teen pregnancy rates and information on drug use.) Furthermore, the profile includes a narrative explanation of all data provided.

2. Needs Assessment/Resource Inventory/Gap Analysis: A description of met and unmet HIV prevention needs in target populations to be reached by primary HIV prevention interventions, and barriers in reaching populations. The description of target populations may include age group, gender, race/ethnicity, socioeconomic status, geographic area, sexual orientation, risk for HIV infection, primary language, and significant cultural factors.

3. Prioritization: The populations at high risk for HIV in rank order (i.e., prioritization), and the culturally and linguistically appropriate individual-, group-, and community-level strategies and interventions to reach each. These high-risk populations should include defined target populations whose sero status is unknown, negative, or positive. The strategies and interventions should include the interventions described in the section Essential Components of a Comprehensive HIV Prevention Program, as well as school-based programs, and other HIV prevention activities. Both existing and proposed interventions should be described. A clear, concise, logical statement of the reason each prioritized intervention was selected should be included.

4. Linkages: A description of how activities proposed in the comprehensive plan to prevent transmission or acquisition of HIV (primary prevention activities) are linked to activities to prevent or delay the onset of illness in persons with HIV infection (secondary prevention activities), to STD treatment, drug treatment, and Ryan White Comprehensive AIDS Resources Emergency (CARE) Act planning.

5. Goals: Short and long term goals for HIV prevention in defined populations being reached with defined interventions.

6. Surveillance and Research: A description of ongoing HIV prevention surveillance and research activities (e.g., epidemiologic and behavioral surveillance, research, and program evaluation activities), how these are linked to prevention program strategies in the plan, and any additional surveillance and research that is needed.

7. Coordination: A description of how governmental and non-governmental agencies will coordinate to provide comprehensive HIV prevention services and programs within the area for which the plan is developed.

8. Technical Assistance Needs Assessment and Plan: An HIV prevention technical assistance needs assessment identifying needs of the health department, community planning group(s), and community-based providers in the areas of program planning, implementation, and evaluation, and a plan of activities that addresses the technical assistance needs.

9. Community Planning Evaluation Plan: An evaluation plan for the HIV prevention planning process.

Letters of Concurrence/Nonconcurrence

Each health department, in its application, must include a letter of concurrence or nonconcurrence from every HIV prevention community planning group convened within the health department's jurisdiction. At a minimum, the letter(s) should be signed by the co-chairs on behalf of the group(s).

HIV prevention community planning group members should carefully review the comprehensive HIV prevention plan and the health department's entire application to CDC for Federal funds (including the proposed budget). Because the community planning process requires prioritization of HIV prevention needs and because prioritization directly corresponds to resource allocation, it is critical that the community planning group review the proposed allocation of resources in the health department's application (and, especially, to review expenditure levels in light of the epidemiologic profile). Community planning groups are not asked to review and comment on internal health department issues, such as salaries of individual health department staff, but instead to indicate:

1. The extent to which the health department and the HIV prevention community planning group(s) have successfully collaborated in developing, reviewing, or revising the comprehensive HIV prevention plan;

2. The extent to which the activities, programs, and services, for which the health department is requesting CDC funds, are responsive to the priorities in the comprehensive plan;

3. The process used for obtaining concurrence, including

a. A description of the process used for review of the application by the community planning group,

b. The time frame allotted for the review,

c. Who from the community planning group reviewed it (co-chairs, members, subcommittee chairs), and

d. The quality of the concurrence (e.g., without reservation, with minor concerns, with important concerns).

Letter(s) of concurrence may include reservations or a statement of concern/issues. The health department should address these reservations or concerns in an addendum to the HIV prevention application.

Letter(s) of nonconcurrence indicate that an HIV prevention community planning group disagrees with the program priorities identified in the health department's application. The letter should cite specific reasons for nonconcurrence. In instances of nonconcurrence and when a health department does not concur with the recommendations of the HIV prevention community planning group(s) and believes that public health would be better served by funding HIV prevention activities/services that are substantially different, the health department must submit a letter of justification in its application. CDC will assess and evaluate these justifications on a case-by-case basis and determine what action may be appropriate. A letter of nonconcurrence does not necessarily mean that the jurisdiction will lose any portion of its CDC funding. These actions can range from:

1. Obtaining more input/information regarding the situation;

2. Meeting with the health department and co-chairs;

3. Negotiating with the health department regarding the issues raised;

4. Recommending local mediation;

5. Approving the health department's application as is;

6. Requesting that a detailed plan of corrective action be developed to address the areas of concern and to be executed within a specified time frame;

7. Conducting an on-site comprehensive program assessment to identify and propose action steps to resolve areas of concern;

8. Conducting an on site program assessment focused on a specific area(s);

9. Developing a detailed technical assistance plan for the project area to help systematically address the situation; and

10. Placing conditions or restrictions on the award of funds pending a future submission by the applicant.

Roles and Responsibilities—Health Departments

State, local, and territorial health departments are responsible for the health of the populations in their jurisdictions. States have a broad responsibility in surveillance, prevention, overall planning, coordination, administration, fiscal management, and provision of essential public health services. The role of the health department in the community planning process is to:

1. Establish and maintain at least one HIV prevention community planning group that meets the principles described in the section Principles of HIV Prevention Community Planning. Health departments are required to determine how best to achieve and integrate statewide, regional, and local community planning within their jurisdictions. In those jurisdictions where CDC has direct cooperative agreements with both State and local health departments, health departments are expected to have systems and procedures in place to facilitate coordination and communication between the State and local health departments and their community planning groups.

2. Identify a health department employee, or a designated representative, to serve as co-chair of each HIV prevention community planning group in the project area; if State health departments implement more than one planning group within their jurisdiction, they may wish to designate local health department representatives as co-chairs of these planning groups.

3. Assure collaboration between HIV prevention community planning group(s) and other relevant planning efforts, particularly the process for allocating Titles I, II, and IIIb of the Ryan White Comprehensive AIDS Resources Emergency Act and the STD prevention program. Health departments may consider merging the HIV prevention community planning process with other planning bodies/processes already in place. If such mergers are undertaken, health departments must adhere to the principles of HIV prevention community planning, as contained in this document.

4. Provide an epidemiologic profile of the HIV prevention community planning group's jurisdiction to assist the group in establishing program priorities based on the extent, distribution, and impact of the HIV/AIDS epidemic. The profile should compile, analyze, and synthesize data from a variety of sources (demographic and socioeconomic data, reported AIDS cases, reported HIV infections from areas with confidential reporting, HIV sero prevalence and sero incidence surveys/studies [where available], HIV risk behaviors and surrogate markers for HIV risk behaviors, e.g., sexually transmitted disease (STD) and teen pregnancy rates and information on drug use.) Further, the profile should include a narrative explanation of all data provided and a summary of key findings.

5. Provide expertise and technical assistance, including ongoing training on HIV prevention planning, STD treatment and the interpretation of epidemiologic, behavioral, and evaluation data, to ensure that the planning process is comprehensive and evidence based.

6. Distribute widely the comprehensive HIV prevention plan and utilize existing networks to promote linkages and coordination among local

HIV prevention service providers, public health agencies, STD treatment clinics, community planning groups, and behavioral and social scientists who are either in the local area or who are familiar with local prevention needs, issues, and at-risk populations.

7. Develop an application for HIV prevention cooperative agreement funds, based on the comprehensive HIV prevention plan(s) developed through the HIV prevention community planning process, seek review of the application and letter(s) of concurrence/nonconcurrence from the community planning group(s), and allocate resources based on the plan's priorities.

8. Operationalize and implement HIV prevention services/activities outlined in the comprehensive plan including awarding and administering HIV prevention funds.

9. Administer HIV prevention funds awarded under the cooperative agreement, ensuring that funds are awarded to contractors within 90 days of the time that the health department receives notice of grant award from CDC. Monitor contractor activities and document contractor compliance.

10. Ensure that technical assistance is provided to assist health departments and community-based providers in the areas of program planning, implementation, and evaluation as identified in the comprehensive HIV prevention plan. Health departments should meet these needs by drawing on expertise from a variety of sources (e.g., the CDC-supported TA network, health departments, academia, professional and other national organizations, and non-governmental organizations).

11. Administer and coordinate public funds from a variety of sources, including Federal, State, and local agencies, to prevent HIV transmission and reduce associated morbidity and mortality.

12. Ensure program effectiveness through specific program monitoring and evaluation activities. This may include conducting or contracting for process and outcome evaluation studies, providing technical assistance in evaluation, or ensuring the provision of evaluation technical assistance to funding recipients.

13. Provide periodic feedback to the community planning group on the successes and barriers encountered in implementing HIV prevention interventions.

HIV Prevention Community Planning Groups

The role of the planning group(s) in the HIV prevention community planning process is to:

1. Elect a community co-chair to work with the co-chair designated by the health department.

2. Determine the technical assistance needs of the community planning group to enable them to execute an effective community planning process.

3. Carefully review available epidemiologic, evaluation, behavioral and social science, cost and cost-effectiveness, and needs assessment data and other information required to prioritize HIV prevention needs.

4. Identify unmet HIV prevention needs within defined populations.

5. Prioritize HIV prevention needs by target populations and propose high priority strategies and interventions.

6. Identify the technical assistance needs of community-based providers in the areas of planning, implementing, and evaluating prevention interventions.

7. Assess how well the priorities outlined in the plan are represented in the health department's application to CDC for Federal HIV prevention funds.

8. Community planning groups must focus primarily on the tasks of planning, as described above. Whether or not community planning groups take on additional tasks beyond those described in this document is determined locally by the health department and the community planning group (see Definition of HIV Prevention Community Planning). The planning process should be flexible, taking a long-term approach and negotiating meaningful tasks for the planning group that contribute and enhance the comprehensive plan. The important, overall goal of HIV prevention community planning is to have in place a comprehensive HIV prevention plan that is current, evidence based, adaptable as new information becomes available, tailored to the specific needs of each jurisdiction, and widely distributed in an effort to provide a road map for prevention that can be used by all prevention providers in the jurisdiction.

Shared Responsibilities Between Health Departments and HIV Prevention Community Planning Groups

Together, the health department and the community planning group should:

1. Develop and implement policies and procedures that clearly address and outline systems for regularly re-examining:

a. Planning group composition, selection, appointment, and terms of office to ensure that all planning group(s) reflect, as much as possible, the population characteristics of the epidemic in State and local jurisdictions in terms of age, race/ethnicity, gender, sexual orientation, geographic distribution, and risk for HIV infection;

b. Roles and responsibilities of the community planning group, its members, and its various components (e.g., subcommittees, workgroups, regional groups, etc.);

c. Methods for reaching decisions; attendance at meetings; resolution of disputes identified in planning deliberations; and resolution of conflict(s) of interest for members of the planning group(s).

2. Develop and apply criteria for selecting the individual members of the HIV prevention community planning group(s) within the jurisdiction. Special emphasis should be placed on procedures for identifying representatives of socioeconomically marginalized groups and groups that are under served by existing HIV prevention programs.

3. Determine the most effective mechanisms for input into the HIV prevention community planning process. The process must be structured in such a way that it incorporates and addresses needs and priorities identified at the community level (i.e., the level closest to the problem or need to be addressed).

4. Provide a thorough orientation for all new members, as soon as possible after appointment. New members should understand:

a. The roles, responsibilities, and principles outlined in this document;

b. The procedures and ground rules used in all deliberations and decision making; and

c. The specific policies and procedures for resolving disputes and avoiding conflict of interests that are consistent with the principles of this guidance and are developed with input from all parties.

5. Determine the distribution of planning funds to (a) support planning group meetings, public meetings, and other means for obtaining community input; (b) facilitate involvement of all participants in the planning process, particularly those persons with and at risk for HIV infection; (c) support capacity development for inclusion, representation, and parity of community representatives and for other planning group members to participate effectively in the process; (d) provide technical assistance to health departments and community planning groups by outside experts; (e) support planning infrastructure for the HIV prevention community planning process; (f) collect, analyze, and disseminate relevant data; and (g) evaluate the community planning process.

6. Consider what additional data are needed for decision-making about priority needs, and propose methods for obtaining the data.

7. Develop goals for HIV prevention strategies and interventions in defined target populations.

8. Develop, update annually, and disseminate the comprehensive HIV prevention plan.

9. If there are multiple community planning groups in the jurisdiction, integrate multiple HIV community prevention plans into a project-wide comprehensive HIV prevention plan.

10. Foster integration of the HIV prevention community planning process with other relevant planning efforts. Consider how the following are addressed within the Comprehensive HIV prevention plan:

a. HIV prevention interventions;

b. Early intervention, primary care, and other HIV-related services;

c. STD, TB, and substance abuse prevention and treatment;

d. Women's health services;

e. Mental health services; and

f. Other public health needs.

Centers for Disease Control and Prevention

The role of CDC in the HIV prevention community planning process is to:

1. Provide leadership in the national design, implementation, and evaluation of HIV prevention community planning.

2. Collaborate with health departments, community planning groups, national organizations, Federal agencies, and academic institutions to ensure the provision of technical/program assistance and training for the HIV prevention community planning process. The CDC project officer is key to this collaboration. He/she works with the health department and the community co-chairs to provide technical/program assistance for the community planning process, including discussing roles and responsibilities of community planning participants, disseminating CDC documents, and responding to direct inquiries to ensure consistent interpretation of the guidance.

3. Provide technical/program assistance through a variety of mechanisms to help recipients understand how to (a) ensure parity, inclusion, and representation of all members throughout the community planning process; (b) analyze epidemiologic, behavioral and other relevant data to assess the impact and extent of the HIV/AIDS epidemic in defined populations; (c) conduct needs assessments and prioritize unmet HIV prevention needs; (d) identify and evaluate effective and cost-effective HIV prevention activities for these priority populations; (e) provide access to needed behavioral and social science expertise; (f) identify and manage dispute and conflict of interest issues; and (g) evaluate the community planning process.

4. Require that application content submitted by HIV prevention cooperative agreement recipients for HIV prevention community planning funds is in accordance with the principles and the roles and responsibilities outlined in this guidance.

5. Monitor the HIV prevention community planning process, especially around the five core objectives.

6. Require as a condition for award of cooperative agreement funds that recipients' applications are in accordance with the comprehensive plan developed through the HIV prevention community planning process or include an acceptable letter of justification.

7. Identify the essential components of a comprehensive HIV prevention program.

8. Collaborate with health departments in evaluating HIV prevention programs.

9. Collaborate with other Federal agencies (particularly the National Institutes of Health, the Substance Abuse and Mental Health Services Administration, and the Health Resources and Services Administration) in promoting the transfer of new information and emerging prevention technologies or approaches (i.e., epidemiologic, biomedical, operational, behavioral, or evaluative) to health departments and other prevention partners, including non-governmental organizations.

10. Compile annually a report on the projected expenditures of HIV prevention cooperative agreement funds by specific strategies and interventions. Collaborate with other prevention partners in improving and integrating fiscal tracking systems.

Accountability

CDC is committed to the concept of HIV prevention community planning as outlined in this guidance. In summary, CDC expects that:

1. Health departments will support and facilitate the community planning process;

2. Community planning groups will develop plans in which they have prioritized (rank ordered) HIV prevention needs, including populations and interventions;

3. Health departments will reflect these priorities in their applications to CDC and implement effective HIV prevention programs based on the comprehensive HIV prevention plan; and

4. Community planning groups will review the entire application for their jurisdiction, including the budget, prior to writing letters of concurrence and nonconcurrence.

CDC will continue to conduct external reviews of health department HIV prevention cooperative agreement applications and comprehensive HIV prevention plans to monitor the progress health departments and community planning groups are making in meeting these expectations. These reviews will focus on whether or not:

1. A jurisdiction's planning process is in compliance with this guidance and the five core objectives;

2. Priority populations and recommended interventions identified in the comprehensive HIV prevention plan are consistent with the epidemiologic profile, needs assessment, and behavioral/social science data presented in the plan;

3. Proposed prevention program objectives, activities, and budget in the application are consistent with the comprehensive HIV prevention plan; and

4. Any discrepancies noted are adequately justified.

CDC will review the recommendations provided by the External Reviewers and consider them when making decisions concerning issues such as funding restrictions and conditions, as well as detailed plans of technical assistance.

Department of Education

Safe and Drug-Free Schools and Communities National Program—Federal Activities Grants Program; Notice

VOL 63 ISS 96 MAY 19 1998 UMI

DEPARTMENT OF EDUCATION

[CFDA NO.: 84.184G & J]

Safe and Drug-Free Schools and Communities National Programs—Federal Activities Grants Program

AGENCY: Department of Education.

ACTION: Notice of Proposed Priorities and Selection Criteria for Fiscal Year 1998.

SUMMARY: The Secretary announces proposed priorities and selection criteria for fiscal year (FY) 1998 under the Safe and Drug-Free Schools and Communities (SDFSC) National Programs Federal Activities Grants Program. The Secretary takes this action to focus Federal financial assistance on identified national needs to promote the creation of safe and orderly learning environments for all students and to encourage the development of systems to collect data related to youth drug use and violent behavior.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding these proposed priorities. All comments submitted in response to this notice will be available for public inspection, during and after the comment period, in Room 603, Portals Building, 1250 Maryland Avenue, SW, Washington, DC, between the hours of 9:00 a.m. and 4:30 p.m., Eastern time, Monday through Friday of each week except Federal holidays.

On request, the Department supplies an appropriate aid, such as a reader or print magnifier, to an individual with a disability who needs assistance to review the comments. An individual with a disability who wants to schedule an appointment for this type of aid may call (202) 205–8113 or (202) 260–9895. An individual who uses a TDD may call the Federal Information Relay Service at 1–800–877–8339, between 8 a.m. and 8 p.m. Eastern time, Monday through Friday.

DATES: Comments must be received by the Department on or before June 18, 1998.

ADDRESSES: All comments concerning these proposed priorities should be addressed to Ethel Jackson, U.S. Department of Education, 600 Maryland Avenue, SW., Suite 603, Portals Building, Washington, DC 20202–6123. Comments may also be sent through the Internet to: comments@ed.gov. You must include the term "Federal Activities Grant Program" in the subject line of your electronic message.

FOR FURTHER INFORMATION CONTACT: Ethel Jackson, Safe and Drug-Free Schools Programs, U.S. Department of Education, 600 Independence Avenue, SW., Room 603, Portals, Washington, DC 20202–6123. Telephone: (202) 260–3954. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8:00 a.m. and 8:00 p.m., Eastern time, Monday through Friday.

Individuals with disabilities may obtain this document in an alternate format (e.g., Braille, large print, audiotape, or computer diskette) on request to the contact person listed above.

Note: This notice of proposed priorities and selection criteria does not solicit applications. A notice inviting applications under this competition will be published in the **Federal Register** concurrent with or following the publication of the notice of final priorities.

SUPPLEMENTARY INFORMATION:

This notice contains two proposed priorities and selection criteria for fiscal year 1998. Under absolute priority one (CFDA 84.184G, State and Local Educational Agency Drug and Violence Prevention Data Collection), the Secretary may make grant awards for up to 24 months. Under absolute priority number two (CFDA 84.184J, Model Demonstration Program), the Secretary may award cooperative agreements for up to 60 months. Cooperative agreements funded through this priority will serve as national demonstration sites to test strategies, assess effectiveness, and make a major contribution to the development and dissemination of models and components of models which can be used by school districts and other youth-serving agencies nationwide.

Priorities

Under 34 CFR 75.105(c)(3) and the Safe and Drug-Free Schools and Communities Act of 1994, the Secretary gives an absolute preference to applications that meet one of the following priorities. The Secretary funds under this competition only applications that meet one of these absolute priorities.

Absolute Priority 1 and Selection Criteria—State and Local Educational Agency Drug and Violence Prevention Data Collection (CFDA 84.184G)

Under this priority, applicants must propose projects that—

(1) Develop, improve, expand, or enhance the collection of data related to youth drug use and violence; and

(2) Develop and implement processes to ensure that high-quality data are used to form policy, assess needs, select interventions, and assess the success of drug and violence prevention activities funded under the SDFSC State Grants Program. Projects may be State-wide in scope or limited to an individual local educational agency, or a consortium of local educational agencies, with a student enrollment that exceeds 30,000.

Projects must address drug and violence prevention data for students in general, not just for a sub-set of the population (e.g., non-English speaking students or hearing-impaired students). To be considered for funding under this competition, a project must include—

(1) Concrete plans, with timelines, that detail how the results of new or improved data collection efforts will be incorporated into State and local educational agency efforts to assess needs, select interventions, and assess success of drug and violence prevention efforts;

(2) Outcome-based performance indicators that will be used to judge the success of the project;

(3) A description of how efforts proposed as part of the project have been coordinated with and will not duplicate data collection efforts being implemented by other State or local agencies; and

(4) If the applicant is other than a State or local educational agency, evidence of commitment from the State educational agency (for State-wide projects) or from the superintendent of schools (for local projects).

Selection Criteria

(a)(1) The Secretary uses the following selection criteria to evaluate proposals submitted under this priority.

The maximum score for all of the criteria in this section is 100 points.

The maximum score for each criterion is indicated in parentheses with the criterion.

(b) *The criteria.*—

1. *Need for project.* (15 points)

In determining the need for the proposed project, the following factors are considered:

(a) The magnitude of the need for the services to be provided or the activities to be carried out by the proposed project.

(b) The extent to which specific gaps or weaknesses in services, infrastructure, or opportunities have been identified and will be addressed by the proposed project, including the nature and magnitude of those gaps or weaknesses.

2. *Significance.* (25 points)

In determining the significance of the proposed project, the following factors are considered:

(a) The significance of the problem or issues to be addressed by the proposed project.

(b) The likelihood that the proposed project will result in system change or improvement.

(c) The extent to which the proposed project is likely to build local capacity to provide, improve, or expand services that address the needs of the target population.

3. *Quality of the project design.* (25 points)

In determining the quality of the design of the proposed project, the following factors are considered:

(a) The extent to which the goals, objectives, and outcomes to be achieved by the proposed project are clearly specified and measurable.

(b) The extent to which the proposed project is designed to build capacity and yield results that will extend beyond the period of Federal financial assistance.

(c) The extent to which the proposed project will be coordinated with similar or related efforts, and with other appropriate community, State and Federal resources.

4. *Adequacy of resources.* (15 points)

In determining the adequacy of resources for the proposed projects, the following factors are considered:

(a) The extent to which the costs are reasonable in relation to the objectives, design, and potential significance of the proposed project.

(b) The potential for the incorporation of project purposes, activities or benefits into the ongoing program of the agency or organization at the end of Federal funding.

5. *Quality of the management plan* (10 points)

In determining the quality of the management plan for the proposed project, the following factor is considered:

(a) The adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, time lines, and milestone for accomplishing project tasks.

6. *Quality of the project evaluation.* (10 points)

In determining the quality of the evaluation to be conducted for the proposed project, the following factor is considered:

(a) The extent to which the methods of evaluation will provide performance feedback and permit periodic assessment of progress toward achieving intended outcomes.

Absolute Priority #2 and Selection Criteria—Model Demonstration Programs to Create Safe and Orderly Learning Environments in Schools (CFDA 84.184J)

Projects proposed under this priority are expected to comprehensively address multiple factors that predispose youth to drug use and violent behavior. Therefore, projects will not be funded for: (a) basic support of existing programs; (b) replication of a single program of demonstrated effectiveness, or (c) less than $500,000 or more than $1 million.

Projects supported under this priority will be funded for implementation in one site for three years and for replication in additional sites for two years. Projects will be reviewed during the third year to examine, among other factors, the degree to which the evaluation findings at the original site are promising, and the quality of the evaluation design proposed to test the model at other sites during years four and five. Projects which fail to demonstrate effectiveness at the original site will not be funded to test the model's replication in other sites.

Under this priority, applicants must propose projects that:

(A) Develop and implement a model with specific components or strategies that are based on theory, research, or evaluation data;

(B) Identify outcomes intended to result in behavioral change in youth served and other indicators of the effectiveness of the model (e.g. improved bonding to school and to the community, reductions in disciplinary referrals, absence of firearms and other weapons in schools, acquisition of pro-social skills, and reductions in alcohol, tobacco, and other drug use by the target population);

(C) Evaluate the model by using multiple measures to determine the effectiveness of the model and its components or strategies; and

(D) Produce detailed documentation of procedures and materials that would enable others to replicate the model as implemented at the original site.

Applicants must provide the following : (1) recent and historical data on drug use by youth; (2) data that describes patterns of violence and disruptive acts in schools; (3) rates of referral to juvenile justice authorities for bringing weapons to school, drug use or possession and violent criminal acts; (4) evidence of gang and violence problems in the target community, and (5) demographic information for the geographic area in which the school is located.

Selection Criteria

(a)(1) The Secretary uses the following selection criteria to evaluate proposals submitted under this priority.

The maximum score for all of the criteria in this section is 100 points.

(2) The maximum score for each criterion is indicated in parentheses.

(b) *The criteria.*—

1. *Significance* (30 points)

In determining the significance of the proposed project, the following factors are considered:

(a) The potential contribution of the proposed project to the development and advancement of theory, knowledge, and practices in the field of study.

(b) The extent to which the proposed project is likely to yield findings that may be utilized by other appropriate agencies and organizations.

(c) The potential replicability of the proposed project or strategies, including, as appropriate, the potential for implementation in a variety of settings.

(2) *Quality of the project design* (25 points)

In determining the quality of the design of the proposed project, the following factors are considered:

(a) The extent to which the goals, objectives, and outcomes to be achieved by the proposed project are clearly specified and measurable.

(b) The extent to which there is a conceptual framework underlying the proposed research or demonstration activities and the quality of that framework.

(c) The extent to which the design of the proposed project reflects up-to-date knowledge from research and effective practice.

(d) The quality of the proposed demonstration design and procedures for documenting project activities and results;

(e) The extent to which the proposed project represents an exceptional approach to the priority or priorities established for the competition.

3. *Adequacy of resources* (10 points)

In determining the adequacy of resources for the proposed project, the following factors are considered:

(a) The relevance and demonstrated commitment of each partner in the proposed project to the implementation and success of the project.

(b) The extent to which the costs are reasonable in relation to the objectives, design and potential significance of the proposed project.

4. *Quality of the management plan* (10 points)

In determining the quality of the management plan, the following factors are considered:

UMI
VOL
63
ISS
96
MY
19
1998
UMI

(a) The adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks.

(b) The extent to which the time commitments of the project director and principal investigator and other key project personnel are appropriate and adequate to meet the objectives of the proposed project.

5. *Quality of the project evaluation* (25 points)

In determining the quality of the evaluation, the following factors are considered:

(a) The extent to which the methods of the evaluation are thorough, feasible, and appropriate to the goals, objectives and outcomes of the proposed project.

(b) The extent to which the methods of evaluation include the use of objective performance measures that are clearly related to the intended outcomes of the project and will produce quantitative and qualitative data to the extent possible.

Title 3—

The President

Executive Order 13083 of May 14, 1998

Federalism

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in order to guarantee the division of governmental responsibilities, embodied in the Constitution, between the Federal Government and the States that was intended by the Framers and application of those principles by the Executive departments and agencies in the formulation and implementation of policies, it is hereby ordered as follows:

Section 1. *Definitions.* For purposes of this order:

(a) "State" or "States" refer to the States of the United States of America, individually or collectively, and, where relevant, to State governments, including units of local government and other political subdivisions established by the States.

(b) "Policies that have federalism implications" refers to Federal regulations, proposed legislation, and other policy statements or actions that have substantial direct effects on the States or on the relationship, or the distribution of power and responsibilities, between the Federal Government and the States.

(c) "Agency" means any authority of the United States that is an "agency" under 44 U.S.C. 3502(1), other than those considered to be independent regulatory agencies, as defined in 44 U.S.C. 3502(5).

Sec. 2. *Fundamental Federalism Principles.* In formulating and implementing policies that have federalism implications, agencies shall be guided by the following fundamental federalism principles:

(a) The structure of government established by the Constitution is premised upon a system of checks and balances.

(b) The Constitution created a Federal Government of supreme, but limited, powers. The sovereign powers not granted to the Federal Government are reserved to the people or to the States, unless prohibited to the States by the Constitution.

(c) Federalism reflects the principle that dividing power between the Federal Government and the States serves to protect individual liberty. Preserving State authority provides an essential balance to the power of the Federal Government, while preserving the supremacy of Federal law provides an essential balance to the power of the States.

(d) The people of the States are at liberty, subject only to the limitations in the Constitution itself or in Federal law, to define the moral, political, and legal character of their lives.

(e) Our constitutional system encourages a healthy diversity in the public policies adopted by the people of the several States according to their own conditions, needs, and desires. States and local governments are often uniquely situated to discern the sentiments of the people and to govern accordingly.

(f) Effective public policy is often achieved when there is competition among the several States in the fashioning of different approaches to public policy issues. The search for enlightened public policy is often furthered when individual States and local governments are free to experiment with a variety of approaches to public issues. Uniform, national approaches to

public policy problems can inhibit the creation of effective solutions to those problems.

(g) Policies of the Federal Government should recognize the responsibility of—and should encourage opportunities for—States, local governments, private associations, neighborhoods, families, and individuals to achieve personal, social, environmental, and economic objectives through cooperative effort.

Sec. 3. *Federalism Policymaking Criteria.* In addition to adhering to the fundamental federalism principles set forth in section 2 of this order, agencies shall adhere, to the extent permitted by law, to the following criteria when formulating and implementing policies that have federalism implications:

(a) There should be strict adherence to constitutional principles. Agencies should closely examine the constitutional and statutory authority supporting any Federal action that would limit the policymaking discretion of States and local governments, and should carefully assess the necessity for such action.

(b) Agencies may limit the policymaking discretion of States and local governments only after determining that there is constitutional and legal authority for the action.

(c) With respect to Federal statutes and regulations administered by States and local governments, the Federal Government should grant States and local governments the maximum administrative discretion possible. Any Federal oversight of such State and local administration should not unnecessarily intrude on State and local discretion.

(d) It is important to recognize the distinction between matters of national or multi-state scope (which may justify Federal action) and matters that are merely common to the States (which may not justify Federal action because individual States, acting individually or together, may effectively deal with them). Matters of national or multi-state scope that justify Federal action may arise in a variety of circumstances, including:

(1) When the matter to be addressed by Federal action occurs interstate as opposed to being contained within one State's boundaries.

(2) When the source of the matter to be addressed occurs in a State different from the State (or States) where a significant amount of the harm occurs.

(3) When there is a need for uniform national standards.

(4) When decentralization increases the costs of government thus imposing additional burdens on the taxpayer.

(5) When States have not adequately protected individual rights and liberties.

(6) When States would be reluctant to impose necessary regulations because of fears that regulated business activity will relocate to other States.

(7) When placing regulatory authority at the State or local level would undermine regulatory goals because high costs or demands for specialized expertise will effectively place the regulatory matter beyond the resources of State authorities.

(8) When the matter relates to Federally owned or managed property or natural resources, trust obligations, or international obligations.

(9) When the matter to be regulated significantly or uniquely affects Indian tribal governments.

Sec. 4. *Consultation.* (a) Each agency shall have an effective process to permit elected officials and other representatives of State and local governments to provide meaningful and timely input in the development of regulatory policies that have federalism implications.

(b) To the extent practicable and permitted by law, no agency shall promulgate any regulation that is not required by statute, that has federalism implica-

VOL 63 ISS 96 MAY 19 1998 UMI

tions, and that imposes substantial direct compliance costs on States and local governments, unless:

(1) funds necessary to pay the direct costs incurred by the State or local government in complying with the regulation are provided by the Federal Government; or

(2) the agency, prior to the formal promulgation of the regulation,

(A) in a separately identified portion of the preamble to the regulation as it is to be issued in the **Federal Register**, provides to the Director of the Office of Management and Budget a description of the extent of the agency's prior consultation with representatives of affected States and local governments, a summary of the nature of their concerns, and the agency's position supporting the need to issue the regulation; and

(B) makes available to the Director of the Office of Management and Budget any written communications submitted to the agency by States or local governments.

Sec. 5. *Increasing Flexibility for State and Local Waivers.* (a) Agencies shall review the processes under which States and local governments apply for waivers of statutory and regulatory requirements and take appropriate steps to streamline those processes.

(b) Each agency shall, to the extent practicable and permitted by law, consider any application by a State or local government for a waiver of statutory or regulatory requirements in connection with any program administered by that agency with a general view toward increasing opportunities for utilizing flexible policy approaches at the State or local level in cases in which the proposed waiver is consistent with applicable Federal policy objectives and is otherwise appropriate.

(c) Each agency shall, to the extent practicable and permitted by law, render a decision upon a complete application for a waiver within 120 days of receipt of such application by the agency. If the application for a waiver is not granted, the agency shall provide the applicant with timely written notice of the decision and the reasons therefor.

(d) This section applies only to statutory or regulatory requirements that are discretionary and subject to waiver by the agency.

Sec. 6. *Independent Agencies.* Independent regulatory agencies are encouraged to comply with the provisions of this order.

Sec. 7. *General Provisions.* (a) This order is intended only to improve the internal management of the executive branch and is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or equity by a party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

(b) This order shall supplement but not supersede the requirements contained in Executive Order 12866 ("Regulatory Planning and Review"), Executive Order 12988 ("Civil Justice Reform"), and OMB Circular A–19.

(c) Executive Order 12612 of October 26, 1987, and Executive Order 12875 of October 26, 1993, are revoked.

(d) The consultation and waiver provisions in sections 4 and 5 of this order shall complement the Executive order entitled, "Consultation and Coordination with Indian Tribal Governments," being issued on this day.

Executive Order 13084 of May 14, 1998

Consultation and Coordination With Indian Tribal Governments

The United States has a unique legal relationship with Indian tribal governments as set forth in the Constitution of the United States, treaties, statutes, Executive orders, and court decisions. Since the formation of the Union, the United States has recognized Indian tribes as domestic dependent nations under its protection. In treaties, our Nation has guaranteed the right of Indian tribes to self-government. As domestic dependent nations, Indian tribes exercise inherent sovereign powers over their members and territory. The United States continues to work with Indian tribes on a government-to-government basis to address issues concerning Indian tribal self-government, trust resources, and Indian tribal treaty and other rights.

Therefore, by the authority vested in me as President by the Constitution and the laws of the United States of America, and in order to establish regular and meaningful consultation and collaboration with Indian tribal governments in the development of regulatory practices on Federal matters that significantly or uniquely affect their communities; to reduce the imposition of unfunded mandates upon Indian tribal governments; and to streamline the application process for and increase the availability of waivers to Indian tribal governments; it is hereby ordered as follows:

Section 1. *Definitions.* For purposes of this order:

(a) "State" or "States" refer to the States of the United States of America, individually or collectively, and, where relevant, to State governments, including units of local government and other political subdivisions established by the States.

(b) "Indian tribe" means an Indian or Alaska Native tribe, band, nation, pueblo, village, or community that the Secretary of the Interior acknowledges to exist as an Indian tribe pursuant to the Federally Recognized Indian Tribe List Act of 1994, 25 U.S.C. 479a.

(c) "Agency" means any authority of the United States that is an "agency" under 44 U.S.C. 3502(1), other than those considered to be independent regulatory agencies, as defined in 44 U.S.C. 3502(5).

Sec. 2. *Policymaking Criteria.* In formulating policies significantly or uniquely affecting Indian tribal governments, agencies shall be guided, to the extent permitted by law, by principles of respect for Indian tribal self-government and sovereignty, for tribal treaty and other rights, and for responsibilities that arise from the unique legal relationship between the Federal Government and Indian tribal governments.

Sec. 3. *Consultation.* (a) Each agency shall have an effective process to permit elected officials and other representatives of Indian tribal governments to provide meaningful and timely input in the development of regulatory policies on matters that significantly or uniquely affect their communities.

(b) To the extent practicable and permitted by law, no agency shall promulgate any regulation that is not required by statute, that significantly or uniquely affects the communities of the Indian tribal governments, and that imposes substantial direct compliance costs on such communities, unless:

(1) funds necessary to pay the direct costs incurred by the Indian tribal government in complying with the regulation are provided by the Federal Government; or

(2) the agency, prior to the formal promulgation of the regulation,

(A) in a separately identified portion of the preamble to the regulation as it is to be issued in the **Federal Register**, provides to the Director of the Office of Management and Budget a description of the extent of the agency's prior consultation with representatives of affected Indian tribal governments, a summary of the nature of their concerns, and the agency's position supporting the need to issue the regulation; and

(B) makes available to the Director of the Office of Management and Budget any written communications submitted to the agency by such Indian tribal governments.

Sec. 4. *Increasing Flexibility for Indian Tribal Waivers.* (a) Agencies shall review the processes under which Indian tribal governments apply for waivers of statutory and regulatory requirements and take appropriate steps to streamline those processes.

(b) Each agency shall, to the extent practicable and permitted by law, consider any application by an Indian tribal government for a waiver of statutory or regulatory requirements in connection with any program administered by that agency with a general view toward increasing opportunities for utilizing flexible policy approaches at the Indian tribal level in cases in which the proposed waiver is consistent with the applicable Federal policy objectives and is otherwise appropriate.

(c) Each agency shall, to the extent practicable and permitted by law, render a decision upon a complete application for a waiver within 120 days of receipt of such application by the agency. The agency shall provide the applicant with timely written notice of the decision and, if the application for a waiver is not granted, the reasons for such denial.

(d) This section applies only to statutory or regulatory requirements that are discretionary and subject to waiver by the agency.

Sec. 5. *Cooperation in developing regulations.* On issues relating to tribal self-government, trust resources, or treaty and other rights, each agency should explore and, where appropriate, use consensual mechanisms for developing regulations, including negotiated rulemaking.

Sec. 6. *Independent agencies.* Independent regulatory agencies are encouraged to comply with the provisions of this order.

Sec. 7. *General provisions.* (a) This order is intended only to improve the internal management of the executive branch and is not intended to, and does not, create any right, benefit, or trust responsibility, substantive or procedural, enforceable at law or equity by a party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

(b) This order shall supplement but not supersede the requirements contained in Executive Order 12866 ("Regulatory Planning and Review"), Executive Order 12988 ("Civil Justice Reform"), OMB Circular A–19, and the Executive Memorandum of April 29, 1994, on Government-to-Government Relations with Native American Tribal Governments.

(c) This order shall complement the consultation and waiver provisions in sections 4 and 5 of the Executive order, entitled "Federalism," being issued on this day.

(d) This order shall be effective 90 days after the date of this order.

Title 3—

The President

Notice of May 18, 1998

Continuation of Emergency With Respect to Burma

On May 20, 1997, I issued Executive Order 13047, effective at 12:01 a.m. eastern daylight time on May 21, 1997, certifying to the Congress under section 570(b) of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1997 (Public Law 104–208), that the Government of Burma has committed large-scale repression of the democratic opposition in Burma after September 30, 1996, thereby invoking the prohibition on new investment in Burma by United States persons, contained in that section. I also declared a national emergency to deal with the threat posed to the national security and foreign policy of the United States by the actions and policies of the Government of Burma, invoking the authority, *inter alia*, of the International emergency Economic Powers Act (50 U.S.C. 1701-1706).

The national emergency declared on May 20, 1997, must continue beyond May 20, 1998, as long as the Government of Burma continues its policies of committing large-scale repression of the democratic opposition in Burma. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing the national emergency with respect to Burma. This notice shall be published in the **Federal Register** and transmitted to the Congress.

William J. Clinton

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

UMI

VOL 63 ISS 97 MAY 20 1998

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512-1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $555, or $607 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $220. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: June 16, 1998 at 9:00 am.
WHERE: Office of the Federal Register
Conference Room
800 North Capitol Street, NW.
Washington, DC
(3 blocks north of Union Station Metro)
RESERVATIONS: 202–523–4538

Title 3—

The President

Proclamation 7096 of May 14, 1998

National Safe Boating Week, 1998

By the President of the United States of America

A Proclamation

Recreational boating is one of our Nation's most popular and most rewarding pastimes. Blessed with an abundance of scenic rivers, lakes, streams, and coastal waters, our country is a haven for people who love the water. More than 78 million Americans take to the water each year with family and friends to appreciate nature, relax, and simply escape from the cares of the day. However, while boating can be a wonderful recreational activity, it can also be dangerous for the unprepared.

Tragically, more than 700 Americans die each year in boating-related accidents. In most cases, human error and poor judgment are to blame. Drinking or taking drugs while operating a boat, ignoring safe navigation rules, and failing to wear a life preserver are all examples of poor judgment that can lead to loss of life. The U.S. Coast Guard estimates that last year alone, 80 percent of boating-related fatalities could have been prevented had life jackets been worn. So, the theme of this year's Safe Boating Week, "Boat Smart from the Start! Wear Your Life Jacket," is truly a matter of life and death. I encourage all Americans to wear life preservers every time they are on the water—this simple precaution can save hundreds of lives each year.

The National Safe Boating Council, the U.S. Coast Guard, other Federal agencies, State and local governments, and many recreational boating organizations actively promote boating safety and work to save lives on the water. However, it is ultimately up to each individual to take responsibility for his or her own safety and for the safety of friends and family. This year, during National Safe Boating Week, I urge all Americans who use our Nation's waterways to practice safe boating and to educate others about the importance of wearing life jackets, abstaining from drugs and alcohol, and following safe navigation rules. Together we can save lives and ensure that boating remains an enjoyable activity—for ourselves and for our loved ones.

In recognition of the importance of safe boating practices, the Congress, by joint resolution approved June 4, 1958 (36 U.S.C. 161), as amended, has authorized and requested the President to proclaim annually the seven-day period prior to Memorial Day as "National Safe Boating Week."

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, do hereby proclaim May 16 through May 22, 1998, as National Safe Boating Week. I encourage the Governors of the 50 States and the Commonwealth of Puerto Rico, and officials of other areas subject to the jurisdiction of the United States, to join in observing this occasion and to urge all Americans to practice safe boating not only during this week, but also throughout the year.

Presidential Determination No. 98–22 of May 13, 1998

Sanctions Against India for Detonation of a Nuclear Explosive Device

Memorandum for the Secretary of State

In accordance with section 102(b)(1) of the Arms Export Control Act, I hereby determine that India, a non-nuclear-weapon state, detonated a nuclear explosive device on May 11, 1998. The relevant agencies and instrumentalities of the United States Government are hereby directed to take the necessary actions to impose the sanctions described in section 102(b)(2) of that Act.

You are hereby authorized and directed to transmit this determination to the appropriate committees of the Congress and to arrange for its publication in the **Federal Register**.

William J. Clinton

Rules and Regulations

Federal Register
Vol. 63, No. 97
Wednesday, May 20, 1998

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 3017

Governmentwide Debarment and Suspension (Nonprocurement); Delegation of Authority

AGENCY: Office of the Secretary, USDA.

ACTION: Final rule.

SUMMARY: This rule amends 7 CFR part 3017 to permit the Chief of the Forest Service to redelegate the authority to serve as Forest Service nonprocurement debarring or suspending official to the Deputy Chief or an Associate Deputy Chief for the National Forest System.

EFFECTIVE DATE: May 20, 1998.

FOR FURTHER INFORMATION CONTACT: Jim Naylor, Forest Management Staff, Forest Service, USDA, STOP 1105, P.O. Box 96090, Washington, D.C. 20090–6090 (202) 205–0858.

SUPPLEMENTARY INFORMATION: Under the Governmentwide nonprocurement debarment and suspension rules, the authority to act as the Debarring and Suspending Official is vested in the agency head or an official designated by the agency head (53 FR 19161, 19205; May 26, 1988). However, the U.S. Department of Agriculture regulations implementing the Governmentwide nonprocurement debarment and suspension rules (54 FR 4721, 4731; Jan. 30, 1989) provide that the authority to act as a Debarring and Suspending Official may not be delegated below the head of any organizational unit of the U.S. Department of Agriculture.

The time-consuming nature of the Debarring and Suspending Official's duties is inconsistent with the other duties of and demands on the Chief of the Forest Service in overseeing the Forest Service's programs. The Debarring and Suspending Official must personally review the record, conduct informal hearings, and make the decision to suspend, propose debarment, or debar. If there is subsequent litigation, the official may be required to answer depositions or to testify. Moreover, Forest Service debarment and suspension cases are complicated because many deal with indictments for timber theft, collusive bidding, and other serious violations concerning contracts and permits for the use of natural resources.

Therefore, in recognition of the number and complexity of Forest Service nonprocurement debarment and suspension actions, the Secretary is revising the USDA rule to permit the Chief to redelegate the authority to act as the Forest Service nonprocurement Debarring and Suspending Official to a subordinate Forest Service official, namely the Deputy Chief and the Associate Deputy Chiefs for the National Forest System.

Regulatory Impact

This rule relates to internal Department management. As such, this rule has no substantive effect, nor is it subject to prior review by the Office of Management and Budget under Executive Order 12866. Because of its internal nature, this rule also is exempt from further analysis under the Civil Justice Reform Act, the Unfunded Mandates Reform Act of 1995, the Paperwork Reduction Act, and Executive Order 12630.

List of Subjects in 7 CFR Part 3017

Administrative practice and procedure, Grant administration, Grant programs (Agriculture).

Therefore, for the reasons set forth in the preamble, Part 3017 of Title 7 of the Code of Federal Regulations is amended as follows:

PART 3017—GOVERNMENTWIDE DEBARMENT AND SUSPENSION (NONPROCUREMENT) AND GOVERNMENTWIDE REQUIREMENTS FOR A DRUG-FREE WORKPLACE (GRANTS)

1. The authority citation for part 3017 continues to read as follows:

Authority: 5 U.S.C. 301; 41 U.S.C. 701 et seq.; E.O. 12549; 51 FR 6370, 3 CFR, 1986 Comp., p. 189.

2. Section 3017.105 is amended by revising the definitions of *Debarring official* paragraph (2)(i) and *Suspending official* paragraph (2)(i) to read as follows:

§ 3017.15 Definitions.

* * * * *

Debarring official. * * *

(2) * * *

(i) In USDA, the authority to act as a debarring official is not delegated below the agency head, except that in the case of the Forest Service, the Chief may redelegate the authority to act as a debarring official to the Deputy Chief or an Associate Deputy Chief for the National Forest System.

* * * * *

Suspending official. * * *

(2) * * *

(i) In USDA, the authority to act as a suspending official is not delegated below the agency head, except that in the case of the Forest Service, the Chief may redelegate the authority to act as a suspending official to the Deputy Chief or an Associate Deputy Chief for the National Forest System.

* * * * *

Dated: May 12, 1998.

Reba Pittman Evans,

Acting Assistant Secretary, Administration.

AGENCY: Defense Nuclear Facilities Safety Board.

ACTION: Update of FOIA fee schedule.

SUMMARY: The Defense Nuclear Facilities Safety Board is publishing its annual update to the Freedom of Information Act (FOIA) Fee Schedule pursuant to 10 CFR 1703.107(b)(6) of the Board's regulations.

EFFECTIVE DATE: June 1, 1998.

FOR FURTHER INFORMATION CONTACT: Kenneth M. Pusateri, General Manager, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW, Suite 700, Washington, DC 20004–2901, (202) 208–6447.

SUPPLEMENTARY INFORMATION: The FOIA requires each Federal agency covered by the Act to specify a schedule of fees applicable to processing of requests for

agency records. 5 U.S.C. 552(a)(4)(i). On March 15, 1991 the Board published for comment in the **Federal Register** its proposed FOIA Fee Schedule. 56 FR 11114. No comments were received in response to that notice and the Board issued a final Fee Schedule on May 6, 1991.

Pursuant to 10 CFR 1703.107(b)(6) of the Board's regulations, the Board's General Manager will update the Fee Schedule once ever 12 months. Previous Fee Schedule updates were published in the **Federal Register** and went into effect, most recently, on June 1, 1997. 62 FR 30432, June 4, 1997.

Board Action

Accordingly, the Board issues the following schedule of updated fees for services performed in response to FOIA requests:

Defense Nuclear Facilities Safety Board Schedule of Fees for FOIA Services (Implementing 10 CFR § 1703.107(b)(6))

Search or Review Charge: $52 per hour
Copy Charge (paper): $.05 per page, if done in-house, or generally available commercial rate (approximately $.10 per page)
Copy Charge (3.5" diskette): $5.00 per diskette
Copy Charge (audio cassette): $3.00 per cassette
Duplication of Video: $25.00 for each individual videotape; $16.50 for each additional individual videotape
Copy Charge for large documents (e.g., maps, diagrams): Actual commercial rates

Dated: May 31, 1998.

Kenneth M. Pusateri,

General Manager.

FEDERAL HOUSING FINANCE BOARD

12 CFR Part 960

[No. 98–18]

RIN 3069–AA73

Amendment of Affordable Housing Program Regulation

AGENCY: Federal Housing Finance Board.

ACTION: Interim final rule.

SUMMARY: The Federal Housing Finance Board (Finance Board) is amending its regulation governing the operation of the Affordable Housing Program (AHP or Program) to make certain technical revisions to the regulation that would clarify Program requirements and improve the operation of the AHP.

EFFECTIVE DATE: The interim final rule shall be effective on June 19, 1998. The Finance Board will accept written comments on this interim final rule on or before July 20, 1998.

ADDRESSES: Mail comments to Elaine L. Baker, Secretary to the Board, Federal Housing Finance Board, 1777 F Street, N.W., Washington, D.C. 20006. Comments will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT: Richard Tucker, Deputy Director, Compliance Assistance Division, Office of Policy, (202) 408–2848, or Sharon B. Like, Senior Attorney-Advisor, (202) 408–2930, or Roy S. Turner, Attorney-Advisor, (202) 408–2512, Office of General Counsel, Federal Housing Finance Board, 1777 F Street, N.W., Washington, D.C. 20006.

SUPPLEMENTARY INFORMATION:

I. Statutory and Regulatory Background

Section 10(j)(1) of the Federal Home Loan Bank Act (Act) requires each Federal Home Loan Bank (Bank) to establish a Program to subsidize the interest rate on advances to members of the Federal Home Loan Bank System (Bank System) engaged in lending for long-term, low- and moderate-income, owner-occupied and affordable rental housing at subsidized interest rates. *See* 12 U.S.C. 1430(j)(1). The Finance Board is required to promulgate regulations governing the Program. *See id.* The Finance Board's existing regulation governing the operation of the Program is set forth in part 960 of the Finance Board's regulations (AHP regulation). *See* 12 CFR part 960.

On August 4, 1997, the Finance Board published a final rule adopting comprehensive revisions to the AHP regulation, which, among other changes, authorized the 12 Banks, rather than the Finance Board, to approve applications for AHP subsidies beginning January 1, 1998. *See* 62 FR 41812 (Aug. 4, 1997).

In the course of implementing the changes to the Program under the recent revisions to the AHP regulation, the Banks and Finance Board staff have identified a number of technical issues whose resolution would clarify Program requirements and improve the effectiveness of the Program. The Finance Board previously published a list of Questions and Answers prepared by Finance Board staff in order to provide guidance on some of these issues. *See* 62 FR 66977 (Dec. 23, 1997). This interim final rule codifies portions of the Finance Board staff guidance contained in the Questions and Answers and addresses additional technical issues that have arisen in the course of implementing the 1997 revisions to the AHP regulation. Although the interim final rule will become effective 30 days after publication in the **Federal Register**, the Finance Board requests comment on all aspects of the rule during a 60-day comment period.

II. Analysis of Interim Final Rule

A. Definitions—Section 960.1

1. Definition of "Affordable"

Under § 960.5(b)(1) of the current AHP regulation, in order for rental housing to be eligible to be financed by an AHP subsidy, at least 20 percent of the units must be occupied by and affordable for very low-income households. *See* 12 CFR 960.1, 960.5(b)(1). Section 960.1 of the current AHP regulation provides that "affordable" means that "the rent charged to a household for a unit that is committed to be affordable in an AHP application does not exceed 30 percent of the income of a household of the maximum income and size expected, under the commitment made in the AHP application, to occupy the unit (assuming occupancy of 1.5 persons per bedroom or 1.0 person per unit without a separate bedroom)." *See id.* § 960.1 This definition is intended to make clear that the 30 percent-of-income limitation on rent applies to all units in a project which, according to the commitments made in the AHP application, are to be reserved for occupancy by households with incomes at or below 80 percent of the median income for the area. However, subsequent to the adoption of the definition, questions have arisen as to which units in a rental project are subject to the 30 percent-of-income limitation. The revised definition of "affordable" is intended to clarify this issue. The interim final rule defines "affordable" to mean that "the rent charged for a unit which is to be reserved for occupancy by a household with an income at or below 80 percent of the median income for the area, does not exceed 30 percent of the income of a household of the maximum income and size expected, under the commitment made in the AHP application, to occupy the unit (assuming occupancy of 1.5 persons per bedroom or 1.0 person per unit without a separate bedroom)."

THE PAPER AND INK USED IN THE ORIGINAL PUBLICATION MAY AFFECT THE QUALITY OF THE MICROFORM EDITION

2. Definitions of "Low- or Moderate-Income Household" and "Very Low-Income Household" for Housing With Current Occupants

Under § 960.1 of the current AHP regulation, in the case of projects involving the purchase or rehabilitation of occupied rental housing, a household occupying such housing is deemed to be a "very low-income household" if, at the time the purchase or rehabilitation of the housing is completed, the household has an income at or below 50 percent of the median income for the area. *See id.* This provision may make it difficult for the sponsor of such a project to commit to reserve a specific proportion of units for very low-income households because of the uncertainty as to how many of the current occupants will qualify as very low-income households at some future date when the project purchase or rehabilitation is completed. Consequently, the interim final rule provides that current occupants will be deemed to by very low-income households if they have incomes at or below 50 percent of the median income for the area at the time the application for AHP subsidy is submitted to the Bank. The interim final rule makes a parallel change to the definition of "low- or moderate-income household" in § 960.1 of the current AHP regulation.

3. Definition of "Owner-Occupied Unit" as Including Two-to-Four Family Housing

Section 960.1 of the current AHP regulation defines "owner-occupied unit" as a unit in an "owner-occupied project," which is defined as a project involving the purchase, construction, or rehabilitation of owner-occupied housing, including condominiums and cooperative housing, by or for very low- or low- or moderate-income households. *See id.* § 960.1. The interim final clarifies that two-to-four family owner-occupied housing consisting of one owner-occupied unit and one or more rental units constitutes a single owner-occupied unit for purposes of the AHP. The income eligibility and affordability requirements of the AHP regulation do not apply to the rental units in two-to-four family housing.

4. Definition of "Rental Project" as Including Overnight Shelters for Homeless Households

Under § 960.1 of the current AHP regulation, a "rental project" is defined to include "transitional housing for homeless households." *See id.* The interim final rule clarifies that overnight shelters for homeless households also are considered rental housing under the AHP.

B. Terms of Advisory Council Members—Section 960.4(d)

Section 960.4(d) of the current AHP regulation provides that a Bank's board of directors shall appoint Advisory Council members to serve for no more than three consecutive terms of three years each, and such terms shall be staggered to provide continuity in experience and service to the Advisory Council. *See id.* § 960.4(d). The interim final rule restates this requirement to make clear that, as intended by the current AHP regulation, an Advisory Council member's individual term must be three years. The interim final rule also adds language to clarify that an Advisory Council member appointed to fill a vacancy shall be appointed for the unexpired term of his or her predecessor in office and that appointments for the unexpired term of a predecessor shall not count toward the three-term limit.

C. Minimum Eligibility Standards For AHP Projects—Section 960.5

1. Fair Housing Compliance—§ 960.5(b)(9)

Section 960.5(b)(9) of the interim final rule clarifies the requirement in the current AHP regulation that projects, as proposed, must comply with applicable fair housing law requirements and demonstrate how the project will be affirmatively marketed in order to be eligible to receive AHP funds. *See id.* § 960.5(b)(9). The interim final rule is intended to clarify that compliance with any applicable fair housing laws includes compliance with applicable federal and state laws on housing accessibility for the disabled, as well as affirmative marketing requirements under the Fair Housing Act, as they relate to disabled persons.

There are a number of federal and state fair housing laws relating to persons with disabilities that may apply to AHP projects, depending upon: the type of housing or housing design (single-family, multifamily, homeless shelters, buildings with or without elevators, or mixed use buildings); whether the project involves acquisition, rehabilitation or new construction; and whether the project involves federal or state funds. Given the number of different laws governing fair housing and accessibility requirements for the disabled, it is recommended that the appropriate enforcing agencies be consulted for clarification on any specific issue relating to compliance.

2. District Eligibility Requirements—Section 960.5(b)(10)

Section 960.5(b)(10)(i) of the current AHP regulation authorizes a Bank, after consultation with its Advisory Council, to establish one or more of the following additional eligibility requirements for AHP applications: (1) A requirement that the amount of subsidy requested for the project does not exceed limits established by the Bank as to the maximum amount of AHP subsidy available per member each year; or per member, per project, or per project unit in a single funding period; (2) a requirement that the project is located in the Bank's District; or (3) a requirement that the member submitting the application has made use of a credit product offered by the Bank, other than AHP or Community Investment Program (CIP) credit products, within the previous 12 months. *See id.* § 960.5(b)(10)(i). Section 960.5(b)(10)(ii) further provides that District eligibility requirements must apply equally to all members. *See id.* § 960.5(b)(10)(ii).

Several of the Banks would like to have the option to make the use of a minimum amount of Bank credit products a prerequisite for applying for large amounts of AHP subsidy. Under § 960.5(b)(10)(i)(C) of the current AHP regulation, which authorizes the Banks to condition the availability of AHP subsidy upon a member's use of "a" credit product, this option is not now available. *See id.* § 960.5(b)(10)(i)(C). Further, these Banks have proposed that the required level of credit product usage be linked to a member's asset size. For example, a Bank proposes to allow all members to have access to up to $50,000 of AHP subsidy per year, but require members wishing to apply for more than $50,000 to have outstanding average daily balances of Bank credit products in an amount equal to at least 1.5 percent of the member's total assets. In support of this kind of requirement, the Banks have argued that because AHP subsidies are derived from a Bank's earnings, fairness requires that availability of subsidies be linked to the extent to which a member contributes to the Bank's earnings through the purchase of other Bank credit products. These Banks argue that a member's use of a single Bank credit product does not make a meaningful contribution to Bank earnings.

Accordingly, the interim final rule revises the language of § 960.5(b)(10)(i)(C) of the current AHP regulation to permit a Bank to establish a requirement that a member submitting an AHP application has made use of a minimum amount of a credit product

MAY AFFECT THE QUALITY OF THE MICROFORM EDITION

offered by the Bank, other than AHP or CIP credit products, within the previous 12 months, provided that such a minimum threshold for credit product usage established by a Bank shall not exceed 1.5 percent of a member's total assets, and all members shall have access to some amount of AHP subsidy, as determined by the Bank, regardless of whether they meet the Bank's minimum threshold for credit product usage.

Section 960.5(b)(10)(ii) of the current AHP regulation provides that "District eligibility requirements must apply equally to all members." *See id.* § 960.5(b)(10)(ii). The interim final rule revises this language to clarify that "[a]ny limit on the amount of AHP subsidy available per member must result in equal amounts of AHP subsidy available to all members." This requirement is intended to ensure that such limits are not structured or applied in a discriminatory manner.

D. Procedure for Approval of Applications for Funding—Section 960.6

1. Instructions for the Competitive Scoring Process—Section 960.6(b)(4)(ii) and (iii)

The interim final rule adds specific references to the targeting and subsidy-per-unit scoring criteria to clarify the cross references in §§ 960.6(b)(4)(ii) and (iii) of the current AHP regulation. *See id.* §§ 960.6(b)(4)(ii), (iii).

2. Scoring Criterion on Use of Donated Government-Owned or Other Properties—Section 960.6(b)(4)(iv)(A)

Under § 960.6(b)(4)(iv)(A) of the current AHP regulation, an application may receive points if it involves the creation of housing using a significant proportion of units or land donated or conveyed for a nominal price by the federal government or any agency or instrumentality thereof, or by any other party. *See id.* § 960.6(b)(4)(iv)(A). Questions have arisen as to what should be considered a "nominal price." The interim final rule adds language to § 960.6(b)(4)(iv)(A) clarifying that a nominal price is a small, negligible amount, most often one dollar, and may be accompanied by modest expenses related to the conveyance of the property.

3. Targeting Score for Owner-Occupied Projects—Section 960.6(b)(4)(iv)(C)(*2*)

The first sentence of § 960.6(b)(4)(iv)(C)(*2*) of the current AHP regulation provides that applications for owner-occupied projects shall be awarded points based on the percentage of units in the project to be provided to households with incomes at or below 80 percent of the median income for the area. *See id.* § 960.6(b)(4)(iv)(C)(*2*). The wording of this sentence creates the erroneous implication that an AHP owner-occupied project may contain one or more units for households with incomes above 80 percent of the median income for the area. Under the Act, AHP subsidies may be used only to finance owner-occupied housing for households with incomes at or below 80 percent of the median income for the area. *See* 12 U.S.C. 1430(j)(2)(A). Consequently, the interim final rule deletes the first sentence of § 960.6(b)(4)(iv)(C)(*2*) of the current AHP regulation. Applications for owner-occupied projects shall be awarded points based on a declining scale, with projects having the highest percentage of units targeted to households with the lowest percentage of median income for the area awarded the highest number of points.

4. Scoring Criterion for Housing for Homeless Households—Section 960.6 (b)(4)(iv)(D)

Under § 960.6(b)(4)(iv)(D) of the current AHP regulation, an application may receive points if it involves "[t]he creation of transitional housing, excluding overnight shelters, for homeless households permitting a minimum of six months occupancy, or the creation of rental housing reserving at least 20 percent of the units for homeless households." *Id.* § 960.6(b)(4)(iv)(D). The interim final rule restates this provision in order to clarify the language. No substantive change is intended. The revised language omits the express exclusion of overnight shelters contained in the current language, because it is clear that overnight shelters do not come within the category of housing permitting a minimum of six months occupancy.

5. Scoring Criterion for Economic Diversity—Section 960.6(b)(4)(iv)(F)(*8*)

Under § 960.6(b)(4)(iv)(F)(*8*) of the current AHP regulation, applications for AHP subsidy may receive points for meeting the "Economic Diversity" scoring criterion if they involve the creation of housing that either: (1) is part of a strategy to end isolation of very low-income households by providing economic diversity through mixed-income housing in low- or moderate-income neighborhoods, or (2) provides very low- or low- or moderate-income households with housing opportunities in areas where the median household income exceeds 80 percent of the median income for the area. *Id.* § 960.6(b)(4)(iv)(F)(*8*).

One of the Banks has pointed out an ambiguity in the second alternative described above, which makes that alternative unworkable. Specifically, assuming the word "area" refers to the same area each time it appears in the following phrase, it will always be the case that a project provides "housing opportunities in areas where the median household income exceeds 80 percent of the median income for the area," because the median income for an area, by definition, always exceeds 80 percent of the median income for that area.

The general intent of the second alternative requirement in the "Economic Diversity" criterion is to promote housing opportunities for very low- and low- or moderate-income households in areas that are wealthier relative to the surrounding areas. Therefore, the interim final rule revises the second alternative to provide that applications may receive points for "Economic Diversity" if they involve the creation of housing that provides very low- or low- or moderate-income households with housing opportunities in neighborhoods or cities where the median income exceeds the median income for the larger area—such as the city, county, or Primary Metropolitan Statistical Area—in which the neighborhood or city is located.

6. Scoring Criterion for Community Involvement—Section 960.6(b)(4)(iv)(F)(*10*)

Under § 960.6(b)(4)(iv)(F)(*10*) of the current AHP regulation, an application for AHP subsidy may receive points for meeting the "Community Involvement" scoring criterion if it shows demonstrated support for the AHP project by local government, community organizations, or individuals, other than as project sponsors, through the commitment by such entities or individuals of donated goods and services, or volunteer labor. *Id.* § 960.6 (b)(4)(iv)(F)(*10*). Several of the Banks have requested clarification of what constitutes a donated good or service from a local government. For example, local governments may provide support to housing projects in the form of property tax deferment or abatement, zoning changes or variances, infrastructure improvements, or fee waivers. Each of these forms of local government initiatives constitutes the kind of non-cash support for the project that merits scoring credit under the "Community Involvement" criterion. Therefore, the interim final rule specifies that these items and any similar types of non-cash support for a project by local government are to be

considered under the "Community Involvement" criterion.

E. Modifications of Applications—Sections 960.7 and 960.9

Sections 960.7 and 960.9 of the current AHP regulation govern modifications to approved AHP applications prior to and subsequent to project completion, respectively. *See id.* § § 960.7, 960.9. Each of these sections provides that as a threshold requirement for the approval of a modification, it must be shown that "there is or will be a change in the project that materially affects the facts under which the application was originally scored and approved under the Bank's competitive application program * * * ." *See id.* § § 960.7(a), 960.9. A number of the Banks have requested clarification of what constitutes a "material change" affecting the facts under which the application was originally scored and approved. Accordingly, the interim final rule revises § § 960.7 and 960.9 of the current AHP regulation by replacing the "material change" requirement with language clarifying that a modification is triggered where there is or will be a change to a project that would change the score that the project application received in the funding period in which it was originally scored and approved, had the changed facts been operative at that time.

F. Use of Repaid Subsidies—Section 960.12(e)

Under §§ 960.12(a) and (b) of the current AHP regulation, which set forth the requirements for the recovery of AHP subsidy in cases of noncompliance with AHP requirements, interest on AHP subsidies must be recovered, where appropriate. *See id.* § 960.12(a), (b). Section 960.12(e) of the current AHP regulation provides that amounts repaid to a Bank as a result of noncompliance with AHP requirements shall be made available for other AHP-eligible projects. *See id.* § 960.12(e). The interim final rule clarifies that any recovered interest on such amounts also must be made available for other AHP-eligible projects.

G. Agreements—Section 960.13

1. Retention Agreements for Owner-Occupied Units Constructed or Rehabilitated With AHP-Assisted Financing—Sections 960.13(c)(4) and (d)(1)

Section 960.13(c)(4) of the current AHP regulation sets forth the required elements for retention agreements for AHP-assisted owner-occupied units financed by a loan from the proceeds of a subsidized advance. *See id.* § 960.13(c)(4). Specifically, it requires such units to be subject to a deed restriction or other legally enforceable retention agreement or mechanism requiring that: (1) the Bank or its designee is to be given notice of any sale or refinancing of the unit occurring prior to the end of the retention period; and (2) in the case of a refinancing prior to the end of the retention period, the full amount of the interest rate subsidy received by the owner, based on the pro rata portion of the interest rate subsidy imputed to the subsidized advance during the period the owner occupied the unit prior to refinancing, shall be repaid to the Bank from any net gain realized upon the refinancing, unless the unit continues to be subject to a deed restriction or other legally enforceable retention agreement or mechanism for the remainder of the 5-year retention period. *See id.*

The retention agreement described in § 960.13(c)(4) is intended to be used in situations where a member uses the proceeds of a subsidized advance to provide permanent financing for the purchase of individual units. Because each permanent loan is funded by a subsidized advance, the permanent loan incorporates some level of interest rate subsidy that the household purchasing a unit benefits from during the term of the loan. Thus, there is a direct link between the subsidized advance and the permanent financing for the unit.

Section 960.13(c)(4) does not address the situation where a member uses a subsidized advance to finance a loan to a housing developer to build or rehabilitate owner-occupied units, which then are purchased by households with permanent financing from another source. In this situation, the purchaser essentially receives a pro rata portion of the interest rate subsidy in the construction or rehabilitation loan in the form of a lump-sum reduction in the purchase price resulting from the subsidized financing. The amount of the reduction in the purchase price can be determined by spreading the total value of the AHP subsidy across all the units financed by the construction or rehabilitation loan, and apportioning the subsidy on a pro rata basis based upon the relative prices of the units. In effect, the units are financed with AHP subsidy in a similar manner to units purchased by homebuyers who receive a direct subsidy in the form of downpayment assistance.

Under § 960.13(d)(1) of the current AHP regulation, where a purchaser uses a direct subsidy in the form of downpayment assistance to purchase a unit, the unit must be subject to a deed restriction or other legally enforceable retention agreement or mechanism requiring that: (1) The Bank or its designee is to be given notice of any sale or refinancing of the unit occurring prior to the end of the retention period; (2) in the case of a sale prior to the end of the retention period, an amount equal to a pro rata share of the direct subsidy, reduced for every year the seller owned the unit, shall be repaid to the Bank from any net gain realized upon the sale of the unit after deduction for sales expenses, unless the purchaser is a low- or moderate-income household; and (3) in the case of a refinancing prior to the end of the retention period, an amount equal to a pro rata share of the direct subsidy, reduced for every year the occupying household has owned the unit, shall be repaid to the Bank from any net gain realized upon the refinancing, unless the unit continues to be subject to a deed restriction or other legally enforceable retention agreement or mechanism for the remainder of the retention period. *See id.* § 960.13(d)(1).

In sum, the AHP interest rate subsidy in a construction or rehabilitation loan can be viewed as the functional equivalent of a lump-sum reduction in the ultimate purchase prices of all the units financed by such loan. This is similar to the situation where units are purchased by homebuyers who receive a direct subsidy in the form of downpayment assistance. Therefore, the Finance Board proposes to add a new paragraph (c)(4)(ii) to § 960.13(c)(4) of the current AHP regulation requiring owner-occupied units financed by AHP-subsidized construction or rehabilitation loans to be subject to retention agreements similar to those required by § 960.13(d)(1) for owner-occupied units financed by a direct subsidy.

The interim final rule also revises the language of § 960.13(d)(1) to address situations parallel to those discussed above, but which involve an AHP direct subsidy. For example, in some situations, a housing developer may receive the proceeds of a direct subsidy to finance the construction or rehabilitation of owner-occupied units, which then are purchased by households with permanent financing from another source. As in the case where such units are constructed or rehabilitated with an AHP-subsidized loan, the purchasers of the units essentially receive a pro rata portion of the direct subsidy used to finance the construction or rehabilitation of the units, in the form of a lump-sum reduction in the units' purchase price. The interim final rule is intended to make clear that, although the purchasers

of the units do not directly receive the proceeds of the direct subsidy, the units must be subject to AHP retention/recapture mechanisms.

2. Termination of AHP Income-Eligibility and Affordability Restrictions After Foreclosure—Sections 960.13(c)(5)(iv) and (d)(2)(iv)

Under §§ 960.13(c)(5)(iv) and (d)(2)(iv) of the current AHP regulation, a retention agreement for an AHP rental project must incorporate a provision providing that the income-eligibility and affordability restrictions applicable to the project may terminate upon foreclosure or transfer in lieu of foreclosure. *See id.* §§ 960.13(c)(5)(iv), (d)(2)(iv). The purpose of this provision is to ensure that in cases where an AHP project goes into foreclosure, the AHP income-eligibility and affordability restrictions do not impede transfer of the project after foreclosure. As currently worded, §§ 960.13(c)(5)(iv) and (d)(2)(iv) could be read mistakenly to mean that upon the initiation of foreclosure, AHP income-eligibility and affordability restrictions automatically terminate. This is not the intended meaning of these provisions. Rather, the Finance Board intends that AHP income-eligibility and affordability restrictions incorporated in any lien on a project will be extinguished in the foreclosure process in connection with the repayment, if any, of AHP subsidy. Similarly, the Finance Board intends that any deed restriction on the project incorporating AHP income-eligibility and affordability requirements will be extinguished after foreclosure. Consequently, the interim final rule replaces the word "upon" in §§ 960.13(c)(5)(iv) and (d)(2)(iv) of the current AHP regulation with "after," so that the regulation provides for the termination of AHP income-eligibility and affordability restrictions after foreclosure.

In addition, the interim final rule deletes the reference to transfers in lieu of foreclosure, because transfers in lieu of foreclosure do not extinguish liens on the property transferred other than the lien of the transferee. Consequently, when an AHP project is transferred in lieu of foreclosure, the transferee must foreclose on the project to remove any remaining AHP lien and the income-eligibility and affordability restrictions incorporated in the lien. After such foreclosure, §§ 960.13(c)(5)(iv) and (d)(2)(iv) provide for the termination of the AHP income-eligibility and affordability restrictions. The interim final rule adds similar language to the provisions of the AHP regulation governing retention agreements for AHP-assisted owner-occupied projects. *See id.* §§ 960.13(c)(4), (d)(1).

III. Regulatory Flexibility Act

Because no notice of proposed rulemaking is required for this regulation, the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) do not apply.

List of Subjects in 12 CFR Part 960

Credit, Federal home loan banks, Housing, Reporting and recordkeeping requirements. Accordingly, the Finance Board hereby amends title 12, chapter IX, part 960, *Code of Federal Regulations*, as follows.

PART 960—AFFORDABLE HOUSING PROGRAM

1. The authority citation for part 960 continues to read as follows:

Authority: 12 U.S.C. 1430(j).

2. Amend § 960.1, by revising the definitions of "Affordable", "Low-or moderate-income household" paragraph (2)(ii), "Owner-occupied unit", "Rental project", and "Very low-income household" paragraph (2)(ii) to read as follows:

§ 960.1 Definitions.

* * * * *

Affordable means that the rent charged for a unit which is to be reserved for occupancy by a household with an income at or below 80 percent of the median income for the area, does not exceed 30 percent of the income of a household of the maximum income and size expected, under the commitment made in the AHP application, to occupy the unit (assuming occupancy of 1.5 persons per bedroom or 1.0 person per unit without a separate bedroom).

* * * * *

Low- or moderate-income household.

* * * * *

(2) * * *

(ii) *Housing with current occupants.* In the case of projects involving the purchase or rehabilitation of rental housing with current occupants, *low- or moderate-income household* means an occupying household with an income at or below 80 percent of the median income for the area at the time an application for AHP subsidy is submitted to the Bank.

* * * * *

Owner-occupied unit means a unit in an owner-occupied project. Housing with two to four dwelling units consisting of one owner-occupied unit and one or more rental units shall be considered a single owner-occupied unit.

Rental project means a project involving the purchase, construction, or rehabilitation of rental housing, including overnight shelters and transitional housing for homeless households and mutual housing, where at least 20 percent of the units in the project are occupied by and affordable for very low-income households.

* * * * *

Very low-income household.

* * * * *

(2) * * *

(ii) *Housing with current occupants.* In the case of projects involving the purchase or rehabilitation of rental housing with current occupants, *very low-income household* means an occupying household with an income at or below 50 percent of the median income for the area at the time an application for AHP subsidy is submitted to the Bank.

* * * * *

3. Section 960.4 is amended by revising paragraph (d) to read as follows:

§ 960.4 Advisory Councils.

* * * * *

(d) *Terms of Advisory Council members.* Advisory Council members shall be appointed by the Bank's board of directors to serve for terms of three years, and such terms shall be staggered to provide continuity in experience and service to the Advisory Council. An Advisory Council member appointed to fill a vacancy shall be appointed for the unexpired term of his or her predecessor in office. No Advisory Council member may be appointed to serve for more than three consecutive terms. Appointments for the unexpired term of a predecessor shall not count toward the three-term limit.

* * * * *

4. Section 960.5 is amended by revising paragraphs (b)(9), (b)(10)(i)(C), and (b)(10)(ii) to read as follows:

§ 960.5 Minimum eligibility standards for AHP projects.

* * * * *

(b) * * *

(9) *Fair housing.* The project, as proposed, must comply with applicable federal and state laws on fair housing and housing accessibility, including, but not limited to, the Fair Housing Act, the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, and the Architectural Barriers Act of 1969, and must demonstrate how the project will be affirmatively marketed.

(10) *District eligibility requirements.*

(i) * * *

(C) A requirement that the member submitting the application has made use of a minimum amount of a credit

product offered by the Bank, other than AHP or CIP credit products, within the previous 12 months, provided that such a minimum threshold for credit product usage established by a Bank shall not exceed 1.5 percent of a member's total assets, and all members shall have access to some amount of AHP subsidy, as determined by the Bank, regardless of whether they meet the Bank's minimum threshold for credit product usage.

(ii) Any limit on the amount of AHP subsidy available per member must result in equal amounts of AHP subsidy available to all members.

5. Section 960.6 is amended by revising the second sentence of paragraph (b)(4)(ii), the fourth sentence of paragraph (b)(4)(iii), and paragraphs (b)(4)(iv)(A), (b)(4)(iv)(C)(*2*), (b)(4)(iv)(D), (b)(4)(iv)(F)(*8*), and (b)(4)(iv)(F)(*10*) to read as follows:

§ 960.6 Procedure for approval of applications for funding.

* * * * *

(b) * * *

(4) * * *

(ii) *Point allocations.* * * * The scoring criterion for targeting identified in paragraph (b)(4)(iv)(C) of this section shall be allocated at least 20 points.

* * *

(iii) *Satisfaction of scoring criteria.* * * * A Bank shall designate the targeting and subsidy-per-unit scoring criteria identified in paragraphs (b)(4)(iv)(C) and (H), respectively, of this section as variable-point criteria. * * *

(iv) * * *

(A) *Use of donated government-owned or other properties.* The creation of housing using a significant proportion of units or land donated or conveyed for a nominal price by the federal government or any agency or instrumentality thereof, or by any other party. For purposes of this paragraph, a nominal price is a small, negligible amount, most often one dollar, and may be accompanied by modest expenses related to the conveyance of the property for use by the project.

* * * * *

(C) * * *

(*2*) *Owner-occupied projects.* Applications for owner-occupied projects shall be awarded points based on a declining scale, with projects having the highest percentage of units targeted to households with the lowest percentage of median income for the area awarded the highest number of points.

* * * * *

(D) *Housing for homeless households.* The creation of rental housing reserving at least 20 percent of the units for homeless households, or the creation of transitional housing for homeless households permitting a minimum of six months occupancy.

* * * * *

(F) * * *

(*8*) *Economic diversity.* The creation of housing that is part of a strategy to end isolation of very low-income households by providing economic diversity through mixed-income housing in low- or moderate-income neighborhoods, or providing very low-or low- or moderate-income households with housing opportunities in neighborhoods or cities where the median income exceeds the median income for the larger surrounding area—such as the city, county, or Primary Metropolitan Statistical Area—in which the neighborhood or city is located;

* * * * *

(*10*) *Community involvement.* Demonstrated support for the project by local government, other than as a project sponsor, in the form of property tax deferment or abatement, zoning changes or variances, infrastructure improvements, fee waivers, or other similar forms of non-cash assistance, or demonstrated support for the project by community organizations or individuals, other than as project sponsors, through the commitment by such entities or individuals of donated goods and services, or volunteer labor;

* * * * *

6. Section 960.7 is amended by revising paragraph (a) to read as follows:

§ 960.7 Modifications of applications prior to project completion.

(a) *Modification procedure.* If, prior to final disbursement of funds to a project from all funding sources, there is or will be a change in the project that would change the score that the project application received in the funding period in which it was originally scored and approved, had the changed facts been operative at that time, a Bank, in its discretion, may approve in writing a modification to the terms of the approved application, provided that:

* * * * *

7. Section 960.9 is amended by revising the introductory text to read as follows:

§ 960.9 Modifications of applications after project completion.

Modification procedure. If, after final disbursement of funds to a project from all funding sources, there is or will be a change in the project that would change the score that the project application received in the funding period in which it was originally scored and approved, had the changed facts been operative at that time, a Bank, in its discretion, may approve in writing a modification to the terms of the approved application, provided that:

* * * * *

8. Section 960.12 is amended by revising paragraph (e) to read as follows:

§ 960.12 Remedial actions for noncompliance.

* * * * *

(e) *Use of repaid subsidies.* Amounts repaid to a Bank pursuant to this section, including any interest, shall be made available for other AHP-eligible projects.

* * * * *

9. Section 960.13 is amended by revising paragraphs (c)(4), (c)(5)(iv), (d)(1), and (d)(2)(iv) to read as follows:

§ 960.13 Agreements.

* * * * *

(c) * * *

(4) *Retention agreements for owner-occupied units.* (i) *Units with AHP-assisted permanent financing.* The member shall ensure that an owner-occupied unit with permanent financing obtained from the proceeds of a subsidized advance is subject to a deed restriction or other legally enforceable retention agreement or mechanism requiring that:

(A) The Bank or its designee is to be given notice of any sale or refinancing of the unit occurring prior to the end of the retention period;

(B) In the case of a refinancing prior to the end of the retention period, the full amount of the interest rate subsidy received by the owner, based on the pro rata portion of the interest rate subsidy imputed to the subsidized advance during the period the owner occupied the unit prior to refinancing, shall be repaid to the Bank from any net gain realized upon the refinancing, unless the unit continues to be subject to a deed restriction or other legally enforceable retention agreement or mechanism described in this paragraph (c)(4)(i); and

(C) The obligation to repay AHP subsidy to the Bank shall terminate after any foreclosure.

(ii) *Units constructed or rehabilitated with AHP-assisted financing.* The member shall ensure that an owner-occupied unit constructed or rehabilitated with a loan from the proceeds of a subsidized advance but which does not have permanent financing from the proceeds of a subsidized advance, is subject to a deed restriction or other legally enforceable retention agreement or mechanism requiring that:

(A) The Bank or its designee is to be given notice of any sale or refinancing of the unit occurring prior to the end of the retention period;

(B) In the case of a sale prior to the end of the retention period, an amount equal to the pro rata portion of the interest rate subsidy imputed to the subsidized advance that financed the construction or rehabilitation loan for the unit, reduced for every year the seller owned the unit, shall be repaid to the Bank from any net gain realized upon the sale of the unit after deduction for sales expenses, unless the purchaser is a low- or moderate-income household;

(C) In the case of a refinancing prior to the end of the retention period, an amount equal to the pro rata portion of the interest rate subsidy imputed to the subsidized advance that financed the construction or rehabilitation loan for the unit, reduced for every year the owner occupied the unit, shall be repaid to the Bank from any net gain realized upon the refinancing, unless the unit continues to be subject to a deed restriction or other legally enforceable retention agreement or mechanism described in this paragraph (c)(4)(ii); and

(D) The obligation to repay AHP subsidy to the Bank shall terminate after any foreclosure.

(5) * * *

(iv) The income-eligibility and affordability restrictions applicable to the project terminate after any foreclosure.

* * * * *

(d) *Special provisions where members obtain direct subsidies.* (1) *Retention agreements for owner-occupied units.* The member shall ensure that an owner-occupied unit that is purchased, constructed, or rehabilitated with the proceeds of a direct subsidy is subject to a deed restriction or other legally enforceable retention agreement or mechanism requiring that:

(i) The Bank or its designee is to be given notice of any sale or refinancing of the unit occurring prior to the end of the retention period;

(ii) In the case of a sale prior to the end of the retention period, an amount equal to a pro rata share of the direct subsidy that financed the purchase, construction, or rehabilitation of the unit, reduced for every year the seller owned the unit, shall be repaid to the Bank from any net gain realized upon the sale of the unit after deduction for sales expenses, unless the purchaser is a low- or moderate-income household;

(iii) In the case of a refinancing prior to the end of the retention period, an amount equal to a pro rata share of the direct subsidy that financed the purchase, construction, or rehabilitation of the unit, reduced for every year the occupying household has owned the unit, shall be repaid to the Bank from any net gain realized upon the refinancing, unless the unit continues to be subject to a deed restriction or other legally enforceable retention agreement or mechanism described in this paragraph (d)(1); and

(iv) The obligation to repay AHP subsidy to the Bank shall terminate after any foreclosure.

(2) * * *

(iv) The income-eligibility and affordability restrictions applicable to the project terminate after any foreclosure.

* * * * *

Dated: April 22, 1998.

By the Board of Directors of the Federal Housing Finance Board.

Bruce A. Morrison,

Chairman.

[FR Doc. 98–13428 Filed 5–19–98; 8:45 am]

BILLING CODE 6725–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 98–NM–13–AD; Amendment 39–10535; AD 98–11–08]

RIN 2120–AA64

Airworthiness Directives; Airbus Model A300, A310, and A300–600 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Airbus Model A300, A310, and A300–600 series airplanes, that requires replacement of the non-return valves located in the engine fuel feed lines on the outer fuel tank with new return valves; and, for certain airplanes, replacement of the inner tank booster pump canisters with modified canisters. This amendment is prompted by issuance of mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by this AD are intended to prevent sticking of non-return valves located in the fuel system, which could result in an internal fuel transfer from the center tank to the inner or outer tank. Such a transfer of fuel could lead to fuel spillage overboard through the vent system, and consequent insufficient fuel for the airplane to reach its flight destination.

DATES: Effective June 24, 1998.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of June 24, 1998.

ADDRESSES: The service information referenced in this AD may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2110; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Airbus Model A300, A310, and A300–600 series airplanes was published in the **Federal Register** on March 27, 1998 (63 FR 14849). That action proposed to require replacement of the non-return valves located in the engine fuel feed lines on the outer fuel tank with new return valves; and, for certain airplanes, replacement of the inner tank booster pump canisters with modified canisters.

Comments

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supports the proposed rule.

Conclusion

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

Cost Impact

The FAA estimates that 103 Model A300, A310, and A300–600 series airplanes of U.S. registry will be affected by this AD.

The FAA estimates that the required replacement of the non-return valves will take approximately 66 work hours

per airplane to accomplish, at an average labor rate of $60 per work hour. Required parts will be supplied by the manufacturer at no cost to the operators. Based on these figures, the cost impact of this action required by this AD on U.S. operators is estimated to be $407,880, or $3,960 per airplane.

The FAA estimates that the required replacement of the inner fuel tank booster pump canisters will take approximately 12 work hours per airplane to accomplish, at an average labor rate of $60 per work hour. Required parts will be supplied by the manufacturer at no cost to the operators. Based on these figures, the cost impact of this action required by this AD on U.S. operators is estimated to be $74,160, or $720 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

98–11–08 Airbus Industrie: Amendment 39–10535. Docket 98–NM–13–AD.

Applicability: Model A300, A310, and A300–600 series airplanes; on which Airbus Modification 8928 or 6094 has not been installed; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent sticking of non-return valves located in the fuel system, which could result in fuel spillage overboard and consequent insufficient fuel for the airplane to reach its flight destination, accomplish the following:

(a) Within 18 months after the effective date of this AD, accomplish paragraphs (a)(1) and (a)(2) of this AD, as applicable.

(1) For airplanes on which Airbus Modification 8928 has not been installed: Replace the non-return valves located in the engine fuel feed lines on the outer fuel tank with new non-return valves, in accordance with Airbus Service Bulletin A300–28–0063, Revision 01 (for Model A300 series airplanes); Airbus Service Bulletin A310–28–2053, Revision 01 (for Model A310 series airplanes); or Airbus Service Bulletin A300–28–6031, Revision 01 (for Model A300–600 series airplanes); all dated January 15, 1997; as applicable.

(2) For extended range twin-engine operations (ETOPS) airplanes, or airplanes equipped with auxiliary tanks; on which Airbus Modification 6094 has not been installed: Replace the inner tank booster pump canisters with modified canisters, in accordance with Airbus Service Bulletin A300–28–0071 (for Model A300 series airplanes); A310–28–2124 (for Model A310 series airplanes); or A300–28–6054 (for Model A300–600 series airplanes); all dated January 15, 1997; as applicable.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The actions shall be done in accordance with the following Airbus Service Bulletins, as applicable:

- A300–28–0063, Revision 01, dated January 15, 1997;
- A310–28–2053, Revision 01, dated January 15, 1997;
- A300–28–6031, Revision 01, dated January 15, 1997;
- A300–28–0071, dated January 15, 1997;
- A310–28–2124, dated January 15, 1997; and
- A300–28–6054, dated January 15, 1997.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Note 3: The subject of this AD is addressed in French airworthiness directive 97–082–215(B), dated March 12, 1997.

(e) This amendment becomes effective on June 24, 1998.

Issued in Renton, Washington, on May 13, 1998.

John J. Hickey,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 98–NM–34–AD; Amendment 39–10536; AD 98–11–09]

RIN 2120–AA64

Airworthiness Directives; Empresa Brasileira de Aeronautica S.A. (EMBRAER) Model EMB–145 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain EMBRAER Model EMB–145 series airplanes, that requires a one-time visual inspection of the pilot valve harness tubes for bulges and cracks, cleaning the tubes, applying sealant at the tube end opening, and replacing any discrepant tubes with serviceable tubes. This amendment also requires replacement of the pilot valve harness tubes and vent valve tubes with new tubes having improved anti-corrosion protection. This amendment is prompted by issuance of mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by this AD are intended to prevent cracking of the pilot valve harness tubes, which could allow fuel to enter the conduit and leak overboard; this condition could result in increased risk of a fuel tank explosion and fire.

DATES: Effective June 24, 1998.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of June 24, 1998.

ADDRESSES: The service information referenced in this AD may be obtained from Empresa Brasileira de Aeronautica S.A. (EMBRAER), P.O. Box 343—CEP 12.225, Sao Jose dos Campos—SP, Brazil. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Small Airplane Directorate, Atlanta Aircraft Certification Office, One Crown Center, 1895 Phoenix Boulevard, suite 450, Atlanta, Georgia; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Rob Capezzuto, Aerospace Engineer, ACE–115A, FAA, Small Airplane Directorate, Atlanta Aircraft Certification Office, One Crown Center, 1895 Phoenix Boulevard, suite 450, Atlanta, Georgia 30337–2748; telephone (770) 703–6071; fax (770) 703–6097.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain EMBRAER Model EMB–145 series airplanes was published in the Federal Register on March 27, 1998 (63 FR 14853). That action proposed to require a one-time visual inspection of the pilot valve harness tubes for bulges and cracks, cleaning the tubes, applying sealant at the tube end opening, and replacing any discrepant tubes with serviceable tubes. That action also proposed to require replacement of the pilot valve harness tubes and vent valve tubes with new tubes having improved anti-corrosion protection.

Comments

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were submitted in response to the proposal or the FAA's determination of the cost to the public.

Conclusion

The FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

Cost Impact

The FAA estimates that 15 airplanes of U.S. registry will be affected by this AD.

It will take approximately 2 work hours per airplane to accomplish the required inspection, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of the inspection required by this AD on U.S. operators is estimated to be $1,800, or $120 per airplane.

It will take approximately 8 work hours per airplane to accomplish the required replacement, at an average labor rate of $60 per work hour. Required parts will be provided by the manufacturer at no cost to the operator. Based on these figures, the cost impact of the replacement required by this AD on U.S. operators is estimated to be $7,200, or $480 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption ADDRESSES.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

98–11–09 Empresa Brasileira De Aeronautica S.A. (Embraer): Amendment 39–10536. Docket 98–NM–34–AD.

Applicability: Model EMB–145 series airplanes; as listed in EMBRAER Service Bulletin 145–28–0005, dated May 23, 1997, and EMBRAER Service Bulletin 145–28–0006, dated October 22, 1997; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For

airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent cracking of the pilot valve harness tubes, which could allow fuel to enter the conduit and leak overboard, and result in increased risk of a fuel tank explosion and fire, accomplish the following:

(a) Within 30 calendar days or 200 hours time-in-service after the effective date of this AD, whichever occurs later, perform a one-time visual inspection of the pilot valve harness tubes (conduit) for bulges and cracks, in accordance with the Accomplishment Instructions of EMBRAER Service Bulletin 145–28–0005, dated May 23, 1997.

(1) If no discrepancy is found in the harness tube, prior to further flight, clean the tube and apply sealant at the tube end opening in accordance with the service bulletin.

(2) If any crack or bulge is found in the harness tube, prior to further flight, replace the tube with a new or serviceable tube, clean the tube, and apply sealant at the tube end opening in accordance with the service bulletin.

(b) Within 4,000 hours time-in-service after the effective date of this AD, replace the existing pilot valve harness tubes and vent valve tubes with new tubes, in accordance with EMBRAER Service Bulletin 145–28–0006, dated October 22, 1997.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Atlanta Aircraft Certification Office (ACO), FAA, Small Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Atlanta ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Atlanta ACO.

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) The actions shall be done in accordance with EMBRAER Service Bulletin 145–28–0005, dated May 23, 1997, and EMBRAER Service Bulletin 145–28–0006, dated October 22, 1997. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Empresa Brasileira de Aeronautica S.A. (EMBRAER), P.O. Box 343—CEP 12.225, Sao Jose dos Campos—SP, Brazil. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Small Airplane Directorate, Atlanta Aircraft Certification Office, One Crown Center, 1895 Phoenix Boulevard, suite 450, Atlanta, Georgia; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Note 3: The subject of this AD is addressed in Brazilian airworthiness directive 97–07–02R1, dated January 15, 1998.

(f) This amendment becomes effective on June 24, 1998.

Issued in Renton, Washington, on May 13, 1998.

John J. Hickey,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Parts 202, 216, and 250

RIN 1010–AC23

Royalties on Gas, Gas Analysis Reports, Oil and Gas Production Measurement, Surface Commingling, and Security

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Final rulemaking; corrections.

SUMMARY: MMS published in the **Federal Register** of May 12, 1998, a final rule commonly known as the "GVS rule" that updated production measurement, surface commingling, and security requirements and made other amendments. The final rule was to become effective on July 13, 1998. This document corrects the effective date and makes two other technical corrections to the final rule. The rule will become effective on June 29, 1998.

EFFECTIVE DATES: The rule published on May 12, 1998 (63 FR 26362) is effective May 12, 1998.

FOR FURTHER INFORMATION CONTACT: Kumkum Ray, Engineering and Operations Division at (703) 787–1600.

SUPPLEMENTARY INFORMATION: MMS needs the correction to the effective date of the GVS rule to ensure that the revised title 30 of the Code of Federal Regulations slated for publication on July 1, 1998 (i.e., the bound volume) includes the new numbering system in the final rule entitled, "Redesignation of 30 CFR Part 250" which follows the GVS final rule. We are also making two corrections: (1) A paragraph numbering correction and (2) a correction to specify a regulatory citation. In the final rule FR Doc. 98–3533, published in the issue of Tuesday, May 12, 1998, make the following corrections.

Corrections

1. On page 26362 in the preamble the effective date is corrected to read as follows:

[**EFFECTIVE DATES:** June 29, 1998]. The Director of the Federal Register has approved the incorporation by reference of certain publications listed in the regulations as of June 29, 1998.

2. On page 26367 in the third column in § 250.1(a) on the third line "paragraph (d)" is corrected to read "paragraph (e)."

3. On page 26372 in the third column in § 250.182(g) at the end of the introductory text, "30 CFR 250, Subpart A:" is corrected to read "30 CFR 250.1:"

Dated: May 13, 1998.

E.P. Danenberger,

Chief, Engineering and Operations Divisions.

[DoD 6010.8–R]

Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Waiver of Collection of Payments Due From Certain Persons Unaware of Loss of CHAMPUS Eligibility

AGENCY: Office of the Secretary, DoD.

ACTION: Final rule.

SUMMARY: This final rule authorizes the waiver of collection of payments due from individuals who lost their CHAMPUS eligibility when they became eligible for Medicare Part A, due to disability or end stage renal disease.

EFFECTIVE DATE: This final rule is effective June 19, 1998.

ADDRESSES: TRICARE Management Activity, 1B657 Pentagon, Washington, DC 20301–1200.

FOR FURTHER INFORMATION CONTACT: Cynthia P. Speight, TRICARE Management Activity, (703) 697–8975.

SUPPLEMENTARY INFORMATION:

I. Overview of the Final Rule

Formerly, under Title 10 United States Code, Section 1086(d), a beneficiary lost eligibility for CHAMPUS when he or she became eligible for Medicare Part A, including when eligibility was due to disability or

end stage renal disease. Payments made after the beneficiary attained eligibility for Medicare Part A were erroneous payments and subject to collection under the Federal Claims Collection Act. In 1991, Congress amended 10 U.S.C. 1086(d) to provide that those persons eligible for Medicare by reason of disability or end stage renal disease who are enrolled in the supplementary medical insurance program under Medicare Part B retain eligibility for CHAMPUS, secondary to Medicare coverage. Section 743 of the National Defense Authorization Act for Fiscal Year 1996, Pub. L. 104–106, provides authority, effective February 10, 1996, to waive the collection of erroneous civilian health care benefits from a person under age 65 who lost eligibility for civilian care due to eligibility for Medicare as a result of disability or end stage renal disease. The period of this waiver authority begins January 1, 1967, and ends on the later of July 1, 1996, or the termination date of any special enrollment Medicare period established by law for such person.

Since most payments made under CHAMPUS are paid directly to participating providers of care, and not to the beneficiary, the rule also provides for the waiver of collection of such payments made to participating providers. These providers are paid based on a contractual agreement of benefits by the beneficiaries. If the claim for these benefits cannot be paid due to ineligibility of the beneficiary, the beneficiary indebtedness to the provider would remain. Thus, the authority to relieve disabled CHAMPUS beneficiaries from the indebtedness arising from these erroneous payments does not depend upon who actually received the payments.

II. Public Comments

The proposed rule was published on December 4, 1997 (62 FR 64191). We did not receive any public comments.

III. Rulemaking Procedures

Executive Order 12866 requires that a regulatory impact analysis be performed on any significant regulatory action, defined as one which would have an annual effect on the economy of $100 million, or have other significant effects.

The Regulatory Flexibility Act requires that each federal agency prepare a regulatory flexibility analysis when the agency issues regulations which would have a significant impact on a substantial number of small entities. This rule is not significant regulatory action under E.O. 12886, nor would it have a significant impact on small entities. The changes set forth in the final rule are minor revisions to the existing regulation. In addition, this final rule does not impose new information collection requirements for purposes of the Paperwork Reduction Act of 1995.

List of Subjects in 32 CFR Part 199

Claims, Handicapped, Health insurance, Military personnel.

PART 199—[AMENDED]

Accordingly, 32 CFR Part 199 is amended a follows:

1. The authority citation for part 199 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. Chapter 55.

2. Section 199.11 is amended as follows:

a. By revising paragraphs (b)(1) and (g) introductory heading.

b. By redesignating paragraphs (g)(3), (g)(4), (g)(5), (g)(6), (g)(7), (g)(8) and (g)(9) as (g)(4), (g)(5), (g)(6), (g)(7), (g)(8), (g)(9) and (g)(10).

c. By adding paragraph (g)(3) and revising newly redesignated paragraph (g)(10).

§ 199.11 Overpayments recovery.

* * * * *

(b) * * *

(1) *Federal statutory authority.* The Federal Claims Collection Act provides the basic authority under which claims may be asserted pursuant to this section. It is implemented by joint regulations issued by the Department of Justice and the General Accounting Office, 4 CFR parts 101–105. Thereunder, the heads of federal agencies or their designees are required to attempt collection of all claims of the United States for money or property arising out of the activities of their respective agencies. These officials may, with respect to claims that do not exceed $20,000, exclusive of interest, and in conformity with the standards promulgated in the joint regulations, compromise, suspend, or terminate collection action on such claims. Section 743 of the National Defense Authorization Act for Fiscal Year 1996 (Public Law 104–106) authorizes the waiver (see paragraph (g)(3) of this section) of collection of overpayments otherwise due from a person after the termination of the person's CHAMPUS eligibility, because the person became eligible for Medicare Part A by reason of disability or end-stage renal disease.

* * * * *

(g) *Compromise, waiver, suspension or termination of collection actions arising under the Federal Claims Collection Act.* * * *

* * * * *

(3) *Waiver of collection of erroneous payments due from certain persons unaware of loss of CHAMPUS eligibility.*

(i) The Director, OCHAMPUS may waive collection of payments otherwise due from certain persons as a result of health benefits received under this part after the termination of the person's eligibility for such benefits. Waiver may be granted if collection of such payments would be against equity and good conscience and not in the best interest of the United States. These criteria are met by a finding that there is no indication of fraud, misrepresentation, fault, or lack of good faith on the part of the person who received the erroneous payment or any other person having an interest in obtaining such waiver.

(ii) *Persons eligible for waiver.* The following persons are eligible for waiver:

(A) A person who:

(1) Is entitled to Medicare Part A by reason of disability or end stage renal disease;

(2) In the absence of such entitlement, would have been eligible for CHAMPUS under 10 U.S.C. 1086; and

(3) At the time of the receipt of such benefits, was under age 65.

(B) Any participating provider of care who received direct payment for care provided to a person described in paragraph (g)(ii)(A) of this section pursuant to an assignment of benefits from such person.

(iii) The authority to waive collection of payments under this section shall apply with regard to health benefits provided during the period beginning January 1, 1967, and ending on the later of: the termination date of any special enrollment period for Medicare Part B provided specifically for such persons; or July 1, 1996.

* * * * *

(10) *Effect of compromise, waiver, suspension or termination of collection action.* Pursuant to the Internal Revenue Code, 26 U.S.C. 6041, compromises and terminations of undisputed debts not discharged in a Title 11 bankruptcy case and totaling $600 or more for the year will be reported to the Internal Revenue Service in the manner prescribed for inclusion in the debtor's gross income for that year. Any action taken under paragraph (g) of this section regarding the compromise of a federal claim, or waiver or suspension or termination of collection action on a federal claim is not an initial determination for purposes of the appeal procedures § 199.10.

* * * * *

Dated: May 14, 1998.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000–04–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD1–95–002]

RIN 2115–AE47

Drawbridge Operation Regulations; New Rochelle Harbor, NY

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is changing the regulations governing the Glen Island Bridge, mile 0.8, across New Rochelle Harbor in New Rochelle. The change requires two hours advance notice for openings between the hours of 12 midnight and 6 a.m. from May 1 through October 31, and twenty-four hours advance notice between the hours of 8 p.m. and 8 a.m. from November 1 through April 30. This change was requested by the Westchester County Department of Parks because of the few requests for bridge openings during these time periods. This action relieves the bridge owner of the burden of having personnel constantly available to open the bridge and should provide for the reasonable needs of navigation. This change to the regulations will also require the bridge owner to install and maintain clearance gauges.

DATES: This final rule is effective June 19, 1998.

ADDRESSES: Documents as indicated in this preamble are available for inspection or copying at the First Coast Guard District Office, Battery Park Bldg., New York, New York 10004–5073, 7 a.m. to 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (212) 668–7069.

FOR FURTHER INFORMATION CONTACT: Mr. J. Arca, project officer, First Coast Guard District, Bridge Branch. The telephone number is (212) 668–7069.

SUPPLEMENTARY INFORMATION:

Regulatory History

On January 27, 1995, the Coast Guard published a notice of proposed rulemaking entitled "Drawbridge Operation Regulations; New Rochelle Harbor, NY" in the **Federal Register** (60 FR 5343). Ninety-eight comments expressing opposition to the proposal were received. No public hearing was requested and none was held. Following revision of the regulation request by Westchester County, the Coast Guard, on May 13, 1996, published a supplemental notice of proposed rulemaking entitled "Drawbridge Operation Regulations; New Rochelle Harbor, New York" in the **Federal Register** (61 FR 22002). The Coast Guard received sixteen letters commenting on this supplemental notice of proposed rulemaking. No public hearing was requested, and none was held.

Background

The Glen Island Bridge has a vertical clearance of 13 feet above Mean High Water (MHW) and 20 feet above Mean Law Water (MLW) in the closed position. The bridge is presently required to open on signal. The new regulations will provide openings on signal with two hours advance notice between the hours of 12 midnight and 6 a.m. from May 1 through October 31, and twenty-four hours advance notice between the hours of 8 p.m. and 8 a.m. from November 1 through April 30.

From May 1994, through October 1994, there were thirty two bridge openings between midnight and 6 a.m. From November 1994, through April 1995, there ware twenty openings between 8 p.m. and 8 a.m. The existing regulations are being changed to provide Westchester County relief from having an operator in constant attendance at the bridge since there is limited demand for bridge openings during the regulated periods.

Discussion of Comments and Changes

Sixteen comments were received in response to the supplemental notice of proposed rulemaking. One expressed no objection; one comment from Westchester County Department of Parks endorsed the proposal; fourteen comments objected to the proposal. Of those fourteen, eight objected because of the misconception that the bridge will not open for marine traffic and they will be forced to use the back for channel. The back channel is considered dangerous for nighttime passage due to the shallowness and narrowness of the channel and the lack of lighted aids to navigation. This concern is dispelled since the bridge will open when needed except an advance notice for openings will be required. Additionally, the waterway provides sufficient area for mariners to anchor nearby while waiting for an opening. Three objections expressed concern that approval of the request would lead to further encroachment on the full time operating hours of the bridge. An approved request for change to operating regulations is not a valid basis for subsequent approval of additional changes. In the event that further changes are sought, if warranted the Coast Guard will reinitiate notice and comment rulemaking. All requests to change regulations are examined in light of the reasonable needs of navigation. One objection expressed concern that vessel appurtenances would have to be lowered. 33 CFR 117.11(a) requires that, "No vessel owner or operator shall (a) Signal a drawbridge to open if the vertical clearance is sufficient to allow the vessel, after all lowerable non-structural vessel appurtenances that are not essential to navigation have been lowered, to safely pass under the drawbridge in the closed position." Only those vessel appurtenances that are non-structural and non-essential to navigation have to be lowered in accordance with the law. One commentor requested installation of a marine radio at the bridge. Installation of marine radio is unnecessary since the waterway is strictly recreational and the majority of bridge openings are for sailboats most of which are not equipped with marine radio. Installation of a marine radio will not enhance marine safety and would be an unnecessary economic burden on the bridge owner. The final objection, from the Westchester County Board of Legislators, included a legislative resolution urging denial of the requested change by the Coast Guard based on the deterrent to criminal activity in the adjacent park offered by constant attendance on the bridge. Marine safety concerns were cited as well. Because of opposing views on the regulation change by two elements of Westchester County government, the Coast Guard requested, by letter dated February 26, 1997, that the County Executive reiterate the County's position. By letter March 20, 1997, the Commissioner of the Westchester County Department of Parks, on behalf of the County Executive indicated the County's continued desire to seek the proposed regulation change. A telephone conversation with Parks Commissioner DeSantis on 31 March 1997 provided further confirmation.

The infrequent requests for bridge openings during the regulated period and the ability to obtain bridge openings by providing advance notice makes the requested regulation change reasonable.

Regulatory Evaluation

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs

and benefits under section 6(a)(3) of that Order. It has not been reviewed by the Office of Management and Budget under that Order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. This final rule adopts the operating hours which the Coast Guard believes to be appropriate since the recreational boaters that use this waterway seldom transit during night time and thus, a requirement for the bridge operator to be present during all time periods, is unwarranted. The Coast Guard believes this final rule achieves the requirement of balancing the navigational rights of recreational boaters and the needs of land based transportation.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard considered whether this rule will have a significant economic impact on a substantial number of small entities. "Small entities" include small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdiction with populations of less than 50,000. Therefore, for the reasons discussed in the Regulatory Evaluation section above, the Coast Guard certifies under section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) that this final rule will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This final rule does not provide for a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this rule in accordance with the principles and criteria contained in Executive Order 12612 and has determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this rule and concluded that under Figure 2–1, paragraph 32(e), of Commandant Instruction M16475.1C, this rule is categorically excluded from further environmental documentation because promulgation of changes to drawbridge regulations have been found to not have a significant effect on the environment. A "Categorical Exclusion Determination" is not required for this rule.

List of Subjects in 33 CFR Part 117

Bridges.

Regulation

For the reasons set out in the preamble, the Coast Guard amends 33 CFR part 117 as follows:

PART 117—[AMENDED]

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g); § 117.255 also issued under the authority of Pub. L. 102–587, 106 Stat. 5039.

2. Add § 117.082 to read as follows:

§ 117.802 New Rochelle Harbor.

(a) The draw of the Glen Island Bridge, mile 0.8, at New Rochelle, New York, shall open on signal, except as follows:

(1) two hours advance notice shall be given for openings from 12 midnight to 6 a.m. from May 1st through October 31st by calling the number posted at the bridge.

(2) twenty-four hours advance notice shall be given for openings from 8 p.m. to 8 a.m. from November 1st through April 30th by calling the number posted at the bridge.

(b) The owner of the bridge shall provide, and keep in good legible condition, clearance gauges with figures not less than twelve (12) inches high designed, installed, and maintained according to the provisions of § 118.160 of this chapter.

Dated: May 6, 1998.

R.M. Larrabee,

Rear Admiral, U.S. Coast Guard, Commander, First Coast Guard District.

BILLING CODE 4910–15–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[COTP SAN JUAN 97–045]

RIN 2115–AA97

SZ; San Juan Harbor, San Juan, Puerto Rico

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a permanent moving safety zone around Liquefied Petroleum Gas (LPG) ships transiting the waters of San Juan Harbor, San Juan, Puerto Rico. Due to their highly volatile cargoes, size, draft, and the local channel restrictions, LPG ships require use of the center of these channels for safe navigation These regulations are necessary for the protection of life and property on the navigable waters of the Untied States.

DATES: This rule becomes effective June 19, 1998.

FOR FURTHER INFORMATION CONTACT: LT Christopher K. Palmer, project officer, USCG Marine Safety Office San Juan, (787) 729–6800 x320.

SUPPLEMENTARY INFORMATION:

Regulatory History

On February 6, 1998, the Coast Guard published a Notice of Proposed Rulemaking (NPRM) in the **Federal Register** (63 FR 6142). One comment was received during the comment period.

Background and Purpose

LPG vessels make the three-hour transit through the waters of San Juan Harbor on the average of once a week. Historically, the Coast Guard has established a temporary moving safety zone each time an LPG ship transits the waters of San Juan Harbor. These vessels use the Bar, Anegado, and Army Terminal Channels enroute to either the Gulf Refinery Oil dock or the Catano Oil dock. Temporary moving safety zones are established for each transit because of the significant risks LPG ships present with their highly volatile cargoes, their size, draft, and the local channel restrictions which require that LPGs use the center of the channel for safe navigation. Given the recurring nature of these port calls, the dangers associated with LPG ships, and the need to provide for the safety of live on navigable waters during the arrival and departure of LPG ships, the Coast Guard is establishing a permanent moving safety zone around these vessels during their arrival and departure from San Juan Harbor, San Juan, Puerto Rico.

The safety zone will be established in an area one half mile around LPG ships entering or departing San Juan Harbor. Vessels will be prohibited from entering the safety zone while the vessel is transiting. The safety zone will be activated when the vessel is one mile north of San Juan Harbor #1 Sea Buoy, and will cease once the vessel is moored at either the Gulf Refinery Oil dock or the Catano Oil dock. The Coast Guard will assign a patrol, issue a Broadcast

and Local Notice to Mariners, and advise the San Juan Port Control of the established safety zone in advance of the LPG ships' arrival and departure.

Discussions of Comments

The Coast Guard received one comment suggesting that the regulations should require a tug escort for all LPG vessels entering and exiting San Juan Harbor. The Coast Guard considered this comment and determined that it is not always necessary to assign an escort tug. Therefore, the final rule does not contain this requirement. The Coast Guard will continue to evaluate each LPG vessel arrival and departure on a case by case basis for the necessity of requiring a tug escort.

Regulatory Evaluation

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. The Office of Management and Budget has exempted it from review under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) 44 FR 11040, February 26, 1979). The Coast Guard expects the economic impact of this rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. This conclusion is based on the limited duration of the moving safety zone, the extensive advisories that will be made to the affected maritime community and the minimal restrictions the regulations will place on vessel traffic. These regulations will be in effect for a total of approximately three hours per port call for these vessels.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this rule will have a significant economic impact on a substantial number of small entities. "Small entities" include small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their field, and governmental jurisdictions with populations of less than 50,000.

Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this rule would not have a significant economic impact on a substantial number of small entities, as the regulations would only be in effect approximately three hours one day each week in a limited area of San Juan Harbor.

Collection of Information.

These regulations contain no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 et seq.)

Federalism.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612 and it has been determined that the rulemaking does not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Assessment.

The Coast Guard has considered the environmental impact of this rule and has concluded under figure 2–1, paragraph 34(g), of Commandant Instruction M16475.1C, that this action is categorically excluded from further environmental documentation. A Categorical Exclusion Determination and Environmental Analysis Checklist is available in the docket for inspection or copying.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reports and recordkeeping requirements, Security Measures, Waterways.

Final Regulations:

In consideration of the foregoing, the Coast Guard amends subpart C of part 165 of Title 33, Code of Federal Regulations as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–1(g), 6.04–1, 6.046 and 160.5.

2. A new § 165.754 is added to read as follows:

§ 165.754 Safety Zone: San Juan Harbor, San Juan, PR

(a) *Regulated Area.* A moving safety zone is established in the following area:

(1) The waters around Liquefied Petroleum Gas ships entering San Juan Harbor in an area one half mile around each vessel, beginning one mile north of the San Juan Harbor #1 Sea Buoy, in approximate position 18–29.3N, 66–07.6W and continuing until the vessel is safely moored at either the Gulf Refinery Oil dock or the Catano Oil dock in approximate position 18–25.8N, 66–06.5W. All coordinates referenced use datum: NAD 83.

(2) The waters around Liquefied Petroleum Gas ships departing San Juan Harbor in an area one half mile around each vessel beginning at either the Gulf Refinery Oil dock or Catano Oil dock in approximate position 18–25.8N, 66–06.5W when the vessel gets underway, and continuing until the stern passes the San Juan Harbor #1 Sea Buoy, in approximate position 18–28.3N, 66–07.6W. All coordinates referenced use datum: NAD 83.

(b) *Regulations.* (1) No person or vessel may enter, transit or remain in the safety zone unless authorized by the Captain of the Port, San Juan, Puerto Rico, or a designated Coast Guard commissioned, warrant, or petty officer.

(2) Vessels encountering emergencies which require transit through the moving safety zone should contact the Coast Guard patrol craft on VHF Channel 16. In the event of an emergency, the Coast Guard patrol craft may authorize a vessel to transit through the safety zone with a Coast Guard designated escort.

(3) The Captain of the Port and the Duty Officer at Marine Safety Office, San Juan, Puerto Rico, can be contacted at telephone number (787) 729–6800 ext. 140. The Coast Guard Patrol Commander enforcing the safety zone can be contacted on VHF–FM channels 16 and 22A.

(4) The Marine Safety Office San Juan will notify the marine community of periods during which these safety zones will be in effect by providing advance notice of scheduled arrivals and departures of Liquefied Petroleum Gas vessels via a marine broadcast Notice to Mariners.

(5) Should the actual time of entry of the Liquefied Petroleum Gas vessel vary more than one half hour from the scheduled time stated in the broadcast Notice to Mariners, the person directing the movement of the Liquefied Petroleum Gas vessel shall obtain permission from Captain of the Port San Juan before commencing the transit.

(6) All persons and vessels shall comply with the instructions of on-scene patrol personnel. On-scene patrol personnel include commissioned, warrant, or petty officers of the U.S. Coast Guard. Coast Guard Auxiliary and local or state officials may be present to inform vessel operators of the requirements of this section, and other applicable laws.

Dated: May 11, 1998.

B.M. Salerno,

Commander, U.S. Coast Guard, Captain of the Port, San Juan, PR.

[DFARS Case 98–D012]

Defense Federal Acquisition Regulation Supplement; Electronic Funds Transfer

AGENCY: Department of Defense (DoD).

ACTION: Interim rule with request for comments.

SUMMARY: The Director of Defense Procurement has issued an interim rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to provide policy and procedures for the use of the electronic funds transfer (EFT) method of contract payment when the payment office uses the central contractor registration (CCR) database as its source of EFT information. This rule eliminates requirements for duplicate submissions of EFT information by DoD contractors.

DATES: Effective date: June 1, 1998.

Comment date: Comments on the interim rule should be submitted in writing to the address shown below on or before July 20, 1998, to be considered in the formulation of the final rule.

ADDRESSES: Interested parties should submit written comments to: Defense Acquisition Regulations Council, Attn: Ms. Sandra G. Haberlin, PDUSD(A&T) DP (DAR), IMD 3D139, 3062 Defense Pentagon, Washington, DC 20301–3062. Telefax number (703) 602–0350.

E-mail comments submitted over the Internet should be addressed to: dfars@acq.osd.mil

Please cite DFARS Case 98–D012 in all correspondence related to this issue. E-mail comments should cite DFARS Case 98–D012 in the subject line.

FOR FURTHER INFORMATION CONTACT: Ms. Sandra G. Haberline, (703) 602–0131.

SUPPLEMENTARY INFORMATION:

A. Background

An interim rule amending the Federal Acquisition Regulation (FAR) was published in the **Federal Register** on August 29, 1996 (61 FR 45770). The rule added a new FAR Subpart 32.11, Electronic Funds Transfer, which provides policy and procedures for Government payment by EFT. The rule also added two contract clauses: FAR 52.232–33, Mandatory Information for Electronic Funds Transfer Payment, and FAR 52.232–34, Optional Information for Electronic Funds Transfer Payment. FAR 52.232–33 requires the contractor to provide EFT information as a condition of payment under the contract. When FAR 52.232–33 will not be included in a contract, FAR 52.232–34 is used if EFT may become a viable method of payment during the period of contract performance, and the clause becomes effective if the Government and the contractor agree to commence EFT. Both clauses require the contractor to provide EFT information to the cognizant payment office for each contract awarded to the contractor.

A final DFARS rule was published in the **Federal Register** on March 31, 1998 (63 FR 15316). The rule added DFARS Subpart 204.73 and a contract clause at DFARS 252.204–7004, Required Central Contractor Registration, and requires contractor registration in a DoD CCR database prior to award of a contract, basic agreement, basic ordering agreement, or blanket purchase agreement, unless the award results from a solicitation issued on or before May 31, 1998. The rule requires that contractors register on a one-time basis, and confirm on an annual basis that their CCR registration is accurate and complete. As part of the registration process, contractors are required to furnish their EFT payment information into the CCR database.

This interim DFARs rule eliminates conflicting and administratively burdensome requirements for contractors to provide EFT information to the payment office for each contract awarded (in accordance with FAR 52.232–33 or FAR 52.232–34), and into the CCR database (in accordance with DFARS 252.204–7004). This rule prescribes the use of a new clause at DFARS 252.232–7009, Payment by Electronic Funds Transfer (CCR), instead of either EFT FAR clause, for contracts that include the clause at 252.204–7004 and that will be paid by EFT. DFARS 252.232–7009 is especially tailored for those DoD contractors that are required to register in the CCR database.

B. Regulatory Flexibility Act

The interim rule may have a significant beneficial economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, et seq. An Initial Regulatory Flexibility Analysis has been performed and is summarized as follows:

The objective of the rule is to revise current procedures for the use of electronic funds transfer in order to accommodate the DoD requirement for contractors to register into a CCR database; thus, eliminating conflicting and administratively burdensome requirements for both large and small contractors.

FAR 52.232–33 and FAR 52.232–34 require, for each contract awarded, the contractor to provide EFT information to the cognizant payment office. In addition, DFARS 204.7302 requires contractor registration in a DoD CCR database prior to award of a contract, basic agreement, basic ordering agreement, or blanket purchase agreement, unless the award results from a solicitation issued on or before May 31, 1998. As part of the registration process, contractors are required to furnish their EFT information. Therefore, Contractors are required to

furnish EFT information into the CCR database, and to the cognizant payment office for each contract awarded to them.

This interim DFARS rule applies to small entities that are required to register in the DoD CCR database in accordance with DFARS 252.204–7004, and that are required to be paid by EFT in accordance with FAR 52.232–33 or FAR 52.232–34. The rule does not apply to small entities that are exempted from CCR or exempted from the EFT method of payment. This rule reduces the burden on small entities by eliminating the requirement for DoD contractors to furnish EFT information to the payment office for each contract. To date, no supporting data has been collected; therefore, there is no available estimate of the number of small entities that will be subject to the rule.

The interim rule decreases information collection requirements by requiring the use of DFARS 252.232–7009 instead of the FAR clauses and their associated reporting requirements. The new DFARS clause only applies to contractors that are required to register in the CCR database. The requirement to register in the database already is prescribed at DFARS 204.7302.

This rule has a beneficial economic impact on small entities by eliminating conflicting and administratively burdensome requirements for submission of EFT information. There are no significant alternatives that would have a more beneficial economic impact on small entities and at the same time comply with 31 U.S.C. 3332, as amended by Subsection 31001(x) of Public Law 104–134, that "* * * all Federal payments to a recipient who becomes eligible for that type of payment * * * shall be made by electronic funds transfer."

A copy of the Initial Regulatory Flexibility Analysis may be obtained from the address specified herein. Comments are invited from small businesses and other interested parties. Comments from small entities concerning the affected DFARS subparts also will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and should cite DFARS Case 98–D012.

C. Paperwork Reduction Act

The interim rule decreases the information collection requirement currently approved under Office of Management and Budget (OMB) Control Number 9000–0144. The decrease results from the rule removing the requirement to use the clause at FAR 52.232–33 or FAR 52.232–34, when a contract includes the clause at DFARS 252.204–7004, Required Central Contractor Registration, and will be paid by EFT. OMB approved the information collection requirement to submit EFT information in the CCR database on November 20, 1997, under OMB Control Number 0704–0400, which expires on November 30, 2000.

D. Determination To Issue an Interim Rule

A determination has been made under the authority of the Secretary of Defense that urgent and compelling reasons exist to publish this interim rule prior to affording the public an opportunity to comment. This action is necessary to expeditiously eliminate conflicting and administratively burdensome requirements for DoD contractors. Effective June 1, 1998, DoD contractors are required to register in a CCR database. The contractor payment information required by the clauses at FAR 52.232–33 and 52.232–34 duplicates information required for registration in the CCR database. This interim rule prescribes a DFARS clause for use in place of the FAR clauses, to eliminate requirements for duplicate submissions of information by DoD contractors. However, comments received in response to the publication of this interim rule will be considered in formulating the final rule.

List of Subjects in 48 CFR Parts 232 and 252

Government procurement.

Michele P. Peterson,

Executive Editor, Defense Acquisition Regulations Council.

Therefore, 48 CFR Parts 232 and 252 are amended as follows:

1. The authority citation for 48 CFR Parts 232 and 252 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

PART 232—CONTRACT FINANCING

2. Subpart 232.11 is added to read as follows:

Subpart 232.11—Electronic Funds Transfer

Sec.
232.1101 Policy.
232.1103 Contract clause.

232.1101 Policy.

(a) If the payment office is not capable of making payment by electronic funds transfer (EFT), the payment office is relieved of the requirement to pay by EFT is DoD complies with 31 CFR 208.3, which requires written notice and submittal of an implication plan to the Department of the Treasury, Financial Management Service.

232.1103 Contract clause.

If the solicitation or contract includes the clause at 252.204–7004, Required Central Contractor Registration, and payment under the contract will be made by electronic funds transfer, use the clause at 252.232–7009, Payment by Electronic Funds Transfer (CCR), instead of the clause at FAR 52.232–33, Mandatory Information for Electronic Funds Transfer Payment, or the clause at FAR 52.232–34, Optional Information for Electronic Funds Transfer Payment.

PART 252—SOLICITAITON PROVISIONS AND CONTRACT CLAUSES

3. Section 252.232–7009 is added to read as follows:

252.232–7009 Payment by Electronic Funds Transfer (CCR).

As prescribed in 232.1103, use the following clause:

Payment by Electronic Funds Transfer (CCR) (JUN 1998)

(a) *Method of payment.* (1) All payments by the Government under this contract shall be made by electronic funds transfer (EFT), except as provided in paragraph (a)(2) of (b) of this clause. As used in this clause, the term "EFT" refers to the funds transfer and may also include the payment information transfer.

(2) In the event the Government is unable to release one or more payments by EFT, the Contractor agrees to either (i) accept payment by check or some other mutually agreeable method of payment, or (ii) request the Government to extend the payment due date until such time as the Government can make payment by EFT (but see paragraph (e) of this clause).

(b) *Alternative contractor certification.* If the Contractor certifies in writing, as part of its registration with the Central Contractor Registration (CCR) database that it does not have an account with a financial institution and does not have an authorized payment agent, payment shall be made by check to the remittance address contained in the CCR database. All contractor certifications will expire on January 1, 1999.

(c) *Contractor's EFT information.* Except as provided in paragraph (b) of this clause, the Government shall make payment to the Contractor using the EFT information contained in the CCR database. In the event that the EFT information changes, the Contractor shall be responsible for providing the updated information to the CCR database.

(d) *Mechanisms for EFT payment.* The Government may make payment by EFT through either an Automated Clearing House subject to the banking laws of the United States or the Federal Reserve Wire Transfer System.

(e) *Suspension of payment.* If the Contractor's EFT information in the CCR

database is incorrect and the Contractor has not certified under paragraph (b) of this clause, the Government need not make payment to the Contractor under this contract until correct EFT information or certification is entered into the CCR database; and any invoice or contract financing request shall be deemed not to be a proper invoice for the purpose of prompt payment under this contract. The prompt payment terms of the contract regarding notice of an improper invoice and delays in accrual of interest penalties apply.

(f) *Contractor EFT arrangements.* If the Contractor has identified multiple payment receiving points (i.e., more than one remittance address or EFT information set) in the CCR database, and the Contractor has not notified the Government of the payment receiving point applicable to this contract, the Government shall make payment to the first payment receiving point (EFT information set or remittance address as applicable) listed in the CCR database.

(g) *Liability for uncompleted or erroneous transfers.* (1) If an uncompleted or erroneous transfer occurs because the Government failed to use the Contractor's EFT information in the correct manner, the Government remains responsible for—

(i) Making a correct payment;

(ii) Paying any prompt payment penalty due; and

(iii) Recovering any erroneously directed funds.

(2) If an uncompleted or erroneous transfer occurs because the Contractor's EFT information was incorrect, or was revised within 30 days of Government release of the EFT payment transaction instruction to the Federal Reserve System, and—

(i) If the funds are no longer under the control of the payment office, the Government is deemed to have made payment and the contractor is responsible for recovery of any erroneously directed funds; or

(ii) If the funds remain under the control of the payment office, the Government shall not make payment, and the provisions of paragraph (e) of this clause shall apply.

(h) *EFT and prompt payment.* A payment shall be deemed to have been made in a timely manner in accordance with the prompt payment terms of this contract if, in the EFT payment transaction instruction released to the Federal Reserve System, the date specified for settlement of the payment is on or before the prompt payment due date, provided the specified payment date is a valid date under the rules of the Federal Reserve System.

(i) *EFT and assignment of claims.* If the Contractor assigns the proceeds of this contract as provided for in the assignment of claims terms of this contract, the Contractor shall require as a condition of any such assignment, that the assignee register in the CCR database and be paid by EFT in accordance with the terms of this clause. In all respects, the requirements of this clause shall apply to the assignee as if it were the Contractor. EFT information that shows the ultimate recipient of the transfer to be other than the Contractor, in the absence of a proper assignment of claims acceptable to the Government, is incorrect EFT information within the meaning of paragraph (e) of this clause.

(j) *Liability for change of EFT information by financial agent.* The Government is not liable for errors resulting from changes to EFT information made by the Contractor's financial agent.

(k) *Payment information.* The payment or disbursing office shall forward to the Contractor available payment information that is suitable for transmission as of the date of release of the EFT instruction to the Federal Reserve System. The Government may request the Contractor to designate a desired format and method(s) for delivery of payment information from a list of formats and methods the payment office is capable of executing. However, the Government does not guarantee that any particular format or method of delivery is available at any particular payment office and retains the latitude to use the format and delivery method most convenient to the Government. If the Contractor has certified in accordance with paragraph (b) of this clause or if the Government otherwise makes payment by check in accordance with paragraph (a) of this clause, the Government shall mail the payment information to the remittance address contained in the CCR database.

(End of clause)

Proposed Rules

Federal Register
Vol. 63, No. 97
Wednesday, May 20, 1998

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 97–NM–89–AD]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 747–400 Series Airplanes Powered by Pratt and Whitney PW4000 Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Boeing Model 747–400 series airplanes. This proposal would require repetitive inspections to detect improper installation and fatigue damage of the end cap of the forward engine mount, and replacement of the forward engine mount end cap assembly with an improved end cap assembly. Such replacement, when accomplished, would terminate the repetitive inspections. This proposal is prompted by a report of fatigue cracking of end cap bolts, caused by improper installation. Subsequent investigation revealed that properly installed end caps also are subject to early fatigue cracking. The actions specified by the proposed AD are intended to prevent failure of the end cap assembly, which could lead to separation of the engine from the airplane in the event of a primary thrust linkage failure.

DATES: Comments must be received by July 6, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–89–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Tamara L. Anderson, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2771; fax (425) 227–1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 97–NM–89–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–89–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The FAA has received a report of broken end cap bolts of the forward engine mount, which were found during overhaul of a Pratt & Whitney PW4000 engine that had been installed on a Boeing Model 747–400 series airplane. Investigation revealed that the end cap had been installed backwards. A properly installed end cap does not normally react any significant engine thrust loads; it is intended to provide a secondary load path if the primary thrust linkage fails. An end cap installed backwards will react the engine thrust loads along with the primary thrust linkage, which will result in premature fatigue failure of the end cap or end cap bolts. In addition, fatigue analysis and testing have confirmed that a properly installed end cap assembly would fail in a low number of flight cycles after a primary thrust linkage failure. Failure of the end cap assembly, if not corrected, could lead to separation of the engine from the airplane in the event of primary thrust linkage failure.

Other Relevant Rulemaking

There is a high degree of similarity between the configurations of the engine installations on the incident airplane (Model 747–400) and certain Model 767 series airplanes. The FAA may consider rulemaking to address this condition on Model 767 series airplanes; therefore, this proposed rule is applicable only to Model 747–400 series airplanes.

Explanation of Relevant Service Information

The FAA has reviewed and approved Boeing Alert Service Bulletin 747–71A2283, dated October 10, 1996, which describes procedures for repetitive detailed visual inspections to detect improper installation and fatigue damage of the end cap of the forward engine mount, and replacement of the end cap assembly of the forward engine mount with an improved assembly. Such replacement would eliminate the need for the repetitive inspections. Accomplishment of this replacement, as described in the alert service bulletin, is intended to adequately address the identified unsafe condition.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require accomplishment of the actions specified in the alert service bulletin described previously, except as discussed below.

Differences Between Proposed Rule and Service Bulletin

Boeing Alert Service Bulletin 747–71A2283 divides the affected airplanes into two groups depending upon the particular engine configuration of the affected airplane, and provides different procedures depending upon group classification and engine on-wing flight cycles. Operators should note that, whereas the alert service bulletin specifies that operators of Group 1 airplanes should contact the manufacturer for disposition of the terminating action, this proposed AD would require that the end cap and bolts be replaced in accordance with the procedures specified in Chapter 71–00–00 of the Boeing 747 Airplane Maintenance Manual (AMM).

Additionally, the alert service bulletin specifies that certain actions required by this proposed AD may be accomplished in accordance with "an operator's equivalent procedure." However, this proposed AD requires that those actions be accomplished in accordance with the procedures specified in Chapter 71–00–00 of the AMM. An "operator's equivalent procedure" may be used only if approved as an alternative method of compliance in accordance with paragraph (e) of this proposed AD.

Cost Impact

There are approximately 133 airplanes of the affected design in the worldwide fleet. The FAA estimates that 36 airplanes of U.S. registry would be affected by this proposed AD: 35 Group 1 airplanes, and 1 Group 2 airplane.

It would take approximately 36 work hours per Group 1 airplane (9 work hours per engine) to accomplish the proposed inspection, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of this proposed inspection on U.S. operators is estimated to be $75,600, or $2,160 per airplane, per inspection cycle.

It would take approximately 272 work hours per airplane (68 work hours per engine) for both Group 1 and Group 2 airplanes to accomplish the proposed replacement of the forward engine mount end cap and/or end cap bolts, at an average labor rate of $60 per work hour. Required parts would cost approximately $1,000 per airplane. Based on these figures, the cost impact of this proposed replacement on U.S. operators is estimated to be $623,520, or $17,320 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Docket 97–NM–89–AD.

Applicability: Model 747–400 series airplanes powered by Pratt & Whitney PW4000 engines, as listed in Boeing Alert Service Bulletin 747–71A2283, dated October 10, 1996; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent possible separation of the engine from the airplane in the event of a primary thrust linkage failure, accomplish the following:

(a) For Group 1 airplanes, as identified in Boeing Alert Service Bulletin 747–71A2283, dated October 10, 1996: Except as provided by paragraph (c) of this AD, accomplish paragraphs (a)(1) and (a)(2), of this AD, as applicable, in accordance with the alert service bulletin.

(1) Within 500 hours time-in-service after the effective date of this AD, perform a detailed visual inspection (Work Package 1) to detect improper installation of the end cap of the forward engine mount, in accordance with the alert service bulletin.

(i) If no attachment hardware is found loose or missing, and if no part shows signs of damage, repeat the inspection thereafter at intervals not to exceed 5,000 hours time-in-service or 15 months, whichever occurs first, until the requirements of paragraph (a)(2) of this AD have been accomplished.

(ii) If any attachment hardware is found loose or missing, or if any part shows signs of damage, prior to further flight, replace the end cap and bolts with an improved end cap and bolts (Work Package 2), in accordance with the alert service bulletin. Accomplishment of the replacement constitutes terminating action for the requirements of this AD for Group 1 airplanes.

(2) Replace the existing end cap and end cap bolts of the forward engine mount with an improved end cap and end cap bolts (Work Package 2), at the earlier of the times specified in paragraphs (a)(2)(i) and (a)(2)(ii) of this AD. Accomplishment of the replacement constitutes terminating action for the requirements of this AD for Group 1 airplanes.

(i) Prior to the accumulation of 16,000 total flight cycles on any engine, or within 500

hours time-in-service after the effective date of this AD, whichever occurs later; or

(ii) Within 3 years after the effective date of this AD.

(b) For Group 2 airplanes, as identified in Boeing Alert Service Bulletin 747–71A2283, dated October 10, 1996: Except as provided by paragraph (c) of this AD, within 3 years after the effective date of this AD, replace the existing end cap bolts of the forward engine mount with improved end cap bolts (Work Package 3), in accordance with the alert service bulletin.

(c) Where Boeing Alert Service Bulletin 747–71A2283, dated October 10, 1996, specifies that the actions required by this AD may be accomplished in accordance with an "operator's equivalent procedure," the actions must be accomplished in accordance with Chapter 71–00–00 of the Boeing 747 Airplane Maintenance Manual (AMM), as specified in the alert service bulletin.

(d) As of the effective date of this AD, no person shall install on any airplane a forward engine mount end cap having part number 310T3026–1.

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(f) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on May 14, 1998.

John J. Hickey,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 98–NM–105–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus Model A320 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Airbus Model A320 series airplanes. This proposal would require an electrical continuity test of the discharge circuit for the cargo compartment fire extinguisher bottle to detect any cross-connection of the electrical wires in the cargo compartment discharge circuit, and corrective actions, if necessary. This proposal is prompted by issuance of mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by the proposed AD are intended to prevent incorrect distribution of fire extinguishing chemicals in the event of an unconfined fire in the cargo compartment.

DATES: Comments must be received by June 19, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–105–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2110; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 98–NM–105–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–105–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, notified the FAA that an unsafe condition may exist on certain Airbus Model A320 series airplanes. The DGAC advises that an operator found, on two airplanes, cross-connections in the cargo compartment discharge circuit for the fire extinguisher bottle. The aft cargo compartment electrical connector had been fitted on the bottle discharge circuit dedicated to the forward cargo compartment fire extinguisher. The forward cargo compartment electrical connector was fitted on the aft compartment electrical connector. These cross-connections were attributed to the wire loom (bundle) being incorrectly identified, which the manufacturer has since corrected. This condition, if not corrected, could result in the incorrect distribution of fire extinguishing chemicals in the event of an unconfined fire in the cargo compartment.

Explanation of Relevant Service Information

Airbus has issued All Operator Telex (AOT) 26–10, dated April 5, 1993, which describes procedures for an electrical continuity test of the discharge circuit for the cargo compartment fire extinguisher bottle to detect any cross-connection of the electrical wires in the cargo compartment discharge circuit, and corrective actions, if necessary. The corrective actions include re-identification of the wiring loom and connection of electrical connectors to

the appropriate cargo compartment fire extinguisher. Accomplishment of the actions specified in the AOT is intended to adequately address the identified unsafe condition. The DGAC classified this AOT as mandatory and issued French airworthiness directive 94–056–051(B), dated March 16, 1994, in order to assure the continued airworthiness of these airplanes in France.

FAA's Conclusions

This airplane model is manufactured in France and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require accomplishment of the actions specified in the AOT described previously.

Cost Impact

The FAA estimates that 118 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed action, and that the average labor rate is $60 per work hour. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be $7,080, or $60 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Airbus Industrie: Docket 98–NM–105–AD.

Applicability: Model A320 series airplanes, manufacturer serial numbers 002 through 402 inclusive, on which Airbus Modification 20071 (reference Airbus Service Bulletin A320–26–1020, dated January 4, 1993) has been accomplished; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent incorrect distribution of fire extinguishing chemicals in the event of a fire in the cargo compartment, which if unconfined could spread beyond the cargo compartment, accomplish the following:

(a) Within 450 flight hours after the effective date of this AD, perform a one-time electrical continuity test of the discharge circuit for the cargo compartment fire extinguisher bottle to detect any cross-connection of the electrical wires in the cargo compartment discharge circuit, in accordance with Airbus All Operator Telex (AOT) 26–10, dated April 5, 1993. If any anomaly is detected, prior to further flight, accomplish corrective actions, in accordance with the AOT.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Note 3: The subject of this AD is addressed in French airworthiness directive 94–056–051(B), dated March 16, 1994.

Issued in Renton, Washington, on May 14, 1998.

John J. Hickey,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. 98–NM–149–AD]

RIN 2120–AA64

Airworthiness Directives; Aerospatiale Model ATR42 and ATR72 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Aerospatiale Model ATR42 and

ATR72 series airplanes. This proposal would require a one-time inspection of the electromagnetic interference (EMI) filter capacitors and electronic cards of the cabin air recirculation fans to detect damage. This proposal also would require replacement of damaged components with new or serviceable parts, and modification of the cabin air assembly fans. This proposal is prompted by issuance of mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by the proposed AD are intended to prevent overheating and consequent failure of the EMI filter capacitors, which could result in emission of toxic smoke and fumes throughout the airplane, and consequent adverse effects on flight crew and passengers.

DATES: Comments must be received by June 19, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–149–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2110; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 98–NM–149–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–149–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, notified the FAA that an unsafe condition may exist on certain Aerospatiale Model ATR42 and ATR72 series airplanes. The DGAC advises that it has received several reports of toxic smoke and fumes emitting into the passenger compartments. Investigation revealed that the toxic smoke and fumes resulted from excess thermal stress (overheating) of the electromagnetic interference (EMI) filter capacitors on the electronic cards of the cabin air recirculation fans, which are associated with the right and left air-conditioning packs. The overheated EMI filter capacitors leaked electrolyte onto the electronic cards of the air recirculation fans. The electrolyte leakage caused short-circuiting, charring, and corrosion of the electronic cards, emitting toxic smoke into the passenger compartments. Such overheating and consequent failure of the EMI filter capacitors, if not corrected, could result in emission of toxic smoke and fumes throughout the airplane, and consequent adverse effects on flight crew and passengers.

Explanation of Relevant Service Information

The manufacturer has issued Avions de Transport Regional Service Bulletins ATR42–21–0069, dated February 5, 1998 (for Model ATR42 series airplanes), and ATR72–21–1048, dated February 5, 1998 (for Model ATR72 series airplanes), which describe procedures for performing a one-time visual inspection to detect damage of the EMI filter capacitors and electronic cards of the cabin air recirculation fans of the left and right air-conditioning packs. The service bulletins also describe procedures for replacement of damaged components with new or serviceable parts, and modification of the cabin air assembly fans. Accomplishment of the actions specified in the service bulletins are intended to adequately address the identified unsafe condition. The DGAC classified these service bulletins as mandatory and issued French airworthiness directive 98–070–074(B) (for Model ATR42 series airplanes) and 98–073–037(B) (for Model ATR72 series airplanes), both dated February 11, 1998, in order to assure the continued airworthiness of these airplanes in France.

Avions de Transport Regional Service Bulletins reference EG&G Rotron Service Bulletin 011232500–21–1, dated December 12, 1997, as an additional source of service information for accomplishment of the modification.

FAA's Conclusions

These airplane models are manufactured in France and are type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require accomplishment of the actions specified in the service bulletins described previously.

Interim Action

This is considered to be interim action until final action is identified, at which time the FAA may consider additional rulemaking.

Cost Impact

The FAA estimates that 81 airplanes of U.S. registry would be affected by this

proposed AD, that it would take approximately 3 work hours per airplane to accomplish the proposed inspection, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of the inspection proposed by this AD on U.S. operators is estimated to be $14,580, or $180 per airplane.

It would take approximately 2 work hours per airplane to accomplish the proposed modification at an average labor rate of $60 per work hour. The cost of the required parts would be minimal. Based on these figures, the cost impact of the modification proposed by this AD on U.S. operators is estimated to be $9,720, or $120 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Aerospatiale: Docket 98–NM–149–AD.

Applicability: Model ATR42–300, –320, and –500 series airplanes, as listed in Aerospatiale Service Bulletin ATR42–21–0069, dated February 5, 1998; and Model ATR72–101, –102, –201, –202, –211, –212, and –212A series airplanes, as listed in Aerospatiale Service Bulletin ATR72–21–1048, dated February 5, 1998; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent overheating and consequent failure of the electromagnetic interference (EMI) filter capacitors, which could result in emission of toxic smoke and fumes throughout the airplane, and consequent adverse effects on flight crew and passengers, accomplish the following:

(a) Within 11 months after the effective date of this AD, perform a one-time visual inspection to detect damage of the EMI filter capacitors and electronic cards of the cabin air recirculation fan of the right and left air-conditioning packs, in accordance with Avions de Transport Regional Service Bulletin ATR42–21–0069, dated February 5, 1998 (for Model ATR42 series airplanes), or ATR72–21–1048, dated February 5, 1998 (for Model ATR72 series airplanes), as applicable.

(1) If no discrepancy is detected, prior to further flight, modify and re-identify each fan assembly, in accordance with the applicable service bulletin.

(2) If any discrepancy is detected, prior to further flight, replace the damaged components with new or serviceable components, and modify and re-identify the fan assembly, in accordance with the applicable service bulletin.

Note 2: Avions de Transport Regional Service Bulletin ATR42–21–0069, dated February 5, 1998 (for Model ATR42 series airplanes), and ATR72–21–1048, dated February 5, 1998 (for Model ATR72 series airplanes), reference EG&G Rotron Service Bulletin 011232500–21–1, dated December 12, 1997, as an additional source of service information for accomplishment of the modification.

(b) As of the effective date of this AD, no person shall install on any airplane a cabin air-conditioning recirculation Rotron fan having part number (P/N) 011232500 Amend. A, or P/N 011494500 Amend. A, on the left or right air-conditioning pack.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Note 4: The subject of this AD is addressed in French airworthiness directives 98–070–074(B) and 98–073–037(B), both dated February 11, 1998.

Issued in Renton, Washington, on May 14, 1998.

John J. Hickey,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Dornier Model 328–100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Dornier Model 328–100 series airplanes. This proposal would require replacing the existing roll spoiler control rods with improved parts. This proposal is prompted by issuance of

mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by the proposed AD are intended to prevent bending stress to the fork end of the roll spoiler, which could result in failure of the roll spoiler and consequent reduced controllability of the airplane.

DATES: Comments must be received by June 19, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–133–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Fairchild Dornier, Dornier Luftfahrt GmbH, P.O. Box 1103, D–82230 Wessling, Germany. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2110; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 98–NM–133–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–133–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Luftfahrt-Bundesamt (LBA), which is the airworthiness authority for Germany, notified the FAA that an unsafe condition may exist on certain Dornier Model 328–100 series airplanes. The LBA advises that the manufacturer reported that insufficient clearance may exist between the fork end of the roll spoiler control rod and the bell crank of the roll spoiler. Such insufficient clearance could cause bending stress to the fork end of the roll spoiler, which, if not corrected, could result in failure of the roll spoiler and consequent reduced controllability of the airplane.

Explanation of Relevant Service Information

The manufacturer has issued Dornier Service Bulletin SB–328–27–247, Revision 1, dated February 19, 1998, which describes procedures for replacing the existing roll spoiler control rods with improved roll spoiler control rods on the right and left sides of the airplane. The LBA classified this service bulletin as mandatory and issued German airworthiness directive 1998–042, dated January 29, 1998, in order to assure the continued airworthiness of these airplanes in Germany.

FAA's Conclusions

This airplane model is manufactured in Germany and is type certificated for operation in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the LBA has kept the FAA informed of the situation described above. The FAA has examined the findings of the LBA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require accomplishment of actions specified in the service bulletin described previously.

Cost Impact

The FAA estimates that 50 airplanes of U.S. registry would be affected by this proposed AD, and that it would take approximately 3 work hours per airplane to accomplish the proposed replacement, at an average labor rate of $60 per work hour. Required parts would be provided by the manufacturer at no cost to the operators. Based on these figures, the cost impact of the replacement proposed by this AD on U.S. operators is estimated to be $9,000, or $180 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Dornier Luftfahrt GMBH: Docket 98–NM–133–AD.

Applicability: Model 328–100 series airplanes, serial numbers 3005 through 3047 inclusive; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent bending stress to the fork end of the roll spoiler, which could result in failure of the roll spoiler and consequent reduced controllability of the airplane, accomplish the following:

(a) Within 4 months after the effective date of this AD, replace the existing roll spoiler control rods on the right and left sides of the airplane with improved parts, in accordance with Dornier Service Bulletin SB–328–27–247, Revision 1, dated February 19, 1998.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate. Operators shall submit their request through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Note 3: The subject of this AD is addressed in German airworthiness directive 1998–042, dated January 29, 1998.

Issued in Renton, Washington, on May 14, 1998.

John J. Hickey,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. 97–NM–258–AD]

RIN 2120–AA64

Airworthiness Directives; McDonnell Douglas Model MD–90–30 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model MD–90–30 series airplanes. This proposal would require repetitive inspections to detect debris in the areas behind the aft lavatory toilet shroud, behind the aft lavatory modules, and below the cabin floor aft of the aft cargo compartment bulkhead; and removal of debris. This proposal also would require modification of the lavatory toilet shroud assemblies and modification of the lavatory entry door louvers, which would terminate the repetitive inspections. This proposal is prompted by reports of paper debris collecting on the hot pneumatic ducts below the cabin floor. The actions specified by the proposed AD are intended to prevent paper debris from collecting on the ducts, which could result in a potential fire hazard or possible loss of elevator control system redundancy.

DATES: Comments must be received by July 6, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–258–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from The Boeing Company, Douglas Products Division, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Technical Publications Business Administration, Dept. C1–L51 (2–60). This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California.

FOR FURTHER INFORMATION CONTACT: Albert H. Lam, Aerospace Engineer, Systems and Equipment Branch, ANM–130L, FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712–4137; telephone (562) 627–5346; fax (562) 627–5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 97–NM–258–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the

FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–258–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The FAA has received reports indicating that lavatory paper debris was found behind the toilet seat shroud in the aft lavatory, behind the aft lavatory modules, and below the cabin floor aft of the aft cargo compartment bulkhead of McDonnell Douglas Model MD–90–30 series airplanes. This condition has been attributed to a gap between the lavatory floor pan perimeter and the toilet shroud. Airflow through the lavatory module can force paper and lint from the floor through the gap in the toilet shroud and the floor; this debris can collect on the hot pneumatic ducts below the cabin floor aft of the aft cargo compartment bulkhead. This condition, if not corrected, could result in a potential fire hazard or possible loss of elevator control system redundancy.

Explanation of Relevant Service Information

The FAA has reviewed and approved McDonnell Douglas Alert Service Bulletin MD90–25A017, Revision R01, dated October 16, 1997, which describes procedures for repetitive inspections to detect paper and lint debris in the areas behind the aft lavatory toilet shroud, behind the aft lavatory modules, and below the cabin floor aft of the aft cargo compartment bulkhead, and removal of debris.

The FAA also has reviewed and approved McDonnell Douglas Service Bulletin MD90–25–022, Revision R01, dated October 15, 1997, which describes procedures for modification of the lavatory toilet shroud assemblies. The modification involves adding a rubber seal to the shroud assemblies to close the gap between the shroud assemblies and the lavatory floor pans. This service bulletin references Jamco Service Bulletin MD090–25–1140, Revision 3, dated May 30, 1997, as an additional source of service information for accomplishment of the modification.

In addition, the FAA has reviewed and approved McDonnell Douglas Service Bulletin MD90–25–023, Revision R01, dated October 15, 1997, which describes procedures for modification of the lavatory entry door louvers. The modification entails installing a new frame panel and new louvers on the entry door assembly. This service bulletin references Jamco Service Bulletin MD090–25–1155, Revision 2, dated June 11, 1997, as an additional source of service information for accomplishment of this modification.

Accomplishment of the modifications specified in McDonnell Douglas Service Bulletins MD90–25–022 and MD90–25–023 is intended to adequately address the identified unsafe condition. These modifications, when accomplished, would eliminate the need for the repetitive inspections described in the alert service bulletin described previously.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require accomplishment of the actions specified in the alert service bulletin and service bulletins described previously.

Cost Impact

There are approximately 55 airplanes of the affected design in the worldwide fleet. The FAA estimates that 19 airplanes of U.S. registry would be affected by this proposed AD.

It would take approximately 5 work hours per airplane to accomplish the proposed inspection, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of the inspection proposed by this AD on U.S. operators is estimated to be $5,700, or $300 per airplane, per inspection cycle.

It would take approximately 1 work hour per airplane to accomplish the proposed modification of the toilet shroud assemblies, at an average labor rate is $60 per work hour. Required parts would be supplied by the manufacturer at no cost to the operators. Based on these figures, the cost impact of this modification proposed by this AD on U.S. operators is estimated to be $1,140, or $60 per airplane.

It would take approximately 1 work hour per airplane to accomplish the proposed modification of the lavatory entry door louvers, at an average labor rate is $60 per work hour. Required parts would be supplied by the manufacturer at no cost to the operators. Based on these figures, the cost impact of this modification proposed by this AD on U.S. operators is estimated to be $1,140, or $60 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

McDonnell Douglas: Docket 97–NM–258–AD.

Applicability: Model MD–90–30 series airplanes; as listed in paragraph 1.A.1. of McDonnell Douglas Alert Service Bulletin MD90–25A017, Revision R01, dated October 16, 1997, McDonnell Douglas Service Bulletin MD90–25–022, Revision R01, dated October 15, 1997 , and McDonnell Douglas Service Bulletin MD90–25A023, Revision R01, dated October 15, 1997; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been

modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent a potential fire hazard or the possible loss of elevator control system redundancy due to paper debris collecting on the hot pneumatic ducts below the cabin floor, accomplish the following:

(a) Within 450 flight hours or 3 months after the effective date of this AD, whichever occurs later, perform an inspection to detect paper and lint debris in the areas behind the aft lavatory toilet shroud, behind the aft lavatory modules, and below the cabin floor aft of the aft cargo compartment bulkhead, in accordance with paragraph 3. ("Accomplishment Instructions") of McDonnell Douglas Alert Service Bulletin MD90–25A017, Revision R01, dated October 15, 1997. If any debris is found, prior to further flight, remove it in accordance with the alert service bulletin. Repeat the inspection thereafter at intervals not to exceed 450 flight hours.

(b) Within 12 months after the effective date of this AD, modify the lavatory toilet shroud assemblies in accordance with paragraph 3. ("Accomplishment Instructions") of McDonnell Douglas Service Bulletin MD90–25–022, Revision R01, dated October 15, 1997.

(c) Within 12 months after the effective date of this AD, modify the lavatory entry door louvers in accordance with paragraph 3. ("Accomplishment Instructions") of McDonnell Douglas Service Bulletin MD90–25–023, Revision R01, dated October 15, 1997.

(d) Modification of the toilet shroud assemblies and the lavatory entry door louvers in accordance with paragraphs (b) and (c) of this AD constitutes terminating action for the repetitive inspection requirements of paragraph (a) of this AD.

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(f) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on May 14, 1998.

John J. Hickey,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Saab Model SAAB SF340A and SAAB 340B Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Saab Model SAAB SF340A and SAAB 340B series airplanes. This proposal would require modification of the detachable center inlet component of the air intake system of the engine. This proposal is prompted by issuance of mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by the proposed AD are intended to prevent fuel and/or oil that may be present in the nacelle from entering the air intake system of the engine, which could result in a possible engine fire.

DATES: Comments must be received by June 19, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–117–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Saab Aircraft AB, SAAB Aircraft Product Support, S–581.88, Linköping, Sweden. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2110; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 98–NM–117–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–117–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Luftfartsverket (LFV), which is the airworthiness authority for Sweden, notified the FAA that an unsafe condition may exist on certain Saab Model SAAB SF340A and SAAB Model 340B series airplanes. The LFV advises that two holes were introduced in the rear portion of the detachable center inlet of the air intake system of the engine during the design and manufacturing of a certain number of these inlets. The LFV further advises that, under certain conditions, a pressure difference between the nacelle and the detachable center inlet component of the air intake system

could force residual fuel and/or oil, located in the nacelle, through these two holes and into the air intake system of the engine. Such condition, if not corrected, could result in a possible engine fire.

Explanation of Relevant Service Information

The manufacturer has issued SAAB Service Bulletin 340–30–073, dated August 18, 1997, including Attachment 1, dated March 6, 1997, which describes procedures for installation of a filler plate onto the detachable center inlet component of the engine air intake system. Accomplishment of the action specified in the service bulletin is intended to adequately address the identified unsafe condition. The LFV classified this service bulletin as mandatory and issued Swedish airworthiness directive 1–119, dated August 21, 1997, in order to assure the continued airworthiness of these airplanes in Sweden.

FAA's Conclusions

These airplane models are manufactured in Sweden and are type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the LFV has kept the FAA informed of the situation described above. The FAA has examined the findings of the LFV, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require accomplishment of the actions specified in the service bulletin described previously.

Cost Impact

The FAA estimates that 135 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 2 work hours per airplane to accomplish the proposed modification, and that the average labor rate is $60 per work hour. Required parts would be provided by the manufacturer at no cost to the operators. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be $16,200, or $120 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Saab Aircraft AB (Formerly SAAB Fairchild): Docket 98–NM–117–AD.

Applicability: Model SAAB SF340A and Model SAAB 340B series airplanes, as listed in SAAB Service Bulletin 340–30–073, dated August 18, 1997; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent fuel and/or oil that may be present in the nacelle from entering the air intake system of the engine, which could result in a possible engine fire, accomplish the following:

(a) Within 2 years after the effective date of this AD, modify the detachable center inlet component of the air intake system of the engine, in accordance with Saab Service Bulletin 340–30–073, dated August 18, 1997, including Attachment 1, dated March 6, 1997.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Note 3: The subject of this AD is addressed in Swedish airworthiness directive 1–119, dated August 21, 1997.

Issued in Renton, Washington, on May 14, 1998.

John J. Hickey,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Boeing Model 767 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Boeing Model 767 series airplanes. This proposal would require repetitive inspections to detect improper installation or fatigue damage of the end cap of the forward engine mount, and replacement of the end cap assembly with an improved assembly. Such replacement, when accomplished, would terminate the repetitive inspections. This proposal is prompted by a report of fatigue cracking of end cap bolts caused by improper installation. Subsequent investigation revealed that properly installed caps also are subject to early fatigue cracking. The actions specified by the proposed AD are intended to prevent failure of the end cap assembly, which could lead to separation of the engine from the airplane in the event of a primary thrust linkage failure.

DATES: Comments must be received by July 6, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97-NM–186-AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Todd T. Martin, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2770; fax (425) 227–1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 97–NM–186–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–186–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The FAA has received a report of broken end cap bolts of the forward engine mount, which were found during overhaul of a Pratt & Whitney PW4000 engine that had been installed on a Boeing Model 747–400 series airplane. Investigation revealed that the end cap had been installed backwards. A properly installed end cap assembly does not normally react any significant engine thrust loads; it is intended to provide a secondary load path if the primary thrust linkage fails. An end cap installed backwards will react the engine thrust loads along with the primary thrust linkage, a condition which will result in premature fatigue failure of the end cap or bolts. In addition, fatigue analysis and testing have confirmed that a properly installed end cap would fail within a low number of flight cycles after a primary thrust linkage failure. Failure of the end cap assembly, if not corrected, could lead to separation of the engine from the airplane in the event of a primary thrust linkage failure.

There is a high degree of similarity between the configurations of the engine installations on the Model 747–400 and certain Model 767 series airplanes. The FAA may consider rulemaking to address this condition on Model 747–400 series airplanes; therefore, this proposed rule is applicable only to Model 767 series airplanes.

Explanation of Relevant Service Information

The FAA has reviewed and approved Boeing Alert Service Bulletin 767–71A0087, dated October 10, 1996, which describes procedures for repetitive visual inspections to detect improper installation or fatigue damage of the end cap of the forward engine mount, and replacement of the end cap assembly with an improved assembly. Such replacement would eliminate the need for the repetitive inspections. Accomplishment of this replacement, as described in the alert service bulletin, is intended to adequately address the identified unsafe condition.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require accomplishment of the actions specified in the alert service bulletin described previously, except as discussed below.

Differences Between Proposed Rule and Alert Service Bulletin

Boeing Alert Service Bulletin 767–71A0087 divides the affected airplanes into three groups depending upon the particular engine configuration of the affected airplane, and provides different procedures depending upon group classification and engine on-wing flight cycles. Operators should note that the alert service bulletin specifies that operators of certain Group 2 airplanes should contact the manufacturer for instructions. However, this proposed AD would not require that the manufacturer be contacted, but rather that Group 2 airplanes (regardless of accumulated on-wing flight cycles) be treated the same as Group 1 airplanes. That is, this proposed AD would not distinguish between the two airplane groups; therefore, the proposed

inspections, terminating actions, and compliance times would be identical for both Group 1 and Group 2 airplanes.

In addition, some of the compliance times specified in this proposed rule are different from those stated in the alert service bulletin. Specifically, this proposed AD expresses certain compliance times in terms of both flight cycles and flight hours, whereas the alert service bulletin expresses certain compliance times in terms of flight hours only. The reason for this difference is to account for those airplanes on which average mission lengths vary significantly from the fleet norm.

Additionally, the alert service bulletin specifies that the visual inspections required by this proposed AD may be accomplished in accordance with either the Boeing 767 Airplane Maintenance Manual or "an operator's equivalent procedure." However, this proposed AD requires that the actions be accomplished in accordance with the procedures specified in the Chapter 71–00–00 of the 767 Airplane Maintenance Manual. An "operator's equivalent procedure" may be used only if approved as an alternative method of compliance in accordance with the provisions specified in paragraph (e) of this proposed AD.

Cost Impact

There are approximately 239 airplanes of the affected design in the worldwide fleet. The FAA estimates that 96 airplanes of U.S. registry would be affected by this proposed AD.

It would take approximately 37 work hours per airplane (18.5 work hours per engine) to accomplish the proposed inspections, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of this proposed inspection on U.S. operators is estimated to be $213,120, or $2,220 per airplane, per inspection cycle.

It would take approximately 135 work hours per airplane (67.5 work hours per engine) to accomplish the proposed replacement of the forward engine mount end cap and bolts, at an average labor rate of $60 per work hour. Required parts would cost approximately $1,000 per airplane. Based on these figures, the cost impact of this proposed replacement on U.S. operators is estimated to be $873,600, or $9,100 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Docket 97–NM–186–AD.

Applicability: Model 767 series airplanes; as listed in Boeing Alert Service Bulletin 767–71A0087, dated October 10, 1996; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (f) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent possible separation of the engine from the airplane in the event of a primary thrust linkage failure, accomplish the following:

(a) For Groups 1 and 2 airplanes: Except as provided by paragraph (c) of this AD, accomplish paragraphs (a)(1), (a)(2), and (a)(3) of this AD, as applicable, in accordance with Boeing Alert Service Bulletin 767–71A0087, dated October 10, 1996.

(1) Within 500 flight hours or 300 flight cycles after the effective date of this AD, whichever occurs later: Accomplish Work Package 1 (visual inspection of the forward engine mount). Thereafter, repeat Work Package 1 at the intervals specified in the alert service bulletin until the requirements of either paragraph (a)(2) or (a)(3) of this AD are accomplished.

(2) Prior to the accumulation of 16,000 total flight cycles on any engine or within 500 flight hours or 300 flight cycles after the effective date of this AD, whichever occurs latest: Accomplish Work Package 2 (non-destructive test inspection of the forward engine mount). Thereafter, repeat Work Package 2 on that engine at the intervals specified in the alert service bulletin until the requirements of paragraph (a)(3) of this AD are accomplished. Accomplishment of Work Package 2 constitutes terminating action for the repetitive inspections required by paragraph (a)(1) of this AD for that engine.

(3) Within 3 years after the effective date of this AD: Accomplish Work Package 3 (end cap and bolt replacement of the forward engine mount). Accomplishment of Work Package 3 constitutes terminating action for the requirements of this AD.

(b) For Group 3 airplanes: Within 3 years after the effective date of this AD, accomplish Work Package 4 (Bolt Replacement) in accordance with Boeing Alert Service Bulletin 767–71A0087, dated October 10, 1996.

(c) Where Boeing Alert Service Bulletin 767–71A0087, dated October 10, 1996, specifies that the actions required by this AD may be accomplished in accordance with an "operator's equivalent procedure," the actions must be accomplished in accordance with Chapter 71–00–00 of the Boeing 767 Airplane Maintenance Manual (AMM), as specified in the alert service bulletin.

(d) If any discrepancy (including an improperly installed end cap or fatigue damage to the end cap assembly or thrust linkage) is found during any inspection required by this AD, prior to further flight, accomplish Work Package 3 in accordance with Boeing Alert Service Bulletin 767–71A0087, dated October 10, 1996.

(e) As of the effective date of this AD, no person shall install a forward engine mount end cap having part number 310T3026–1 on any airplane.

(f) An alternative method of compliance or adjustment of the compliance time that

provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(g) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on May 14, 1998.

John J. Hickey,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Ch. XVII

Fire Protection for Shipyard Employment Negotiated Rulemaking Advisory Committee; Meeting

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Fire Protection for Shipyard Employment Negotiated Rulemaking Advisory Committee; notice of open meeting.

SUMMARY: The Occupational Safety and Health Administration announces a meeting of the Fire Protection for Shipyard Employment Negotiated Rulemaking Advisory Committee. OSHA invites all interested persons to attend. The members represent groups interested in, or significantly affected by, the outcome of the rulemaking. They include representatives of shipyards, labor unions, professional associations, and government agencies. The committee will continue its discussions on a proposed standard to protect workers from fire hazards in shipyard employment, including the following areas: scope and application; administrative, engineering, and work practice controls; fire brigades; written fire plans; technological advances; cost of fire protection; and the content of appendices. The committee's goal is reach consensus on a proposed standard and explanatory preamble.

DATES: The meeting dates are Monday, June 15, 1998 through Wednesday, June 17, 1998 from 8:00 a.m. to about 4:00 p.m. daily. Submit comments, requests for oral presentations, and requests for disability accommodations by June 1, 1998.

ADDRESSES: The meeting will be held at the Maritime Institute of Technology and Graduate Studies (MITAGS), 5700 Hammonds Ferry Road, Linthicum Heights, MD 21090, telephone (410) 859–5700. Mail comments and requests for oral presentations to Mr. Joseph V. Daddura, U.S. Department of Labor, OSHA, Office of Maritime Standards, 200 Constitution Avenue, NW, Room N–3621, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT:

Mr. Joseph V. Daddura, Project Officer, Office of Maritime Standards, OSHA (202–219–7234, ext. 123). For disability accommodations, contact Ms. Theda Kenney (202–219–8061, ext. 100).

SUPPLEMENTARY INFORMATION:

Meeting Agenda

The committee will focus its discussions on definitions and on provisions that address ships fixed fire protection systems. Potential impacts of a proposed rule on small employers will also be addressed.

Public Participation

Interested persons may send written comments, data, views, or statements for consideration by the Committee to Mr. Joseph V. Daddura. Interested persons may also request the opportunity to make an oral presentation to the committee by providing Mr. Daddura with a summary of the proposed presentation, an estimate of the time desired, and a statement of the interest that the person represents. The facilitator may allow such presentations if there is adequate time in the meeting schedule.

Authority: This document is issued pursuant to the Negotiated Rulemaking Act of 1990 (5 U.S.C. 561 et seq.) and Section 7(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 656).

Signed at Washington, D.C., this 13th day of May 1998.

Charles N. Jeffress,

Assistant Secretary of Labor.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 917

[KY–218–FOR]

Kentucky Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; public comment period and opportunity for public hearing.

SUMMARY: OSM is announcing receipt of a proposed amendment to the Kentucky regulatory program (hereinafter the "Kentucky program") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment consists of revisions to the Kentucky statutes pertaining to bonding and permit renewal. The amendment is intended to revise the Kentucky program to be consistent with the corresponding Federal regulations.

DATES: Written comments must be received by 4:00 p.m., [E.D.T.], June 19, 1998. If requested, a public hearing on the proposed amendment will be held on June 15, 1998. Requests to speak at the hearing must be received by 4:00 p.m., [E.D.T.], on June 4, 1998.

ADDRESSES: Written comments and requests to speak at the hearing should be mailed or hand delivered to William J. Kovacic, Director, at the address listed below.

Copies of the Kentucky program, the proposed amendment, a listing of any scheduled public hearings, and all written comments received in response to this document will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive one free copy of the proposed amendment by contacting OSM's Lexington Field Office.

William J. Kovacic, Director, Lexington Field Office, Office of Surface Mining Reclamation and Enforcement, 2675 Regency Road, Lexington, Kentucky 40503. Telephone: (606) 233–2494.

Department of Surface Mining Reclamation and Enforcement, 2 Hudson Hollow Complex, Frankfort, Kentucky 40601. Telephone: (502) 564–6940.

FOR FURTHER INFORMATION CONTACT: William J. Kovacic, Director, Lexington Field Office, Telephone: (606) 233–2494.

SUPPLEMENTARY INFORMATION:

I. Background on the Kentucky Program

On May 18, 1982, the Secretary of the Interior conditionally approved the Kentucky program. Background information on the Kentucky program, including the Secretary's findings, the disposition of comments, and the conditions of approval can be found in the May 18, 1982, **Federal Register** (47 FR 21404). Subsequent actions concerning the conditions of approval and program amendments can be found at 30 CFR 917.11, 917.13, 917.15, 917.16, and 917.17.

II. Description of the Proposed Amendment

By letter dated April 23, 1998 (Administrative Record No. KY–1425), Kentucky submitted a proposed amendment to its program. House Bills (HB) 354, 498, and 593 (effective July 15, 1998) revise section 350 of the Kentucky Revised Statues (KRS) at 350.990(11), 350.131(2), 350.139(1), 350.990(1), and 350.060(16).

Specifically, Kentucky proposes to make the following changes. HB 354 confirms Executive Order 97–714, June 11, 1997, which changed the name of the Division of Abandoned Lands to the Division of Abandoned Mine Lands and corrects the name in KRS 350.990(11). HB 498 completes the package of bonding reforms jointly recommended by the State, OSM, and others. It requires that when a bond is forfeited, and the entire forfeited amount is more than necessary to complete reclamation, the unused funds less any accrued interest shall be returned to the party from whom they were collected at KRS 350.131(2). It establishes the bond forfeiture supplemental fund at KRS 350.139(1) and requires that funds from forfeited reclamation bonds be placed in an interest-bearing account. The interest becomes a supplemental fund that can be used to reclaim any lands where a forfeited bond is insufficient to complete the necessary reclamation. No more that 25% of the supplemental fund can be expended on a single site, unless a larger expenditure is necessary to abate an imminent danger to public health or safety. At KRS 350.990(1), HB 498 provides for a potential second source of money for the supplemental fund. The first $800,000 of collected civil penalties for coal mining violations will be deposited into the General Fund. One-half of the excess will go to the new bond forfeiture supplemental fund, but only when the balance in the Bond Pool Fund (Fund) is above the maximum of the operating range necessary to ensure its solvency. No diversion of excess penalty income from the Fund to the supplemental fund will occur until the Fund balance reaches $16 million, or a larger amount established by the most recent actuarial study of the Fund. If the Fund falls below $16 million (or higher amount established by the study), all excess moneys shall be deposited into the Fund until it reaches $16 million. HB 593 revises KRS 350.060(16) to require that a notice of noncompliance be issued if a permit has expired or if a permit renewal application has not been timely filed and the operator or permittee wants to continue the mining operation. The notice of noncompliance shall be deemed to have been complied with, and the permit may be renewed, if a permit renewal application is received within 30 days of the receipt of the notice of noncompliance. Upon submittal of a permit renewal application, the operator or permittee shall be deemed to have timely filed the permit renewal application and shall be permitted to continue, under the terms of the expired permit, the mining operation, pending issuance of the permit renewal. Failure to comply with the remedial measures of the notice of noncompliance shall result in the cessation of the mining operation.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSM is seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the Kentucky program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under **DATES** or at locations other than the Lexington Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to speak at the public hearing should contact the person listed under **FOR FURTHER INFORMATION CONTACT** by 4:00 p.m., [E.D.T.] on June 4, 1998. The location and time of the hearing will be arranged with those persons requesting the hearing. If no one requests an opportunity to speak at the public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to speak have been heard. Persons in the audience who have not been scheduled to speak, and who wish to do so, will be heard following those who have been scheduled. The hearing will end after all persons scheduled to speak and persons present in the audience who wish to speak have been heard.

Any disabled individual who has need for a special accommodation to attend a public hearing should contact the individual listed under **FOR FURTHER INFORMATION CONTACT.**

Public Meeting

If only one person requests an opportunity to speak at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSM representatives to discuss the proposed amendment may request a meeting by contacting the person listed under **FOR FURTHER INFORMATION CONTACT.** All such meetings will be open to the public and, if possible, notices of meetings will be posted at the locations listed under **ADDRESSES.** A written summary of each meeting will be made a part of the Administrative Record.

IV. Procedural Determinations

Executive Order 12866

This rule is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866 (Regulatory Planning and Review).

Executive Order 12988

The Department of the Interior has conducted the reviews required by section 3 of Executive Order 12988 (Civil Justice Reform) and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each such program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions or proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and

its implementing Federal regulations and whether the other requirements of 30 CFR Parts 730, 731, and 732 have been met.

National Environmental Policy Act

No environmental impact statement is required for this rule since section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C)).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3507 *et seq.*).

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal which is the subject of this rule is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Accordingly, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

Unfunded Mandates

This rule will not impose a cost of $100 million or more in any given year on any governmental entity or the private sector.

List of Subjects in 30 CFR Part 917

Intergovernmental relations, Surface mining, Underground mining.

Dated: May 13, 1998.

Allen D. Klein,

Regional Director, Appalachian Regional Coordinating Center.

Rules of Practice, Procedure, and Evidence for Administrative Proceedings of the Coast Guard

AGENCY: Coast Guard, DOT.

ACTION: Reopening of comment period on notice of proposed rulemaking.

SUMMARY: The Coast Guard is reopening the period for public comment on its Notice of Proposed Rulemaking (NPRM), Rules of Practice, Procedures, and Evidence for Administrative Proceedings of the Coast Guard. Because of several requests for extension, the Coast Guard is reopening the period for 30 days.

DATES: Comments must reach the Coast Guard on or before June 19, 1998.

ADDRESSES: You may mail comments to the Docket Management Facility [USCG–1998–3472], U.S. Department of Transportation (DOT), Room PL–401, 400 Seventh Street SW., Washington, DC 20590–0001, or deliver them to room PL–401, located on the Plaza Level of the Nassif Building at the same address between 10 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202–366–9329.

The Docket Management Facility maintains the public docket for this rulemaking. Comments, and documents as indicated in this preamble, will become part of this docket and will be available for inspection or copying at room PL–401, located on the Plaza Level of the Nassif Building at the above address between 10 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also electronically access the public docket for this rulemaking on the Internet at http://dms.dot.gov.

FOR FURTHER INFORMATION CONTACT: For information on the public docket, contact Carol Kelley, Coast Guard Dockets Team Leader, or Paulette Twine, Chief, Documentary Services Division, U.S. Department of Transportation, telephone 202–366–9329; for information concerning the notice of proposed rulemaking (NPRM) provisions, contact George J. Jordan, Attorney-Advisor, Office of the Chief Administrative Law Judge, between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. His telephone number is 202–267–0006.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Notice of Proposed Rulemaking (NPRM), published on April 6, 1998 (63 FR 16731), encouraged interested persons to participate in this rulemaking by submitting written data, views, or arguments by May 6, 1998. This request does the same, except that it asks them by June 19, 1998.

Persons submitting comments should include their names and addresses, identifying this rulemaking (USCG–1998–3472) and the specific section of this document to which each comment applies, and give the reason for each comment. Please submit one copy of all comments and attachments in an unbound format, no larger than 8½ by 1 inches, suitable for copying and electronic filing to the DOT Docket Management Facility at the address under **ADDRESSES.** If you want acknowledgment of receipt of your comment, enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period. It may change this proposed rule in view of the comments.

The Coast Guard plans no public meeting. Persons may request a public meeting by writing to the Docket Management Facility at the address under **ADDRESSES.** The request must identify this docket (USCG–1998–3472) and should include the reasons why a public meeting would be helpful to this rulemaking. If an opportunity for oral presentations will help the rulemaking procedures, the Coast Guard will hold a public meeting at a time and place announced by a later notice in the **Federal Register.**

Background and Purpose

The Coast Guard seeks to improve its adjudication process. This improvement would also affect certain actions involving merchant mariners. First, the proposed rule would consolidate all Coast Guard adjudicative procedures to include the following: the suspension and revocation (S&R) of merchant mariners' licenses, certificates of registry, and documents and the procedures involving class II civil penalties. Second, the proposed rule would eliminate unnecessary procedures from S&R proceedings. The Coast Guard expects the proposed rule to facilitate the efficient use of administrative resources relating to Coast Guard adjudication. It would save time, effort, and money for all parties

who are or may become involved in Coast Guard actions.

Signed: 14 May 1998.

Robert S. Horowitz,

Chief Counsel (Acting).

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 21

RIN 2900–AI31

Advance Payments and Lump-Sum Payments of Educational Assistance

AGENCIES: Defense; Coast Guard, Transportation; and Veterans Affairs.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the educational assistance regulations of the Department of Veterans Affairs (VA) dealing with the advance payment and lump-sum payment of educational assistance. VA is proposing to amend these regulations by removing provisions that no longer apply and by making other changes for the purpose of clarification. This will make these regulations easier to use.

DATES: Comments must be received on or before July 20, 1998.

ADDRESSES: Mail or hand-deliver written comments to: Director, Office of Regulations Management (02D), Department of Veterans Affairs, 810 Vermont Avenue, NW, Room 1154, Washington, DC 20420. Comments should indicate that they are submitted in response to "RIN 2900–AI31". All written comments received will be available for public inspection at the above address in the Office of Regulations Management between the hours of 8:00 a.m. to 4:30 p.m., Monday through Friday (except holidays).

FOR FURTHER INFORMATION CONTACT: William G. Susling, Jr., Education Advisor, Education Service, Veterans Benefits Administration, 202–273–7187.

SUPPLEMENTARY INFORMATION: For many decades VA by statute has permitted veterans, servicemembers, eligible persons, and reservists to receive an advance payment of educational assistance provided that they request such a payment and certain other requirements are met. These payments have covered educational assistance scheduled to be paid to the individual during the first month or fraction of a month and the following month in a term or school year. Similarly, some individuals in some of the educational programs VA administers are able in certain circumstances to receive a lump-sum payment covering the educational assistance due for an entire term.

The regulations governing these payments have accumulated obsolete provisions over the years, and have been written in a way that is not always easy to understand. This proposed rule removes these obsolete provisions and makes other clarifying changes. Moreover, VA may make advance payments under many of the educational programs the department administers. The rules governing advance payments are the same for all of those educational programs. There appears to be no need to repeat those rules in each subpart of part 21, 38 CFR. Consequently, VA is proposing to replace the repetition of those rules with references to the complete statement of the advance payment rules that are proposed in subpart D.

Current regulations allow VA to make lump-sum payments to trainees in both the Survivors' and Dependents' Educational Assistance program (DEA) and in the Montgomery GI Bill—Active Duty (MGIB). The rules for making these payments are the same for both programs. There appears to be no need to repeat these rules in both of the affected subparts of Part 21, 38 CFR. Consequently, VA is proposing to replace the repetition of those rules with references to the complete statement of the lump-sum payment rules that are proposed in subpart D. There are no substantive changes in this proposed rule.

Paperwork Reduction Act

The Office of Management and Budget (OMB) has determined that the proposed 38 CFR 21.4138(a) would constitute a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). Accordingly, under § 3507(d) of the Act VA has submitted a copy of this rulemaking action to OMB for its review.

Title: Request for an Advance Payment of Educational Assistance.

Summary of collection of information: The collection of information in the proposed revisions to § 21.4138(a) in this rulemaking proceeding implements a statutory provision that mandates that an individual who wishes to receive an advance payment of educational assistance must ask for it.

Description of need for information and proposed use of information: The information required in § 21.4138(a) is needed so that VA may make advance payments of educational assistance to those who want such payments.

Description of likely respondents. Veterans, reservists, and eligible persons receiving educational assistance under the programs VA administers.

Estimated number of respondents: 75,000 each year.

Estimated frequency of responses: Occasionally, when a veteran, reservist, or eligible person wants an advance payment of educational assistance at the start of an enrollment period.

Estimated total annual reporting and recordkeeping burden: 6,250 hours of reporting burden. VA does not believe that there will be additional recordkeeping burden.

Estimated average burden per respondent: 5 minutes.

The Department considers comments by the public on proposed collections of information in—

- Evaluating whether the proposed collection(s) of information are necessary for the proposed performance of the functions of the Department, including whether the information will have practical utility;
- Evaluating the accuracy of the Department's estimate of the burden of the proposed collections of information, including the validity of the methodology and assumptions used;
- Minimizing the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

OMB is required to make a decision concerning the collection of information contained in this proposed rule between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication.

The Department of Defense (DOD) and VA are jointly issuing this proposed rule insofar as it relates to the Post-Vietnam Era Veterans' Educational Assistance program. This program is funded by DOD and administered by VA. DOD, the Department of Transportation (Coast Guard), and VA are jointly issuing this proposed rule insofar as it relates to the Montgomery GI Bill—Selected Reserve. This program is funded by DOD and the Coast Guard, and is administered by

VA. The remainder of this proposed rule is issued solely by VA.

The signers of this document hereby certify that this regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. The adoption of this proposed rule would not make substantive changes. It would remove provisions that no longer apply and make other changes for purposes of clarification.

The Catalog of Federal Domestic Assistance numbers for the programs affected by this proposed rule are 64.117, 64.120, and 64.124. The proposed rule will also affect the Montgomery GI Bill—Selected Reserve for which there is no Catalog of Federal Domestic Assistance number.

List of Subjects in 38 CFR Part 21

Administrative practice and procedure, Armed forces, Civil rights, Claims, Colleges and universities, Conflict of interests, Defense Department, Education, Employment, Grant programs—education, Grant programs—veterans, Health care, Loan programs-education, Loan programs—veterans, Manpower training programs, Reporting and recordkeeping requirements, Schools, Travel and transportation expenses, Veterans, Vocational education, Vocational rehabilitation.

Approved: May 12, 1998.

Togo D. West, Jr.,

Secretary.

Approved: March 16, 1998.

Norman G. Lezy,

Lieutenant General, USAF, Deputy Assistant Secretary (Military Personnel Policy), Department of Defense.

Approved: February 26, 1998.

G.F. Woolever,

Rear Admiral, U.S. Coast Guard, Assistant Commandant for Human Resources.

For the reasons set out in the preamble, 38 CFR part 21 is proposed to be amended as set forth below.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

Subpart D—Administration of Educational Assistance Programs

1. The authority citation for subpart D continues to read as follows:

Authority: 10 U.S.C. ch. 1606; 38 U.S.C. 501(a), 38 U.S.C. chs. 30, 32, 34, 35, 36, unless otherwise noted.

2. In § 21.4138, the introductory text is removed; paragraphs (c) and (d) are removed and reserved; and paragraphs (a) and (b) are revised to read as follows:

§ 21.4138 Certifications and release of payments.

(a) *Advance payments.* (1) VA will make payments of educational assistance in advance when:

(i) The veteran, servicemember, reservist, or eligible person has specifically requested such a payment;

(ii) The student is enrolled for half time or more;

(iii) The educational institution at which the veteran, servicemember, reservist, or eligible person is accepted or enrolled has agreed to and can satisfactorily carry out the provisions of 38 U.S.C. 3680(d)(4)(B) and (C) and (5) pertaining to receipt, delivery, or return of checks and certifications of delivery and enrollment;

(iv) The Director of the VA field facility of jurisdiction has not acted under paragraph (a)(4) of this section to prevent advance payments being made to the veteran's, servicemember's, reservist's, or eligible person's educational institution;

(v) There is no evidence in the veteran's, servicemember's, reservist's, or eligible person's claim file showing that he or she is not eligible for an advance payment;

(vi) The period for which the veteran, servicemember, reservist, or eligible person has requested a payment either—

(A) Is preceded by an interval of nonpayment for 30 days or more; or

(B) Is the beginning of a school year that is preceded by a period of nonpayment of 30 days or more; and

(vii) The educational institution or the veteran, servicemember, reservist, or eligible person has submitted the certification required by § 21.7151.

(2) The amount of the advance payment to a veteran, reservist, or eligible person is the educational assistance for the month or fraction thereof in which the term or course will begin plus the educational assistance for the following month. The amount of the advance payment to a servicemember is the amount payable for the entire term, quarter, or semester, as applicable.

(3) VA will mail advance payments to the educational institution for delivery to the veteran, servicemember, reservist, or eligible person. The educational institution will not deliver the advance payment check more than 30 days in advance of the first date of the period for which VA makes the advance payment.

(4) The Director of the VA field station of jurisdiction may direct that advance payments not be made to individuals attending an educational institution if:

(i) The educational institution demonstrates an inability to comply with the requirements of paragraph (a)(3) of this section;

(ii) The educational institution fails to provide adequately for the safekeeping of the advance payment checks before delivery to the veteran, servicemember, reservist, or eligible person or return to VA; or

(iii) The Director determines, based on compelling evidence, that the educational institution has demonstrated its inability to discharge its responsibilities under the advance payment program.

(Authority: 10 U.S.C. 16136(b), 38 U.S.C. 3034, 3680(d))

(b) *Lump-sum payments.* A lump-sum payment is a payment of all educational assistance due for an entire quarter, semester, or term. VA will make a lump-sum payment to:

(1) A veteran or servicemember pursuing a program of education at less than the half-time rate under 38 U.S.C. chapter 30;

(2) A servicemember pursuing a program of education at the half-time rate or greater under 38 U.S.C. chapter 30, provided that VA did not make an advance payment to the servicemember for the term for which a lump-sum payment would otherwise be due; and

(3) An eligible person pursuing a program of education at less than the half-time rate under 38 U.S.C. chapter 35.

(Authority: 38 U.S.C. 3034(c), 3680(f))

* * * * *

Subpart G—Post-Vietnam Era Veterans' Educational Assistance Under 38 U.S.C. Chapter 32

3. The authority citation for part 21, subpart G continues to read as follows:

Authority: 38 U.S.C. 501(a), ch. 32, unless otherwise noted.

4. Section 21.5135 is revised to read as follows.

§ 21.5135 Advance payments.

VA will apply the provisions of § 21.4138(a) in making advance payments to veterans and servicemembers.

(Authority: 38 U.S.C. 3241, 3680)

Subpart K—All Volunteer Force Educational Assistance Program (Montgomery GI Bill—Active Duty)

5. The authority citation for part 21, subpart K continues to read as follows:

Authority: 38 U.S.C. 501(a), ch. 30, 36, unless otherwise noted.

6. In § 21.7140, paragraph (b) is removed; paragraphs (c), (d), (e), (f), and

(g) are redesignated as paragraphs (b), (c), (d), (e), and (f), respectively; and paragraph (a) is revised, to read as follows:

§ 21.7140 Certifications and release of payments.

(a) *Advance payments and lump-sum payments.* VA will apply the provisions of § 21.4138 (a) and (b) in making advance payments and lump-sum payments to veterans and servicemembers.

(Authority: 38 U.S.C. 3034 and 3680)

* * * * *

Subpart L Educational Assistance for Members of the Selected Reserve

7. The authority citation for part 21, subpart L continues to read as follows:

Authority: 10 U.S.C. ch. 1606; 38 U.S.C. 501, unless otherwise noted.

8. In § 21.7640, the authority citations for paragraphs (b), (c), (e), and (f) are amended by removing "; Pub. L. 98–525"; and paragraph (e) is amended by removing "paragraph (d) of this section" and adding, in its place, "§ 21.4138(a)"; and paragraph (d) is revised to read as follows:

§ 21.7640 Release of payments.

* * * * *

(d) *Advance payments.* VA will apply the provisions of § 21.4138(a) in making advance payments to reservists.

(Authority: 10 U.S.C. 16136(b), 38 U.S.C. 3680)

Federal Register
Vol. 63, No. 97
Wednesday, May 20, 1998

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Arkansas Advisory Committee

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the Arkansas Advisory Committee to the Commission will convene at 4:00 p.m. and adjourn at 8:00 p.m. on June 11, 1998, at the North Little Rock Hilton, Two Riverfront Place, North Little Rock, Arkansas 72114. The purpose of the meeting is project planning.

Persons desiring additional information, or planning a presentation to the Committee, should contact Melvin L. Jenkins, Director of the Central Regional Office, 913–551–1400 (TDD 913–551–1414). Hearing-impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Office at least ten (10) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, May 11, 1998.

Carol-Lee Hurley,

Chief, Regional Programs Coordination Unit.

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Rhode Island Advisory Committee

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the Rhode Island Advisory Committee to the Commission will convene at 9:00 a.m. and adjourn at 12:30 p.m. on June 5, 1998, at the Rhode Island State House, Room 102, Providence, Rhode Island 02903. The purpose of the meeting is for the Committee to discuss the status of their project, "An Examination of the Impact of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 on Legal Immigrants in Rhode Island," and plan future events.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson Robert Lee, 401–351–2712, or Ki-Taek Chun, Director of the Eastern Regional Office, 202–376–7533 (TDD 202–376–8116). Hearing-impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Office at least ten (10) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, May 11, 1998.

Carol-Lee Hurley,

Chief, Regional Programs Coordination Unit.

BILLING CODE 6335–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Fish Tagging Report

ACTION: Proposed Collection; Comment Request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before July 20, 1998.

ADDRESSES: Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington DC 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Dave Rosenthal, Southeast Fisheries Science Center, 75 Virginia Beach Drive, Miami, FL 33149 (305) 361–4253.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Cooperative Gamefish Tagging Program (CGFTP) was initiated in 1971 as part of a comprehensive research program resulting from passage of Public Law 86–395 and other legislative acts under which the National Marine Fisheries Service operates. The program attempts to determine the migratory patterns and other biological information of billfish, tunas, and other highly migratory species. The Fish Tagging Report card and the Fish Tag Issue Report card are necessary when a tag is used. They are provided to the angler with the tags. When an angler receives the tags, he/she returns the Tag Issue Report card to NMFS to register the series of tags that were issued. When the angler releases a fish, he/she takes the Fish Tagging Report Card with a tag attached, removes the numbered tag, applies the tag to the fish, and then mails the completed card (which has a number matching the tag number) to NMFS, where the data is stored.

II. Method of Collection

Fishermen volunteer to tag and release their catch. When requested, NMFS provides the volunteers with fish tags for their use when they release their fish. Usually a group of five tags are sent at one time. When the angler receives their tags, they respond by completing the Tag Issue Report card and submits this to NMFS. When a tag is applied to a fish, the corresponding data is reported on the Fish Tagging Report card and submitted to NMFS. When a tagged fish is recaptured, the tag has the address of NMFS and a tag number. The person with the tagged fish can mail it back to NMFS where information on the fish is recorded and matched with the release data. The Tag Recapture Card is cleared under OMB Approval Number 0648–0259.

III. Data

OMB Number: 0648–0247.
Type of Review: Regular Submission.
Affected Public: Individuals.
Estimated Number of Respondents: 10,000.

Estimated Time per Response: 2 minutes.

Estimated Annual Burden Hours: 300.

Estimated Total Annual Cost to Public: $0 (no capital expenditures are required).

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: May 14, 1998.

Linda Engelmeier,

Departmental Forms Clearance Officer, Office of Management and Organization.

Southeast Region Gear Identification Requirements

ACTION: Proposed collection; comment request

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Pub. L. 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before July 20, 1998.

ADDRESSES: Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue NW, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Edward E. Burgess, 9721 Executive Center Drive North, St. Petersburg, FL, 33702, 813–570–5326.

SUPPLEMENTARY INFORMATION:

I. Abstract

Under the provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.) NOAA is responsible for management of the Nation's marine fisheries. As part of its efforts to enforce fishery regulations, NOAA has included in some of those regulations requirements that fishing gear be marked. The ability to link gear to its owner or operator is essential for enforcement in these fisheries, and the identification of gear is also useful in actions concerning the damage or loss of gear. NOAA has previously received Paperwork Reduction Act clearance for all of its gear-marking requirements under one Office of Management and Budget (OMB) control number, 0648–0305, but for internal management reasons NOAA intends that future clearances will be obtained on a regional or fishery basis. This notice is for the requirements imposed in the Southeast Region for the following: coral aquacultured live rock; golden crab traps; reef fish traps and floats; Spanish mackerel gillnet floats; spiny lobster traps; snapper-grouper traps (pots); stone crab traps.

II. Method of Collection

Fishermen in selected fisheries must mark their fishing gear. Aquacultured live rock which is not geologically distinguishable from naturally occurring substrate must be marked or tagged. Each fish or spiny lobster trap or pot must be marked with a tag and a buoy must be used to mark the traps. Gillnets for Spanish mackerel on the east coast of Florida must be marked with floats.

III. Data

OMB Number: New Number to be Assigned.

Form Number: N/A.

Type of Review: Regular submission.

Affected Public: Business and other for-profit organizations.

Estimated Number of Respondents: 1,000.

Estimated Time Per Response: Each trap will require 7 minutes to mark. It will take 10 seconds to mark each coral rock and it will take 20 minutes to mark a Spanish mackerel gillnet float.

Estimated Total Annual Burden Hours: 2,187.

Estimated Total Annual Cost to Public: $15,275.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: May 14, 1998.

National Oceanic and Atmospheric Administration

Marine Recreational Fishery Statistics Survey

ACTION: Proposed collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Pub. L. 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before July 20, 1998.

ADDRESSES: Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Stephen Meyers, Fisheries

Statistics and Economics Division (F/ST1), Office of Science and Technology, National Marine Fisheries Service, 1315 East West Highway, Silver Spring, MD 20910. (301) 713–2328.

SUPPLEMENTARY INFORMATION:

I. Abstract

These data are required to carry out provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 USC 1801 *et seq.*), as amended. Marine recreational anglers are surveyed for catch and effort data, fish biology data, and angler socioeconomic characteristics.

II. Method of Collection

A random-digit-dialing telephone household survey collects data on the number of fishing trips and on the proportion of marine fishing households by county of the survey area. On-site intercept interviews of marine recreational anglers collects data on the catch per trip by species.

III. Data

OMB Number: 0648–0052.
Form Numbers: None.
Type of Review: Regular submission.
Affected Public: Individuals (U.S. marine recreational anglers).
Estimated Number of Respondents: 428,000.
Estimated Time Per Response: Approximately 7–8 minutes per survey of fishermen or fishing households and 1 minute for contacts of non-fishing households.
Estimated Total Annual Burden Hours: 16,459.
Estimated Total Annual Cost to Public: $0 (no capital expenditures required.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

High Seas Fishing Application Information

ACTION: Proposed collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before July 20, 1998.

ADDRESSES: Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Bob Dickinson, Office of Sustainable Fisheries, International Fisheries Division, 1315 East West Highway, Silver Spring, Maryland 20910, (301) 713–2337.

SUPPLEMENTARY INFORMATION:

I. Abstract

United States vessels that fish on the high seas are required to possess a permit issued under the High Seas Fishing Compliance Act (16 U.S.C. 5501 *et seq.* and 50 CFR 300.13). Applicants must submit application information to identify their vessels and intended fishing areas. The application information is used to process applications and maintain a register of U.S. vessels authorized to fish on the high seas.

II. Method of Collection

The submission of a form is required.

III. Data

OMB Number: 0648–0304.
Form Number: None.
Type of Review: Regular submission.
Affected Public: Business and other for-profit (owners/operators of vessels fishing on the high seas).
Estimated Number of Respondents: 200.
Estimated Time Per Response: .5 hour each.
Estimated Total Annual Burden Hours: 100.
Estimated Total Annual Cost to Public: $0 (no capital expenditures).

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Bureau of the Census

[Docket No. 980512125–8125–01]

Decennial Population and Housing Count Determination for Places Incorporating or Annexing Between the National Censuses

AGENCY: Bureau of the Census, Commerce.

ACTION: Notice of temporary termination of program.

SUMMARY: This document serves notice to state and local governments and to other Federal agencies that for the next three years, beginning on June 1, 1998, the Bureau of the Census will not provide the operations necessary to determine the April 1, 1990 census population and housing unit counts for entities that annex territory, or that

incorporate or organize as counties, boroughs, cities, towns, villages, townships, or other general purpose governments, between the 1990 and 2000 decennial censuses.

EFFECTIVE DATE: June 1, 1998.

FOR FURTHER INFORMATION CONTACT: Dr. Joel L. Morrison, Chief, Geography Division, Bureau of the Census, Washington, D.C. 20233–7400, telephone (301) 457–1132, e-mail at jmorrison@geo.census.gov.

SUPPLEMENTARY INFORMATION: The Bureau of the Census first began to make these count determinations in 1972 in response to the requests of local governments to establish eligibility for participation in the General Revenue Sharing Program, authorized under Pub. L. 92–512. At that time, the Bureau of the Census established a fee-paid program enabling entities with annexations to obtain updated decennial census population counts that reflected the population living in the boundary change areas. The Bureau of the Census received funding from the U.S. Department of the Treasury to make those determinations for larger annexations that met prescribed criteria and for the new incorporations. The General Revenue Sharing Program ended on September 30, 1986. The Bureau of the Census continued to fund the count update operation through fiscal year 1995 for the large annexations and through fiscal year 1996 for newly incorporated areas. There is no funded Federal legislative requirement that this work continue.

The Bureau of the Census will renew the program in the year 2001, after the availability of Census 2000 data, for those entities that desire the service, provided that any and all costs associated with this work are borne by the local governmental entity.

Authority to continue this program on a fee-for-service basis is contained in Title 13, United States Code, Section 8.

Dated: May 13, 1998.

James F. Holmes,

Acting Director, Bureau of the Census.

Foreign-Trade Zones Board

[Order No. 980]

Grant of Authority for Subzone Status CITGO Petroleum Co. (Petroleum Product Storage Facility), Broward County, FL

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment . . . of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a-81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs ports of entry;

Whereas, the Board's regulations (15 CFR part 400) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved;

Whereas, an application from Broward County, Florida, grantee of FTZ 25, for authority to establish special-purpose subzone status at the petroleum product storage facility of CITGO Petroleum Company, in Broward County, Florida, was filed by the Board on July 11, 1997, and notice inviting public comment was given in the **Federal Register** (FTZ Docket 58–97, 62 FR 38972, 7/21/97); and,

Whereas, the Board adopts the findings and recommendations of the examiner's report, and finds that the requirements of the FTZ Act and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, therefore, the Board hereby grants authority for subzone status at the petroleum product storage facility of CITGO Petroleum Company, located in Broward County, Florida (Subzone 25B), at the location described in the application, and subject to the FTZ Act and the Board's regulations, including § 400.28.

Signed at Washington, DC, this 11th day of May 1998.

Robert S. LaRussa,

Assistant Secretary of Commerce for Import Administration, Alternate Chairman, Foreign-Trade Zones Board.

Attest:

Dennis Puccinelli,

Acting Executive Secretary.

International Trade Administration

[A–583–810]

Chrome-Plated Lug Nuts From Taiwan; Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Extension of time limit for preliminary results of antidumping duty administrative review of chrome-plated lug nuts from Taiwan.

SUMMARY: The Department of Commerce ("the Department") is extending the time limit for the preliminary results of the sixth antidumping duty administrative review of the antidumping order on chrome-plated lug nuts from Taiwan. This review covers 18 producers and exporters of chrome-plated lung nuts. The period of review is September 1, 1996 through August 31, 1997.

EFFECTIVE DATE: May 20, 1998.

FOR FURTHER INFORMATION CONTACT: Todd Peterson or Thomas Futtner, AD/CVD Enforcement Group II, Office 4, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington DC 20230, telephone (202) 482–4195 or 482–3814, respectively.

SUPPLEMENTARY INFORMATION:

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930 ("the Act") are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department's regulations are references to the provisions codified at 19 CFR 351.101, et seq. (62 FR 27296—May 19, 1997).

Extension of Preliminary Results

The Department initiated this administrative review on October 30, 1997 (62 FR 58705). Under section 751(a)(3)(A) of the Act, the Department may extend the deadline for completion of an administrative review if it determines that it is not practicable to complete the review within the statutory time limit of 365 days. Because of the complexity and novelty of certain issues in this case, it is not practicable to complete this review within the statutory time limit of 365 days. The Department, therefore, is extending the time limit for the preliminary results of the aforementioned review to August 3, 1998. See memorandum from Maria Harris Tildon to Robert S. LaRussa, which is on file in Room B–099 at the Department's headquarters. The deadline for the final results of this review will continue to be 120 days after publication of the preliminary results.

This extension of time limit is in accordance with section 751(a)(3)(A) of the Act and section 351.213(h)(2) of the Department's regulations.

Dated: May 14, 1998.

Maria Harris Tildon,

Acting Deputy Assistant Secretary, AD/CVD Enforcement Group II.

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Visiting Committee on Advanced Technology; Meeting

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice of partially closed meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, 5 U.S.C. app. 2, notice is hereby given that the Visiting Committee on Advanced Technology, National Institute of Standards and Technology (NIST), will meet Tuesday, June 9, 1998 from 8:30 a.m. to 5:00 p.m. The Visiting Committee on Advanced Technology is composed of fifteen members appointed by the Director of NIST who are eminent in such fields as business, research, new product development, engineering, labor, education, management consulting, environment, and International relations. The purpose of this meeting is to review and make recommendations regarding general policy for the Institute, its organization, its budget, and its programs within the framework of applicable national policies as set forth by the President and the Congress. The agenda will include an update on NIST programs, NIST Planning for International Standards and Recent Developments in international Standards, the Manufacturing Extension Partnership, and a laboratory tour. Discussions scheduled to begin at 8:30 a.m. and to end at 9:10 a.m. on June 9, 1998, on staffing of management positions at NIST and the NIST budget, including funding levels of the Advanced Technology Program and the Manufacturing Extension Partnership scheduled to begin at 4:30 p.m. and to end at 5 p.m. on June 9, 1998, will be closed.

DATES: The meeting will convene June 9, 1998, at 8:30 a.m. and will adjourn at 5 p.m. on June 9, 1998.

ADDRESSES: The meeting will be held in the Employees Lounge (seating capacity 80, includes 38 participants), Administration Building, at NIST, Gaithersburg, Maryland.

FOR FURTHER INFORMATION CONTACT: Chris E. Kuyatt, Visiting Committee Executive Director, National Institute of Standards and Technology, Gaithersburg, MD 20899, telephone number (301) 975–6090.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the General Counsel, formally determined on February 13, 1998, that portions of the meeting of the Visiting Committee on Advanced Technology which involve discussion of proposed funding of the Manufacturing Extension Partnership and the Advanced Technology Program may be closed in accordance with 5 U.S.C. 552b(c)(9)(B), because those portions of the meetings will divulge matters the premature disclosure of which would be likely to significantly frustrate implementation of proposed agency actions; and that portions of meetings which involve discussion of the staffing issues of management and other positions at NIST may be closed in accordance with 5 U.S.C. 552b(c)(6), because divulging information discussed in those portions of the meetings is likely to reveal information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Dated: May 14, 1998.

Robert E. Hebner,

Acting Deputy Director.

RIN 0648–AH77

Atlantic Shark Fisheries; Notice of Availability

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability.

SUMMARY: NMFS announces that the Highly Migratory Species Management Division has prepared a final document considering the economic effects and potential alternatives to the 1997 quotas on the Atlantic large coastal shark fishery, as ordered by the Middle District Court of Florida, Tampa Division, on February 26, 1998.

ADDRESSES: Requests for copies of the final document should be sent to Margo Schulze, Highly Migratory Species Management Division (F/SF1), National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Margo Schulze or Karyl Brewster-Geisz, 301–713–2347; fax: 301–713–1917.

SUPPLEMENTARY INFORMATION: The fishery for Atlantic sharks is managed under the Fishery Management Plan for Sharks of the Atlantic Ocean prepared by NMFS under authority of section 304(g) of the Magnuson-Stevens Fishery Conservation and Management Act, as amended, and was implemented on April 26, 1993, through regulations found at 50 CFR part 678.

On April 2, 1997 (62 FR 16648), NMFS reduced the large coastal shark commercial quota and recreational bag limit by 50 percent as proposed, with an exception for an additional recreational allowance of two Atlantic sharpnose sharks per person per trip. The prohibition on possession of white sharks was modified to allow for a catch-and-release-only recreational fishery. Otherwise, all measures were implemented as proposed. Partly because NMFS received comments that indicated the proposed measures may have a significant economic impact on a substantial number of small entities and because it wanted to ensure that the impacts were thoroughly analyzed, NMFS prepared a Final Regulatory Flexibility Analysis (FRFA) that assessed the economic impacts of the regulation on small entities engaged in the Atlantic shark fishery in the final rule. In that FRFA, NMFS reaffirmed its

conclusion from the proposed rule stage that the 1997 quotas would not have a significant economic impact on a substantial number of small entities engaged in the large coastal shark fishery.

On May 2, 1997, a coalition of commercial shark fishermen, dealers, and organizations sued the Secretary of Commerce (Secretary) to set aside the 1997 commercial shark quotas based on allegations of uncertainty in the data used in stock assessments, on lack of international management, and on NMFS' determination that there would be no significant economic impact on a substantial number of small entities engaged in the Atlantic shark fishery. On February 27, 1998, Judge Steven D. Merryday, U.S. District Court, Middle District of Florida, Tampa Division, issued an amended order that found "that the Secretary acted within his regulatory discretion in setting the quotas but failed to conduct a proper analysis to determine the quota's economic effect on small businesses" (p. 1). Judge Merryday ordered that the agency submit further analyses on or before May 15, 1998, and retained jurisdiction over the case pending review of the analyses. The quotas are maintained until further order of the Court. On April 14, 1998, NMFS announced the availability of the draft consideration of the economic effects and potential alternatives to the 1997 quotas on the Atlantic large coastal shark fishery in response to the judicial order. Public comment was requested on the assumptions, analysis, and conclusions in the draft document. The comments received were considered and used to improve the document. A summary of the comments and NMFS response to each are contained within the document. This final document was submitted to the United States District Court for the Middle District of Florida, Tampa Division, on May 15, 1998.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: May 14, 1998.

Gary C. Matlock,

Director, Office of Sustainable Fisheries National Marine Fisheries Service.

Small Takes of Marine Mammals Incidental to Specified Activities; Offshore Seismic Activities in the Beaufort Sea

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of application and proposed authorization for a small take exemption; request for comments.

SUMMARY: NMFS has received a request from Western Geophysical/Western Atlas International of Houston, Texas (Western Geophysical) for an authorization to take small numbers of marine mammals by harassment incidental to conducting seismic surveys in the Beaufort Sea in state and Federal waters. Under the Marine Mammal Protection Act (MMPA), NMFS is requesting comments on its proposal to authorize Western Geophysical to incidentally take, by harassment, small numbers of bowhead whales and other marine mammals in the above mentioned areas during the open water period of 1998.

DATES: Comments and information must be received no later than June 19, 1998.

ADDRESSES: Comments on the application should be addressed to Michael Payne, Chief, Marine Mammal Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Silver Spring, MD 20910–3225. A copy of the application, a 1996 environmental assessment (EA), and a list of references used in this document may be obtained by writing to this address or by telephoning one of the contacts listed here.

FOR FURTHER INFORMATION CONTACT: Kenneth R. Hollingshead, (301) 713–2055, Brad Smith, (907) 271–5006.

SUPPLEMENTARY INFORMATION:

Background

Section 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) directs the Secretary of Commerce to allow, upon request, the incidental, but not intentional taking of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, notice of a proposed authorization is provided to the public for review.

Permission may be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses and that the permissible methods of taking and requirements pertaining to the monitoring and reporting of such taking are set forth.

On April 10, 1996 (61 FR 15884), NMFS published an interim rule establishing, among other things, procedures for issuing incidental harassment authorizations under section 101(a)(5)(D) of the MMPA for activities in Arctic waters. For additional information on the procedures to be followed for this authorization, please refer to that document.

Summary of Request

On April 15, 1998, NMFS received an application from Western Geophysical requesting an authorization for the harassment of small numbers of several species of marine mammals incidental to conducting seismic surveys during the open water season in the Beaufort Sea between Harrison Bay and Flaxman Island, AK. Weather permitting, the survey is expected to take place between approximately July 1 and October 20, 1998. A detailed description of the work proposed for 1998 is contained in the application (Western Geophysical, 1998) and is available upon request (see **ADDRESSES**).

Description of Habitat and Marine Mammal Affected by the Activity

A detailed description of the Beaufort Sea ecosystem and its associated marine mammals can be found in the EA prepared for this authorization or in other documents (Minerals Management Service (MMS), 1992, 1996). This information is incorporated by reference and need not be repeated here. A copy of the EA is available upon request (see **ADDRESSES**).

Marine Mammals

The Beaufort/Chukchi Seas support a diverse assemblage of marine mammals, including bowhead whales (*Balaena mysticetus*), gray whales (*Eschrichtius robustus*), belukha (*Delphinapterus leucas*), ringed seals (*Phoca hispida*), spotted seals (*Phoca largha*) and bearded seals (*Erignathus barbatus*). Descriptions of the biology and distribution of these species and of others can be found in several other documents (Western Geophysical, 1998; BPXA, 1996b, 1998; Lentfer, 1988;

MMS, 1992, 1996; Small and DeMaster, 1995; Hill *et al.*, 1997). Please refer to those documents for information on these species.

Potential Effects of Seismic Surveys on Marine Mammals

Disturbance by seismic noise is the principal means of taking by this activity. Support vessels and aircraft will provide a secondary source of noise. The physical presence of vessels and aircraft could also lead to non-acoustic effects involving visual or other cues.

Seismic surveys are used to obtain data about formations several thousands of feet deep. The proposed seismic operation is an ocean bottom cable (OBC) survey. OBC surveys involve dropping cables from a ship to the ocean bottom, forming a patch consisting of 4 parallel cables 10 kilometers (km) (6.2 mi) long, separated 750 m (2,500 ft) from each other. Sensors (hydrophones) are attached to the cables. These hydrophones are used to detect seismic energy reflected back from underground rock strata. The original source of this energy is a submerged acoustic source, called a seismic airgun array, that releases compressed air into the water, creating an acoustical energy pulse that is directed downward toward the seabed. The source level planned for this project—a maximum of 249 dB re 1 μPa-m (zero to peak) or 53 bar-meters peak-to-peak from a 1,500 in^3 array of airguns—is in the lower to middle portion of the range of source levels commonly used for seismic operations with airgun arrays (Richardson *et al.*, 1995). Normally, 36 seismic lines are run for each patch, covering an area 6.0 km by 17.5 km (3.7 mi by 10.87 mi), centered over the patch.

After sufficient data have been recorded to allow accurate mapping of the rock strata, the cable is lifted onto the deck of a cable-retrieval vessel, moved to a new location (ranging from several hundred to a few thousand feet away), and placed onto the seabed again. For a more detailed description of the seismic operation, please refer to the application (Western Geophysical, 1998).

Depending upon ambient conditions and the sensitivity of the receptor, underwater sounds produced by open water seismic operations may be detectable a substantial distance away from the activity. Any sound that is detectable is (at least in theory) capable of eliciting a disturbance reaction by a marine mammal or of masking a signal of comparable frequency (Western Geophysical, 1998). An incidental harassment take is presumed to occur when marine mammals in the vicinity of the seismic source, the seismic vessel, other vessels, or aircraft react to the generated sounds or to visual cues.

Seismic pulses are known to cause bowhead whales to behaviorally respond within a distance of several kilometers (Richardson *et al.*, 1995). Although some limited masking of low-frequency sounds (e.g., whale calls) is a possibility, the intermittent nature of seismic source pulses (1 second in duration every 6 to 12 seconds) will limit the extent of masking. Bowhead whales are known to continue calling in the presence of seismic survey sounds, and their calls can be heard between seismic pulses (Richardson *et al.*, 1986). Masking effects are expected to be absent in the case of belukhas, given that sounds important to them are predominantly at much higher frequencies than are airgun sounds (Western Geophysical, 1998).

Hearing damage is not expected to occur during the project. It is not known whether a marine mammal very close to an airgun array would be at risk of temporary or permanent hearing impairment, but temporary threshold shift is a theoretical possibility for animals within a few hundred meters (Richardson *et al.*, 1995) of the source. However, planned monitoring and mitigation measures (described later in this document) are designed to detect marine mammals occurring near the array and to avoid exposing them to sound pulses that have any possibility of causing hearing damage.

When the received levels of noise exceed some behavioral reaction threshold, cetaceans will show disturbance reactions. The levels, frequencies, and types of noise that will elicit a response vary between and within species, individuals, locations, and seasons. Behavioral changes may be subtle alterations in surface, respiration, and dive cycles. More conspicuous responses include changes in activity or aerial displays, movement away from the sound source, or complete avoidance of the area. The reaction threshold and degree of response are related to the activity of the animal at the time of the disturbance. Whales engaged in active behaviors, such as feeding, socializing, or mating, are less likely than resting animals to show overt behavioral reactions, unless the disturbance is directly threatening (Western Geophysical, 1998).

Bowhead Whales

Various studies (Reeves *et al.*, 1984, Fraker *et al.*, 1985, Richardson *et al.*, 1986, Ljungblad *et al.*, 1988) have reported that, when an operating seismic vessel approaches within a few kilometers, most bowhead whales exhibit strong avoidance behavior and changes in surfacing, respiration, and dive cycles. Bowheads exposed to seismic pulses from vessels more than 7.5 km (4.5 mi) away rarely showed observable avoidance of the vessel, but their surface, respiration, and dive cycles appeared altered in a manner similar to that observed in whales exposed at a closer distance (BPXA, 1996a, 1996b, Western Geophysical, 1998).

Within a 6–99 km (3.7–60 mi) range, it has not been possible to determine a specific distance at which subtle behavioral changes no longer occur (Richardson and Malme, 1993), given the high variability observed in bowhead whale behavior (BPXA, 1996a, 1996b). Analysis of the results from BPXA's 1996 seismic monitoring program does not provide conclusive evidence about the radius of avoidance of bowheads to the seismic program. The peak number of bowhead sightings was 10–20 km (6.2–12.3 mi) from shore during no-seismic periods and 20–30 km (12.3–18.6 mi) from shore during periods that may have been influenced by seismic noise. This difference was not statistically significant, but the low numbers of sightings preclude meaningful interpretation (Western Geophysical, 1998).

Inupiat whalers believe that migrating bowheads are sometimes displaced at distances considerably greater than 6 to 8 km (3.7 to 5.0 mi)(Rexford, 1996). Scientific studies done to date have limitations as discussed in part by Moore and Clark (1992) and MMS (1996). It is possible that, when additional data are available, it will be demonstrated that bowheads sometimes do avoid seismic vessels at distances beyond 6 to 8 km (3.7 to 5.0 mi). Also, whalers have mentioned that bowheads sometimes seem more "skittish" and more difficult to approach when seismic exploration is underway in the area. This "skittish" behavior may be related to the observed subtle changes in the behavior of bowheads exposed to seismic pulses from distant seismic vessels (Richardson *et al.*, 1986).

Gray Whales

The reactions of gray whales to seismic pulses are similar to those of bowheads. Migrating gray whales along the California coast were noted to slow their speed of swimming, turn away from seismic noise sources, and increase their respiration rates. Malme *et al.* (1983, 1984, 1988) concluded that approximately 50 percent showed avoidance when the average received

pulse level was 170 dB (re 1 μPa @ 1 m). By some behavioral measures, clear effects were evident at average pulse levels of 160+dB; less consistent results were suspected at levels of 140–160 dB.

Belukha

The belukha is the only species of toothed whale (*Odontoceti*) expected to be encountered in the Beaufort Sea. Because their hearing threshold at frequencies below 100 Hz (where most of the energy from airgun arrays is concentrated) is poor (125 dB re 1 μPa @ 1 m) or more depending upon frequency (Johnson *et al.*, 1989; Richardson *et al.*, 1991, 1995), belukha are not predicted to be strongly influenced by seismic noise. However, because of the high source levels of seismic pulses, airgun sounds may be audible to belukha at distances of 100 km (Richardson and Wursig, 1997). The reaction distance for belukha, although presently unknown, is expected to be less than that for bowheads, given the presumed poorer sensitivity of belukhas than that of bowheads for low-frequency sounds (Western Geophysical, 1998).

Ringed, Largha and Bearded Seals

No detailed studies of reactions by seals to noise from open water seismic exploration have been published (Richardson *et al.*, 1995). However, there are some data on the reactions of seals to various types of impulsive sounds (J. Parsons as quoted in Greene, *et al.* 1985; Anon., 1975; Mate and Harvey, 1985). These studies indicate that ice seals typically either tolerate or habituate to seismic noise produced from open water sources.

Underwater audiograms have been obtained using behavioral methods for three species of phocinid seals, ringed, harbor, and harp seals (*Pagophilus groenlandicus*). These audiograms were reviewed in Richardson *et al.* (1995). Below 30–50 kHz, the hearing threshold of phocinids is essentially flat down to at least 1 kHz and ranges between 60 and 85 dB (re 1 μPa @ 1 m). There are few data on hearing sensitivity of phocinid seals below 1 kHz. NMFS considers harbor seals to have a hearing threshold of 70–85 dB at 1 kHz (60 FR 53753, October 17, 1995), and recent measurements for a harbor seal indicate that, below 1 kHz, its thresholds deteriorate gradually to 97 dB (re 1 μPa @ 1 m) at 100 Hz (Kastak and Schusterman, 1995a, b).

Because no studies to date have focused on pinniped reaction to underwater noise from pulsed, seismic arrays in open water (Richardson *et al.*, 1991, 1995), as opposed to in-air exposure to continuous noise, substantive conclusions are not possible at this time. However, assuming a sound pressure level of 80–100 dB over its threshold is needed in order to cause annoyance and 130 dB for injury (pain), as is the current thought based upon human studies (Advanced Research Projects Agency and NMFS, 1995), it appears unlikely that pinnipeds would be harassed or injured by low frequency sounds from a seismic source unless they were within close proximity of the array. For permanent injury, pinnipeds would likely need to remain in the high-noise field for extended periods of time. Existing evidence also suggests that, while they may be capable of hearing sounds from seismic arrays, seals appear to tolerate intense pulsatile sounds without known effect once they learn that there is no danger associated with the noise (see, for example, NMFS/Washington Department of Wildlife, 1995). In addition, they will apparently not abandon feeding or breeding areas due to exposure to these noise sources (Richardson *et al.*, 1991) and may habituate to certain noises over time. Since seismic work is fairly common in Beaufort Sea waters, pinnipeds have been previously exposed to seismic noise and may not react to it after initial exposure.

Other Effects

For a discussion on the anticipated effects of ships, boats, and aircraft, on marine mammals and their food sources, please refer to the application (Western Geophysical, 1998). Information on these effects is incorporated in this document by reference (see Western Geophysical, 1998).

Numbers of Marine Mammals Expected to be Taken

Western Geophysical estimates that the following numbers of marine mammals may be subject to Level B harassment, as defined in 50 CFR 216.3:

Species	Population size	Harassment takes in 1998	
		Possible	Probable
Bowhead	8,000	800	<400
Gray whale	23,000	<10	0
Belukha	41,610	250	<150
Ringed seal	1–1.5 million	400	<300
Spotted seal	>200,000	10	<5
Bearded seal	>300,000	50	<30

Effects of Seismic Noise and Other Activities on Subsistence Needs

The disturbance and potential displacement of marine mammals by sounds from seismic activities are the principle concerns related to subsistence use of the area. The harvest of marine mammals (mainly bowhead whales, ringed seals, and bearded seals) is central to the culture and subsistence economies of the coastal North Slope communities (Western Geophysical, 1998). In particular, if migrating bowhead whales are displaced farther offshore by elevated noise levels, the harvest of these whales could be more difficult and dangerous for hunters. The harvest could also be affected if bowheads become more skittish when exposed to seismic noise (Western Geophysical, 1998).

Nuiqsut is the community closest to the area of the proposed activity, and it harvests bowhead whales only during the fall whaling season. In recent years, Nuiqsut whalers typically take zero to four whales each season (Western Geophysical, 1998). Nuiqsut whalers concentrate their efforts on areas north and east of Cross Island, generally in water depths greater than 20 m (65 ft). Cross Island, the principle field camp location for Nuiqsut whalers, is located within the general area of the proposed seismic area. Thus, the possibility and timing of potential seismic operations in the Cross Island area requires Western Geophysical to provide NMFS with a Plan of Cooperation (also called the Communications and Avoidance Agreement) with North Slope Borough residents to avoid any unmitigable adverse impact on subsistence needs.

Whalers from the village of Kaktovik search for whales east, north, and west

of the village. Kaktovik is located 50 mi (80 km) east of the easternmost end of Western Geophysical's planned 1998 seismic exploration area. The westernmost reported harvest location was about 21 km (13 mi) west of Kaktovik, near 70°10'N, 144°W (Kaleak, 1996). That site is approximately 60 km (37 mi) east of the closest part of Western Geophysical's planned seismic exploration area for 1998 (Western Geophysical, 1998).

Whalers from the village of Barrow search for bowhead whales much further from the planned seismic area, >200 km (>125 mi) west (Western Geophysical, 1998).

The location of the proposed seismic activity is south of the center of the westward migration route of bowhead whales, but there is some overlap. Western Geophysical (1998) believes that, although whales may be able to hear the sounds emitted by the seismic array out to a distance of 50 km (30 mi) or more, it is unlikely that changes in migration route will occur at distances of >25 km (>15 mi). Alternatively, Inupiat whalers believe that bowheads begin to divert from their normal migration path more than 48 km (35 mi) away (MMS, 1996).

It is recognized that it is difficult to determine the maximum distance at which reactions occur (Moore and Clark, 1992). As a result, Western Geophysical will participate in a Communications and Avoidance Agreement with the whalers to reduce any potential interference with the hunt. Also, it is believed that the monitoring plan proposed by Western Geophysical (1998; also see LGL Ltd. and Greeneridge Sciences Inc, 1998) will provide information that will help resolve uncertainties about the effects of seismic exploration on the accessibility of bowheads to hunters.

While seismic exploration has some potential to influence subsistence seal hunting activities, the peak season for seal hunting is during the winter months when the harvest consists almost exclusively of ringed seals (Western Geophysical, 1998). In summer, boat crews hunt ringed, spotted and bearded seals (Western Geophysical, 1998). The most important sealing area for Nuiqsut hunters is off the Colville delta, extending as far west as Fish Creek and as far east as Pingok Island (Western Geophysical, 1998). This area overlaps with the westernmost portion of the planned seismic area. In this area, during summer, sealing occurs by boat when hunters apparently concentrate on bearded seals (Western Geophysical, 1998).

Mitigation

Western Geophysical plans to use biological observers to monitor marine mammal presence in the vicinity of the seismic array. To avoid the potential for serious injury to marine mammals, Western Geophysical will power down the seismic source if pinnipeds are sighted within the area delineated by the 190 dB isopleth or:

(1) within 60 m (197 ft) of a single airgun or an array of ≤60 in^3.

(2) within 170 m (558 ft) of an array >60 in^3 and ≤750 in^3 at <2.5 m (8.3 ft) depth;

(3) within 280 m (919 ft) of an array >60 in^3 and ≤750 in^3 operating at >2.5 m (8.3 ft) depth;

(4) within 200 m (656 ft) of an array >750 in^3 and ≤1500 in^3 operating at <2.5 m (8.3 ft) depth;

(5) within 350 m (1,148 ft) of an array >750 in^3 and ≤1500 in^3 operating at >2.5 m (8.3 ft) depth;

Western Geophysical will power down the seismic source if bowhead, gray, or belukha whales are sighted within the area delineated by the 180 dB isopleth or:

(1) within 160 m (525 ft) of a single airgun or an array of >60 in^3;

(2) within 660 m (2,165 ft) of an array >60 in^3 and ≤750 in^3 at <2.5 m (8.3 ft) depth;

(3) within 900 m (2,953 ft) of an array >60 in^3 and ≤750 in^3 operating at >2.5 m (8.3 ft) depth;

(4) within 700 m (2,297 ft) of an array >750 in^3 and ≤840 in^3 operating at <2.5 m (8.3 ft) depth; and

(5) within 900 m (2,953 ft) of an array >750 in^3 and ≤840 in^3 operating at >2.5 m (8.3 ft) depth;

In addition, Western Geophysical proposes to ramp-up the seismic source to operating levels at a rate no greater than 6 dB/min. If the array includes airguns of different sizes, the smallest gun will be fired first. Additional guns will be added at intervals appropriate to limit the rate of increase in source level to a maximum of 6 dB/min.

Monitoring

As part of its application, Western Geophysical provided a monitoring plan for assessing impacts to marine mammals from seismic surveys in the Beaufort Sea. This monitoring plan is described in Western Geophysical (1998) and in LGL Ltd. and Greeneridge Sciences Inc. (1998). Although Western Geophysical is prepared to discuss coordination of research to the extent practicable with other seismic operations, Western Geophysical is prepared to sponsor an independent program. As required by the MMPA, this monitoring plan will be subject to a peer-review panel of technical experts prior to formal acceptance by NMFS.

Preliminarily, Western Geophysical plans to conduct the following:

Vessel-Based Visual Monitoring

A minimum of two biologist-observers aboard the seismic vessel will search for and observe marine mammals whenever seismic operations are in progress, and for at least 30 minutes prior to planned start of shooting. These observers will scan the area immediately around the vessels with reticulated binoculars during the daytime and with night-vision equipment during the night (prior to mid-August, there are no hours of darkness). Individual watches will normally be limited to no more than 4 consecutive hours.

When mammals are detected within a safety zone designated to prevent injury to the animals (see Mitigation), the geophysical crew leader will be notified so that shutdown procedures can be implemented immediately.

Aerial Surveys

From September 1, 1998, until 3 days after the seismic program ends, aerial surveys will be conducted daily, weather permitting. The primary objective will be to document the occurrence, distribution, and movements of bowhead and belukha whales in and near the area where they might be affected by the seismic pulses. These observations will be used to estimate the level of harassment takes and to assess the possibility that seismic operations affect the accessibility of bowhead whales for subsistence hunting. Pinnipeds will be recorded when seen. Aerial surveys will be at an altitude of 300 m (1,000 ft) above sea level. Western Geophysical proposes to avoid overflights of the Cross Island area where whalers from Nuiqsut are based during their fall whale hunt.

Consistent with 1996 and 1997 aerial surveys in the U.S. Beaufort Sea, the daily aerial surveys are proposed to cover two grids: (1) A grid of 12 north-south lines spaced 8 km (5 mi) apart and extending from about 20 km (12.5 mi) west of the western side of the then-current seismic exploration area to 50 km (30 mi) east of its eastern edge, and from the barrier islands north to approximately the 100 m (328 ft) depth contour; and (2) a grid of 4 survey lines within the above region, also spaced 8 km (5 mi) apart and mid-way between the longer lines, to provide more intensive coverage of the area of the seismic operations and immediate surrounding waters.

When the seismic program is relocated east or west along the coast during the 1998 season, both survey grids will be relocated a corresponding distance along the coast. Information on the survey program can be found in Western Geophysical (1998) and in LGL Ltd. and Greeneridge Sciences Inc. (1998), which are incorporated in this document by reference.

Acoustical Measurements

The acoustic measurement program proposed for 1998 is designed to be continue work conducted in 1996 and 1997 (see BPXA, 1996a, 1997, and 1998; LGL Ltd. and Greeneridge Sciences Inc., 1996, 1997, and 1998). The acoustic measurement program is planned to include (1) boat-based acoustic measurements, (2) OBC-based acoustic measurements, (3) use of air-dropped sonobuoys and (4) bottom-mounted acoustical recorders.

The boat-based acoustical measurement program is proposed for a 7-day period in August 1998. The objectives of this survey will be as follows: (1) To measure the levels and other characteristics of the horizontally propagating seismic survey sounds from the type(s) of airgun array(s) to be used in 1998 as a function of distance and aspect relative to the seismic source vessel(s) and to water depth.

(2) To measure the levels and frequency composition of the vessel sounds emitted by vessels used regularly during the 1998 program.

(3) To obtain additional site-specific ambient noise data, which determine signal-to-noise ratios for seismic and other acoustic signals at various ranges from their sources.

Western Geophysical and its proposed consultant (Greeneridge Sciences) are investigating the use of the OBC-system to help document horizontal propagation of the seismic surveys. In addition, during late August and September, autonomous seafloor acoustic recorders will be placed on the sea bottom at 3 locations to record low-frequency sounds nearly continuously for up to 3 weeks at a time. Information includes characteristics of the seismic pulses, ambient noise, and bowhead calls. Additional data on these noise sources will be obtained from sonobuoys dropped from aircraft after September 1.

For a more detailed description of planned monitoring activities, please refer to the application and supporting document (Western Geophysical, 1998; LGL Ltd. and Greeneridge Sciences Inc., 1998).

Estimates of Marine Mammal Take

Estimates of takes by harassment will be made through vessel and aerial surveys. Preliminarily, Western Geophysical will estimate the number of (1) marine mammals observed within the area ensonified strongly by the seismic vessel; (b) marine mammals observed showing apparent reactions to seismic pulses (e.g., heading away from the seismic vessel in an atypical direction); (c) marine mammals subject to take by type (a) or (b) when no monitoring observations were possible; and (d) bowheads displaced seaward from the main migration corridor.

Reporting

Western Geophysical will provide an initial report on 1998 activities to NMFS within 90 days of the completion of the seismic program. This report will provide dates and locations of seismic operations, details of marine mammal sightings, estimates of the amount and nature of all takes by harassment, and any apparent effects on accessibility of marine mammals to subsistence users.

A final technical report will be provided by Western Geophysical within 20 working days of receipt of the document from the contractor, but no later than April 30, 1999. The final technical report will contain a description of the methods, results, and interpretation of all monitoring tasks.

Consultation

Under section 7 of the Endangered Species Act (ESA), NMFS completed an informal consultation on the issuance of an incidental harassment authorization for similar activities on June 26, 1997. A copy of that document is available upon request (see **ADDRESSES**). If an authorization to incidentally harass listed marine mammals is issued under the MMPA, NMFS will issue an Incidental Take Statement under section 7 of the ESA.

National Environmental Policy Act (NEPA)

In conjunction with the 1996 notice of proposed authorization (61 FR 26501, May 28, 1996) for open water seismic operations in the Beaufort Sea, NMFS released an EA that addressed the impacts on the human environment from issuance of the authorization and the alternatives to the proposed action. No comments were received on that document and, on July 18, 1996, NMFS concluded that neither implementation of the proposed authorization for the harassment of small numbers of several species of marine mammals incidental to conducting seismic surveys during the open water season in the U.S. Beaufort Sea nor the alternatives to that action would significantly affect the quality of the human environment. As a result, the preparation of an environmental impact statement on this action is not required by section 102(2) of NEPA or its implementing regulations. A copy of the EA is available upon request (see **ADDRESSES**).

This year's activity is a continuation of the seismic work conducted in 1996 and 1997. For Western Geophysical's 1998 application, NMFS has conducted a review of the impacts expected from the issuance of an Incidental Harassment Authorization in comparison to those impacts evaluated in 1996. As assessed in detail in this document, NMFS has preliminarily determined that there will be no more than a negligible impact on marine mammals from the issuance of the harassment authorization and that there will not be any unmitigable impacts to subsistence communities, provided the mitigation measures required under the authorization are implemented. Because the activity is substantially the same as the one conducted in 1996 and no new impacts on the environment have been identified, a new EA is not warranted and, therefore, the preparation of an Environmental Impact Statement on this action is not required by section 102(2) of NEPA or its implementing regulations.

Conclusions

NMFS has preliminarily determined that the short-term impact of conducting seismic surveys in the U.S. Beaufort Sea will result, at worst, in a temporary modification in behavior by certain species of cetaceans and possibly pinnipeds. While behavioral modifications may be made by these species to avoid the resultant noise, this behavioral change is expected to have a negligible impact on the animals.

As the number of potential incidental harassment takes will depend on the distribution and abundance of marine mammals (which vary annually due to variable ice conditions and other factors) in the area of seismic operations, due to the distribution and abundance of marine mammals during the projected period of activity and the location of the proposed seismic activity in waters generally too shallow and distant from the edge of the pack ice for most marine mammals of concern, the number of potential harassment takings is estimated to be small. In addition, no take by injury and/or death is anticipated, and the potential for temporary or permanent hearing impairment will be avoided through the incorporation of the mitigation

measures mentioned in this document. No rookeries, mating grounds, areas of concentrated feeding, or other areas of special significance for marine mammals occur within or near the planned area of operations during the season of operations.

Because bowhead whales are east of the seismic area in the Canadian Beaufort Sea until late August/early September, seismic activities are not expected to impact subsistence hunting of bowhead whales prior to that date. After August 31, 1998, aerial survey flights for bowhead whale assessments will be initiated. Appropriate mitigation measures to avoid an unmitigable adverse impact on the availability of bowhead whales for subsistence needs will be the subject of consultation between Western Geophysical and subsistence users.

Also, while open-water seismic exploration in the U.S. Beaufort Sea has some potential to influence seal hunting activities by residents of Nuiqsut, because (1) the peak sealing season is during the winter months, (2) the main summer sealing is off the Colville Delta, and (3) the zone of influence by seismic sources on belukha and seals is fairly small, NMFS believes that Western Geophysical's seismic survey will not have an unmitigable adverse impact on the availability of these stocks for subsistence uses.

Proposed Authorization

NMFS proposes to issue an incidental harassment authorization for the 1998 Beaufort Sea open water season for a seismic survey provided the above mentioned mitigation, monitoring, and reporting requirements are incorporated. NMFS has preliminarily determined that the proposed seismic activity would result in the harassment of only small numbers of bowhead whales, gray whales, and possibly belukha whales, bearded seals, and largha seals; would have a negligible impact on these marine mammal stocks; and would not have an unmitigable adverse impact on the availability of marine mammal stocks for subsistence uses.

Information Solicited

NMFS requests interested persons to submit comments, and information, concerning this request (see **ADDRESSES**).

Dated: May 14, 1998.

Patricia A. Montanio,

Deputy Director, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 051398E]

Mid-Atlantic Fishery Management Council; Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council (Council) and its Comprehensive Management Committee; Committee Chairmen; Information and Education Committee; Habitat Committee; Executive Committee; and Squid, Mackerel, and Butterfish Committee will hold a public meeting.

DATES: The meetings will be held on Tuesday, June 2, 1998, to Thursday, June 4, 1998. See **SUPPLEMENTARY INFORMATION** for specific dates and times.

ADDRESSES: This meeting will be held at the Sheraton Grand Hotel, Bicentennial Park, New Bern, NC; telephone: 919–638–3585.

Council address: Mid-Atlantic Fishery Management Council, 300 S. New Street, Dover, DE 19904; telephone: 302–674–2331.

FOR FURTHER INFORMATION CONTACT: Christopher Moore, Ph.D., Acting Executive Director, Mid-Atlantic Fishery Management Council; telephone: 302–674–2331, ext. 16.

SUPPLEMENTARY INFORMATION: On Tuesday, June 2, the Comprehensive Management Committee will meet from 8:00–10:00 a.m. The Committee Chairmen will meet from 10:00–11:00 a.m. The Information and Education Committee will meet from 11:00 a.m. until noon. The Habitat Committee, together with the Dogfish Committee, Surfclam and Ocean Quahog Committee, Squid, Mackerel and Butterfish Committee, Habitat Advisors, and Scientific and Statistical Committee, will meet from 1:00–5:00 p.m. On Wednesday, June 3, the Executive Committee will meet from 7:00–9:00 a.m. Council will meet from 9:00–11:00 a.m. The Atlantic Mackerel, Squid, and Butterfish Committee will meet as a Council Committee of the Whole from 11:00 until noon. Council will meet from 1:00–2:00 p.m. to review the Whiting Fishery Management Plan. Council will meet from 2:00–5:00 p.m., together with the Atlantic States Marine Fisheries Commission (ASMFC) Board, to review Amendment 1 to the Bluefish Fishery Management Plan. On Thursday, June 4, Council will meet from 8:00 a.m. until 5:00 p.m.

Agenda items for this meeting are: Distribution and abundance and EFH identification and recommendations on dogfish, surfclams, ocean quahogs, and squid, mackerel, butterfish; Review and adoption of NMFS recommendations on bluefish EFH; Review and hearing adoption of NMFS consistency amendment for consistency in Northeast vessel permits (replacement and upgrade); Adoption of mackerel limited entry provisions for pubic hearing document; Review and comment on whiting, winter flounder, herring and scallop management measures; Review and adoption of Amendment 1 to the Bluefish FMP for public hearing; Review and adoption of Dogfish FMP for public hearing; Review and adoption of Monkfish FMP; Review comprehensive management matrix; Review Council newsletter, view Council websight; hear committee reports and other fishery management matters.

Although other issues not contained in this agenda may come before these groups for discussion, in accordance with the Magnuson- Stevens Fishery Conservation and Management Act, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in the agenda listed in this notice.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Joanna Davis at the Council (see **ADDRESSES**) at least 5 days prior to the meeting date.

Dated: May 14, 1998.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[051398D]

New England Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce

ACTION: Notice of public meetings.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a number of public meetings of its oversight committees and advisory panels in June, 1998 to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from these groups will be brought to the full Council for formal consideration and action, if appropriate.

DATES: The meetings will be held between June 4 and June 17, 1998. See **SUPPLEMENTARY INFORMATION** for specific dates and times.

ADDRESSES: Meetings will be held in Gloucester, MA, Warwick, RI, and Portland, ME. See **SUPPLEMENTARY INFORMATION** for specific locations.

FOR FURTHER INFORMATION CONTACT: Paul J. Howard, Executive Director; (781) 231–0422.

SUPPLEMENTARY INFORMATION:

Meeting Dates and Agendas

Thursday, June 4, 1998, 9:30 a.m.—Joint Habitat Committee and Advisory Panel Meeting

Location: NMFS Northeast Regional Office, One Blackburn Drive, Gloucester, MA 01960; telephone: (978) 281–9300.

Development of essential fish habitat (EFH) designations for Council-managed species and review of the EFH draft public hearing document.

Thursday, June 11, 1998, 10:30 a.m.—Whiting Committee Meeting

Location: Marine Trade Center, Two Portland Fish Pier, Third Floor, Suite 109, Portland, ME 04101; telephone: (207) 775–5450.

Review of the Draft Supplemental Environmental Impact Statement and draft public hearing document associated with (whiting) Amendment 10 to the Northeast Multispecies Fishery Management Plan (FMP).

Wednesday, June 17, 1998, 10 a.m.—Scallop Advisory Panel Meeting

Location: Radisson Hotel, 2081 Post Road, Warwick, RI 02886; telephone: (401) 739–3000.

Review and comment on the management measures proposed for Amendment 7 to the Sea Scallop FMP. The amendment is intended to rebuild the scallop resource by substantially reducing fishing effort.

Although other issues not contained in this agenda may come before these groups for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Paul J. Howard (see **ADDRESSES**) at least 5 days prior to the meeting dates.

Dated: May 14, 1998.

Office of the Secretary

Submission for OMB Review; Comment Request

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Associated Form, and OMB Number: Individual MCJROTC Instructor Evaluation Summary; NAVMC 10942; OMB Number 0703–0016.

Type of Request: Extension.

Number of Respondents: 348.

Responses Per Respondent: 1.

Annual Responses: 348.

Average Burden Per Response: 30 minutes.

Annual Burden Hours: 174.

Needs and Uses: This form provides a written record of the overall performance of duty of Marine instructors who are responsible for implementing the Marine Corps Junior Reserve Officers' Training Corps (MCJROTC). The Individual MCJROTC Instructor Evaluation Summary is completed by principals to evaluate the effectiveness of individual Marine instructors. The form is further used as a performance related counseling tool and as a record of service performance to document performance and growth of individual Marine instructors. Evaluating the performance of instructors is essential in ensuring that they provide quality training.

Affected Public: Individuals or households.

Frequency: Biennially.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Mr. Edward C. Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer for DoD, Room 10236, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. Robert Cushing.

Written requests for copies of the information collection proposal should be sent to Mr. Cushing, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202–4302.

Dated: May 13, 1998.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Submission for OMB Review; Comment Request

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Associated Form, and OMB Number: Academic Certification for Marine Corps Officer Candidate Program; NAVMC 10469; OMB Number 0703–0011.

Type of Request: Extension.

Number of Respondents: 3,500.

Responses Per Respondent: 1.

Annual Responses: 3,500.

Average Burden Per Response: 15 minutes.

Annual Burden Hours: 875.

Needs and Uses: Used by Marine Corps officer procurement personnel, this form provides a standardized method for determining the academic eligibility of applicants for all Reserve officer candidate programs. Use of this form is the only accurate and specific method to determine a Reserve officer applicant's academic qualifications. Each applicant interested in enrolling in an undergraduate or graduate Reserve officer commission program completes and return the form.

Affected Public: Individuals or households.

Frequency: On occasion..

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Mr. Edward C. Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer for DoD, Room 10236, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. Robert Cushing.

Written requests for copies of the information collection proposal should be sent to Mr. Cushing, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202–4302.

Dated: May 13, 1998.

Patricia L. Toppings,

Meeting of DOD Advisory Group on Electron Devices

AGENCY: Department of Defense, Advisory Group on Electron Devices.

ACTION: Notice.

SUMMARY: The DoD Advisory Group on Electron Devices (AGED) announces a closed session meeting.

DATES: The meeting will be held at 0900, Tuesday, June 16, 1998.

ADDRESSES: The meeting will be held at Palisades Institute for Research Services, 1745 Jefferson Davis Highway, Suite 500, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Mr. Eliot Cohen, AGED Secretariat, 1745 Jefferson Davis Highway, Crystal Square Four, Suite 500, Arlington, Virginia 22202.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide advice to the Under Secretary of Defense for Acquisition and Technology, to the Director of Defense Research and Engineering (DDR&E), and through the DDR&E to the Director, Defense Advanced Research Projects Agency and the Military Departments in planning and managing an effective and economical research and development program in the area of electron devices.

The AGED meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The agenda for this meeting will include programs on Radiation Hardened Devices, Microwave Tubes, Displays and Lasers. The review will include details of classified defense programs throughout.

In accordance with Section 10(d) of Pub. L. No. 92–463, as amended, (5 U.S.C. App. § 10(d) (1994)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. § 552b(c)(1) (1994), and that accordingly, this meeting will be closed to the public.

Dated: May 14, 1998.

L.M. Bynum,

Alternate, OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3910–01–P

DEPARTMENT OF ENERGY

Office of Environmental Management

Environmental Management Site-Specific Advisory Board Renewal

Pursuant to Section 14(a)(2)(A) of the Federal Advisory Committee Act (Pub. L. 92–463), and in accordance with title 41 of the Code of Federal Regulations, section 101–6.1015(a), and following consultation with the Committee Management Secretariat, General Services Administration, notice is hereby given that the Environmental Management Site-Specific Advisory Board has been renewed for a two-year period beginning May 16, 1998.

The purpose of the Board is to provide the Assistant Secretary for Environmental Management with advice and recommendations on environmental management projects and issues such as risk management, economic development, future land use, and budget prioritization activities, from the perspectives of affected groups and State and local governments. Board membership will reflect the full diversity of views in the affected community and region and be composed primarily of people who are directly affected by site clean-up activities. Members will include interested stakeholders from local governments, Indian Tribes, environmental and civic groups, labor organizations, universities, waste management and environmental restoration firms, and other interested parties. Representatives from the Department of Energy (DOE), the Environmental Protection Agency, and State governments will be ex-officio members of the Board. Selection and appointment of Board members will be accomplished using procedures designed to ensure diverse membership and a balance of viewpoints. Consensus recommendations to the DOE from the Board on the resolution of numerous difficult issues will help achieve DOE's objective of an integrated environmental management program.

The Secretary of Energy has determined that renewal of the Environmental Management Site-Specific Advisory Board is necessary to conduct DOE's business and is in the public interest. The Board will operate in accordance with the provisions of the Federal Advisory Committee Act, the DOE Organization Act (Pub. L. 95–91), and rules and regulations issued in implementation of those Acts.

Further information regarding this advisory board may be obtained from Rachel M. Samuel at (202) 586–3279.

Issued in Washington, D.C. on May 15, 1998.

James N. Solit,

Advisory Committee Management Officer.

DEPARTMENT OF ENERGY

Notice of Program Interest—Comprehensive Test Ban Treaty Research and Development Program

AGENCY: Albuquerque Operations Office (AL). The U.S. Department of Energy (DOE).

ACTION: Notice of program interest—to fund unsolicited applications/proposals for financial assistance awards contributing to the mission of the Comprehensive Test Ban Treaty (CTBT) Research and Development Program.

SUMMARY: The DOE is interested in receiving for consideration applications for Federal Financial Assistance Awards pursuant to the financial assistance rules contained in Title 10 Code of Federal Regulations Part 600 (10 CFR 600), specifically 10 CFR 600.9). On behalf of the DOE CTBT R&D Program, DOE/AL invites Unsolicited Applications/Proposals from interested and qualified Nonprofit Organizations, Institutions of Higher Education, and Commercial Organizations to pursue research that supports the CTBT R&D program mission.

The CTBT R&D Program mission is: "to carry out research and development necessary to provide U.S. government agencies, that are responsible for monitoring and/or verifying CTBT compliance, with technologies, algorithms, hardware and software for integrated systems to detect, locate, identify and characterize nuclear explosions at the thresholds and confidence levels that meet U.S. requirements in a cost-effective manner." Program priorities focus on the advancement of seismic, infrasound, radionuclide, and hydroacoustic knowledge and capabilities. This Notice of Program Interest is intended to encourage the participation of Nonprofit Organizations, Institutions of Higher Education, and Commercial Organizations in furthering these program mission interests.

DATES: This Notice of Program Interest expires *September 30, 1998*. This date does not represent a common deadline for applications but rather that applications may be submitted at any time before the notice expires.

ADDRESSES: Applicants seeking funding consideration by the CTBT R&D Program under this Notice of Program Interest are requested to mark and submit their Unsolicited Applications/Proposals, eight (8) total, as follows:

Original and Copies #1–6: Leslie A. Casey, Treaty Monitoring Program Manager, c/o CTBT R&D Program—Notice of Program Interest—NN–20, U.S. Department of Energy, 1000 Independence, Ave., SW, Washington, DC 20585–0420. DOE/NN–20 will initiate the objective merit review process.

Copy #7: John N. Augustine, Unsolicited Applications/Proposals Manager, c/o CTBT R&D Program—Notice of Program Interest—NN–20, U.S. Department of Energy, Federal Energy Technology Office (FETC), 626 Cochrans Mill Road, PO Box 10940, Pittsburgh, PA 15236–0940. DOE FETC—Pittsburgh will assign a DOE identification number and acknowledge receipt of the proposal.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Albuquerque Operations Office, P.O. Box 5400, Albuquerque, NM 87185–5400, Attn: Mr. Michael G. Loera, Contracts and Procurement Division, Telephone Number: (505) 845–4302, Fax Number: (505) 845–4004.

SUPPLEMENTARY INFORMATION: Responses to this Notice of Program Interest must explain how the proposed work furthers the CTBT R&D Program mission and research issues. These are summarized on the Web Page: "http://www.ctbt.rnd.doe.gov/coordination/", under the heading "R&D Issues and Metrics". Successful applications will: demonstrate a knowledge of the ongoing CTBT R&D Program; offer novel or innovative approaches leading to performance improvements and cost reductions; respond to ground truth data deficiencies; and, follow the guidance provided in the *"Guide for the Submission of Unsolicited Applications/Proposals"*, which is available on the Web Page: "http://www.pr.doe.gov/gdtoc.html". Applicants are, thereby, encouraged to review and acquaint themselves with 10 CFR 600.10, "Form and contents of applications", and with work that has already been performed as represented in the bibliography located at the Program's web site.

Unsolicited Applications/Proposals will be evaluated against many factors. Some of the criteria that are likely to apply include: technical merit; applicant's familiarity with other ongoing work; the relevance and quality of the applicant's prior work; effectiveness of the proposed technical approach; timeliness; cost; and the period of performance. Applicants are, therefore, encouraged to include information in their proposals that facilitate evaluation against these criteria and as a minimum should address the requirements listed below. Cost sharing is not required, but highly encouraged. It is anticipated that Cooperative Agreements will be favored over Grants. The resulting Cooperative Agreement or Grant will be administered by the DOE Albuquerque Operations Office, or possibly by other CTBT Program Office designees.

Unsolicited Applications/Proposals are to be comprised of both technical and cost proposal elements. Unsolicited Proposal requirements and format are as follow:

(1) *Project Description:* (Provide a comprehensive, but succinct [350 character] description of the proposed research project. It should convey the project objective, application, method, product and value to U.S. government agencies and other users).

(2) *Objective(s):* (State research objectives).

(3) *Application:* (Describe the product and how it is to be used. Discuss the product's merits over the current baseline and operational risk considerations).

(4) *User(s):* (List potential users and indicate whether they have expressed interest in the product).

(5) *Prior Work:* (Summarize the current state-of-the-art for the stated field of endeavor. Provide credentials of key participants and describe their previous relevant work. Cite applicable bibliographic references).

(6) *Collaborators:* (Identify other participants and describe their role and contribution).

(7) *Proposed Work & Scientific Basis:* (Specify the technical approach to manage the project; describe specific tasks and subtask activities to be conducted by Work Breakdown Structure (WBS) to achieve the research objectives; and identify key decision points [milestones]. Relate these elements to how they further the stated research objectives and advance the state-of-the-art).

(8) *Research Issues:* (Identify the technical issues that will be addressed by the project; list potential barriers and explain how they will be overcome).

(9) *Tasks:* (By WBS element, list the tasks, associated subtasks, and associated costs. Differentiate the cost for fully burdened labor, equipment, materials, other (such as travel, taxes, fee (if applicable), etc.) [Once Unsolicited Applications/Proposals are selected for funding, a complete break-down by cost element will be required.]

(10) *Milestones:* (List milestones and scheduled completion dates by task/subtask).

(11) *Deliverables:* (List deliverables and scheduled completion dates by task/subtask).

Funding Considerations

Financial Assistance Awards are anticipated to be funded for project duration's of 1–3 years and awards will generally range from $100,000 to $500,000. Total program funds for Unsolicited Applications/Proposals in Fiscal Year (FY) 1998 are not likely to exceed $1,000,000. Unsolicited Applications/Proposals received may be considered for funding at any time following receipt. Unsolicited Applications/Proposals not selected in FY 1998 may be reconsidered for funding in the following year.

Submission, Withdrawal, and Unsuccessful Applications

Unsolicited Applications/Proposals will be accepted on an ongoing basis. Unsolicited Applications/Proposals must state an acceptance period of 180 days; however, Unsolicited Applications/Proposals may be withdrawn by the Applicant at any time by written notification to the DOE Contracting Officer identified below. Unsolicited Applications/Proposals not funded and not withheld for reconsideration will be destroyed and the Applicant will be notified accordingly. A Federal Financial Assistance Award (Grant and Cooperative Agreements) application package which includes a sample award can be obtained from the DOE Contracting Officer identified below or can be down-loaded from the DOE AL Web Page: "http://www.doeal.gov/cpd/ " under the heading "Solicitations".

It is DOE policy to exercise extreme care to ensure that the proposal information is not duplicated, used or disclosed in whole or in part for any purpose other than to evaluate the proposal, without written permission of the Applicant. Furthermore, with respect to the Unsolicited Proposal evaluation, the Applicant is hereby informed that it is standard practice of the CTBT R&D program officials to include review by DOE laboratory managers and experts in the topic area of the proposal. If you are an expert and are willing to serve as a reviewer on a non-remunerative basis, the CTBT R&D Program would like to be notified of your interest. Serving as a technical reviewer could encompass these Unsolicited Applications/Proposals, subject to non-disclosure agreements, as well as other proposals related to the CTBT R&D Program. Interested individuals are requested to forward their resume and cover letter expressing their interest to: Manager, Treaty Monitoring Programs (NN–20), U.S. Department of Energy, 1000 Independence Avenue SW, Washington, DC, 20585–0420. Finally, proposal evaluation may include coordination with other government agencies or their designated contractors, primarily to check for duplication of effort and end user interest. This is an important integration practice appropriate to a full-scope, ongoing and mature program such as the CTBT R&D program.

Issued in Washington, D.C. on May 13, 1998.

Leslie A. Casey,

Treaty Monitoring Program Manager, NN–20.

DEPARTMENT OF ENERGY

Environmental Management Advisory Board

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following Advisory Committee meeting:

NAME: Environmental Management Advisory Board.

DATE AND TIMES: Wednesday, June 10, 1998; 8:30 a.m.–3 p.m.

PLACE: U.S. Department of Energy, Forrestal Building, 1000 Independence Avenue, SW.; Room 1E–245, Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: James T. Melillo, Special Assistant to the Assistant Secretary for Environmental Management; Environmental Management Advisory Board (EMAB), EM–22, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–4400. The Internet address is: James.Melillo@em.doe.gov

SUPPLEMENTARY INFORMATION:

Purpose of the Board

The purpose of the Board is to provide the Assistant Secretary for Environmental Management (EM) with advice and recommendations on issues confronting the Environmental Management program from the perspectives of affected groups and state, local, and tribal governments. The Board will help to improve the Environmental Management Program by assisting in the process of securing consensus recommendations, and providing the Department's numerous publics with opportunities to express their opinions regarding the Environmental Management Program.

Tentative Agenda

Wednesday, June 10, 1998

8:30 a.m. Co-Chairmen Open Public Meeting
8:45 a.m. EM–1 Opening Remarks
9:15 a.m. Technology Development & Transfer Committee Report
9:45 a.m. Science Committee Report
10:30 a.m. Break
10:45 a.m. Privatization Committee Report
11:00 a.m. Long Term Stewardship Committee Report
11:15 a.m. 2006 Strategic Planning Committee Reports
12:00 p.m. Working Lunch
12:30 p.m. 2006 Strategic Plan Status
1:00 p.m. Board Discussion
1:45 p.m. Public Comment Period
2:00 p.m. Board Business
2:30 p.m. Public Comment Period
3:00 p.m. Meeting Adjourns

A final agenda will be available at the meeting.

Public Participation: The meeting is open to the public. Written statements may be filed with the Board either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should either contact James T. Melillo at the address or telephone number listed above, or call 1–(800) 736–3282, the Center for Environ mental Management Information and register to speak during the public comment session of the meeting. Individuals may also register on June 10, 1998 at the meeting site. Every effort will be made to hear all those wishing to speak to the Board, on a first come, first serve basis. Those who call in and reserve time will be given the opportunity to speak first. The Board Co-Chairs are empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts and Minutes: A meeting transcript and minutes will be available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585 between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on May 14, 1998.

Rachel M. Samuel,

Deputy Advisory Committee Management Officer.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP98–406–000]

CNG Transmission Corporation; Informal Settlement Conference

May 14, 1998.

Take notice that an informal settlement conference will be convened in this proceeding on Wednesday, May 20, 1998, at 10:00 a.m., at the offices of the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, for the purpose of exploring the possible settlement of the above-referenced docket.

Any party, as defined by 18 CFR 385.102(c), or any participant as defined in 18 CFR 385.102(b), is invited to attend. Persons wishing to become a party must move to intervene and receive intervener status pursuant to the Commission's regulations (18 CFR 835.214).

For additional information, please contact William J. Collins at (202) 208–0248.

David P. Boergers,

Acting Secretary.

[Docket No. ER98–2912–000]

Duke Power Company; Notice of Filing

May 14, 1998.

Take notice that on April 29, 1998, Duke Power Company tendered the true-up filing for calendar year 1997 under Article II.3 of the Settlement Agreement approved by Commission's Letter Order issued October 9, 1991 in Docket No. ER90–315–000.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions and protests should be filed on or before May 22, 1998. Protests will be considered by the Commission to determine the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP98–217–000]

Gas Research Institute; Refund Report

May 14, 1998.

Take notice that on May 8, 1998, the Gas Research Institute (GRI) tendered for filing a report listing its 1997 refunds made to its pipeline members.

GRI states that the refunds, totaling $18,621,249 to twenty-eight pipelines, were made in accordance with the Commission's September 27, 1996 Opinion No. 407 (76 FERC ¶ 61,337).

GRI states that it has served copies of the filing to each person included on the Secretary's service list in Docket No. RP96–267–000.

Any person desiring to be heard or to protest this filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed on or before May 22, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

David P. Boergers,

Acting Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP97–781–001]

National Fuel Gas Supply Corporation; Notice of Amendment

May 14, 1998.

Take notice that on May 11, 1998, National Fuel Gas Supply Corporation (National Fuel) 10 Lafayette Square, Buffalo, New York 14203, filed in Docket No. CP97–781–001 an amendment to the pending abandonment application filed on September 29, 1997, in Docket CP97–781–000 for permission and approval to abandon its Deerlick Storage Field (Deerlick) and adjacent facilities located in Warren County, Pennsylvania, all as more fully set forth in the application on file with the Commission and open to public inspection.

National Fuel states that the September 29 Application indicates that there are seven independent producers located on the gathering lines feeding the Deerlick gathering system at eight interconnections. National Fuel claims that it has ascertained that the seven producers deliver gas to National Fuel at thirteen such interconnections and of these thirteen interconnections, ten were installed under National Fuel's blanket certificate in Docket No. CP83–4. National Fuel's amendment includes a revised accounting treatment reflecting the abandonment of the additional interconnections. National Fuel requests that the Commission's abandonment authorization encompasses all ten of these reported interconnections.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 4, 1998, file with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's

Rules. All persons who have heretofore filed need not file again.

David P. Boergers,

Acting Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–525–000]

Northern Natural Gas Company; Request Under Blanket Authorization

May 14, 1998.

Take notice that on May 6, 1998, Northern Natural Gas Company (Northern), 1111 South 103rd Street, Omaha, Nebraska 68124–1000, filed in Docket No. CP98–525–000 a request pursuant to Sections 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212) for authorization to install and operate two (2) new master meters in Green and Trempealeau Counties, Wisconsin to provide central points of measurement to Wisconsin Gas Company (WGC), under Northern's blanket certificate issued in Docket No. CP82–401–000 [1] pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northern states that WGC has requested the installation of the Monroe and the Black River Falls Master Meters to provide central points of measurement for deliveries to WGC under Northern's currently effective throughput service agreements. Northern also states that the proposed master meters will not impact the volumes currently delivered to WGC through the specified branch lines. Northern estimates a cost of $465,000 to install the new master meters.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

David P. Boergers,

Acting Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. TM98–2–58–001]

Northern Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

May 14, 1995.

Take notice that on May 8, 1998, Northern Natural Gas Company (Northern), tendered for filing to become part of Northern's FERC Gas Tariff, the following tariff sheets proposed to become effective on June 1,1998:

Fifth Revised Volume No. 1

Substitute Eighth Revised Sheet No. 54
Substitute Seventh Revised Sheet No. 61
Substitute Seventh Revised Sheet No. 62
Substitute Seventh Revised Sheet No. 63
Substitute Seventh Revised Sheet No. 64

Northern states that the reason for this filing is to resubmit Sheets Nos. 54, 61, 62, 63 and 64 to correct the Mainline fuel True-up Adjustment as derived on a Revised Exhibit No. 2 and to correct the UAF percentage because of administrative oversights.

Northern states that copies of the filing were served upon Northern's customers and interested State Commissions.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

David P. Boergers,

Acting Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. OR98–13–000]

Tosco Corporation, Complainant v. SFPP, L.P., Respondent; Compliant

May 14, 1998.

Take notice that on April 24, 1998, pursuant to sections 9, 13(1), and 15(1) of the Interstate Commerce Act of 1887 (Act) (49 U.S.C. App. §§ 9, 13(1), 15(1)), Rule 206 of the Commission's Rules of Practice and Procedure (18 CFR § 385.206), and the Procedural Rules Applicable to Oil Pipeline Proceedings (18 CFR § 343.1(a)), Tosco Corporation, including its subsidiaries and affiliates (Tosco), tendered for filing its complaint against the interstate rates and charges of SFPP, L.P. (SFPP).

Tosco alleges that SFPP's system-wide rate structure is excessive, discriminatory and unlawful. Tosco argues that SFPP has violated and continues to violate sections 1(5), 2, 3(1), 4, 6, and 8 of the Act by (a) establishing and charging unjust and unreasonable rates, (b) charging unduly discriminatory and preferential rates and charges, and (c) assessing untariffed rates and charges for jurisdictional service.

Tosco requests that the Commission: (1) Examine the rates and charges collected by SFPP for its jurisdictional interstate service; (2) order refunds to Tosco to the extent the Commission finds that such rates or charges were unlawful; (3) determine just, reasonable, and nondiscriminatory rates for SFPP's jurisdictional interstate service; (4) award Tosco reasonable attorneys' fees and costs; and (5) order such other relief as may be appropriate.

Tosco states that it has served the Compliant on SFPP.

Any person desiring to be heard or to protest said complaint should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214, 385.211. All such motions or protests should be filed on or before May 26, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make Protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. Answers

[Project No. 5637–003]

Pancheri Inc.; Availability of Environmental Assessment

May 14, 1998.

An environmental assessment (EA) is available for public review. The EA is for an application to amend the Pancheri Hydroelectric Project. The application is to rehabilitate the existing project by upgrading the existing pipe water conveyance system and building a new powerhouse. The EA finds that approval of the application would not constitute a major federal action significantly affecting the quality of the human environment. The Pancheri Hydroelectric Project is located on the Sawmill Creek in Butte County, Idaho.

The EA was written by staff in the Office of Hydropower Licensing, Federal Energy Regulatory Commission. Copies of the EA can be viewed at the Commission's Public Reference Room, Room 2A, 888 First Street, N.E., Washington, D.C. 20426. Copies can also be obtained by calling the project manager listed below. For further information, please contact the project manager, Jean A. Potvin, at (202) 219–0022.

Surrender of Exemption and Dam Removal

May 14, 1998.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. Type of Application: Surrender of Exemption and Dam Removal.

b. Project No: 4727–013.

c. Licensee: John C. Jones.

d. Name of Project: Grist Mill Project.

e. Location: Souadabscook Stream, Town of Hampden, Penobscot County, ME.

f. Pursuant to: Energy Security Act of 1980, 94 Stat. 611; Federal Power Act, 16 U.S.C. §§ 792–828.

g. Licensee Contact: John C. Jones, P.O. Box 147, Winterport, ME 04496, 207–223–4363.

h. FERC Contact: Dean C. Wight, (202) 219–2675.

i. Comment Date: June 22, 1998.

J. Description of Proposed Action: The exemptee proposes to surrender the exemption from licensing because he has determined that further operation and repair of the project is not economically feasible.

The exemptee further proposes to remove the project dam in lieu of installation of a fish passage facility and in lieu of reducing the height of the dam, as required by the Commission's May 22, 1997 Order Approving Stipulation and Consent Agreement.

k. This notice also consists of the following standard paragraphs: B, C1, and D2.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C1. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST" OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

David P. Boergers,

Acting Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS–00241; FRL–5790–6]

National Advisory Committee for Acute Exposure Guideline Levels for Hazardous Substances; Notice of Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: A meeting of the National Advisory Committee for Acute Exposure Guideline Levels for Hazardous Substances (NAC/AEGL Committee) will be held on June 8–10, 1998, in Washington, DC. At this meeting, the NAC/AEGL Committee will address the various aspects of the acute toxicity and the development of Acute Exposure Guideline Levels (AEGLs) for the following chemicals: acrolein, carbon tetrachloride, chloroform, crotonaldehyde, hydrogen sulfide, nickel carbonyl, nitrogen oxides, peracetic acid, propylene imine, and propylene oxide.

DATES: A meeting of the NAC/AEGL Committee will be held from 10 a.m. to 5 p.m. on Monday, June 8, 1998; from 8:30 a.m. to 5 p.m. on Tuesday, June 9, 1998; and from 8:30 a.m. to 1 p.m. on Wednesday, June 10, 1998.

ADDRESSES: The meeting will be held at the National Endowment for the Arts, 1100 Pennsylvania Ave., NW., Rm. M09, Washington, DC 20506 (located in the Old Post Office Building, across the street from the Federal Triangle Metro stop).

FOR FURTHER INFORMATION CONTACT: Paul S. Tobin, Designated Federal Officer (DFO), Office of Prevention, Pesticides, and Toxic Substances (7406), 401 M St., SW., Washington, DC 20460; (202) 260–1736; e-mail: tobin.paul@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Electronic Availability

Internet

Electronic copies of this notice and various support documents are available from the EPA Home Page at the **Federal Register**—Environmental Documents entry for this document under "Laws and Regulations" (http://www.epa.gov/fedrgstr/).

Fax-On-Demand

Using a faxphone call (202) 401–0527 and select item 4800 for an index of items in this category.

II. Meeting Procedures

For further information on the meeting, the meeting agenda, the submission of information, or presentation of information on chemicals to be discussed, contact the DFO.

The meeting of the NAC/AEGL Committee will be open to the public. Oral presentations or statements by interested parties will be limited to 10 minutes. Interested parties should contact the DFO to schedule statements or presentations before the NAC/AEGL Committee. Since seating for outside observers may be limited, those wishing to attend the meeting as observers should also contact the DFO as soon as possible to ensure adequate seating arrangements. Direct all inquiries regarding oral presentations, oral statements, submission of written statements, or chemical-specific information to the DFO.

Another meeting of the NAC/AEGL Committee is expected to be held September 1998, but the exact date and meeting location are not yet determined. It is anticipated that the chemicals to be addressed at this meeting will include, but are not limited to, the following: cyclohexylamine, ethylene diamine, glycol ether acetate, HFC–134a, HCFC–141b, methyl isocyanate, piperidine sulfur dioxide, sulfur trioxide, and sulfuric acid. Direct inquiries regarding the submission of data, written statements, or chemical-specific information on the chemicals listed for the September 1998 meeting to the DFO as soon as possible to allow for consideration of this information in the preparation of the NAC/AEGL Committee materials.

ENVIRONMENTAL PROTECTION AGENCY

[PF–793; FRL–5773–2]

Notice of Filing of Pesticide Petition

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of a pesticide petition proposing the establishment of regulations for residues of the pesticide chemical pymetrozine, in or on various food commodities.

DATES: Comments, identified by the docket control number PF–793, must be received on or before June 19, 1998.

ADDRESSES: By mail submit written comments to: Public Information and Records Integrity Branch, Information Resources and Services Division (7506C), Office of Pesticides Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person bring comments to: Rm. 1132, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically by following the instructions under "SUPPLEMENTARY INFORMATION." No confidential business information should be submitted through e-mail.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). CBI should not be submitted through e-mail. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the address given above, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager listed in the table below:

Product Manager	Office location/telephone number	Address
Leonard Cole	Rm. 211, CM #2, 703–305–5412, e-mail:cole.leonard@epamail.epa.gov.	1921 Jefferson Davis Hwy, Arlington, VA

SUPPLEMENTARY INFORMATION: EPA has received pesticide petitions as follows proposing the establishment and/or amendment of regulations for residues of certain pesticide chemicals in or on various food commodities under section 408 of the Federal Food, Drug, and Comestic Act (FFDCA), 21 U.S.C. 346a. EPA has determined that these petitions

contain data or information regarding the elements set forth in section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

The official record for this notice of filing, as well as the public version, has been established for this notice of filing under docket control number [PF–793] (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The official record is located at the address in "ADDRESSES" at the beginning of this document.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comment and data will also be accepted on disks in Wordperfect 5.1/6.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number (insert docket number) and appropriate petition number. Electronic comments on this notice may be filed online at many Federal Depository Libraries.

List of Subjects

Environmental protection, Agricultural commodities, Food additives, Feed additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: May 6, 1998.

James Jones,

Director, Registration Division, Office of Pesticide Programs.

Summaries of Petitions

Petitioner summaries of the pesticide petitions are printed below as required by section 408(d)(3) of the FFDCA. The summaries of the petitions were prepared by the petitioners and represent the views of the petitioners. EPA is publishing the petition summaries verbatim without editing them in any way. The petition summary announces the availability of a description of the analytical methods available to EPA for the detection and measurement of the pesticide chemical residues or an explanation of why no such method is needed.

Norvartis Crop Protection, Inc.

PP 8F4929

EPA has received a pesticide petition (PP 8F4929) from Norvartis Crop Protection, Inc., P.O. Box 18300, Greensboro, NC 27419–8300 proposing pursuant to section 408(d) of the Federal Food, Drug and Cosmetic Act, 21 U.S.C. 346a(d), to amend 40 CFR Part 180 by establishing a tolerance for residues of Pymetrozine in or on the raw agricultural commodity cucumbers, fruiting vegetables, potatoes, hops at 0.02, 0.05 parts per million. EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

A. Residue Chemistry

1. *Plant metabolism.* The metabolism of CGA–215944 in plants is understood for the purposes of the proposed tolerance. Studies in rice, tomatoes, cotton and potatoes gave similar results. Identified metabolic pathways have demonstrated that pymetrozine is the residue of concern for tolerance setting purposes.

2. *Analytical method*— i. *Crops.* Novartis has submitted two analytical methods for the determination of pymetrozine and its major crop metabolite, in crop substrates. For both methods, the limit of detection (LOD) is 1.0 ng and the limit of quantitation (LOQ) is 0.02 ppm. Samples are extracted using acetonitrile: 0.05M sodium borate and an aliquot is taken for each method. The aliquots were cleaned up with solid-phase and/or liquid-liquid partitions and analyzed by HPLC with column-switching and UV detection. Both methods have undergone independent laboratory validation. The pymetrozine Analytical Method is proposed as the tolerance enforcement method.

ii. *Livestock.* Novartis has also submitted analytical methods for the determination of pymetrozine in eggs, milk and poultry, dairy and goat tissues, and for its major livestock metabolite in dairy and goat tissues and milk. This method also accounts for a phosphate conjugate, which is a significant metabolite found only in milk. The LOD for the analytical method is 1.0 ng and the LOQ is 0.01 ppm. Samples are extracted using acetonitrile: Water, cleaned up with solid-phase and liquid-liquid partitions, and analyzed for pymetrozine by HPLC with column switching and UV detection. The LOD for the metabolite method is 1.5 ng and the is LOQ of 0.01 ppm. Samples are extracted using methanol: Water. Milk samples are heated to hydrolyze the phosphate conjugate, and all samples are cleaned up with solid-phase partitions and analyzed by HPLC with UV detection. The parent Analytical Method has successfully undergone independent laboratory validation.

3. *Magnitude of residues*—i. *Cucurbits.* Twenty-two field trials were conducted in 13 states representing typical fruiting vegetables growing areas in the United States, including Arizona, California, Florida, Georgia, Indiana, Michigan, New York, North Carolina, Ohio, Oregon, South Carolina, and Texas. Cantaloupes, summer squash, and cucumbers were treated with two post foliar applications of pymetrozine 50WG at 21 and 14 days prior to harvest of mature fruit using a 1X rate of 80 g a.i./A per application (160 g a.i. or 0.35 lb a.i.per a). Samples of summer squash and cucumbers from early harvest harvest intervals (pre-harvest interval (PHI) < 14 days) were collected to demonstrate decline of residues of pymetrozine.

Residue data were generated for pymetrozine for tolerance setting and dietary exposure estimates. Data was generated for a major metabolite for dietary exposure purposes only as this metabolite does not need to be part of the tolerance expression. No pymetrozine residues were found in cantaloupes treated at the 1X rate and harvested at the target PHI of 14 days. Maximum GS–23199 residues of 0.02 ppm were found in only 1 of 16 cantaloupe samples. The maximum pymetrozine residues found in summer squash samples treated at the 1X rate were 0.02 ppm in a sample harvested at 0–day PHI. No pymetrozine residues were found in any 3–day, 7–day, or 14–day sample of squash treated at the 1X rate. No metabolite residues were found in any summer squash sample at any PHI. No pymetrozine or metabolite residues were found in any sample of cucumbers treated at the 1X rate and harvested at 14 days PHI.

No residues of pymetrozine are expected in cucurbits vegetables treated at the 1X rate and harvested 14 days after the last application.

ii. *Fruiting vegetables.* Seventeen field trials were conducted in 12 states representing typical fruiting vegetable growing areas in the United States, including California, Florida, Indiana, Maryland, Michigan, New Jersey, New Mexico, North Carolina, Ohio, Pennsylvania, Tennessee, and Texas. Tomatoes and peppers were treated

with two post foliar applications of pymetrozine 50 WP 21 and 14 days prior to harvest of mature fruit using a 1X rate of 80 g active ingredient/acre (a.i./A), a 2X rate of 160 g a.i./A, a 3X rate of 240 g a.i./A, and a 5X rate of 400 g a.i./A per application. Samples from early harvest intervals (pre-harvest interval < 14 days) were collected to demonstrate decline of residues of pymetrozine. Mature fruit from two tomato field trials were processed under simulated commercial practice.

Residue data were generated for pymetrozine for tolerance setting and dietary exposure estimates. Data was generated for the major metabolite for dietary exposure purposes only as this metabolite does not need to be part of the tolerance expression. Pymetrozine residues were found in 0– and 3–day PHI samples of tomatoes treated at the 1X rate, but in none of the 7–day PHI 1X samples analyzed. No pymetrozine residues were found in tomatoes treated at the 1X rate and harvested at the target PHI of 14 days. No residues of the metabolite were found in samples harvested with 0–, 3–, or 7–day PHI, but metabolite residues of 0.02 ppm were found in 1 of 22 1X tomato samples harvested with a 14–day PHI.

All analyzed tomato samples treated at exaggerated rates were harvested with a 14–day PHI. No pymetrozine residues were found in any 2X tomato sample. The maximum pymetrozine residues found in 3X and 5X samples were 0.04 ppm and 0.10 ppm. The maximum residues found in 2X, 3X, and 5X samples were 0.02 ppm, 0.08 ppm, and 0.10 ppm.

All analyzed processed tomato fractions were from tomatoes harvested with a 14–day PHI. No residues of pymetrozine were found in any processed fraction from tomatoes treated at exaggerated rates. No 1X processed tomato fraction samples were analyzed. The maximum residues of metabolite found in tomato processed fractions were 0.4 ppm in juice from tomatoes treated at the 5X rate.

All pepper samples analyzed were treated at the 1X rate. Pymetrozine residues of 0.04 ppm were found in 1 of 20 pepper samples harvested at a 14–day PHI. Pymetrozine residues were found in all eight 0–day PHI samples, but in none of the four 3–day or 7–day PHI samples analyzed. No metabolite residues were found in any pepper sample at any PHI.

Little or no residues of pymetrozine are expected in fruiting vegetables treated at the 1X rate and harvested 14 days after the last application.

Tuberous and corm vegetables. Sixteen field trials were conducted in 13 States representing typical potato growing areas in the United States, including Idaho, Washington, Oregon, California, Florida, North Dakota, Minnesota, North Carolina, Wisconsin, Colorado, Maine, New York, and Michigan. Potatoes were treated with two foliar applications of pymetrozine 50 WP made 21 and 14 days prior to first harvest using a 1X rate of 40 g a.i./A, a 3X rate of 120 g a.i./A, and a 5X rate of 400 g a.i./A per application. Samples from early harvest intervals (PHI < 14 days) were collected to demonstrate decline of residues of pymetrozine.

Residue data was generated for pymetrozine for tolerance setting and dietary exposure estimates. Data was generated for the major metabolite for dietary exposure purposes only as this metabolite does not need to be part of the tolerance expression. No residues of pymetrozine or GS–23199 were found in potatoes or processed fractions for any application rate at any PHI in this study.

iii. *Tobacco.* Five field trials were conducted in five states representing typical tobacco growing areas in the United States, including North Carolina, South Carolina, Tennessee, Kentucky, and Virginia. Tobacco was treated with two post foliar applications of pymetrozine 50 WP 21 and 14 days prior to harvest of mature leaves. Rates of 20 g a.i./A and 40 g a.i./A per application were used. Samples from early harvest intervals (PHI < 14 days) were collected to demonstrate decline of residues of pymetrozine.

The maximum residues of pymetrozine found in green leaves of tobacco harvested at 14 days after last application were 0.05 ppm. The maximum residues of metabolite found in green leaves harvested at 14 days after last application were 0.04 ppm. The maximum Detectable residues of pymetrozine found in 23 of 24 samples of cured leaves of tobacco harvessted at 14 days after last application was 0.39 ppm. The maximum residues of metabolite found in cured leaves harvested at 14 days after last application were 0.20 ppm.

In decline studies, detectable residues of pymetrozine were found to decrease with increasing PHI in green leaves. Maximum average metabolite GS–23199 residues were found in 3– and 7– day samples with the lowest average residues in 14–day samples.

iv. *Hops.* Data from eight field trials, conducted in Germany, were submitted August 6,1996. The residue data support a tolerance of 5.0 ppm with a 14–day PHI.

v. *Livestock.* A three-level dairy feeding study was conducted using pymetrozine as the test substance. Holstein dairy cows were dosed daily with pymetrozine at levels equivalent to 0 (Control), 1.0 ppm, 3.0 ppm and 10 ppm. These rates represents 8, 24 and 80 times the maximum expected contribution to the diet. This study was designed to provide data concerning the level of residues of pymetrozine, as pymetrozine and CGA–313124, in milk and tissues which could occur as a result of feeding crops treated with pymetrozine to dairy cows. The results are used to estimate the transfer of residues from the diet to the tissues and milk of livestock.

No detectable residues of pymetrozine or CGA–313124 were observed in samples of liver, kidney, perirenal fat, omental fat, round muscle, or tenderloin muscle from cows dosed with 10 ppm (80X) pymetrozine. No detectable residues of pymetrozine were observed in samples of milk from cows dosed with 10 ppm (80X), 3 ppm (24X), or 1 ppm (8X) pymetrozine at any sampling interval. Detectable residues of CGA–313124 occurred only in milk samples from 80X dosed cows at a maximum level of 0.05 ppm. These results indicate that there is no need to establish a meat and milk tolerance.

B. Toxicological Profile

1. *Acute toxicity.* Pymetrozine has low acute toxicity. The oral LD_{50} in rats is > 5,820 milligrams per kilogram (mg/kg) for males and females, combined. The rat dermal LD_{50} is > 2,000 mg/kg and the rat inhalation LC_{50} is > 1.8 mg/L air. Pymetrozine is not a skin sensitizer in guinea pigs and does not produce dermal irritation in rabbits. It produces minimal eye irritation in rabbits. End-use water-dispersible granule formulations of pymetrozine have similar low acute toxicity profiles.

2. *Genotoxicty.* Pymetrozine did not induce point mutations in bacteria (Ames assay in *Salmonella typhimurium* and *Escherichia coli*) or in cultured mammalian cells (Chinese hamster V79) and was not genotoxic in an *in vitro* unscheduled DNA synthesis assay in rat hepatocytes. Chromosome aberrations were not obeserved in an *in vitro* test using Chinese hamster ovary cells and there were no clastogenic or aneugenic effects on mouse bone marrow cells in an *in vivo* mouse micronucleus test. These studies show that pymetrozine is not genotoxic.

3. *Reproductive and developmental toxicity.* In a teratology study in rats, pymetrozine caused decreased body weights and food consumption in females given 100 and 300 mg/kg/day during gestation. This maternal toxicity was accompanied by fetal skeletal

anomalies and variations consistent with delayed ossification. The no-observed-effect level (NOEL) for maternal and fetal effects in rats was 30 mg/kg/day. A teratology in rabbits showed that pymetrozine caused maternal death and reduced body weight gain and food consumption at 125 mg/kg/day (highest dose tested). Maternal toxicity was accompanied by embryo- and feto-toxicity (abortion in one female and total resorptions in two females). Body weight and food consumption decreases, early resorptions and postimplantation losses were also observed in maternal rabbits given 75 mg/kg/day. There was an increased incidence of fetal skeletal anomalies and variations at these maternally toxic doses. The NOEL for maternal and fetal effects in rabbits was 10 mg/kg/day. Pymetrozine is not teratogenic in rats or rabbits. In a two generation reproduction study in rats, parental body weights and food consumption were decreased, liver and spleen weights were reduced and histopathological changes in liver, spleen and pituitary were observed at 2,000 ppm (highest dose tested). Liver hypertrophy was observed in parental males at 200 ppm (approximately 10–40 mg/kg/day). Reproductive parameters were not affected by treatment with pymetrozine. The NOEL for reproductive toxicity is 2,000 ppm (approximately 110–440 mg/kg/day). Offspring body weights were slightly reduced at 2,000 and 200 ppm and eye opening was slightly delayed in pups at 2,000 ppm. Effects on offspring were secondary to parental toxicity. The NOEL for toxicity to adults and pups is 20 ppm (approximately 1–4 mg/kg/day).

4. *Subchronic toxicity.* Pymetrozine was evaluated in 13–week subchronic toxicity studies in rats, dogs and mice. Liver, kidneys, thymus and spleen were identified as target organs. The NOEL was 500 ppm (33 mg/kg/day) in rats and 100 ppm (3 mg/kg/day) in dogs. In mice, increased liver weights and microscopical changes in the liver were observed at all doses tested. The NOEL in mice was < 1,000 ppm (198 mg/kg/day). No dermal irritation or systemic toxicity occurred in a 28–day repeated dose dermal toxicity study with pymetrozine in rats given 1,000 mg/kg/day. Minimum direct dermal absorption (1.1%) of pymetrozine was detected in rats over a 21 hour period of dermal exposure. Maximum radioactivity left on or in the skin at the application site and considered for potential absorption was 11.9%.

5. *Chronic toxicity.* Based on chronic toxicity studies in the dog and rat, a reference dose (RfD) of 0.0057 mg/kg/day is proposed for pymetrozine. This RfD is based on a NOEL of 0.57 mg/kg/day established in the chronic dog study and an uncertainty factor of 100 to account for interspecies extrapolation and interspecies variability. Minor changes in blood chemistry parameters, including higher plasma cholesterol and phospholipid levels, were observed in the dog at the lowest-observed-effect level (LOEL) of 5.3 mg/kg/day. The NOEL established in the rat chronic toxicity study was 3.7 mg/kg/day, based on reduced body weight gain and food consumption, hematology and blood chemistry changes, liver pathology and biliary cysts.

6. *Animal metabolism.* The metabolism of pymetrozine (CGA–215944) in the rat is well understood. Metabolism involves oxidation of the 5-methylene group of the triazine ring yielding 4,5-dihydro-5-hydroxy-6-methyl-4-[(3-pyridinylmethylene)amino]-1,2,4-triazin-3(2H)-one (CGA–359009). Oxidation of the methyl substituent of the triazine ring led to 4,5-dihydro-6-(hydroxymethyl)-4-[(3-pyridinylmethylene)amino]-1,2,4-triazin-3(2H)-one (CGA–313124) which was further oxidized to the corresponding carboxylic acid, 4,5-dihydro-6-carboxy-4-[(3-pyridinylmethylene)amino]-1,2,4-triazin-3(2H)-one. Hydrolysis of the enamino bridge yielded 4-amino-6-methyl-1,2,4-triazin-3,5(2H,4H)-dione (CGA–294849). This was further degraded to 6-methyl-1,2,4-triazin-3,5(2H,4H)-dione (METABOLITE). Hydrolysis of the enamino bridge of CGA–215944 produced CGA–215525 which undergoes either acylation (CGA–259168) or deamination yielding 4,5-dihydro-6-methyl-1,2,4-triazin-3(2H)-one (CGA–249257). Hydrolysis of the enamino bridge also formed 3-pyridinecarboxaldehyde (CGA–300407), nicotinic acid (CGA–180777), nicotinamide (CGA–180778), 3-pyridinemethanol (CGA–128632) and 1,6-dihydro-1-methyl-6-oxo-3-pyridinecarboxamide. Identified metabolic pathways in animals and plants are similar.

7. *Metabolite toxicology.* The residue of concern for tolerance setting purposes is the parent compound. Metabolites of pymetrozine are considered to be of equal or lesser toxicity than the parent.

8. *Endocrine disruption.* Pymetrozine does not belong to a class of chemicals known or suspected of having adverse effects on the endocrine system. There is no evidence that pymetrozine has any effect on endocrine function in developmental and reproduction studies. Furthermore, histological investigation of endocrine organs in chronic dog, rat and mouse studies did not indicate that the endocrine system is targeted by pymetrozine.

C. Aggregate Exposure

1. *Food.* For purposes of assessing the potential dietary exposure under the proposed tolerances, Novartis has estimated aggregate exposure based on exposure from residues of 0.05 ppm on fruiting vegetables, 0.02 ppm on cucurbits, 0.02 ppm on potatoes and 5 ppm on hops. A 100% market share was assumed.

2. *Drinking water.* Another potential source of exposure of the general population to pymetrozine is via residues in drinking water. Pymetrozine is not expected to contaminate drinking water based on its environmental attributes and the low application rates applied. Pymetrozine breaks down relatively quickly in the environment by a wide variety of mechanisms and degradation pathways. Leaching studies showed that pymetrozine is tightly bound to soil and is unlikely to leach in the field. Field dissipation studies show little movement beyond the uppermost soil horizon.

3. *Non-dietary exposure.* There are no other uses currently registered for pymetrozine. The proposed uses involve application of pymetrozine to crops grown in an agricultural environment. There are no proposed uses which would be expected to result in residential exposure of pymetrozine. Therefore, there is no potential for non-occupational exposure to the general population. is not expected to be significant.

D. Cumulative Effects

The potential for cumulative effects of pymetrozine and other substances that have a common mechanism of toxicity has also been considered. Pymetrozine belongs to a new chemical class known as pyridine azomethines. It exhibits a unique mode of action which can be characterized as nervous system inhibition of feeding behavior. It does not have a general toxic or paralyzing effect on insects, but selectively interferes with normal feeding activities by affecting nervous system regulation of fluid intake. There is no reliable information to indicate that toxic effects produced by pymetrozine would be cumulative with those of any other chemical including another pesticide. Therefore, Novartis believes it is appropriate to consider only the potential risks of pymetrozine in an aggregate risk assessment.

E. Safety Determination

1. *U.S. population.* Using the conservative exposure assumptions and the proposed RfD described above, the aggregate exposure to pymetrozine will utilize 3.78% of the RfD for the U.S. population. EPA generally has no concern for exposures below 100% of the RfD because the RfD represents the level at or below which daily aggregate exposure over a lifetime will not pose appreciable risks to human health. Therefore, Novartis concludes that there is a reasonable certainty that no harm will result from aggregate exposure to pymetrozine residues.

2. *Infants and children.* In assessing the potential for additional sensitivity of infants and children to residues of pymetrozine, data from developmental toxicity studies in the rat and rabbit and a two-generation reproduction study in the rat have been considered.

In a teratology study in rats, developmental toxicity anomalies and variations associated was observed only at maternally toxic doses. Similarly, in a rabbit teratology study, was observed only at maternally toxic doses. The NOELs in the rat and rabbit teratology studies were 30 and 10 mg/kg/day, respectively. In the two-generation reproduction study, there were no effects on reproductive parameters. Offspring body weights were slightly reduced and eye opening was slightly delayed at dose levels producing parental toxicity. The NOEL for parental and offspring toxicity was 20 ppm (approximately 1–4 mg/kg/day).

FFDCA section 408 provides that EPA may apply an additional safety factor for infants and children in the case of threshold effects to account for pre- and post-natal toxicity and the completeness of the database. Based on the current toxicological requirements, the database relative to pre- and post-natal effects for children is complete. Further, for pymetrozine, the NOEL of 0.57 from the chronic feeding study in dogs, which was used to calculate the RfD (0.0057 mg/kg/day), is already lower than the developmental NOELs (30 and 10 mg/kg/day) from the teratogenicity studies in rats and rabbits by a factor of more than tenfold. In the pymetrozine rat reproduction study, the mild nature of the effects observed (decreased body weight) at the systemic LOEL (10–40 mg/kg/day) and the fact that the effects were observed at a dose that is more than 10 times greater than the NOEL in the chronic dog study (0.57 mg/kg/day) suggest that there is no additional sensitivity for infants and children. Therefore, it is concluded that an additional uncertainty factor is not warranted to protect the health of infants and children and that an RfD of 0.0057 mg/kg/day based on the chronic dog study is appropriate for assessing aggregate risk to infants and children from pymetrozine.

Using the exposure assumptions described above, the percent of the RfD that will be utilized by aggregate exposure to residues of pymetrozine is 0.43% for nursing infants less than 1 year old, 1.49% for non-nursing infants, 3.44% for children 1–6 years old and 2.72% for children 7–12 years old. Therefore, based on the completeness and reliability of the toxicity database, Novartis concludes that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to pymetrozine residues.

F. International Tolerances

There are no Codex maximum levels established for residues of pymetrozine.

[FR Doc. 98–13447 Filed 5–19–98; 8:45 am]
BILLING CODE 6560–50–F

ENVIRONMENTAL PROTECTION AGENCY

[PF–804; FRL–5788–8]

Westvaco Corporation; Pesticide Tolerance Petition Filing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of a pesticide petition proposing the establishment of regulations for residues of a certain pesticide chemical in or on various food commodities.

DATES: Comments, identified by the docket control number PF–804, must be received on or before June 19, 1998.

ADDRESSES: By mail submit written comments to: Information and Records Integrity Branch, Public Information and Services Divison (7502C), Office of Pesticides Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person bring comments to: Rm, 119, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically by following the instructions under "SUPPLEMENTARY INFORMATION." No confidential business information should be submitted through e-mail.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). CBI should not be submitted through e-mail. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 119 at the address given above, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: Bipin C. Gandhi, Registration Support Branch, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460. Office location, telephone number, and e-mail address: Rm. 4-W53, Crystal Station #1, 2800 Jefferson Davis Highway, Arlington, VA 22202, (703) 308–8380; e-mail: gandhi.bipin@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: EPA has received a pesticide petition as follows proposing the establishment and/or amendment of regulations for residues of certain pesticide chemical in or on various food commodities under section 408 of the Federal Food, Drug, and Comestic Act (FFDCA), 21 U.S.C. 346a. EPA has determined that this petition contains data or information regarding the elements set forth in section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

The official record for this notice of filing, as well as the public version, has been established for this notice of filing under docket control number [PF–804] (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The official record is located at the address in "ADDRESSES" at the beginning of this document.

Electronic comments can be sent directly to EPA at:
opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comment and data will

also be accepted on disks in Wordperfect 5.1/6.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket control number (PF–804) and appropriate petition number. Electronic comments on this notice may be filed online at many Federal Depository Libraries.

List of Subjects

Environmental protection, Agricultural commodities, Food additives, Feed additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: May 4, 1998.

Peter Caulkins,

Acting Director, Registration Division, Office of Pesticide Programs.

Summaries of Petitions

Petitioner summaries of the pesticide petitions are printed below as required by section 408(d)(3) of the FFDCA. The summaries of the petitions were prepared by the petitioners and represent the views of the petitioners. EPA is publishing the petition summaries verbatim without editing them in any way. The petition summary announces the availability of a description of the analytical methods available to EPA for the detection and measurement of the pesticide chemical residues or an explanation of why no such method is needed.

1. Westvaco Corporation

PP 6E4749

EPA has received a pesticide petition (PP 6E4749) from Westvaco Corporation, Chemical Division, 3950 Faber Place Drive, North Charleston, SC 29405, proposing pursuant to section 408(d) of the Federal Food, Drug and Cosmetic Act, 21 U.S.C. 346a(d), to amend 40 CFR part 180 to establish an exemption from the requirement of a tolerance for residues of acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt (CAS Reg. No. 89678-90-0) when used as an inert ingredient (encapsulating agent, dispensers, resins, fibers and beads) in pesticide formulations applied to growing crops or raw agricultural commodities after harvest, under 40 CFR 180.1001(c) and applied to animals under 40 CFR 180.1001(e). EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

A. Toxicity Data

As part of the EPA policy statement on inert ingredients published in the **Federal Register** of April 22, 1987 (52 FR 13305) (FRL–3190-1), the Agency set forth a list of studies which would generally be used to evaluate the risks posed by the presence of an inert ingredient in a pesticide formulation. However, where it can be determined without the data that the inert ingredient will present minimal or no risk, the Agency generally does not require some or all of the listed studies to rule on the proposed tolerance or exemption from the requirement of a tolerance for an inert ingredient. Westvaco believes that the data and information described below is adequate to ascertain the toxicology and characterize the risk associated with the use of acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt (CAS Reg. No. 89678-90-0) as an inert ingredient in pesticide formulations applied to growing crops and raw agricultural commodities after harvest.

In the case of certain chemical substances that are defined as "polymers" the EPA has established a set of criteria which identify categories of polymers that present low risk. These criteria (described in 40 CFR 723.250) identify polymers that are relatively unreactive and stable compared to other chemical substances as well as polymers that typically are not readily absorbed. These properties generally limit a polymer's ability to cause adverse effects. In addition, these criteria exclude polymers about which little is known. The EPA believes that polymers meeting the criteria noted below will present minimal or no risk.

Acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt (CAS Reg. No. 89678-90-0) conforms to the definition of polymer given in 40 CFR 723.250(b) and meets the following criteria that are used to identify low risk polymers.

1. Acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt is not a cationic polymer, nor is it reasonably anticipated to become a cationic polymer in a natural aquatic environment.

2. Acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt contains as an integral part of its composition the atomic elements carbon and hydrogen.

3. Acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt does not contain as an integral part of its composition, except as impurities, any elements other than those listed in 40 CFR 723.250(d)(2)(ii).

4. Acrylic acid, styrene, alpha-methyl styrene ammonium salt copolymer is not designed, nor is it reasonably anticipated to substantially degrade, decompose, or depolymerize.

5. Acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt is not manufactured or imported from monomers and/or other reactants that are not already included on the Toxic Substance Control Act (TSCA) Chemical Substance Inventory or manufactured under an applicable TSCA section 5 exemption.

6. Acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt is not a water absorbing polymer.

7. Acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt does not contain any group as reactive functional groups.

8. The minimum number-average molecular weight of the acrylic acid, styrene, alpha-methyl styrene copolymer is listed as 1,200 daltons. Substances with molecular weights greater than 400 generally are not absorbed through the intact skin, and substances with molecular weights greater than 1,000 generally are not absorbed through the intact gastrointestinal (GI) tract. Chemicals not absorbed through the skin or GI tract generally are incapable of eliciting a toxic response.

9. The Acrylic acid, styrene, alpha-methyl styrene copolymer has a number-average molecular weight of 1,200 and contains less than 10% oligomeric material below molecular weight 500 and less than 25% oligomeric material below 1,000 molecular weight.

In addition, acrylic acid, styrene, alpha-methyl styrene copolymer is approved by the Food and Drug Administration (FDA) under 21 CFR for contact with food as a component in adhesives (21 CFR 175.105), coatings (21 CFR 175.300), and paper and paperboard (21 CFR 176.170). The ammonium hydroxide utilized to form the ammonium salt is listed in 21 CFR 184.1139 under the section, "Direct food substances affirmed as generally recognized as safe".

B. Aggregate Exposure

Acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt formulations have been in commerce since the mid 1960's. The copolymer is ubiquitous in our every day environment and as it is commonly used in flexographic printing inks and coatings, such as on newspapers,

corrugated boxes (e.g. pizza boxes) and disposable drinking cups.

Although exposure to acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt may occur through dietary (e.g., food wrapping containing copolymer) and non-occupational (e.g., printed articles) sources, the chemical characteristics of acrylic acid, styrene, alpha-methyl styrenecopolymer ammonium salt lead to the conclusion that there is a reasonable certainty of no harm from aggregate exposure to the polymer. Given the existing widespread and historic use of acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt, any additional exposure resulting from the approval of the copolymer as an inert ingredient in pesticide formulations for use on growing crops or to raw agricultural commodities after harvest is not warranted.

C. Cumulative Effects

At this time there is no information to indicate that any toxic effects produced by acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt would be cumulative with those of any other chemical. Given the compound's categorization as a "low risk polymer" (40 CFR 723.250) and its proposed use as an inert ingredient in pesticide formulations, there is no reasonable expectation of increased risk due to cumulative exposure.

D. International Tolerances

Westvaco is petitioning that acrylic acid, styrene, alpha-methyl styrene copolymer ammonium salt be exempt from the requirement of a tolerance based upon its status as a low risk polymer as per 40 CFR 723.250. Therefore, analytical method to determine residues of acrylic acid, styrene, alpha-methyl styrene copolymer in raw agricultural commodities treated with pesticide formulations containing acrylic acid, styrene, alpha-methyl styrene copolymer have not been proposed.

2. Westvaco Corporation

PP 6E4750

EPA has received a pesticide petition (PP 6E4750) from Westvaco Corporation, Chemical Division, 3950 Faber Place Drive, North Charleston, SC 29405, proposing pursuant to section 408(d) of the Federal Food, Drug and Cosmetic Act, 21 U.S.C. 346a(d), to amend 40 CFR part 180 to establish an exemption from the requirement of a tolerance for residues of styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer (CAS Reg. No. 30795-23-4) when used as an inert ingredient (encapsulating agent, dispensers, resins, fibers and beads) in pesticide formulations applied to growing crops or raw agricultural commodities after harvest, under 40 CFR 180.1001(c) and applied to animals under 40 CFR 180.1001(e). EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

A. Toxicity Data

As part of the EPA policy statement on inert ingredients published in the **Federal Register** of April 22, 1987 (52 FR 13305) (FRL–3190-1), the Agency set forth a list of studies which would generally be used to evaluate the risks posed by the presence of an inert ingredient in a pesticide formulation. However, where it can be determined without the data that the inert ingredient will present minimal or no risk, the Agency generally does not require some or all of the listed studies to rule on the proposed tolerance or exemption from the requirement of a tolerance for an inert ingredient. Westvaco believes that the data and information described below is adequate to ascertain the toxicology and characterize the risk associated with the use of styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer (CAS Reg. No. 30795-23-4) as an inert ingredient in pesticide formulations applied to growing crops and raw agricultural commodities after harvest.

In the case of certain chemical substances that are defined as "polymers", the EPA has established a set of criteria which identify categories of polymers that present low risk. These criteria (described in 40 CFR 723.250) identify polymers that are relatively unreactive and stable compared to other chemical substances as well as polymers that typically are not readily absorbed. These properties generally limit a polymer's ability to cause adverse effects. In addition, these criteria exclude polymers about which little is known. The EPA believes that polymers meeting the criteria noted below will present minimal or no risk.

Styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer (CAS Reg. No. 30795-23-4) conforms to the definition of polymer given in 40 CFR 723.250(b) and meets the following criteria that are used to identify low risk polymers.

1. Styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer is not a cationic polymer, nor is it reasonably anticipated to become a cationic polymer in a natural aquatic environment.

2. Styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer contains as an integral part of its composition the atomic elements carbon, chlorine, and hydrogen.

3. Styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer does not contain as an integral part of its composition, except as impurities, any elements other than those listed in 40 CFR 723.250 (d)(2)(ii).

4. Styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer is not designed, nor is it reasonably anticipated to substantially degrade, decompose, or depolymerize.

5. Styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer is not manufactured or imported from monomers and/or other reactants that are not already included on the Toxic Substance Control Act (TSCA) Chemical Substance Inventory or manufactured under an applicable TSCA section 5 exemption.

6. Styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer is not a water absorbing polymer.

7. Styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer does not contain any group as reactive functional groups.

8. The minimum number-average molecular weight of styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer is listed as 4,228 daltons. Substances with molecular weights greater than 400 generally are not absorbed through the intact skin, and substances with molecular weights greater than 1,000 generally are not absorbed through the intact gastrointestinal (GI) tract. Chemicals not absorbed through the skin or GI tract generally are incapable of eliciting a toxic response.

9. Styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer has a number-average molecular weight of 4,228 and contains less than 10% oligomeric material below molecular weight 500 and less than 25% oligomeric material below 1,000 molecular weight.

B. Aggregate Exposure

Styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer formulations have been in commerce since the mid 1960's. The copolymer is ubiquitous in our every day environment and as it is commonly used in flexographic printing inks and coatings such as on

newspapers, corrugated boxes (e.g. pizza boxes) and disposable drinking cups.

Although exposure to styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer may occur through dietary (e.g., food wrapping containing copolymer) and non-occupational (e.g., printed articles) sources, the chemical characteristics of styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer lead to the conclusion that there is a reasonable certainty of no harm from aggregate exposure to the polymer. Given the existing widespread and historic use of styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer, any additional exposure resulting from the approval of the copolymer as an inert ingredient in pesticide formulations for use on growing crops or to raw agricultural commodities after harvest is not warranted.

In addition, styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer is approved by the Food and Drug Administration (FDA) under 21 CFR for contact with food as a component in adhesives (21 CFR 175.105), coatings (21 CFR 175.300), and paper and paperboard (21 CFR 176.170).

C. Cumulative Effects

At this time there is no information to indicate that any toxic effects produced by styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer would be cumulative with those of any other chemical. Given the compound's categorization as a "low risk polymer" (40 CFR 723.250) and its proposed use as an inert ingredient in pesticide formulations, there is no reasonable expectation of increased risk due to cumulative exposure.

D. International Tolerances

Westvaco is petitioning that styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer be exempt from the requirement of a tolerance based upon its status as a low risk polymer as per 40 CFR 723.250. Therefore, analytical methods to determine residues of styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer in raw agricultural commodities treated with pesticide formulations containing styrene, 2-ethylhexyl acrylate, butyl acrylate copolymer have not been proposed.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice and request for comment.

SUMMARY: The FDIC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35). Currently, the FDIC is soliciting comments concerning the following collections of information titled: (1) Procedures for Monitoring Bank Secrecy Act Compliance; (2) Application to Participate in a Conversion Transaction; (3) Application for Waiver of Prohibition on Receipt of Brokered Deposits by Adequately Capitalized Insured Depository Institutions, Registration of Deposit Brokers; (4) Notice of Branch Closure and (5) Real Estate Lending Standards.

DATES: Comments must be submitted on or before July 20, 1998.

ADDRESSES: Interested parties are invited to submit written comments to Tamara R. Manly, Management Analyst (Regulatory Analysis), (202) 898–7453, Office of the Executive Secretary, Room 4058, Attention: Comments/OES, Federal Deposit Insurance Corporation, 550 17th Street N.W., Washington, D.C. 20429. All comments should refer to the OMB control number. Comments may be hand-delivered to the guard station at the rear of the 17th Street Building (located on F Street), on business days between 7:00 a.m. and 5:00 p.m. [FAX number (202) 898–3838; Internet address: comments@fdic.gov].

A copy of the comments may also be submitted to the OMB desk officer for the FDIC: Alexander Hunt, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: Tamara R. Manly, at the address identified above.

SUPPLEMENTARY INFORMATION:

Proposal to renew the following currently approved collections of information:

1. *Title:* Procedures for Monitoring Bank Secrecy Act Compliance.
OMB Number: 3064–0087.
Frequency of Response: On occasion.
Affected Public: Any financial institution complying with the requirements of the Bank Secrecy Act.
Estimated Number of Respondents: 8,400.
Estimated Time per Response: .5 hours.
Estimated Total Annual Burden: 4,200 hours.
General Description of Collection: 12 CFR 326 requires all insured nonmenber banks to establish and maintain procedures designed to assure and monitor their compliance with the requirements of the Bank Secrecy Act (31 U.S.C. 5311 *et seq.*) and the implementing regulations promulgated thereunder by the Department of Treasury at 31 CFR 103.

2. *Title:* Application to Participate in a Conversion Transaction.
OMB Number: 3064–0098.
Frequency of Response: On occasion.
Affected Public: Any depository institution participating in a conversion transaction.
Estimated Number of Respondents: 10.
Estimated Time per Response: 3 hours.
Estimated Total Annual Burden: 30 hours.
General Description of Collection: Section 5(d) of the Federal Deposit Insurance Act (12 U.S.C. 1815(d)) provides that no insured depository institution may participate in a conversion transaction without the prior approval of the FDIC and that entrance and exit fees shall be assessed to the participating institutions. The FDIC implements this statutory requirement by requiring depository institutions wishing to participate in conversion transactions to submit a letter application to obtain FDIC approval.

3. *Title:* Application for Waiver of Prohibition on Receipt of Brokered Deposits by Adequately Capitalized Insured Depository Institutions, Registration of Deposit Brokers.
OMB Number: 3064–0099.
Frequency of Response: On occasion.
Affected Public: Any insured depository institution seeking a waiver to the prohibition on the acceptance of brokered deposits.
Estimated Number of Respondents: 175.
Estimated Time per Response: 2.2.
Estimated Total Annual Burden: 385 hours.
General Description of Collection: Section 29 of the Federal Deposit Insurance Act prohibits undercapitalized insured depository institutions from accepting, renewing, or rolling over any brokered deposits.

Adequately capitalized institutions may do so with a waiver from the FDIC, while well-capitalized institutions may accept, renew, or roll over brokered deposits without restriction. Section 29A requires notification by deposit brokers of their activity and authorizes the imposition of certain recordkeeping and reporting requirements.

4. *Title:* Notice of Branch Closure.
OMB Number: 3064–0109.
Frequency of Response: As needed.
Affected Public: Any financial institution that proposes to close a branch.
Estimated Number of Respondents: 1,050.
Estimated Time per Response: 1.333 hours.
Estimated Total Annual Burden: 1,400 hours.
General Description of Collection: Section 42 of the Federal Deposit Insurance Act mandates that an institution that proposes to close a branch notify its primary Federal regulator no later than 90 days prior to the closing. The statue also provides that a notice be posted on the premises of the branch for the 30-day period immediately prior to the closing and that the customers be notified in a mailing at least 90 days prior to the closing. Each insured depository institution is required to adopt policies for branch closings.

5. *Title:* Real Estate Lending Standards.
OMB Number: 3064–0112.
Frequency of Response: As needed.
Affected Public: Any financial institution engaging in real estate lending.
Estimated Number of Respondents: 7,400.
Estimated Time per Response: 20 hours.
Estimated Total Annual Burden: 148,000 hours.
General Description of Collection: Institutions will use real estate lending policies to guide their lending operations in a manner that is consistent with safe and sound banking practices and appropriate to their size, nature and scope of their operations. These policies should address certain lending considerations, including loan-to-value limits, loan administration policies, portfolio diversification standards, and documentation, approval and reporting requirements.

Request for Comment

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the collection should be modified prior to submission to OMB for review and approval. Comments submitted in response to this notice also will be summarized or included in the FDIC's requests to OMB for renewal of this collection. All comments will become a matter of public record.

Dated at Washington, DC, this 14th day of May 1998.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Commission hereby gives notice of the filing of the following agreements(s) under the Shipping Act of 1984.

Interested parties can review or obtain copies of agreements at the Washington, DC offices of the Commission, 800 North Capitol Street, N.W., Room 962. Interested parties may submit comments on an agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days of the date this notice appears in the **Federal Register**.

Agreement No.: 217–011622
Title: Space Charter Agreement between Croatia Line and the CMA/Italia Space Charter and Sailing Agreement
Parties:
Croatia Line
The CMA/Italia Space Charter and Sailing Agreement and its member lines: Companie Maritime d'Affretement ("CMA") and Italia d'Navigazione S.p.A.
Synopsis: The proposed Agreement authorizes the CMA/Italia Space Charter and Sailing Agreement to charter space to Croatia Line and to enter into cooperative arrangements in the trades between ports on the Mediterranean Sea and the U.S. Atlantic Coast. The parties have requested expedited review.

Dated: May 14, 1998.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL MARITIME COMMISSION

[Petition P2–98]

In the Matter of Jeremy Anderson, Hitomi Matsutani d/b/a Cargo Master, Ampec Line, and Landsea Brokers, Inc.; Filing of Petition for a Consent Cease and Desist Order

Notice is given that a petition has been filed by the Commission's Bureau of Enforcement ("BOE"), seeking issuance of a consent cease and desist order that would ratify a consent agreement entered into between BOE and Hitomi Matsutani d/b/a/ Cargo Master, Ampec Line, Landsea Brokers, Inc. and Jeremy Anderson, in his individual capacity ("Respondent"). By the terms of the consent agreement, Respondents would be barred from

operating as an NVOCC for a period of two years, and prohibited thereafter from operating as an NVOCC or ocean freight forwarder without the proper bond, tariff or license.

Interested persons may reply to the petition no later than June 5, 1998. Replies shall be directed to the Secretary, Federal Maritime Commission, Washington, DC 20573–0001, and shall consist of an original and 15 copies.

Copies of the petition and the consent agreement are available for examination at the Washington, DC office of the Secretary of the Commission, 800 N. Capital Street, NW., Room, 1046.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than June 4, 1998.

A. Federal Reserve Bank of Minneapolis (Karen L. Grandstrand, Vice President) 90 Hennepin Avenue, P.O. Box 291, Minneapolis, Minnesota 55480-0291:

1. William H. Bosshard, La Crosse, Wisconsin; to acquire additional voting shares of Bosshard Banco, Ltd., La Crosse, Wisconsin, and thereby indirectly acquire voting shares of First National Bank of Bangor, Bangor, Wisconsin, and Intercity State Bank, Schofield, Wisconsin.

Board of Governors of the Federal Reserve System, May 15, 1998.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–F

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act. Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 14, 1998.

A. Federal Reserve Bank of Atlanta (Lois Berthaume, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303-2713:

1. Regions Financial Corporation, Birmingham, Alabama; to acquire 100 percent of the voting shares of Jacobs Bank, Scottsboro, Alabama. Comments regarding this application must be received not later than June 8, 1998.

B. Federal Reserve Bank of Dallas (W. Arthur Tribble, President) 2200 North Pearl Street, Dallas, Texas 75201-2272:

1. Horizons Bancorp, Inc., Monroe, Louisiana; to become a bank holding company by acquiring 100 percent of the voting shares of Horizons Bank, Monroe, Louisiana.

Board of Governors of the Federal Reserve System, May 15, 1998.

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies; Correction

This notice corrects a notice (FR Doc. 98-12657) published on page 26607 of the issue for Wednesday, May 13, 1998.

Under the Federal Reserve Bank of Atlanta heading, the entry for Regions Financial Corporation, Birmingham, Alabama, is revised to read as follows:

A. Federal Reserve Bank of Atlanta (Lois Berthaume, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303-2713:

1. Regions Financial Corporation, Birmingham, Alabama; to merge with First Community Banking Services (formerly Fayette County Bancshares), Peachtree City, Georgia, and thereby indirectly acquire formerly Fayette County Bank, Peachtree City, Georgia.

Comments on this application must be received by June 8, 1998.

Board of Governors of the Federal Reserve System, May 15, 1998.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–F

FEDERAL RESERVE SYSTEM

Sunshine Act Meeting

AGENCY HOLDING THE MEETING: Board of Governors of the Federal Reserve System.

TIME AND DATE: 11:00 a.m., Tuesday, May 26, 1998.

PLACE: Marriner S. Eccles Federal Reserve Board Building, 20th and C Streets, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Joseph R. Coyne, Assistant to the Board; 202–452–3204.

SUPPLEMENTARY INFORMATION: You may call 202–452–3206 beginning at approximately 5 p.m. two business days before the meeting for a recorded announcement of bank and bank holding company applications scheduled for the meeting; or you may contact the Board's Web site at http://www.bog.frb.fed.us for an electronic announcement that not only lists

applications, but also indicates procedural and other information about the meeting.

Dated: May 15, 1998.

Jennifer J. Johnson,

Deputy Secretary of the Board.

Agency for Health Care Policy and Research

Meeting of the National Advisory Council for Health Care Policy, Research, and Evaluation

AGENCY: Agency for Health Care Policy and Research, HHS.

ACTION: Notice of public meeting.

SUMMARY: In accordance with section 10(a) of the Federal Advisory Committee Act, this notice announces a meeting of the National Advisory Council for Health Care Policy, Research, and Evaluation.

DATES: The meeting will be held on Friday, June 5, 1998 from 8:30 a.m. to 4 p.m.

ADDRESSES: The meeting will be held at the DoubleTree Hotel, 1750 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Nancy Foster, Coordinator of the Advisory Council at the Agency for Health Care Policy and Research 2101 East Jefferson Street, Suite 502, Rockville, Maryland 20852, (301) 594–1349 ext. 1307.

If sign language interpretation or other reasonable accommodation for a disability is needed, please contact Linda Reeves, Assistance Administrator for Equal Opportunity, AHCPR, on (301) 594–6665 ext. 1055 no later than May 22, 1998.

SUPPLEMENTARY INFORMATION:

I. Purpose

The Council provides advice to the Secretary and the Administrator, Agency for Health Care Policy and Research (AHCPR), on matters related to AHCPR activities to enhance the quality, appropriateness, and effectiveness of health care services and access to such services through scientific research and the promotion of improvements in clinical practice and in the organization, financing, and delivery of health care services. The Council is composed of members of the public appointed by the Secretary and Federal ex-officio members. The Council will be chaired by Harold S. Luft, Ph.D.

II. Agenda

On Friday, June 5, 1998, the meeting will begin at 8:30 a.m., with the call to order by the Council Chairman. The Administrator, AHCPR, will update the status of current Agency programs and initiatives. The Council will then discuss key issues in dissemination of research findings to promote their use, ethical aspects of using public funds for the development of products that will be marketed commercially, and future directions for research on quality, health economics, and primary care.

The meeting will adjourn at 4:00 p.m. Agenda items are subject to change as priorities dictate.

Dated: May 14, 1998.

John M. Eisenberg,

Administrator.

Food and Drug Administration

[Docket No. 98N–0356]

List of Drugs for Which Additional Pediatric Information May Produce Health Benefits in the Pediatric Population; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a list entitled "List of Drugs for Which Additional Pediatric Information May Produce Health Benefits in the Pediatric Population" (hereinafter referred to as "the list"). This is a list of approved drugs for which additional pediatric information may produce health benefits in the pediatric population. The list is being published under new statutory requirements of the Food and Drug Administration Modernization Act of 1997 (Modernization Act). The purpose of the list is to identify certain drugs for which certain information is necessary to determine if an approved drug can be used safely and effectively in the pediatric population.

DATES: Submit written comments on the procedure and criteria used to develop the list at any time.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857. Submit written requests for single copies of the list to the Drug Information Branch (HFD–210), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–4573. Send one self-addressed adhesive label to assist that office in processing your request. Single copies of the list may also be obtained by mail from the Office of Communication, Training and Manufacturers Assistance (HFM–40), Center for Biologics Evaluation and Research (CBER), or by calling the CBER Voice Information System at 1–800–835–4709, or 301–827–1800. Copies of the list may be obtained from CBER's FAX Information System at 1–888–CBER–FAX or 301–827–3844. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the list.

FOR FURTHER INFORMATION CONTACT:

Khyati N. Roberts, Center for Drug Evaluation and Research (HFD–6), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–594–6779, FAX 301–594–5493, e-mail robertsk@cder.fda.gov, or

David W. Feigal, Center for Biologics Evaluation and Research (HFM–6), Food and Drug Administration, 1401 Rockville Pike, Rockville, MD 20852, 301–827–0376, FAX 301–827–0440, e-mail feigal@cber.fda.gov.

SUPPLEMENTARY INFORMATION:

I. Background

On November 21, 1997, President Clinton signed into law the Modernization Act (Pub. L. 105–115). Section 111 of the Modernization Act (21 U.S.C. 355A(b)) requires FDA, after consultation with experts in pediatric research, to develop, prioritize, and publish a list of approved drugs for which additional pediatric information may produce health benefits in the pediatric population. Inclusion of a drug on the list does not necessarily mean that the drug is entitled to pediatric exclusivity.

FDA developed a draft list in consultation with experts in pediatric research, trade organizations, and other interested persons, and made the draft list available for public comment (see 63 FR 12815, March 16, 1998). After consideration of comments on the draft list, FDA is publishing the list of approved drugs for which additional pediatric information may produce health benefits in the pediatric population and announcing its availability through this notice.

II. Procedure for Updating the List

The Modernization Act also requires FDA to update the list annually. FDA plans to update the list regularly and at least annually. Individuals desiring to comment on the procedure and criteria used to develop the list may submit at any time written comments identified with the docket number found in brackets in the heading of this document. Persons seeking to add a particular drug to the priority section of the list or to have a drug removed from the priority section of the list may submit to the agency a citizen petition that complies with the requirements of 21 CFR part 10. At its discretion, the agency may consult with a sitting advisory committee, which may include pediatric research experts, before determining whether to include a drug on or remove a drug from the list.

III. Electronic Access

Persons with access to the Internet may obtain the list and all updated versions of the list by using the World Wide Web (WWW). For WWW access, connect to CDER at http://www.fda.gov/cder/pediatric or to CBER at http://www.fda.gov/CBER/publications.htm.

IV. Request for Comments

Interested persons may submit at any time to the Dockets Management Branch (address above) written comments regarding the procedure and criteria used to develop the list. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The list and received comments will be available for public examination in the office above between 9 a.m. and 4 p.m., Monday through Friday. Received comments will be considered in determination whether further revision of the list is warranted.

Dated: May 13, 1998.

William B. Schultz,

Deputy Commissioner for Policy.

BILLING CODE 4160–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Privacy Act of 1974; Addition of Routine Uses to an Existing System of Records

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notification of an addition of routine uses to an existing system of records.

SUMMARY: In accordance with the requirements of the Privacy Act, the Health Resources and Services Administration (HRSA) is publishing a proposal to add three new routine uses for the records in System of Records 09–15–0056, National Vaccine Injury Compensation Program (VICP), BHPr/HRSA/HHS. HRSA proposes to specify the categories of records in the system, and to expand the list of routine use in record disclosures to include disclosures for research purposes, disclosures to annuity brokers, and disclosures to employees of life insurance companies for the purposes of providing benefits to recipients under the VICP.

DATES: HRSA invites interested parties to submit comments on the addition of new routine uses on or before June 19, 1998. The HRSA/VICP will adopt the new routine uses without further notice 30 days after the date of publication, unless HRSA receives comments which would result in a contrary determination.

ADDRESSES: Please address comments on the altered system of records to the Health Resources and Services Administration (HRSA) Privacy Act Officer, Department of Health and Human Services, 5600 Fishers Lane, Room 14A–20, Rockville, Maryland 20857, telephone (301) 443–3780. This is not a toll-free number.

FOR FURTHER INFORMATION CONTACT: Director, Division of Vaccine Injury Compensation, BHPr/HRSA, Room 8A–35, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857; telephone (301) 443–6593. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The routine use changes proposed are to expand the "Routine Uses of Records" to specify conditions for approving access to the system of records for research purposes.

Access to the system is limited to authorized users only. Stringent physical and procedural safeguards are in place to protect information.

The alteration of this system will have a minimal effect on an individual's privacy and should not affect personal rights. The information gathered for research purposes or benefit payment purposes will not be disclosed publicly in identifiable form.

Disclosure of information from this system of records may provide important information about vaccine safety, benefit-payment trends or the VICP.

The following notice is written in the present, rather than the future tense, to avoid the unnecessary expenditure of public funds to republish the notice after the routine use has become effective.

Dated: May 11, 1998.

Claude Earl Fox,

Acting Administrator.

Add to Routine Uses of Records Maintained in the System:

7. A record may be disclosed to annuity brokers and to employees of life insurance companies for the purposes of obtaining financial advice and for the purchase of contracts to provide benefits to recipients of benefits under the Program. Organizations to which information is disclosed for this use will be required to maintain Privacy Act safeguards with respect to such records.

8. A record may be disclosed to contractors for the purpose of providing medical review, analysis and determination as to whether petitions meet the medical requirements for compensation. Contractors will be required to maintain Privacy Act safeguards with respect to such records.

9. A record may be disclosed for a research purpose when the Department:

(A) Has determined that the disclosure does not violate legal or policy limitations under which the record was provided, collected, or obtained;

(B) Has determined that the research purpose:

(1) Is consistent with the purpose for which the program was formed, which includes but is not limited to evaluating the safety of vaccines covered under the Program,

(2) Cannot be reasonably accomplished with information in statistical form, and must be provided in an identifiable form to accomplish the research purpose, and

(3) Warrants the risk to the privacy of the individual that additional exposure of the record might bring;

(C) Has required the recipient to:

(1) Establish reasonable administrative, technical and physical safeguards to prevent unauthorized use or disclosure of the record,

(2) Remove or destroy the information that identifies the individual at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the research project, unless the recipient has presented adequate justification of a research or health nature for retaining such information, and

(3) Make no further use of the record except:

(a) In emergency circumstances affecting the health or safety of any individual,

(b) For disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or

(c) When required by law; and

(D) Has secured a written statement attesting to the recipient's understanding of and willingness to abide by these provisions.

Office of Refugee Resettlement

Modification to the Standing Announcement Published in the Federal Register on December 9, 1997 (62 FR 236)

AGENCY: Office of Refugee Resettlement (ORR) Administration for Children and Families, DHHS.

ACTION: Notice of correction.

SUMMARY: Notice is hereby given that the ORR Standing Announcement, 62 FR 236, with closing dates of January 31, 1998 and June 30, 1998 will have the following changes.

The following programs will be competed as scheduled in the December 9, 1997 notice: Category 1, Preferred Communities, Category 2, Unanticipated Arrivals, Category 5, Mental Health, and Category 6, Ethnic Community Organizations.

Category 3, Orientation, will be canceled for the June 30, 1998 closing. This program will be competed again with closing date of January 31st beginning in 1999 and each subsequent year until the Standing Announcement is revised or canceled.

Category 4, Technical Assistance to Orientation Grantees, is hereby canceled.

Dated: May 14, 1998.

Lavinia Limon,

Director, Office of Refugee Resettlement.

BILLING CODE 4184–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Notice of Availability of Funding To Provide Community Service Employment Opportunities for Refugees Who Have Experienced Long-term Difficulties in Assimilation

AGENCY: Office of Refugee Resettlement, ACF, DHHS.

ACTION: Request for applications for projects to provide community service employment opportunities for refugees who have experienced long-term difficulties in assimilation.

SUMMARY: This program announcement governs the availability of social services funds and award procedures for $16 million in FY 1998 discretionary grants for community service employment for refugees under the Refugee Resettlement Program. These grants, which will be awarded on a competitive basis, are for localities with large concentrations of refugees who have experienced difficulty integrating socially and economically into local communities. Refugees are eligible to participate in these projects regardless of the length of time they have resided in the U.S. Applications may include requests for project periods of up to three years, with an initial budget period of one year. Where awards are made for multiple year project periods, continuation grant applications will be entertained in subsequent years on a non-competitive basis, subject to the availability of funds, successful progress of the project, and ACF/ORR's determination that this would be in the best interest of the government.

The Catalog of Federal Domestic Assistance (CFDA) number assigned to this announcement is 93.576.

DATE: The closing date for receipt of applications is July 20, 1998.

ADDRESS: Address applications to: Office of Refugee Resettlement, Division of Community Resettlement, 6th Floor East, Aerospace Building, 370 L'Enfant Promenade, SW, Washington, DC 20447

FOR FURTHER INFORMATION CONTACT: Nguyen T. Kimchi at (202) 401–4556, e-mail: Nkimchi@acf.dhhs.gov, or send correspondence to the above listed address.

SUPPLEMENTARY INFORMATION:

Part I. General Information

A. Background

There are communities across this country with large concentrations of refugees [1], many of whom entered the United States over a decade ago. For some refugees, language skills, cultural barriers, the lack of financial resources, and years of relying on public assistance, have isolated them from the mainstream, limited their employment opportunities and hindered integration into American communities. Their rate of assimilation has been documented in many localities on such key indicators as poverty levels, welfare utilization, car and home ownership, high school completion, college attendance or graduation, language fluency, employment rates, household income, per capita income, and naturalization rates. Prior to their arrival in the U.S., some refugees have experienced torture, starvation or prolonged malnutrition, which have exacerbated their isolation and difficulty in adapting to life in the United States.

In some of these communities, refugees represent a significant percentage of the population and, relative to non-refugee groups, have a sizeable impact on local services, medical clinics, and school systems.

The purpose of this announcement is to improve refugee rates of assimilation in heavily impacted communities by providing funding for workforce experience and training, earned income for refugees and their families, and access to needed services for refugee communities.

Statutory and Regulatory Authority

The FY 1998 House Appropriations Committee Report (H.R. Rept. No. 105–205) stated that: "The Committee has set-aside $16,000,000 for increased support to communities with large

[1] In addition to persons who meet all requirements of 45 CFR 400.43, "Requirements for documentation of refugee status," eligibility for targeted assistance includes: (1) Cuban and Haitian entrants, under section 501 of the Refugee Education Assistance Act of 1980 (Pub. L. No. 96–422); (2) certain Amerasians from Vietnam who are admitted to the U.S. as immigrants under section 584 of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1988, as included in the FY 1988 Continuing Resolution (Pub. L. No. 100–202); and (3) certain Amerasians from Vietnam, including U.S. citizens, under title II of the Foreign Operations, Export Financing, and Related Programs Appropriations Acts, 1989 (Pub. L. No. 100–461), 1990 (Pub. L. No. 101–167), and 1991 (Pub. L. No. 101–513). For convenience, the term "refugee" is used in this notice to encompass all such eligible persons unless the specific context indicates otherwise.

Refugees admitted to the U.S. under admissions numbers set aside for private-sector-initiative admissions are not eligible to be served under the targeted assistance program (or under other programs supported by Federal refugee funds) during their period of coverage under their sponsoring agency's agreement with the Department of State—usually two years from their date of arrival or until they obtain permanent resident alien status, whichever comes first.

concentrations of refugees whose cultural differences made assimilation especially difficult justifying a more intense level and longer duration of Federal assistance." Accordingly, ORR has announced in the Notice of Proposed FY 1998 Refugee Social Service Allocations, published in the **Federal Register**, February 13, 1998, that these funds will be made available through discretionary grants for which this announcement solicits applications.

Section 412(c)(1)(A) of the INA authorizes the Director of ORR "to make grants to, and enter into contracts with, public or private nonprofit agencies for projects specifically designed—(i) to assist refugees in obtaining the skills which are necessary for economic self-sufficiency, including projects for job training, employment services, day care, professional refresher training, and other recertification services * * *"

Grant awards are also subject to the following federal regulations: 45 CFR part 74—Uniform administrative requirements for awards and subawards to institutions of higher education, hospitals, other nonprofit organizations, and commercial organizations; and certain grants and agreements with States, local governments and Indian tribal governments and 45 CFR part 92, Uniform administrative requirements for grants and cooperative agreements to State and local governments.

B. Purpose and Scope

Under this announcement, the Office of Refugee Resettlement solicits applications from eligible applicants who wish to compete for funds to provide community employment services for refugees who have experienced long-term difficulties in assimilation into American communities.

One of the most effective methods to help refugees obtain employment and achieve economic self-sufficiency is through employment experience. Employment through community service offers a job for the individual, household income for refugee families, community participation, cross-cultural exposure for public and private agencies, and access to community services for refugee communities. For these reasons, ORR is providing funding under this announcement to be primarily for employer subsidies to create or increase the number of community work experience jobs for refugees.

Community service employment may be in the public or private sector; however, given the emphasis in this announcement on gaining refugee access to community services, ORR anticipates that most successful applicants will target these subsidies to public and private non-profit organizations that may not otherwise have the resources to provide this type of employment.

Some examples of positions in agencies which may benefit from community work experience subsidies are: interpreters and aides in community health and maternal care clinics, classroom aides and teachers in elementary schools, police and law enforcement assistants for such programs as neighborhood watch, and police storefronts, outreach workers for mental health agencies, aides in local services to the elderly or at satellite centers located in areas with large concentration of elderly refugees, and caseworker assistants in public welfare offices.

Accordingly, this grant announcement makes available $16 million for community service employment to assist communities with large concentrations of refugees who are experiencing difficulty assimilating into local communities.

C. Eligible Applicants

Eligible grantees are private, non-profit organizations and agencies of State governments that are responsible for the refugee program under 45 CFR 400.5.

D. Eligible Refugees

Refugees eligible to participate in projects funded under this announcement must be at least 21 years of age, unemployed, or without earned income, or members of families receiving public assistance.

All eligible refugees must be residents of their respective communities for at least six months. Priority will be given to those refugees who are able to work but unable to find employment. ORR anticipates that refugees targeted for these positions may be long-term welfare recipients (12 months or more) or those who face termination from Temporary Assistance for Needy Families (TANF) within the 12 month period following enrollment in this project.

E. Available Funds

Approximately $16 million will be available for awards. It is expected that most grant awards will be between $1 million and $5 million. ORR anticipates making 4–5 awards with these funds for projects that will secure employment for a minimum of 100 eligible participants.

The Director of ORR will make final award decisions based on such factors as: the geographic distribution of the competitive applications; the extent to which the grants reflect a reasonable distribution of funds across the areas impacted by refugees, and the availability of funds.

F. Use of Funds

Successful applicants will receive grants to identify and develop, as necessary, community service employment positions for low-income or unemployed refugees at local public or private nonprofit organizations. Applicants must demonstrate a specific need for supplementation of available resources to provide these services for refugees. Projects funded under this announcement will be designed to (a) provide income to refugees and their households, employment experience, and eventual transition to unsubsidized employment; and (b) through the presence and assistance of a refugee employee in these agencies, give refugee communities greater access to local community services.

Grantees must establish a network of relationships with appropriate public or private, non-profit employers to identify and develop suitable subsidized community service employment positions. Grant funds may be used to reimburse employers for up to 100% of the employment wage, for a maximum of 12 months, under the terms of a contract in which, in exchange for the salary subsidy, the employer agrees to provide the refugee employee additional supervisory assistance in learning and retaining the job. Employers are expected to retain the refugee employee in this position after the wage subsidy has ended, if the refugee has performed satisfactorily, or, if insufficient funds are available, to assist the refugee employee in securing other employment.

Refugee employees should be eligible for all benefits available to all other employees at the work site. Applicants should identify the types and number of community service employment positions targeted in their project, including job descriptions, qualifications, and salary levels. Project participants must be paid an hourly wage equal to the prevailing rates of pay for persons employed in similar occupations by the same employer. In no event should the wage be lower than the federal minimum wage.

Approximately 75–80% of grant funds are to be designated for salary subsidies. Applicants may designate up to 5% for employer incentives.

Grantees should provide supportive services to assist project participants in retaining successful community service employment. Such supportive services

may include: on-site technical assistance; employment counseling; work-related incidental expenses for such items as work shoes, uniforms, glasses, public transportation passes, etc. if these are not available from other sources.

Whether the applicant is a State refugee agency or a non-profit organization, projects proposed for funding under this announcement must be designed and implemented by coalitions of local community agencies and refugee organizations. These coalitions must identify clear respective roles and responsibilities for each participating agency within the coalition, expressed in a signed written agreement which describes the purpose and activities of each. The extent of local collaboration will be an important factor in the review of the strength of the proposal.

Applicants must also provide for the creation of an Advisory Board, delineating the roles and responsibilities of each member, compensation, if any, to members, a definitive and measurable work plan, and schedule of meetings.

G. Restrictions

Funds may not be used for lobbying, union-related activities, politically-related employment as a form of political patronage. Wage subsidies must be used for a net increase in the number of positions within a given agency, not to replace currently funded positions. Refugees employed as a result of this project may not displace employed workers or workers on lay-off.

Part II. The Project Description

The project description provides a major means by which an application is evaluated and ranked to compete with other applications for available assistance. The project description should be concise and complete and should address the activity for which Federal funds are being requested. Supporting documents should be included where they can present information clearly and succinctly. Applicants are encouraged to provide information on their organizational structure, staff, related experience, and other information considered to be relevant. The Office of Refugee Resettlement uses this and other information to determine whether the applicant has the capability and resources necessary to carry out the proposed project. It is important, therefore, that this information be included in the application. However, in the narrative the applicant must distinguish between resources directly related to the proposed project from those that will not be used in support of the specified project for which funds are requested.

A. Statement of Need

The need for assistance must be demonstrated and the principal and subordinate objectives of the project must be clearly stated; supporting documentation, such as letters of support and testimonials from concerned interests other than the applicant, may be included. Any relevant data based on planning studies should be included or referred to in the endnotes/footnotes. Incorporate demographic data and participant/beneficiary information, as needed.

The Office of Refugee Resettlement is particularly interested in the following:

A description, with documentation, of the need for services within the proposed target area, including documentation of the number of refugees in the target area and the ratio between refugees to the non-refugee population in the community.

Data and analyses of family and community needs, including the implications of welfare reform and employment patterns on family needs for child care and other support services.

A discussion of how the targeted refugees have the most need of the proposed services. Submit evidence of poor assimilation of refugees relative to the community at-large. Indicators may include: poverty levels, public assistance utilization, unemployment, rates of high school completion, college attendance, car and homeownership, and attainment of citizenship.

B. Design and Approach

Outline a plan of action which describes the scope and detail of how the proposed work will be accomplished. Account for all functions or activities identified in the application. Cite factors which might accelerate or decelerate the work and state your reason for taking the proposed approach rather than others. Describe any unusual features of the project such as design or technological innovations, reductions in cost or time, or extraordinary social and community involvement.

Provide quantitative monthly or quarterly projections of the accomplishments to be achieved for each function or activity in such terms as the number of people to be served. When accomplishments cannot be quantified by activity or function, list them in chronological order to show the schedule of accomplishments and their target date.

Identify the kinds of data to be collected, maintained and/or disseminated. Note that clearance from the U.S. Office of Management and Budget might be needed prior to a "collection of information" that is "conducted or sponsored" by ACF/ORR. List organizations, cooperating entities, consultants, or other key individuals who will work on the project along with a short description of the nature of their effort or contribution.

The Office of Refugee Resettlement is particularly interested in the following:

The applicant's plans for delivering effective services to refugees in all areas of service and program management.

A description of the proposed target area(s) for services, recruitment strategies, and priorities for selecting refugee clients for participation.

A description of the services and resources of other local refugee employment service and community agencies.

A plan to identify potential employment, to recruit eligible refugees and begin services as soon as possible.

Describe how community service employment positions will be developed with local employers; how these employers will be encouraged to customize the jobs and provide supervisory support to the employees under this project; identify any local employers who have made commitments to the project and describe them (e.g., number and types of jobs, supportive services and training; etc.)

Note: ORR expects that all applicants funded under this announcement will begin serving refugees and their families no later than March, 1999.

A description of the types and number of community service employment positions targeted for the project including job descriptions, qualifications and salary levels.

Documentation of cooperative arrangements with other public or private agencies to assist the applicant in providing effective employment services. Such cooperative arrangements must include a plan to coordinate the funds as appropriate.

C. Results or Benefits Expected

Identify the results and benefits to be derived for refugees and their families as well as for the community. Based on the stated program objectives, a discussion of the specific results or benefits that could be expected for the refugees and families participating in the program. A discussion of the

specific community-wide results or benefits including those resulting from collaborative partnership with other community agencies including the agencies which employ refugees. The qualitative and quantitative data the program will collect to measure progress towards the stated results or benefits. A discussion of how the program will determine the extent to which it has achieved its stated objectives.

Applicants are encouraged to use ORR standards under the Government Performance and Result Act (GPRA) to measure project results. These are:

- The number of refugees who entered employment.
- Cash assistance terminations due to earnings.
- Average hourly wage at placement.
- Employment retention.
- Employment with health benefits.

The Office of Refugee Resettlement is particularly interested in the following:

Numbers, types and average salaries of refugees to be employed in community service employment positions; the degree to which employee benefits, including medical coverage, are available for these jobs; expectations for job or employment retention after one year; expected average earnings one year after placement into subsidized employment; cost per placement into subsidized community service employment.

The application may include other performance outcomes, as appropriate.

D. Project Management and Implementation

Describe the staff and systems capacity for managing the project, to include: key staff resumes or position descriptions; a project organizational chart identifying all agencies involved in the project and their respective roles and responsibilities; Identify the critical activities, time frames, and responsibilities for implementing the project.

Local Collaboration and Sustainability

Identify a coalition of key agencies, respective roles and responsibilities, and agreements. Describe the local partnerships and each member's contribution to the project; the extent to which the project is coordinated with key community activities; the commitment and integration of other community resources; any involvement of, or participation by, local employers; and the extent to which the community and the coalition have developed plans to maintain and expand the capacity to serve the targeted refugee population;

Advisory Board

Identify and submit position descriptions or resumes for Advisory Board positions.

The Office of Refugee Resettlement is particularly interested in the following:

Evidence of the applicant's ability and experience to administer an employment program and to manage a community service employment program. Include a discussion of any proposed changes and improvements in program management.

A description of the applicant's experience in management of employment services for refugees who have had a protracted history of unemployment. A description of the applicant's experience in management of community, State and Federal partnerships. A description of the applicant's history and relationship with the target community. Include a complete discussion of the program's financial status and program operations. Include an organizational chart of the program.

A description of the mechanisms for recruiting and hiring well-trained and appropriately credentialed staff members.

A discussion of all proposed key staff or managerial positions, their proposed salary rates, the length of time they would be employed each year and the applicant's plans for ongoing monitoring and supervision of other staff including refugees employed under the community employment service program if appropriate.

Applicants who are electing to create partnerships with other agencies, providers, or funding sources should provide:

Letters of commitment from partner agencies and providers, including documentation of any additional resources such as child care, health care or transportation subsidies, etc. that will enhance the program. Explain and itemize these resources or services, and state whether or not these costs are included as part of the non-Federal share.

Plans for managing, coordinating or monitoring, and assisting the efforts of partnering agencies and other forms of collaborative arrangements in meeting the goals of the project.

A description of the experience of the applicant and the proposed partnering agencies in collaborating to deliver effective employment services and in managing multiple sources of funding.

A description of how the applicant will track, manage and account for refugee employment costs and, if applicable, the availability of other funding sources.

E. Budget and Budget Justification

Provide line item detail and detailed calculations for each budget object class identified on the Budget Information form. Detailed calculations must include estimation methods, quantities, unit costs, and other similar quantitative detail sufficient for the calculation to be duplicated. The detailed budget must also include a breakout by the funding sources identified in Block 15 of the SF–424.

Provide a narrative budget justification that describes how the categorical costs are derived. Discuss the necessity, reasonableness, and allocability of the proposed costs.

The Office of Refugee Resettlement is particularly interested in the following:

A description of how your proposed budget is reasonable, appropriate and cost effective in view of the proposed services, strategies and anticipated outcomes.

A description of the extent to which your proposal includes significant other resources to complement the ORR funds.

General Instructions

ORR is particularly interested in specific factual information and statements of measurable goals in quantitative terms. Project descriptions are evaluated on the basis of substance, not length. Extensive exhibits are not required. (Supporting information concerning activities that will not be directly funded by the grant or information that does not directly pertain to an integral part of the grant funded activity should be placed in an appendix.) Pages should be numbered and a Table of Contents should be included for easy reference.

The Office of Refugee Resettlement is also requesting that applicants provide a summary of the project description which includes:

- The name and address of the applicant agency.
- The total number of employment placements when the program is completed.
- The total ORR funds requested for a 12 month period.
- The amount and source of any additional funding that will help support the project (i.e., funds that are in addition to Federal ORR funds.)
- The community to be served (name of town(s), city(ies) and county(ies) and the targeted refugee groups.
- The proposed type of jobs, hours per week and wages.
- The target date for beginning full services to refugees.

Additional Information

Following is a description of additional information that should be placed in the appendix of the application.

1. Staff and Position Data

Provide a biographical sketch for each key person appointed and a job description for each vacant position. A biographical sketch will also be required for new key staff as appointed.

2. Organizational Profile

Provide information on the applicant organization and cooperating partners such as organizational charts, financial statements, audit reports or statements from CPAs/Licensed Public Accountants, Employer Identification Numbers, contact persons and telephone numbers, documentation of experience in the program area, and other pertinent information. Any non-profit organization submitting an application must submit proof of its non-profit status in its application at the time of submission. The non-profit agency can accomplish this by providing a copy of the applicant's listing in the Internal Revenue Service's (IRS) most recent list of tax-exempt organizations described in section 501(c)(3) of the IRS code, *or* by providing a copy of the currently valid IRS tax exemption certificate, *or* by providing a copy of the articles of incorporation bearing the seal of the State in which the corporation or association is domiciled.

Part III. Criteria for Review and Evaluation of the Grant Application

Information provided in response to Part II of this announcement will be used to review and evaluate applications using the following criteria:

A. Need for Assistance to Increase Assimilation (30 points)

Quality of description and documentation with regard to refugee assimilation and impact on the community.

B. Program Design and Approach (20 points)

Soundness of and innovation in program design and methodology for securing community service employment for refugees, including evidence of collaboration through coalitions of local community agencies and refugee organizations.

C. Results and Benefits (20 points)

Providing effective and responsive services to targeted refugees and families. Employment results which are timely, appropriate, and measurable using ORR standards for outcome performance under GPRA.

D. Project Management and Implementation (15 points)

The extent of demonstrated capacity of the applicant organization, key leaders and managers and, where appropriate, proposed partnering organizations in:

Managing the proposed community employment services in a timely, cost-effective manner.

Working successfully in partnership with the targeted refugee communities, families, and other community organizations, institutions, and agencies.

E. Cost Effectiveness and Budget Appropriateness (15 points)

The extent to which the project's costs are reasonable and cost-effective in view of the activities to be carried out and the anticipated outcomes.

The extent to which proposed salaries and fringe benefits reflect appropriate levels of compensation for the responsibilities of staff.

The extent to which costs for refugee wages in community employment are reasonable and equitable.

Part IV. The Application Process

A. Required Forms

Applicants interested in applying for funds must submit a complete application including the required forms—Standard Form 424 and attachments. In order to be considered for a grant under this announcement, an application must be submitted on the Standard Form 424 (approved by the Office of Management and Budget (OMB) under Control Number 0348–0043), a copy of which was published by ORR in the **Federal Register**, Volume 62, No. 236. pages 64870–64883. SF–424 is also available through the Administration for Children and Families website at: http://www.acf.dhhs.gov (at "Select a Topic" choose Grant Related Forms and Documents). Each application must be signed by an individual authorized to act for the applicant and to assume responsibility for the obligations imposed by the terms and conditions of the grant award. Applicants requesting financial assistance for non-construction projects must file the Standard Form 424B, Assurances: Non-Construction Programs (approved by the Office of Management and Budget under Control Number 0348–0040). Applicants must sign and return the Standard Form 424B with their application. Applicants must provide a certification concerning lobbying. Applicants must provide information consistent with ACF's approved Uniform Project Description (OMB # 0970–0139), as found in Part II of this Program Announcement. Prior to receiving an award in excess of $100,000, applicants shall furnish an executed copy of the lobbying certification (approved by the Office of Management and Budget under Control Number 0348–0046). Applicants must sign and return the certification with their application.

Applicants must make the appropriate certification of their compliance with the Drug-Free Workplace Act of 1988. By signing and submitting the application, applicants are providing the certification and need not mail back the certification with the application. Applicants must make the appropriate certification that they are not presently debarred, suspended or otherwise ineligible for award. By signing and submitting the application, applicants are providing the certification and need not mail back the certification with the application. Applicants must also understand that they will be held accountable for the smoking prohibition included within Pub. L. 103–227, Part C Environmental Tobacco Smoke (also known as Pro-Children's Act of 1994). A copy of the **Federal Register** notice which implements the smoking prohibition is included with the forms. By signing and submitting the application, applicants are providing the certification and need not mail back the certification with the application.

B. Application Submission

Applicants submitting proposals should use the following format guidelines: Proposals should be organized according to the evaluation criteria located in Part III. For each of the five specified criteria, applicants should provide information in response to the application requirements described in Part II of this announcement.

One signed original and two complete copies of the grant application, including all attachments, are required. Each application must be limited to no more than 25 double-spaced pages of program narrative (not including the Project Summary and the forms which make up the SF–424A and Budget Justification).

If the narrative portion of the application is more than 25 double-spaced pages, the other pages will be removed from the application and not considered by the reviewers. The attachments/appendices to each application must be limited to no more than 25 pages, (in addition to the 25

pages permitted for the narrative portion of the application). If the attachments/appendices to each application are more than 25 pages, the other pages will be removed from the application and not considered by the reviewers.

C. Application Considerations

Applicants will be scored against the evaluation criteria described above. The review will be conducted by a panel consisting of experts in the areas of refugee and employment services.

The results of the competitive review will be taken into consideration by the Director, Office of Refugee Resettlement, in determining the projects to be funded. The Director of ORR will make the final selection of the applicants to be funded. An application may be funded in whole or in part, depending on the relative need for services, applicant ranking, geographic location, proposed costs, and funds available.

Successful applicants will be notified through the issuance of a Financial Assistance Award which sets forth the amount of funds granted, the terms and conditions of the grant, the effective date of the grant, the budget period for which support is given, and the total project period for which support is provided.

D. Checklist for a Complete Application

A complete application consists of the following items in this order:

Introductory Material:

- Cover letter.
- Table of Contents.
- Project Description Summary.

(1) Application for Federal Assistance (SF424).

(2) Budget Information—Non-Construction Programs (SF424A&B).

(3) Budget Justification.

(4) Project Description and Appendices.

(5) Proof of non-profit status as appropriate.

(6) Assurances Non-Construction Programs.

(7) Certification Regarding Lobbying.

(8) Where appropriate, a completed SPOC certification with the date of SPOC contact entered in line 16, page 1 of the SF 424.

Applicants are reminded that the narrative portion of the application cannot exceed 25 double-spaced pages in a 12-pitch font with 1-½ inch margins at the top and 1 inch at the bottom and both sides and that attachments/Appendices to the application can not exceed 25 pages. Attachments and appendices should be used only to provide supporting documentation such as maps, administration charts, position descriptions, resumes, and letters of intent/agreement. Please do not include books or video tapes as they are not easily reproduced and are, therefore, inaccessible to the reviewers. Each page should be numbered sequentially.

GENERAL—The following guidelines are for preparing the budget and budget justification. Both Federal and non-Federal resources shall be detailed and justified in the budget and narrative justification. According to the instructions for completing the SF–424A and the preparation of the budget and budget justification, "Federal resources" refers only to the ACF/ORR grant for which you are applying. Non-Federal resources are all other Federal and non-Federal resources. It is suggested that budget amounts and computations be presented in a columnar format: first column, object class categories; second column, Federal budget; next column(s), non-Federal budget(s), and last column, total budget. The budget justification should be a narrative.

Personnel: Costs of employee salaries and wages. Justification—Identify the project director and for each staff person, provide the title, time commitment to the project (in months), time commitment to the project (as a percentage or full-time equivalent), annual salary, grant salary, wage rates, etc. Do not include the costs of consultants or personnel costs of delegate agencies.

Fringe Benefits: Costs of employee fringe benefits unless treated as part of approved indirect cost rate. Justification—Provide a breakdown of the amounts and percentages that comprise fringe benefit costs such as health insurance, FICA, retirement insurance, taxes, etc.

Travel: Costs of project-related travel by employees of the applicant organization (does not include costs of consultant travel). Justification—For each trip, show the total number of traveler(s), travel destination, duration of trip, per diem, mileage allowances, if privately owned vehicles will be used, and other transportation costs and subsistence allowances. Travel costs for key staff to attend ACF/ORR-sponsored meetings should be detailed in the budget.

Equipment: Costs of tangible, non-expendable, personal property, having a useful life of more than one year and an acquisition cost of $5,000 or more per unit.

Justification—For each type of equipment requested, provide a description of the equipment, the cost per unit, the number of units, the total cost, and a plan for use on the project, as well as use or disposal of the equipment after the project ends.

Supplies: Costs of all tangible personal property other than that included under the Equipment category.

Justification—Specify general categories of supplies and their costs. Show computations and provide other information which supports the amount requested.

Contractual: Costs of all contracts for services and goods except for those which belong under other categories such as equipment, supplies, etc. Contracts with secondary recipient organizations, including delegate agencies (if applicable), should be included under this category.

Justification—All procurement transactions shall be conducted in a manner to provide, to the maximum extent practical, open and free competition. If procurement competitions were held or if procurement without competition is being proposed, attach a list of proposed contractors, indicating the names of the organizations, the purposes of the contracts, the estimated dollar amounts, and the award selection process. Justify any anticipated procurement action that is expected to be awarded without competition and to exceed the simplified acquisition threshold fixed at 41 USC 403(11). Recipients might be required to make available to ACF pre-award review and procurement documents, such as requests for proposal or invitations for bids, independent cost estimates, etc.

Note: Whenever the applicant intends to delegate part of the project to another agency, the applicant must provide a detailed budget and budget narrative for each delegate agency, by agency title, along with the required supporting information referred to in these instructions.

Other: Enter the total of all other costs. Such costs, where applicable and appropriate, may include but are not limited to insurance, professional services costs, space and equipment rentals, printing and publication, computer use, training costs, such as tuition and stipends, staff development, and administrative costs.

Justification—Provide computations, a narrative description and a justification for each cost under this category.

Indirect Costs: This category should be used only when the applicant currently has an indirect cost rate approved by the Department of Health and Human Services or another cognizant Federal agency.

Justification—An applicant proposing to charge indirect costs to the grant must enclose a copy of the current rate

agreement. If the applicant organization is in the process of initially developing or renegotiating a rate, it should immediately upon notification that an award will be made, develop a tentative indirect cost rate proposal based on its most recently completed fiscal year in accordance with the principles set forth in the cognizant agency's guidelines for establishing indirect cost rates, and submit it to the cognizant agency. Applicants awaiting approval of their indirect cost proposals may also request indirect costs. It should be noted that when an indirect cost rate is requested, those costs included in the indirect cost pool should not also be charged as direct costs to the grant. Also, if the applicant is requesting a rate which is less than what is allowed under the agreement, the authorized representative of the applicant organization must submit a signed acknowledgement that the applicant is accepting a lower rate than allowed.

Program Income: The estimated amount of income, if any, expected to be generated from this project.

Justification—Describe the nature, source and anticipated use of program income in the budget or refer to the pages in the application which contain this information.

Non-Federal Resources: Amounts of non-Federal resources that will be used to support the project as identified in Block 15 of the SF–424.

Justification—The firm commitment of these resources must be documented and submitted with the application in order to be given credit in the review process.

E. Due Date for the Receipt of Applications

Deadlines: The closing date for submission of applications is 4:30 p.m. (EDT) on July 20, 1998. Mailed applications shall be considered as meeting the deadline if they are either received on or before the deadline date or sent on or before the deadline date and received by ORR in time for the independent review. Applications should be mailed to: Division of Community Resettlement, Office of Refugee Resettlement, 6th Floor East, Aerospace Building 370 L'Enfant Promenade, SW., Washington, DC 20447.

Applicants are cautioned to request a legibly dated U.S. Postal Service postmark or to obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.

Applications hand carried by applicants, courier services, or by overnight/express mail couriers shall be considered as meeting the announced deadline if they are received on or before the deadline date, between the hours of 8 a.m. and 4:30 p.m., at the above stated address, between Monday and Friday (excluding Federal holidays). (Applicants are cautioned that express/overnight mail services may not always deliver as agreed. In addition, some non-postal service carriers will only deliver to ORR's street address which is 901 D Street SW. instead of 370 L'Enfant Promenade, SW.) ORR cannot accommodate transmission of applications by fax or through other electronic media. Therefore, applications transmitted to ORR electronically will not be accepted regardless of date or time of submission and time of receipt.

Late applications: Applications which do not meet the criteria above are considered late applications. ORR shall notify each late applicant that its application will not be considered.

Extension of deadlines: ORR may extend the deadline for all applicants because of acts of God such as floods, hurricanes, etc., or when there is a widespread disruption of the mails. However, if ORR does not extend the deadline for all applicants, it may not waive or extend the deadline for any applicants. A determination to waive or extend deadline requirements rests with the Chief Grants Management Officer.

F. Paperwork Reduction Act of 1995 (Pub. L. 104–13)

All information collections within this Program Announcement are approved under the following currently valid OMB control numbers: 424, (0348–0043); 424A (0348–0044); 424B (0348–0040); Disclosure of Lobbying Activities (0348–0046); Uniform Project Description (0970–0139), Expiration date 10/31/2000. Financial Status Report (SF–269) (0348–0039) and ORR Program Performance Report (0970–0036).

Public reporting burden for this collection of information is estimated to average 80 hours per response, including the time for reviewing instructions, gathering and maintaining the data needed, and reviewing the collection of information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

G. Executive Order 12372—Notification Process

This program is covered under Executive Order 12372, "Intergovernmental Review of Federal Programs," and 45 CFR part 100, "Intergovernmental Review of Department of Health and Human Services Programs and Activities." Under the Order, States may design their own processes for reviewing and commenting on proposed Federal assistance under covered programs.

All States and territories except Alabama, Alaska, Colorado, Connecticut, Hawaii, Idaho, Kansas, Louisiana, Massachusetts, Minnesota, Montana, Nebraska, New Jersey, Ohio, Oklahoma, Oregon, Pennsylvania, South Dakota, Tennessee, Vermont, Virginia, Washington, American Samoa, and Palau have elected to participate in the Executive Order process and have established Single Points of Contact (SPOCs). Applicants from these twenty-four jurisdictions need not take action regarding Executive Order 12372.

Applicants should contact their SPOC as soon as possible to alert them to the prospective application and to receive any necessary instructions. Applicants must submit any required material to the SPOC as early as possible so that the program office can obtain and review SPOC comments as part of the award process. It is imperative that the applicant submit all required materials, if any, to the SPOC and indicate the date of this submittal (or date of contact if no submittal is required) on the Standard Form 424, item 16a.

Under 45 CFR 100.8(a)(2), a SPOC has 60 days from the application deadline to comment on proposed new or competing continuation awards.

SPOCs are encouraged to eliminate the submission of routine endorsements as official recommendations.

Additionally, SPOCs are requested to clearly differentiate between mere advisory comments and those official State process recommendations which may trigger the "accommodate or explain" rule.

When comments are submitted directly to the ORR, they should be addressed to: Department of Health and Human Services, Administration for Children and Families, Office of Refugee Resettlement, 6th Floor East, Aerospace Building, 370 Enfant Promenade, SW., Washington, DC 20447.

Reporting Requirements—Grantees are required to file the Financial Status Report (SF–269) semi-annually and Program Progress Reports on a quarterly basis.

Although ORR does not expect the proposed components/projects to include evaluation activities, it does expect grantees to maintain adequate records to track and report on expenditures by budget line item,

project outcomes and participant demographics information which may include but is not limited to: date of birth, sex, country of birth, date of entry, education, employment history, marital status and number of children.

The official receipt point for all reports and correspondence is the ORR Division of Community Resettlement. An original and one copy of each report shall be submitted within 30 days of the end of each reporting period directly to the Project Officer named in the award letter. The mailing address is: Division of Community Resettlement, Office of Refugee Resettlement, Sixth Floor East, Aerospace Building, 370 L'Enfant Promenade, SW., Washington, DC 20447.

A final Financial and Program Report shall be due 90 days after the budget expiration date or termination of grant support.

Dated: May 14, 1998.

Lavinia Limon,

Director, Office of Refugee Resettlement.

[FR Doc. 98–13434 Filed 5–19–98; 8:45 am]

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a list of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (301) 443–7978.

Proposed Project: Feasibility Study To Evaluate the Positive Activities Campaign—New—The Center for Substance Abuse Prevention is launching the Positive Activities Campaign, which is an initiative to encourage adults to become more involved in positive, skill-building activities with youth. The ultimate goal of the initiative is to reduce substance abuse among young people. To determine whether the effects from such a campaign can be evaluated, CSAP is proposing a feasibility study of PAC that consists of both a process and an outcomes evaluation. The evaluation will determine whether change can be measured in communities exposed to PAC, including change in adults' involvement with youth. Data for the process evaluation will come primarily from on-site interviews with key personnel, supported by focus groups with volunteers; data for the outcomes evaluation will be collected through a baseline and follow-up telephone survey of adults. The estimated annual burden hours are as follows:

Data collection instrument	Number of respondents	Hours per response	Total annual response burden
Baseline telephone survey of random sample of adults	1,800	0.20	360
Follow-up telephone survey of respondents from baseline survey	1,600	0.15	240
Interviews with local-level staff for process evaluation	240	2.00	480
Focus groups	120	1.50	270
Total			1,350

Written comments and recommendations concerning the proposed information collection should be sent within 30 days of this notice to: Daniel Chenok, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503.

Dated: May 15, 1998.

Richard Kopanda,

Executive Officer, Substance Abuse and Mental Health Services Administration.

BILLING CODE 4162–20–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4349–N–20]

Submission for OMB Review: Comment Request

AGENCY: Office of the Assistant Secretary for Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: Comments due date: June 19, 1998.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments must be received within thirty (30) days from the date of this Notice. Comments should refer to the proposal by name and/or OMB approval number and should be sent to: Joseph F. Lackey, Jr., OMB Desk Officer, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Wayne Eddins, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708–1305. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Eddins.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) the title of the information collection proposal; (2) the office of the agency to collect the information; (3) the OMB approval number, if applicable; (4) the description of the need for the information and its proposed use; (5) the agency form number, if applicable; (6) what members of the public will be affected by the proposal; (7) how frequently information submissions will be required; (8) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (9) whether the proposal is new, an extension, reinstatement, or revision of an information collection requirement; and (10) the names and telephone

numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 35, as amended.

Dated: May 13, 1998.

David S. Cristy,

Director, IRM Policy and Management Division.

Title of Proposal: Campus of Learners Semi-Annual Report.

Office: Public and Indian Housing.

OMB Approval Number: 2577–xxxx.

Description of the Need for the Information and its Proposed Use: Participating PHAs will provide HUD with information on the number of families included in the Campus of Learners Program, Federal dollars supporting the Program, number of residents in classes/training and other opportunities made available to residents. The information will enable HUD to insure that Federal dollars are spent according to that PHA's Strategic Plan.

Form Number: 52350.

Respondents: State, Local, or Tribal Government.

Frequency of Submission: Semi-Annually.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Semi-Annually	25		2		36		1,800

Total Estimated Burden Hours: 1,800.

Status: New.

Contact: Beverly Hardy, HUD, (202) 708–4214; Joseph F. Lackey, Jr., OMB, (202) 395–7316.

Dated: May 13, 1998.

[FR Doc. 98–13371 Filed 5–19–98; 8:45 am]

BILLING CODE 4210–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4369–N–02]

Announcement of OMB Approval Number for Disaster Recovery Grant Reporting (DRGR) Data System

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Announcement of OMB approval number.

SUMMARY: The purpose of this notice is to announce the OMB approval number for the collection of information pertaining to the Disaster Recovery Grant Reporting (DRGR) data system.

FOR FURTHER INFORMATION CONTACT: Mr. Jan Opper, Department of Housing and Urban Development, Room 7286, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708–3587. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended), this notice advises that OMB has responded to the Department's request for approval of the information collection pertaining to the Disaster Recovery Grant Reporting (DRGR) data system. The OMB approval number for this information collection is 2506–0165, which expires on May 31, 2001.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number.

Dated: May 14, 1998.

Kenneth C. Williams,

Deputy Assistant Secretary for Grant Programs.

[FR Doc. 98–13372 Filed 5–19–98; 8:45 am]

BILLING CODE 7025–01–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Receipt of Applications for Permit

The following applicants have applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, *as amended* (16 U.S.C. 1531, *et seq.*):

Applicant: University of Pittsburgh, Titusville, PA, PRT–842323.

The applicant requests a permit to import blood and vaginal samples from Mantled howler monkey (*Alouatta palliata*) collected at Ometepe Field Station, Ometepe, Nicaragua, to enhance the survival of the species through scientific research.

Applicant: National Zoological Park, Washington, D.C., PRT–842435.

The applicant requests a permit to export blood samples from captive-hatched ne-ne geese (*Nesochen sandvicensis*) to the United Kingdom for the purpose of scientific research.

Applicant: White Oak Conservation Center, Yulee, FL, PRT–842418.

The applicant requests a permit to export blood samples from black rhinoceros (*Diceros bicornis minor*) to the United Kingdom for the purpose of scientific research.

Applicant: Shannon E. Binns, University of Ottawa, Canada, PRT–842518.

The applicant requests a permit to take and export whole plants and parts of purple coneflower (*Echinacea tennesseensis* and *E. laevigata*) to Canada for the purpose of scientific research.

Applicant: U.S. Department of Agriculture, ARS North Central Regional Plant Intro. Station, Ames, IA, PRT–842520.

The applicant requests a permit to export seeds of purple coneflower (*Echinacea tennesseensis* and *E. laevigata*) to Canada for the purpose of scientific research.

Applicant: Department of Anthropology, City University of New York, New York, NY, PRT–810330

The applicant requests an amendment to this permit to include the import of shed hair samples from gorillas (*Gorilla gorilla*) collected in Nigeria, for scientific research.

Applicant: Wayne P. Steffens, Superior, WI, PRT–842124.

The applicant requests a permit to import and export specimens of Hine's emerald dragonfly (*Somatochlora hineana*) to and from Canada, including salvaged specimens and voucher specimens associated with population surveys for the purposes of scientific research.

Applicant: The Peregrine Fund, Boise, Idaho, PRT–842855.

The applicant request a permit to export captive-born Aplomado falcons (*Falco femoralis septentrionalis*) to Mexico for release as part of the recovery program for this species. This notice covers activities conducted by the applicant over a five year period.

Applicant: H & L Sales Company, Patio Ranch, San Antonio, TX, PRT 704025.

The applicant requests renewal of a permit to authorize interstate and foreign commerce, export, and cull of excess male barasingha (*Cervus duvauceli*) from their captive herd for the purpose of enhancement of survival of the species. This notice shall cover a period of three years. Permittee must apply for renewal annually.

Written data or comments should be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, Room 700, Arlington, Virginia 22203 and must be received by the Director within 30 days of the date of this publication.

The public is invited to comment on the following application for a permit to conduct certain activities with marine mammals. The application was submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) and the regulations governing marine mammals (50 CFR 18).

Applicant: Mark Cary Connor, Decatur, IL, PRT–842222.

The applicant requests a permit to import a polar bear (*Ursus maritimus*) sport-hunted from the McClintock Channel polar bear population, Northwest Territories, Canada for personal use.

Applicant: Ken D. Semelsberger, Strongsville, OH, 842192.

The applicant requests a permit to import a polar bear (*Ursus maritimus*) sport-hunted from the Western Hudson Bay polar bear population, Northwest Territories, Canada for personal use.

Applicant: Kenneth J. Semelsberger, Strongsville, OH, 842191.

The applicant requests a permit to import a polar bear (*Ursus maritimus*) sport-hunted from the Western Hudson Bay polar bear population, Northwest Territories, Canada for personal use.

Applicant: Obert L. Haines, Alamosa, CO, PRT–842521.

The applicant requests a permit to import a polar bear (*Ursus maritimus*) sport-hunted prior to April 30, 1994, from the Lancaster Sound polar bear population, Northwest Territories, Canada for personal use.

Documents and other information submitted with these applications are available for review, *subject to the requirements of the Privacy Act and Freedom of Information Act*, by any party who submits a written request for a copy of such documents to the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, Room 700, Arlington, Virginia 22203. Phone: (703/358–2104); FAX: (703/358–2281).

Dated: May 14, 1998.

MaryEllen Amtower,

Acting Chief, Branch of Permits, Office of Management Authority.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Endangered and Threatened Species Permit Application

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of applications.

The following applicant has applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*).

Applicant: Davey Resource Group, Davey Tree Expert Company, Kent, Ohio; Michael D. Johnson, Vertebrate Zoologist.

The applicant requests a permit to take (capture and release) Indiana bat (*Myotis sodalis*) in the state of Ohio. Activities are proposed for the purpose of presence/absence studies aimed at enhancement and survival of the species in the wild.

Written data or comments should be submitted to the Regional Director, U.S. Fish and Wildlife Service, Ecological Services Operations, 1 Federal Drive, Fort Snelling, Minnesota 55111–4056, and must be received on or before June 19, 1998.

Documents and other information submitted with these applications are available for review by any party who submits a written request for a copy of such documents to the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Ecological Services Operations, 1 Federal Drive, Fort Snelling, Minnesota 55111–4056. Telephone: (612/713–5332); FAX: (612/713–5292).

Dated: May 13, 1998.

Matthias A. Kerschbaum,

Acting Assistant Regional Director, IL, IN, MO (Ecological Services), Region 3, Fort Snelling, Minnesota.

U.S. DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Issuance of Permit for Marine Mammals

On February 20, 1998, a notice was published in the **Federal Register**, Vol. 63, No. 34, Page 8658, that an application had been filed with the Fish and Wildlife Service by John Abercrombie, Las Vegas, NV, for a permit (PRT–839323) to import a sport-hunted polar bear (*Ursus maritimus*) trophy taken from the Southern Beaufort Sea population, Northwest Territories, Canada, for personal use.

Notice is hereby given that on April 16, 1998, as authorized by the provisions of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

On February 20, 1998, a notice was published in the **Federal Register**, Vol. 63, No. 34, Page 8658, that an application had been filed with the Fish and Wildlife Service by Wallace D. Gott, Upland, CA, for a permit (PRT–839315) to import a sport-hunted polar bear (*Ursus maritimus*) trophy, taken prior to April 30, 1994, from the Northern Beaufort Sea population, Northwest Territories, Canada, for personal use.

Notice is hereby given that on April 16, 1998, as authorized by the provisions of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

On March 13, 1998, a notice was published in the **Federal Register**, Vol. 63, No. 49, Page 12498, that an application had been filed with the Fish and Wildlife Service by Edwin E. Smith, Houston, TX, for a permit (PRT–838493) to import a sport-hunted polar bear (*Ursus maritimus*) trophy, taken prior to April 30, 1994, from the Lancaster Sound population, Northwest Territories, Canada, for personal use.

Notice is hereby given that on April 27, 1998, as authorized by the provisions of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

On March 13, 1998, a notice was published in the **Federal Register**, Vol. 63, No. 49, Page 12498, that an application had been filed with the Fish and Wildlife Service by Dan L. Duncan, Houston, TX, for a permit (PRT–838492) to import a sport-hunted polar bear (*Ursus maritimus*) trophy, taken prior to April 30, 1994, from the Lancaster Sound population, Northwest Territories, Canada, for personal use.

Notice is hereby given that on April 27, 1998, as authorized by the provisions of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

Documents and other information submitted for these applications are available for review by any party who submits a written request to the U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, Rm 700, Arlington, Virginia 22203. Phone (703) 358–2104 or Fax (703) 358–2281.

Aquatic Nuisance Species Task Force Meeting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice announces the organizing meeting of the Ballast Water and Shipping Committee of the Aquatic Nuisance Species Task Force. Topics to be addressed during the meeting are identified.

DATES: The Ballast Water and Shipping Committee will meet from 10 a.m. to 3 p.m. on Thursday, May 28, 1998.

ADDRESSES: the meeting will be held in the first floor conference room at the Northeast-Midwest Institute, 218 D Street, SE., Washington, DC.

FOR FURTHER INFORMATION CONTACT:

LT Lawrence Greene, Ph.D., Committee Chair, U.S. Coast Guard at 202–267–0500, or Bob Peoples, Executive Secretary, Aquatic Nuisance Species Task Force, at 703–358–2025.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, this notice announces a meeting of the Ballast Water and Shipping Committee of the Aquatic Nuisance Species Task Force. The Task Force was established by the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990.

During the meeting, there will be an in-depth discussion of the Notice of Proposed Rule Making regarding implementation of the National Invasive Species Act of 1996 published by the U.S. Coast Guard in the **Federal Register** on April 10, 1998 (63 FR 17782). The notice addresses national voluntary ballast water management guidelines, requirements for reporting ballast water exchange, and modifications of Great Lakes and Hudson River ballast water management regulations. The meeting will conclude with a discussion of future activities and tasks of the Committee and tasks to be undertaken by individual members.

Minutes of the meeting will be maintained by the Executive Secretary, Aquatic Nuisance Species Task Force, Suite 851, 4401 North Fairfax Drive, Arlington, Virginia 22203–1622, and the Chair, Ballast Water and Shipping Committee, Plans and Preparedness Division, Office of Response, U.S. Coast Guard (G–MOR–2), 2100 Second Street, SW., Washington, DC 20593–0001, and will be available for public inspection during regular business hours, Monday through Friday, within 30 days following the meeting.

Dated: May 14, 1998.

Gary Edwards,

Co-Chair, Aquatic Nuisance Species Task Force, Assistant Director—Fisheries.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WY–920–08–1320–01; WYW136142]

Competitive Coal Lease Sale; Powder River Tract; WY

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given that certain coal resources in the Powder River Tract, described below, in Campbell County, Wyoming, will be offered for competitive lease by sealed bid in accordance with the provisions of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*).

DATES: The lease sale will be held at 2 p.m., on Tuesday, June 30, 1998. Sealed bids must be submitted on or before 4 p.m., on Monday, June 29, 1998.

ADDRESSES: The lease sale will be held in the First Floor Conference Room (Room 107) of the Wyoming State Office, 5353 Yellowstone Road, P.O. Box 1828, Cheyenne, Wyoming 82003. Sealed bids must be submitted to the Cashier, Wyoming State Office, at the address given above.

FOR FURTHER INFORMATION CONTACT: Mavis Love, Land Law Examiner, or Melvin Schlagel, Coal Coordinator, at 307–775–6258 and 307–775–6257, respectively.

SUPPLEMENTARY INFORMATION: This coal lease sale is being held in response to a lease by application (LBA) filed by Powder River Coal Company of Gillette, Wyoming. The coal resources to be offered consist of all reserves recoverable by surface mining methods in the following-described lands located in Campbell County approximately 48 miles south-southeast of Gillette, Wyoming, and about 7 miles east of State Highway 59 just south of Piney Canyon Road:

T. 41 N., R. 70 W., 6th P.M., Wyoming
Sec. 6: Lots 10 thru 13, 18 thru 21;
Sec. 7: Lots 6, 11, 14, and 19;
Sec. 18: Lots 5, 12, 13, and 20;
Sec. 19: Lots 5, 12 (N2);
Sec. 20: Lots 1 thru 4, 5 (N2), 6 (N2), 7 (N2), 8 (N2);
Sec. 21: Lots 4, 5 (N2);
T. 42 N., R. 70 W., 6th P.M., Wyoming
Sec. 31: Lots 5 thru 20;
Sec. 32: Lots 1 thru 16;
Sec. 33: Lots 1 thru 16;
Sec. 34: Lots 1 thru 16;
Sec. 35: Lots 1 thru 16.
Containing 4224.225 acres.

The tract is adjacent to the North Antelope and Rochelle mines operated by Powder River Coal Company. It contains surface minable coal reserves

in the Wyodak seam currently being recovered in the adjacent, existing mines. The Wyodak seam averages about 74 feet thick and is the primary recoverable coal seam on the tract. The seam splits roughly in two in the far southwestern portion of the LBA and a thin split off the bottom occurs in the eastern portion. There are no coal outcrops on the tract.

The overburden above the main seam ranges from about 200–300 feet thick on the LBA. The total in-place stripping ratio (BCY/Ton) of the coal is 3.0:1.

The tract contains an estimated 532 million tons of minable coal. This estimate of minable reserves includes the two splits mentioned above but does not include any tonnage from localized seams or splits containing less than 5 feet of coal.

The coal is ranked as subbituminous C. The overall average quality is 8742 Btu/lb, 27.93% moisture, 4.21% ash, 0.18% sulfur, and 1.84% sodium in ash. These quality averages place the coal reserves near the high end of the range of coal quality currently being mined in the southern Powder River Basin south of Wright, Wyoming.

There are several oil and gas wells on the tract. The estimate of the bonus value of the coal lease will include consideration of the future oil and gas production from these wells. An economic analysis of this future income stream will determine whether a well is bought out and plugged prior to mining or re-established after mining is completed. Other costs considered will include moving or removing roads, pipelines, and surface facilities.

The tract in this lease offering contains split estate lands. There are qualified surface owners as defined in the regulations at 43 CFR 3400.0–5. Consent granted by the qualified surface owners has been filed with and verified by the Bureau of Land Management. The lands and purchase price of the consent are shown below:

T. 41 N., R. 70 W., 6th P.M., Wyoming
Sec. 19: Lots 5, 12 (N2).
Containing 60.115 acres.

Purchase Price: $10.00 and an overriding royalty of three percent (3%) of the gross realization of all coal mined and sold from the subject property.

The tract will be leased to the qualified bidder of the highest cash amount provided that the high bid equals the fair market value of the tract. The minimum bid for the tract is $100 per acre or fraction thereof. No bid that is less than $100 per acre, or fraction thereof, will be considered. The bids should be sent by certified mail, return receipt requested, or be hand delivered. The Cashier will issue a receipt for each hand-delivered bid. Bids received after 4 p.m., on Monday, June 29, 1998, will not be considered. The minimum bid is not intended to represent fair market value. The fair market value of the tract will be determined by the Authorized Officer after the sale.

If identical high bids are received, the tying high bidders will be requested to submit follow-up sealed bids until a high bid is received. All tie-breaking sealed bids must be submitted within 15 minutes following the Sale Official's announcement at the sale that identical high bids have been received.

The lease issued as a result of this offering will provide for payment of an annual rental of $3.00 per acre, or fraction thereof, and of a royalty payment to the United States of 12.5 percent of the value of coal produced by strip or augur mining methods and 8 percent of the value of the coal produced by underground mining methods. The value of the coal will be determined in accordance with 30 CFR 206.250.

Bidding instructions for the tract offered and the terms and conditions of the proposed coal lease are available from the Wyoming State Office at the addresses above. Case file documents, WYW136142, are available for inspection at the Wyoming State Office.

Michael Madrid,

Acting Deputy State Director.

BILLING CODE 4310–22–P

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Intent to Repatriate Cultural Items in the Possession of the Denver Museum of Natural History, Denver, CO

AGENCY: National Park Service

ACTION: Notice

Notice is hereby given under the Native American Graves Protection and Repatriation Act, 43 CFR 10.10 (a)(3), of the intent to repatriate cultural items in the possession of the Denver Museum of Natural History (DMNH) which meet the definition of "sacred objects" and "objects of cultural patrimony" under Section 2 of the Act.

The 164 cultural items consist of 25 Hopi spirit friends or Katsina masks and 31 mask attachments; 59 pahos and prayer feathers; one paho holder; three altar figures from Walpi; five Katsina Society dance items from Walpi; 21 Mazrau Society dance items from Shungopavi; nine Katsina Society dance items from Shungopavi; four Snake Society dance items from Shungopavi; two Katsina Society dance items from Oraivi; one Mazrau Society dance item from Oraivi; one Snake Society medicine pouch from Shungopavi; one Snake Society medicine bundle from Shungopavi; and one Mazrau Society ceremonial canteen from Shungopavi.

In 1973, the three altar figures from Walpi were donated to the DMNH by donors whose names are withheld at the DMNH's request. In 1981, three of the pahos were donated to the DMNH by a donor whose name is withheld at the DMNH's request. Between 1968–1983, the remaining 158 cultural items were donated to the DMNH by Dr. and Mrs. Frances Crane, who had acquired the items from at least 12 different sources, including collectors, gift shops, and dealers.

DMNH accession, catalogue, and computer records indicate these 164 cultural items are of Hopi origin from Hopi villages in northern Arizona. Extensive consultations with representatives of the Hopi Tribe and Hopi traditional religious leaders confirm the Hopi identity of these cultural items. Representatives of the Hopi Tribe and Hopi traditional religious leaders have stated that these 164 cultural items are needed by traditional Hopi religious leaders for the practice of traditional Native American religion by their present-day adherents; and that these items also have on-going historical, traditiona, and cultural importance central to the culture itself and could not have been alientated by any individual.

Based on the above-mentioned information, officials of the Denver Museum of Natural History have determined that, pursuant to 43 CFR 10.2 (d)(3), these 164 cultural items are specific ceremonial objects needed by traditional Native American religious leaders for the practice of traditional Native American religions by their present-day adherents. Officials of the Denver Museum of Natural History have determined that, pursuant to 43 CFR 10.2 (d)(4), these 164 cultural items have ongoing historical, traditional, and cultural importance central to the tribe itself, and could not have been alienated, appropriated, or conveyed by any individual. Officials of the Denver Museum of Natural History have also determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity which can be reasonably traced between these items and the Hopi Tribe.

This notice has been sent to officials of the Hopi Tribe. Representatives of

any other Indian tribe that believes itself to be culturally affiliated with these objects should contact Dr. Robert Pickering, Chairman of the Anthropology Department, Denver Museum of Natural History, 2001 Colorado Blvd., Denver, CO 80205; telephone (303) 370–6388 before June 19, 1998. Repatriation of these objects to the Hopi Tribe may begin after that date if no additional claimants come forward.

Dated: May 14, 1998.

Francis P. McManamon,

Departmental Consulting Archeologist, Manager, Archeology and Ethnography Program.

SUMMARY: The Commission invites comments from the public on whether changed circumstances exist sufficient to warrant the institution of investigations pursuant to section 751(b) of the Tariff Act of 1930 (the Act),[1] to review the affirmative determinations of the Commission in the above investigations. The purpose of the proposed review investigations is to determine whether revocation of the existing countervailing duty order on imports of ferrosilicon from Venezuela and the antidumping orders on imports of ferrosilicon from Brazil, China, Kazakstan, Russia, Ukraine, and Venezuela, is likely to lead to continuation or recurrence of material injury.[2] Ferrosilicon is provided for in subheadings 7202.21.10, 7202.21.50, 7202.21.75, 7202.21.90, and 7202.29.00, of the Harmonized Tariff Schedule of the United States.

FOR FURTHER INFORMATION CONTACT: Fred Fischer (202–205–3179) or Vera Libeau (202–205–3176), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server at http://www.usitc.gov.

SUPPLEMENTARY INFORMATION:

Background

On April 24, 1998, the Commission received a request to review its affirmative determination, as it applied to imports from Brazil (the request), in the light of changed circumstances, pursuant to section 751(b) of the Act.[3] The request was filed by counsel on behalf of Associação Brasileira dos Productores de Ferroligas e de Silicio Metalico (ABRAFE), Companhia Brasileira Carbureto de Calcio (CBCC), Companhia de Ferroligas de Bahia (FERBASA), Nova Era Silicon S/A, Italmagnesio S/A-Industria e Comercio, Rima Industrial S/A, and Companhia Ferroligas Minas Gerais (Minasligas).

The alleged changed circumstances include: (1) The revelation of a nationwide ferrosilicon price-fixing conspiracy maintained by major U.S. ferrosilicon producers from at least as early as late 1989 to at least mid-1991. Following criminal price-fixing investigations by the Antitrust Division of the U.S. Department of Justice, Elkem Metals Co. and American Alloys pleaded guilty in 1995 and 1996, respectively, to conspiring to fix prices of commodity ferrosilicon products. SKW Metals & Alloys Inc. and its executive vice-president were found guilty in 1997 of conspiring to fix prices of commodity ferrosilicon products, and; (2) the consequential invalidation of the Commission's determination of material injury that was based upon improper and distorted price data.

Because the alleged changed circumstances predominantly relate to the domestic industry and are not limited to imports from Brazil, submissions should also address the possibility of the Commission self-initiating reviews of the outstanding orders on China, Kazakstan, Russia, Ukraine, and Venezuela.

Written Comments Requested

Pursuant to § 207.45(b) of the Commission's rules of practice and procedure,[4] the Commission requests comments concerning whether the alleged changed circumstances are sufficient to warrant institution of review investigations.

Written Submissions

In accordance with 201.8 of the Commission's rules,[5] the signed original and 14 copies of all written submissions must be filed with the Secretary to the Commission, 500 E Street, SW, Washington, DC 20436. All comments must be filed no later than June 19, 1998, which is at least 30 days after the date of publication of this notice in the

[1] 19 U.S.C. 1675(b).
[2] 19 U.S.C. 1675(b)(2)(A).
[3] 19 U.S.C. 1675(b).
[4] 19 CFR 207.45(b).
[5] 19 CFR 201.8.

Federal Register. The Commission's determination regarding initiation of review investigations is due within 30 days of the close of the comment period. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request business confidential treatment under § 201.6 of the Commission's rules.[6] Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. Each sheet must be clearly marked at the top "Confidential Business Information." The Commission will either accept the submission in confidence or return it. All nonconfidential written submissions will be available for public inspection in the Office of the Secretary.

Copies of the non-confidential version of the request and any other documents in this matter are available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission; telephone 202–205–2000.

Issued: May 12, 1998.

By order of the Commission.

Donna R. Koehnke,

Secretary.

[FR Doc. 98–13426 Filed 5–19–98; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–34,214 and NAFTA–02157]

Fort James Corp., Towel and Tissue Division, Ashland, WI; Negative Determination Regarding Application for Reconsideration

By application dated March 27, 1998, the United Paperworkers International Union (UPIU) Local 1104 requested administrative reconsideration of the Department's negative determination regarding eligibility to apply for Trade Adjustment Assistance (TAA) and NAFTA-Transitional Adjustment Assistance (NAFTA–TAA), applicable to workers and former workers of the subject firm. The denial notices were signed on March 11, 1998. The TAA and NAFTA–TAA decisions were published in the **Federal Register** on April 3, 1998, (63 FR 16574) and (63 FR 16575), respectively.

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If in the opinion of the Certifying Officer, a mis-interpretation of facts or of the law justified reconsideration of the decision.

The negative TAA determination issued by the Department was based on the binding that the "contributed importantly" test of the worker group eligibility requirements of section 222 of the Trade Act of 1974 was not met for workers of Fort James Corporation, Ashland, Wisconsin producing commercial napkins. The "contributed importantly" test is generally demonstrated through a survey of the workers' firm's customers. The Department of Labor surveyed the major declining customers of the subject firm regarding their purchases of commercial napkins. None of the respondents reported import purchases of commercial napkins in 1996, 1997 or in January 1998.

The subject firm workers were denied eligibility to apply for NAFTA–TAA based on the finding that criteria (3) and (4) of the group eligibility requirements of paragraph (a)(1) of section 250 of the Trade Act of 1974, as amended, were not met. There was no shift in production of commercial napkins from the subject firm to Mexico or Canada, nor were there company or customer imports of like or directly competitive products from Mexico or Canada.

The UPIU Local 1104 asserts that some of the machinery at the Ashland mill is scheduled for delivery to China and Europe by the end of summer 1998. The shipment or sale of production equipment to foreign countries is not a basis for a worker group certification under the Trade Act of 1974.

The UPIU Local 1104 provided import statistics for tablecloths and table napkins made of paper for 1997. this information does not substantiate import impact for workers of Fort James Corporation. There must be company or customer increases of imports of articles like or directly competitive with those produced by workers at the subject firm.

The UPIU Local 1104 asserts that during the petition investigation, the customer list provided by the company did not include all of the Fort James Corporation Ashland customers. The customer list requested by the Department and provided by company officials accounted for Ashland's major declining customers.

Finally, the UPIU Local 1104 asserts that prices for market pulp and paperboard has increased, thereby affecting company cost to compete for materials used in the production of commercial napkins. Price of raw materials to produce a product is not a basis for a worker group certification under the Trade Act of 1974.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 4th day of May 1998.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and NAFTA Transitional Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) issued during the period of April, 1998.

In order for an affirmative determination to be made and a certification of eligibility to apply for worker adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separation, or threat thereof, and to the absolute decline in sales or production.

[6] 19 CFR 201.6.

Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–34,104; Sunbeam Corp., Murfreesboro, TN

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

TA–W–34,461; ARC USA, Pauls Valley, OK

TA–W–34,193; Kat-Em International, A Division of Concord Fabrics Inc., Los Angeles, CA

The workers firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W–34,318; Streamline Fashions Mfg., Inc., Philipsburg, PA

Increased imports did not contribute importantly to worker separations at the firm.

TA–W–34,223; Geneva Steel, Provo, UT

the investigation revealed that criteria (2) and criteria (3) have not been met. Sales or production did not decline during the relevant period as required for certification. Increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have not contributed importantly to the separations or threat thereof, and the absolute decline in sales or production.

TA–W–34,481; Renfro Corp., Barber Plant, Mt. Airy, NC

Renfro Corp. Officials made a decision to close it's Barber plant and transfer all production to another domestic plant.

Affirmative Determinations for Worker Adjustment Assistance

TA–W–34,376; Beam Corp., A Div. Of Deena Corp., Tolleson, AZ: March 19, 1997.

TA–W–34,359; Canaan Fashions, Brooklyn, NY: March 11, 1997.

TA–W–34,388; Georgia-Pacific Corp., Building Products Div., Oriented Strand Board Mill, Woodland, MR: March 18, 1997.

TA–W–34,385; Delphi Automotive Systems, Delphi Interior and Lighting, Brea Operations, Brea, CA: March 17, 1997.

TA–W–34,265; H.H. Cutler Co., Grand Rapids, MI: February 4, 1997.

TA–W–34,378 & A; Newel Co., Acme Frame—a/k/a Intercraft, Mundelein, IL and Waukegan, IL: March 5, 1997.

TA–W–34,352; Wintron, Bellefonte, PA: March 11, 1997.

TA–W–34,412; Hit Apparel, Inc., Athens, TN: March 18, 1997.

TA–W–34,438; A.D.H. Mfg Corp., Farner, TN: March 31, 1997.

TA–W–34,444; Covington Industries, Inc., Opp, Al and Operating at the Following Locations: A; Samson Plant, Samson, AL, B; Florala Plant, Florala, AL, C; Kinston Plant, Kinston, AL, D: Opp Distribution, Opp, AL, E: Opp Sewing, Opp, AL: March 13, 1997.

TA–W–34,448; IBP, Inc., Luverne, MN: March 18, 1997.

TA–W–34,413; Babcock & Wilcox Co., Paris, TX: March 26, 1997.

TA–W–34,259; Cleveland Kniting Mills, Cleveland, OH: February 9,

TA–W–34,395; Henry I. Siegel Co., Inc., Chic by H.I.S. Div., Monticello, KY: March 24, 1997.

TA–W–34,382; Decora Mongomery City, MO: March 12, 1997.

TA–W–34,251; Donna Maria's Sewing, Inc., Ripley, WV: February 4, 1997.

TA–W–34,381; Cannon County Knitting Mills, Smithville, TN: March 13, 1997.

TA–W–34,404; Henry I. Siegel, Chic By H.I.S. Div., Saltillo, TN: March 17, 1997.

Also, pursuant to Title V of the North American Free Trade Agreement Implementation Act (Pub. L. 103–182) concerning transitional adjustment assistance hereinafter called (NAFTA–TAA) and in accordance with Section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act as amended, the Department of Labor presents summaries of determinations regarding eligibility to apply for NAFTA–TAA issued during the month of April, 1998.

In order for an affirmative determination to be made and a certification of eligibility to apply for NAFTA–TAA the following group eligibility requirements of Section 250 of the Trade Act must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, (including workers in any agricultural firm or appropriate subdivision thereof) have become totally or partially separated from employment and either—

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely.

(3) That imports from Mexico or Canada of articles like or directly competitive with articles produced by such firm or subdivision have increased, and that the increases imports contributed importantly to such workers' separations or threat of separation and to the decline in sales or production of such firm or subdivision; or

(4) That there has been a shift in production by such workers' firm or subdivision to Mexico or Canada of articles like or directly competitive with articles which are produced by the firm or subdivision.

Negative Determinations NAFTA–TAA

In each of the following cases the investigation revealed that criteria (3) and (4) were not met. Imports from Canada or Mexico did not contribute importantly to workers' separations. There was no shift in production from the subject firm to Canada or Mexico during the relevant period.

NAFTA–TAA–02231; Spirax Sarco, Inc., Allentown, PA

NAFTA–TAA–02309; Harry G. Kramer, III, Pittsburg, PA

NAFTA–TAA–02247; Streamline Fashions Mfg., Inc., Philipsburg, PA

The investigation revealed that the criteria for eligibility have not been met for the reasons specified.

NAFTA–TAA–02282; Georgia-Pacific Corp., Distribution Facility, Eugene, OR

NAFTA–TAA–02338; Johnson Wholesale, Punta Gorda, FL

NAFTA–TAA–02308; Southport Aviation, d/b/a/ Million Air Kansas City, Kansas City, MO

The investigation revealed that the workers of the subject firm did not produce an article within the meaning of Section 250(a) of the Trade Act, as amended.

Affirmative Determinations NAFTA–TAA

NAFTA–TAA–02322; American Powder Coatings, Inc., El Paso, TX: March 31, 1997.

NAFTA–TAA–02343; Russell Corp., Milton, FL: March 26, 1997.

NAFTA–TAA–02188; Donna Maria's Sewing, Inc., Ripley, WV: February 11, 1997.

NAFTA–TAA–02284; IBP, Inc., Luverne, MN: March 18, 1997.

NAFTA–TAA–02271; Cannon County Knitting Mills, Smithville, TN: March 13, 1997.

NAFTA–TAA–02288; Henry I. Siegel Co., Chic By H.I.S. Div., Monticello, KY: March 24, 1997.

NAFTA–TAA–02273 & A,B,C; Henry I. Siegel Co., Inc., Chic By H.I.S. Div., Saltillo, TN, Gleason, TN, Trezevant, TN and South Fulton, TN: March 17, 1997.

NAFTA–TAA–02306; Covington Industries, Inc., Opp, AL, and

Operating at the Following Locations: A; Samson Plant, Samson, AL, B; Florala Plant, Florala, AL, C; Kinston Plant, Kinston, AL, D; Opp Distribution Plant, Opp, AL, E; Opp Sewing Plant, Opp, AL: March 13, 1997.

NAFTA–TAA–02265; Beam Corp., Div. of Deena, Inc., Tolleson, AZ: March 19, 1997.

NAFTA–TAA–02279; Hit Apparel, Inc., Athens, TN: March 18, 1997.

NAFTA–TAA–02324; A.D.H. Mfg. Corp., Farner, TN: March 31, 1997.

NAFTA–TAA–02252; Briggs Industries, Somerset, PA: March 6, 1997.

I hereby certify that the aforementioned determinations were issued during the month of April 1998. Copies of these determinations are available for inspection in Room C–4318, U.S. Department of Labor, 200 Connstitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons who write to the above address.

Dated: May 5, 1998.

[TA–W–34,204]

Pride Companies, L.P., Abilene, Texas; Negative Determination Regarding Application for Reconsideration

By application postmarked April 14, 1998, one of the petitioners requested administrative reconsideration of the Department's negative determination regarding eligibility to apply for Trade Adjustment Assistance (TAA), applicable to workers and former workers of the subject firm. The denial notice was signed on March 20, 1998, and published in the **Federal Register** on April 3, 1998 (63 FR 16574).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The investigation findings for the March 20 denial of TAA for workers of Pride Companies, L.P., Abilene, Texas producing refined petroleum products showed that criteria (1) and (2) of the group eligibility requirements of section 222 of the Trade Act were met; employment, sales and production decreased in January through September 1997 compared with the same time period of the previous year. However, the "contributed importantly" requirement of criterion (3) of section 222 was not met. The "contributed importantly" test is generally demonstrated through a survey of the workers' firm's customers. A survey conducted by the Department regarding the subject firm's loss of a portion of a competitive bid for military jet fuel in February 1997 revealed that the remainder was awarded to domestic suppliers, with the exception of a very small percentage of the solicitation awarded to a foreign source.

The petitioner asserts that layoffs at the Abilene refinery were the result of increased company purchases of imported products supplied by the Texaco Trading and Transportation Inc. terminal in the Houston ship channel area. The petitioner adds that Texaco Trading and Transportation purchases refined products on the open market from various refineries and distribution terminals.

The investigation findings showed that Pride Companies, L.P. did not purchase any refined petroleum products from Texaco or any foreign sources during the time period relevant to the petition investigation. Information obtained during the investigation shows that Texaco Trading and Transportation Inc. will supply refined petroleum products to Pride, but not until the completion of the conversion of the Abilene refinery to a products and crude oil terminal. Information in Departmental trade adjustment assistance files shows that the primary functions of Texaco Trading and Transportation, Inc. are marketing of domestic crude oil, and transportation of crude oil and products by pipeline and truck.

With respect to the petitioners assertion that U.S. domestic production of refined petroleum is at a maximum and cannot meet demand, U.S. imports of these products declined absolutely and relative to domestic shipment from 1996 to 1997.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 4th day of May 1998.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–34,199]

Sangamon, Inc., Taylorville, Illinois; Revised Determination on Reconsideration

In response to a letter of March 26, 1998, from the United Paperworkers International Union (UPIU) Local 637, requesting administrative reconsideration of the Department's denial of TAA for workers of the subject firm, the Department reopened its investigation for the former workers of Sangamon, Incorporated.

The initial investigation resulted in a negative determination issued on March 6, 1998, because the "contributed importantly" test of the Group Eligibility Requirements of the Trade Act was not met for workers at the subject firm producing everyday and seasonal greeting cards. The denial notice was published in the **Federal Register** on April 3, 1998 (63 FR 16,574).

On reconsideration, the Department conducted further survey analysis of the major declining customer of Sangamon, Incorporated. New survey information shows that the major declining customer has indirect import purchases of greeting cards while reducing purchases from the subject firm.

Statistics on greeting cards show aggregate U.S. imports increased in both quantity and value in 1996 and 1997.

Conclusion

After careful consideration of the new facts obtained on reopening, it is concluded that increased imports of articles like or directly competitive with greeting cards produced by the subject firm contributed importantly to the decline in sales and to the total or partial separation of workers of the subject firm. In accordance with the provisions of the Trade Act of 1974, I

make the following revised determination:

All workers of Sangamon, Incorporated, Taylorville, Illinois, who became totally or partially separated from employment on or after January 22, 1997 through two years from the date of certification, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed in Washington, DC, this 5th day of May 1998.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

ETA–5130 Benefit Appeals Report; Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Employment and Training Administration is soliciting comments concerning the proposed extension collection of the ETA–5130 Benefit Appeals Report. A copy of the proposed information collection request can be obtained by contacting the office listed below in the addressee section of this notice.

DATES: Written comments must be submitted to the office listed in the addressee section below on or before July 20, 1998. The Department of Labor is particularly interested in comments which:

- evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- enhance the quality, utility, and clarity of the information to be collected; and
- minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

ADDRESSES: Jack Bright, Unemployment Insurance Service, Employment and training Administration, U.S. Department of Labor, Room S–4516, 200 Constitution Avenue, NW., Washington, DC 20210, telephone number (202) 219–5340, ext. 177 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION:

I. Background

The ETA–5130, Benefit Appeals Report, contains information on the number of unemployment insurance appeals and the resultant decisions classified by program, appeals level, cases filed and disposed of (workflow), and decisions by level, appellant and issue. The data on this report is used by both the Regional and National Office Unemployment Insurance staff to monitor the benefit appeals process in the State Employment Security Agencies (SESAs) and to develop any needed plans for remedial action. The data is also needed for workload budgeting and to determine administrative funding. If this information were not available, developing problems might not be discovered early enough to prevent the solutions from being extremely time consuming and costly.

II. Current Actions

Continued collection of the ETA–5130 data will provide for continuous monitoring of the SESAs appellate processes and needed data for the budgeting and administrative funding activities. The data is collected monthly so that developing backlogs of undecided appeals can be detected as early as possible.

Type of Review: Extension.
Agency: Employment and Training Administration.
Title: Benefit Appeals Report.
OMB Number: 1205–0172.
Agency Number: ETA–9016.
Affected Public: State Governments.
Cite/Reference/Form: ETA 5130.
Total Respondents: 53.
Frequency: Monthly.
Total Responses: 636.
Average Time per Response: 2.5 hours.
Estimated Total Burden Hours: 1620 hours.
Total Burden Cost (capital/startup): 0.
Total Burden Cost (operating/maintaining): $32,400.

Comments submitted in response to this comment request will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: May 14, 1998.

Grace A. Kilbane,

Director, Unemployment Insurance Service.

DEPARTMENT OF LABOR

Employment and Training Administration

[NAFTA–02148]

Sangamon, Inc., Taylorville, Illinois; Revised Determination on Reconsideration

In response to a letter of March 26, 1998, from the United States Paperworkers International Union (UPIU) Local 637, requesting administrative reconsideration of the Department's denial of NAFTA–TAA for workers of the subject firm, the Department reopened its investigation for the former workers of Sangamon, Incorporated. The workers produce everyday and seasonal greeting cards.

The initial investigation resulted in a negative determination issued on March 6, 1998, because criteria (3) and (4) of paragraph (a)(1) of section 250 of the Trade Act of 1974, as amended, were not met. Sangamon, Incorporated did not import greeting cards from sources located in Mexico or Canada, nor was there a shift in production of greeting cards from the Taylorville plant to Mexico or Canada. Furthermore, a survey of the subject firm's customers revealed that none of the customers reported any purchases of greeting cards from Mexico or Canada in 1996 or 1997. The denial notice was published in the **Federal Register** on March 23, 1998 (63 FR 13879).

On reconsideration, the Department conducted further survey analysis of the major declining customer of Sangamon, Incorporated. New survey information shows that the major declining customer has indirect import purchases of greeting cards from Canada while reducing purchases from the subject firm.

Conclusion

After careful review of the additional facts obtained on reconsideration, I conclude that increased imports of articles from Canada like or directly competitive with greeting cards, contributed importantly to the declines in sales or production and to the total or partial separation of workers of Sangamon, Incorporated. In accordance with the provisions of the Act, I make the following certification:

All workers of Sangamon, Incorporated, Taylorville, Illinois, who became totally or partially separated from employment on or after January 22, 1997 through two years from the date of the certification, are eligible to apply for NAFTA–TAA under section 250 of the Trade Act of 1974.

Signed in Washington, DC, this 5th day of May 1998.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

[FR Doc. 98–13417 Filed 5–19–98; 8:45 am]

BILLING CODE 4510–30–M

DEPARTMENT OF LABOR

Employment Standards Administration Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, N.W., Room S–3014, Washington, D.C. 20210

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts." This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

The general wage determinations issued under the Davis-Bacon and related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at (703) 487–4630.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, (202) 512–1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the seven separate volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, D.C. this 15 Day of May 1998.

Carl J. Poleskey,

Chief, Branch of Construction Wage Determinations.

Pension and Welfare Benefits Administration

Working Group on the Disclosure of the Quality of Care in Health Plans Advisory Council on Employee Welfare and Pension Benefits Plans; Meeting

Pursuant to the authority contained in Section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, the Working Group established by the Advisory Council on Employee Welfare and Pension Benefit Plans to study what kind of information on the quality of care in health plans should be transmitted to fiduciaries and participants and how the information should be transmitted will hold an open public meeting on Monday, June 8, 1998, in Room N–4437 C&D, U.S. Department of Labor Building, Second and Constitution Avenue, NW, Washington, DC 20210.

The purpose of the open meeting, which will run from 9:30 a.m. to approximately noon, is for Working Group members to determine specific areas of inquiry for the study and to continue taking testimony on the topic.

Members of the public are encouraged to file a written statement pertaining to the topic by submitting 20 copies on or before June 2, 1998, to Sharon Morrissey, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Room N–5677, 200 Constitution Avenue, NW, Washington, DC 20210. Individuals or representatives of organizations wishing to address the Working Group should forward their request to the Executive Secretary or telephone (202) 219–8753. Oral presentations will be limited to 10 minutes, but an extended statement may be submitted for the record. Individuals with disabilities, who need special accommodations, should contact Sharon Morrissey by June 2, at the address indicated in this notice.

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of such statements should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before June 2.

Signed at Washington, DC, this 14th day of May, 1998.

Olena Berg,

Assistant Secretary, Pension and Welfare Benefits Administration.

Working Group Studying Pre-retirement Distributions From ERISA Employer-Sponsored Pension Plans Advisory Council on Employee Welfare and Pension Benefits Plans; Meeting

Pursuant to the authority contained in Section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting will be held on Tuesday, June 9, 1998, of the Working Group of the Advisory Council on Employee Welfare and Pension Benefit Plans, which is studying pre-retirement distributions, including in-service distributions and participant loans from ERISA employer-sponsored pension plans. Such distributions are known in the pension benefits community as "leakage."

The purpose of the open meeting, which will run from 9:30 a.m. to approximately noon in Room N–4437 C&D, U.S. Department of Labor Building, Second and Constitution Avenue NW, Washington, DC 20210, is for Working Group members to continue gathering statistical information and/or to take additional testimony on the import of these "pension preservation" issues.

Members of the public are encouraged to file a written statement pertaining to the topic by submitting 20 copies on or before June 2, 1998, to Sharon Morrissey, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Room N–5677, 200 Constitution Avenue, NW, Washington, DC 20210. Individuals or representatives of organizations wishing to address the Working Group should forward their request to the Executive Secretary or telephone (202) 219–8753. Oral presentations will be limited to 10 minutes, but an extended statement may be submitted for the record. Individuals with disabilities, who need special accommodations, should contact Sharon Morrissey by June 2, 1998, at the address indicated in this notice.

Organizations or individuals also may submit statements for the record without testifying. Twenty (20) copies of such statements should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before June 2.

Signed at Washington, DC, this 14th day of May, 1998.

Working Group Studying Small Businesses: How To Enhance and Encourage the Establishment of Pension Plans; Meeting

Pursuant to the authority contained in Section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting will be held Monday, June 8, 1998, of the Advisory Council on Employee Welfare and Pension Benefit Plans Working Group formed to study the obstacles to why small businesses are not establishing retirement vehicles for their employees when so many different savings arrangements are available. The Working Group also will focus on how to encourage these businesses to establish such pension plans.

The session will take place in Room N–4437 C&D, U.S. Department of Labor Building, Second and Constitution Avenue, NW, Washington, DC 20210. The purpose of the open meeting, which will run from 1 p.m. to approximately 3:30 p.m., is for Working Group members to continue taking testimony on the topic.

Members of the public are encouraged to file written statement pertaining to the topic by submitting 20 copies on or before June 2, 1998, to Sharon Morrissey, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Room N–5677, 200 Constitution Avenue, NW, Washington, DC 20210. Individuals or representatives of organizations wishing to address the Working Group should forward their request to the Executive Secretary or telephone (202) 219–8753. Oral presentations will be limited to 10 minutes, but an extended statement may be submitted for the record. Individuals with disabilities, who need special accommodations, should contact Sharon Morrissey by June 2, at the address indicated in this notice

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of such statements should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before June 2.

Signed at Washington, DC, this 14th day of May, 1998.

The One-Hundred and Second Full Open Meeting of the Advisory Council on Employee Welfare and Pension Benefits Plans; Meeting

Pursuant to the authority contained in Section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting will be held Tuesday, June 9, 1998, of the Advisory Council on Employee Welfare and Pension Benefit Plans.

The session will take place in Room N–4437 C&D, U.S. Department of Labor Building, Second and Constitution Avenue, NW, Washington, D.C. 20210. The purpose of the open meeting, which will run from 1:00 p.m. to approximately 2:30 p.m., is for the Advisory Council's full membership to be updated on its new working groups' progress on their topics of study as well as on regulatory and enforcement projects being undertaken by the Pension and Welfare Benefits Administration (PWBA).

Members of the public are encouraged to file a written statement pertaining to the Council's three topics for study by submitting 20 copies on or before June 2, 1998, to Sharon Morrissey, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Room N–5677, 200 Constitution Avenue, NW, Washington, D.C. 20210. The topics being studied include:

(a) Disclosure of the Quality of Health Care Plans:

(b) Small Business: How to Enhance and Encourage the Establishment of Pension Plans, and

(c) Pre-retirement Distributions from Employer-Sponsored ERISA Plans.

Individuals or representatives of organizations wishing to address the Advisory Council should forward their request to the Executive Secretary or telephone (202) 219–8753. Oral presentations will be limited to 10 minutes, but an extended statement may be submitted for the record. Individuals with disabilities, who need special accommodations, should contact Sharon Morrissey by June 2, at the address indicated in this notice.

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of such statements should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before June 2.

Signed at Washington, D.C. this 14th day of May, 1998.

Olena Berg,

Assistant Secretary, Pension and Welfare Benefits Administration.

BILLING CODE 4510–29–M

NATIONAL FOUNDATION FOR THE ARTS AND THE HUMANITIES

National Endowment for the Arts; National Council on the Arts 134th Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the National Council on the Arts will be held on June 1, 1998 from 2:00 to 5:00 p.m. in Room 716 and on June 2, 1998 from 9:00 a.m. to 4:45 p.m. in Room M–09 at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW, Washington, D.C. 20506.

The Council will meet in closed session on June 1, from 2:00 to 5:00 p.m. for discussion of National Medal of Arts nominations. In accordance with the determination of the Chairman of May 14, 1998, this session will be closed to the public pursuant to subsection (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code. The remainder of the meeting, from 9:00 a.m. to 4:45 p.m. on June 2, will be open to the public. Topics for discussion will include: Remarks by Robert Pinsky, Poet Laureate of the United States; a report on the Endowment's work with the Mayors' Institute on City Design; Federal Interagency Agreements; the Overview Policy Panel report; a Legislative update; budget update and preliminary discussion of the FY 2000 budget; Application Review; Folk & Traditional Arts Infrastructure Initiative Guidelines, a status report on the WritersCorps Program and general discussion.

If, in the course of discussion, it becomes necessary for the Council to discuss non-public commercial or financial information of intrinsic value, the Council will go into closed session pursuant to subsection (c)(4) of the Government in the Sunshine Act, 5 U.S.C. 552b. Additionally, discussion concerning purely personal information about individuals, submitted with grant applications, such as personal biographical and salary data or medical information, may be conducted by the Council in closed session in accordance with subsection (c)(6) of 5 U.S.C. 552b.

Any interested persons may attend, as observers, Council discussions and reviews which are open to the public. If you need special accommodations due to a disability, please contact the Office of AccessAbility, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW, Washington, D.C. 20506, 202/682–5532, TTY–TDD 202/682–5429, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from the Office of Communications, National Endowment for the Arts, Washington, D.C. 20506, at 202/682–5570.

Dated: May 13, 1998.

Kathy Plowitz-Worden,

Panel Coordinator, Office of Guidelines and Panel Operations.

NUCLEAR REGULATORY COMMISSION

Sunshine Act Meeting

AGENCY HOLDING THE MEETING: Nuclear Regulatory Commission.

DATE: Weeks of May 18, 25, June 1, and 8, 1998.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Public and Closed.

MATTERS TO BE CONSIDERED:

Week of May 18

There are no meetings the week of May 18.

Week of May 25—Tentative

Friday, May 29

11:00 a.m. Affirmation Session (PUBLIC MEETING) (if needed).

1:00 p.m. Briefing on Investigative Matters (Closed—Ex. 5 and 7).

Week of June 1—Tentative

Tuesday, June 2

8:00 a.m. Briefing on Remaining Issues Related to Proposed Restart of Millstone Unit 3. (PUBLIC MEETING) (Contact: Bill Travers, 301–415–1200).

1:00 p.m. (Continuation of Millstone meeting.)

Thursday, June 4

3:30 p.m. Affirmation Session (PUBLIC MEETING) (if needed).

Friday, June 5

10:00 a.m. Briefing by EPRI on their Strategic Plan for the Future (PUBLIC MEETING).

Week of June 8—Tentative

Thursday, June 11

11:30 a.m. Affirmation Session (PUBLIC MEETING) (if needed).

Friday, June 5

10:00 a.m. Briefing by Reactor Vendors Owners' Groups (PUBLIC MEETING).

The Schedule for Commission meetings is subject to change on short notice. To verify the status of meetings call (recording)—(301) 415–1292. Contact person for more information: Bill Hill (301) 415–1661.

BILLING CODE 7590–01–M

NUCLEAR REGULATORY COMMISSION

Biweekly Notice; Applications and Amendments to Facility Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Pub. L. 97–415, the U.S. Nuclear Regulatory Commission (the Commission or NRC staff) is publishing this regular biweekly notice. Pub. L. 97–415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from April 25, 1998, through May 8, 1998. The last biweekly notice was published on May 6, 1998 (63 FR 25101).

Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Chief, Rules and Directives Branch, Division of Administration Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 6D22, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC. The filing of requests for a hearing and petitions for leave to intervene is discussed below.

By June 19, 1998, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC and at the local public document room for the particular facility involved. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington DC, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for a hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

Commonwealth Edison Company, Docket Nos. STN 50–456 and STN 50–457, Braidwood Station, Unit Nos. 1 and 2, Will County, Illinois

Date of amendment request: January 14, 1998.

Description of amendment request: The proposed amendments would change the Technical Specifications to allow replacement of the 125 volt direct current (DC) AT&T batteries with new Charter Power Systems, Inc. (C&D) batteries, and revise the crosstie loading limitation.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

A. The proposed change does not involve a significant increase in the probability of consequences of an accident previously evaluated.

The replacement C&D battery has been selected to meet or exceed the design, functional, and operational requirements of those of the present AT&T battery, including crosstie load limitations. The C&D batteries are similar in design to the previously installed Gould batteries (e.g. electrolyte specific gravity and construction of the plates) except for capacity. The replacement C&D batteries have a significantly larger capacity than either the previously installed Gould, or the currently installed AT&T, batteries. This increased capacity can provide additional margin for future use. Also, the C&D batteries are qualified for a 20 year life and meet the latest applicable standards. The short circuit current provided by the C&D batteries is well within the interrupting capability of the existing DC system [c]ircuit breakers.

Additionally, the crosstie limit is increased to take advantage of the larger C&D battery capacity. The C&D batteries were sized based on having sufficient capacity to energize the design basis DC loads of an operating unit with the [Institute of Electrical and Electronics Engineers] IEEE–485 design margin while maintaining the desired limited DC load of 200 amps for a shutdown unit. This proposed change allows use of the C&D batteries' larger capacity.

Also, although adherence to the performance testing intervals stated in IEEE Std 450 could result in a planned shutdown and possible subsequent increase in the probability of occurrence of an accident (e.g. Turbine Trip), it would be part of a controlled and planned shutdown, therefore the increases would not be considered significant.

The overall design, function, and operation of the DC system and equipment has not been altered by these changes. The proposed changes do not affect any accident initiators of precursors and do not alter the design assumptions for the systems or components used to mitigate the consequences of an accident as analyzed in UFSAR [Updated Final Safety Analysis Report] Chapter 15. Therefore, there is no increase in the probability or consequences of an accident previously evaluated.

B. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The replacement C&D batteries will provide the same function as those of the installed AT&T batteries and will be operated with the same types of operational controls. These limits include battery float terminal voltage, individual cell voltage and electrolyte specific gravity, and crosstie loading. Crosstie conditions are allowed under the present Technical Specifications. The crosstie limit is increased to take advantage of the larger C&D battery capacity. The remaining changes are administrative in nature or provide clarification to maintain consistency with other Technical Specifications.

The DC system and its equipment will continue to perform the same function and be operated in the same fashion. The proposed changes do not create any new or common failure modes. The proposed changes do not introduce any new accident initiators or precursors, or any new design assumptions for the systems or components used to mitigate the consequences of an accident. Therefore, the possibility of a new or different kind of accident from any accident previously evaluated has not been created.

C. The proposed change does not involve a significant reduction in a margin of safety.

The replacement C&D batteries will meet or exceed the design, functional, and qualifications of the installed AT&T batteries. The proposed Technical Specification limitations for the C&D batteries are derived from the same methodology as the AT&T batteries with applied margins in accordance with IEEE 485. Increasing the crosstie loading limits takes advantage of the larger C&D battery capacity with its increased design margin. The proposed change to the crosstie loading limit will continue to conservatively envelope the postulated design requirements. The remaining changes are administrative in nature or provide clarification to maintain consistency with other Technical Specifications.

The inherent design conservatism of the DC system and its equipment has not been altered. The DC system and its equipment will continue to be operated with the same degree of conservatism. Therefore, there is no reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the requested amendments involve no significant hazards consideration.

Local Public Document Room location: Wilmington Public Library, 201 S. Kankakee Street, Wilmington, Illinois 60481.

Attorney for licensee: Michael I. Miller, Esquire; Sidley and Austin, One First National Plaza, Chicago, Illinois 60603.

NRC Project Director: Stuart A. Richards.

Commonwealth Edison Company, Docket Nos. 50–373 and 50–374, LaSalle County Station, Units 1 and 2, LaSalle County, Illinois

Date of amendment request: May 27, 1997, as supplemented on August 1, 1997, and March 24, 1998.

Description of amendment request: The proposed amendments would revise Technical Specification Section 6, "Administrative Controls," to incorporate revised organizational titles and would delete the Unit 1 License Condition 2.C.(30)(a) related to the function of the Shift Technical Advisor. In addition, the proposed amendments would change the submittal frequency of the Radiological Effluent Release Report from semiannually to annually. The proposed amendments will also make several administrative and editorial changes. The staff's proposed no significant hazards consideration determination for the requested change was published on July 30, 1997 (62 FR 40848).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

A. The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes do not affect any accident initiators or precursors and do not change or alter the design assumptions for systems or components used to mitigate the consequences of an accident. The proposed changes do not affect the design or operation of any system, structure, or component in the plant. There are no changes to parameters governing plant operation, and, no new or different type of equipment will be installed.

The proposed changes provide clarification, consistency with station procedures, programs, the Code of Federal Regulations (10 CFR), other Technical Specifications, and Improved Technical Specifications. These changes do not impact any accident previously evaluated in the UFSAR [Updated Final Safety Analysis Report]. There is no relaxation of applicable administrative controls. Those administrative requirements which have no effect on safe operation of the plant are eliminated.

B. The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed changes do not affect the design or operation of any plant system, structure, or component. There are no changes to parameters governing plant operation, and, no new or different type of equipment will be installed.

C. The proposed changes do not involve a significant reduction in a margin of safety.

The proposed changes do not affect the margin of safety for any Technical Specification. The initial conditions and methodologies used in the accident analyses remain unchanged; therefore, accident analyses results are not impacted. Plant safety parameters or setpoints are not affected. All responsibilities described in the Technical Specifications for administrative controls will continue to be performed by individuals possessing the requisite qualifications. Clarifications, relocations, and nomenclature changes neither result in a reduction of personnel responsibilities, nor do they cause a relaxation of programmatic controls. There are no resulting effects on plant safety parameters or setpoints.

Guidance has been provided in "Final Procedures and Standards on No Significant Hazards Considerations," Final Rule, 51 FR 7744, for the application of standards to license change requests for determination of the existence of significant hazards considerations. This document provides examples of amendments which are and are not considered likely to involve significant hazards considerations. These proposed amendments most closely fit the example of a purely administrative change to the Technical Specifications to achieve consistency throughout the Technical Specifications, correction of an error, or a change in nomenclature.

The proposed amendment does not involve a significant relaxation of the criteria used to establish safety limits, a significant relaxation of the bases for the limiting safety system settings, or a significant relaxation of the bases for the limiting conditions for operations. The proposed change does not reduce the margin of safety as defined in the basis for any Technical Specification.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the requested amendments involve no significant hazards consideration.

Local Public Document Room location: Jacobs Memorial Library, Illinois Valley Community College, Oglesby, Illinois 61348.

Attorney for licensee: Michael I. Miller, Esquire; Sidley and Austin, One First National Plaza, Chicago, Illinois 60603.

NRC Project Director: Stuart A. Richards.

Commonwealth Edison Company, Docket Nos. 50–254 and 50–265, Quad Cities Nuclear Power Station, Units 1 and 2, Rock Island County, Illinois.

Date of amendment request: April 13, 1998.

Description of amendment request: Unreviewed Safety Question involving additional manual actions incorporated in new fire protection procedures as a result of a revised Appendix R Safe Shutdown Safety Analysis.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) No significant increase in the probability or consequences of an accident previously evaluated is involved because of the following:

Two types of previously evaluated accidents are relevant to this criterion: (1) A fire; (2) other accidents evaluated in the Updated Final Safety Analysis Report. For these previously evaluated accidents, the change would not result in an increase in either their probabilities of occurrence or the consequences of their occurrence, for the following reasons:

The additional operator manual actions do not significantly change the probability or consequences of a fire. The likelihood of a fire is unchanged. Additional operations do not significantly change the fire loading nor introduce significant new ignition sources. The quantities and arrangement of combustible materials are not changed through additional manual actions.

The consequences of a fire are unchanged because operator manual actions serve to support the station's ability to achieve and maintain shutdown in the event of a fire.

Additional manual operations are for purposes of safe shutdown in the event of a fire in areas requiring alternate shutdown capability and do not impact other accident scenarios. Also, there is no increase in the predicted frequency of other accidents as a result of this change. Accordingly there is no significant change in the probability or consequences of other accidents previously evaluated because they are independent of this change in procedures for fire scenarios.

(2) The possibility of a new or different kind of accident from any accident previously evaluated is not created because:

The proposed change does not create the possibility of a new or different kind of accident from that previously evaluated for the Quad Cities Station. Although the number of manual actions increased and there may be some compression in the time for taking necessary actions relative to the current safe shutdown analysis and procedures, there is no significant change in the operation of plant equipment following the postulated fire event. The existing safe shutdown analysis already relies on operator manual actions which perform the same type of actions.

The overall approach and methodology to performing these operator actions are not significantly different from the prior approach and methodology. This proposed change does not involve an accident initiator or failure not previously considered. The results or effects of equipment malfunctions

previously evaluated are unchanged as the result of potential operator errors. No new failures would occur, and no new modes of operation are introduced by the proposed changes.

Additional manual actions and the timing thereof provide a somewhat different demand on the plant equipment operators, but still provide an effective method for achieving and maintaining post-fire safe shutdown for areas requiring alternate shutdown capability. As such, the proposed changes do not create the possibility of a new or different kind of accident.

(3) No significant reduction in the margin of safety is involved because:

A change in the fire protection program does not result in a significant reduction in the margin of safety if the change does not result in a significant adverse impact on the plant's ability to achieve and maintain safe shutdown in the event of a fire. The proposed operator manual actions to achieve and maintain safe shutdown in a fire scenario do not significantly affect the capability or reliability of the equipment assumed to operate in the safety analysis.

The types of manual actions to be performed in support of Appendix R safe shutdown functions are not significantly different from those previously considered. The complexity of actions is not significantly changed. Indeed many of the additional actions are designed to provide additional protection from spurious operations which could result from a fire.

Any reduction in margin associated with changes in the time before which certain manual actions must occur is largely a result of re-analyses which incorporate conservatisms not previously considered. In total, the proposed changes do not adversely impact the capability to meet the requirements of Appendix R. Any reduction in margin associated with additional manual actions to achieve and maintain post fire safe shutdown in areas requiring alternate capabilities does not involve a significant reduction in margin.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92 are satisfied. Therefore, the NRC staff proposes to determine that the requested amendments involve no significant hazards consideration.

Local Public Document Room location: Dixon Public Library, 221 Hennepin Avenue, Dixon, Illinois 61021.

Attorney for licensee: Michael I. Miller, Esquire; Sidley and Austin, One First National Plaza, Chicago, Illinois 60603.

NRC Project Director: Stuart A. Richards.

Duke Energy Corporation (DEC), et al., Docket Nos. 50–413 and 50–414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of amendment request: May 27, 1997, as supplemented by letters dated March 9, March 20, and April 20, 1998.

Description of amendment request: The proposed amendments would revise the current Technical Specifications (TS) of each unit to conform with NUREG–1431, Revision 1, "Standard Technical Specifications—Westinghouse Plants." The Commission had previously issued a Notice of Consideration of Issuance of Amendments published in the **Federal Register** on July 14, 1997 (62 FR 37628) covering all the proposed changes that were indeed within the scope of NUREG–1431. In DEC's March 9, March 20, and April 20, 1998, supplements, there are proposed changes that are beyond the scope of NUREG–1431, which were, thus, not covered by the staff's July 14, 1997, notice. The following descriptions and proposed no significant hazard analyses cover only those beyond-scope changes. Associated with each change are administrative/editorial changes such that the new or revised requirements would fit into the format of NUREG–1431.

1. Table 3.3–3 of the current TS contains an entry regarding the Containment Pressure Control System, allowing an inoperable channel be placed in trip in 1 hour. DEC proposed to tighten this requirement such that the system supported by the inoperable channel be declared inoperable immediately. No changes to the design of the Containment Pressure Control System or other systems were proposed by DEC.

2. Table 4.3–1 of the Unit 1 current TS has a footnote (No. 13) that specifies a filter time constant of 1.5 seconds in the steam generator low-low level reactor trip circuitry. DEC proposed to delete this time constant since it was never used. No design changes to the instrumentation and control systems are involved.

3. Section 4.5.1.1.c of the current TS requires that power be removed from the accumulator isolation valve when the reactor coolant system pressure is greater than 2000 pounds per square inch gauge (psig). DEC proposed to make this requirement more restrictive, lowering this threshold to 1000 psig on the recommendation of the nuclear vendor, Westinghouse. No design changes to the accumulator system are involved.

4. Section 4.6.5.1.b.1 of the current TS requires that the boron concentration of the ice in the ice condenser be verified once every 9 months to be at least 1800 ppm. DEC proposed to relax the frequency from 9 months to 18 months on the basis that boron, in the form of sodium tetraborate, does not decrease in quantity even though the ice sublimates. No design changes to the ice condenser are involved.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), DEC has provided its analyses of the issue of no significant hazards consideration for each of the above proposed changes. The NRC staff has reviewed DEC's analyses against the standards of 10 CFR 50.92(c). The NRC staff's analysis is presented below.

1. Will the changes involve a significant increase in the probability or consequences of an accident previously evaluated?

For all the changes the answer is "no." The proposed changes will not affect the safety function of the subject systems. There will be no direct effect on the design or operation of any plant structures, systems, or components. No previously analyzed accidents were initiated by the functions of these systems, and the systems were not factors in the consequences of previously analyzed accidents. Therefore, the proposed changes will have no impact on the consequences or probabilities of any previously evaluated accidents.

2. Will the changes create the possibility of a new or difference kind of accident from any accident previously evaluated? For all the changes the answer is "no." The proposed changes would not lead to any hardware or operating procedure change. Hence, no new equipment failure modes or accidents from those previously evaluated will be created.

3. Will the changes involve a significant reduction in a margin of safety?

For all the changes the answer is "no." Margin of safety is associated with confidence in the design and operation of the plant. The proposed changes to the TS do not involve any change to plant design, operation, or analysis. Thus, the margin of safety previously analyzed and evaluated is maintained.

Based on this analysis, it appears that the three standards of 10 CFR 50.92(c) are satisfied for each of the proposed changes. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina.

Attorney for licensee: Mr. Paul R. Newton, Legal Department (PB05E), Duke Energy Corporation, 422 South Church Street, Charlotte, North Carolina.

NRC Project Director: Herbert N. Berkow

Duke Energy Corporation, et al., Docket Nos. 50–413 and 50–414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of amendment request: April 20, 1998.

Description of amendment request: The Control Room Area Ventilation System (CRAVS) can be actuated by a number of ways, including by the engineered safety features actuation signal (ESFAS) when safety injection is also initiated. The only relationship between automatic actuation of the CRAVS and the ESFAS is through safety injection initiation, applicable in Modes 1, 2, 3, and 4. However, in Tables 3.3–3 and 4.3–2 of the units' Technical Specifications, regarding operability and surveillance requirements, the CRAVS automatic actuation has been erroneously specified for all modes (Modes 1, 2, 3, 4, 5, and 6). The licensee proposed to correct this error by the proposed amendment.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

First Standard

Implementation of this amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated. The Control Room Area Ventilation System and ESFAS are not accident initiating systems; they are accident mitigating systems. Therefore, changing the mode requirements for the subject ESFAS functional unit cannot impact accident initiating probabilities. The technical justification associated with this proposed amendment shows that the current Technical Specification mode requirements for the subject functional unit are incorrect as written. The Control Room Area Ventilation System and ESFAS will remain fully capable of performing their design accident mitigation functions for the modes in which they are required. The Control Room Area Ventilation System operability requirement of Technical Specification 3/4.7.6 will continue to be met. Therefore, no accident consequences will be impacted.

Second Standard

Implementation of this amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated. As noted previously, the Control Room Area Ventilation System and ESFAS are not accident initiating systems. Correcting the mode requirements as specified will not impact any plant systems that are accident initiators. No other modifications are being proposed to the plant which would result in the creation of new accident mechanisms. Also, no changes are being made to the way in which the plant is operated, so no new failure mechanisms will be initiated.

Third Standard

Implementation of this amendment would not involve a significant reduction in a margin of safety. Margin of safety is related to the confidence in the ability of the fission product barriers to perform their design functions during and following an accident situation. These barriers include the fuel cladding, the reactor coolant system, and the containment system. The performance of the fission product barriers will not be impacted by implementation of this proposed amendment. Both the Control Room Area Ventilation System and the ESFAS will remain fully capable of performing their design functions for the modes in which they are required. Therefore, no safety margin will be significantly impacted.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina.

Attorney for licensee: Mr. Paul R. Newton, Legal Department (PB05E), Duke Energy Corporation, 422 South Church Street, Charlotte, North Carolina.

NRC Project Director: Herbert N. Berkow.

Duke Energy Corporation (DEC), Docket Nos. 50–369 and 50–370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of amendment request: May 27, 1997, as supplemented by letter dated March 9, 1998.

Description of amendment request: The three proposed changes are associated with DEC's application to convert to the Improved Technical Specifications. The first change would increase the surveillance interval for the boron concentration of the ice bed from once per 9 months, to every 18 months. This change is supported by operating experience data, establishes surveillance intervals that coincide with refueling outages, and minimizes containment entries during power operation. The second change would decrease the Reactor Coolant System pressure level at which power is removed from the accumulator isolation valve from 2000 pounds per square inch gauge (psig) to 1000 psig. This change is considered a more restrictive change, and is based on recommendations by Westinghouse Nuclear Safety Advisory Letter 97–003. The third change would revise the Turbine Trip and Feedwater Isolation function to include an initiation signal from the average-low temperature. This change is considered a more restrictive change, and is consistent with the plant design and safety analysis.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration for each of the above proposed changes. The NRC staff has reviewed the licensee's analyses against the standards of 10 CFR 50.92(c). The NRC staff's analysis is presented below:

1. Will the changes involve a significant increase in the probability or consequences of an accident previously evaluated?

The proposed changes will not affect the safety function of the subject systems. There will be no direct effect on the design or operation of any plant structures, systems, or components. No previously analyzed accidents were initiated by functions of these systems, and the systems were not factors in the consequences of previously analyzed accidents. Therefore, the proposed changes will have no impact on the consequences or probabilities of any previously evaluated accidents.

2. Will the changes create the possibility of a new or different kind of accident from any accident previously evaluated?

The proposed changes would not lead to any hardware or operating procedure change. Hence, no new equipment failure modes or accidents from those previously evaluated will be created.

3. Will the changes involve a significant reduction in a margin of safety?

Margin of safety is associated with confidence in the design and operation of the plant. The proposed changes do not involve any change to the plant design, operation, or analysis. Thus, the margin of safety previously analyzed and evaluated is maintained.

Based on this analysis, it appears that the three standards of 10 CFR 50.92(c) are satisfied for each of the proposed changes. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: J. Murrey Atkins Library, University of North Carolina at

Entergy Gulf States, Inc., and Entergy Operations, Inc., Docket No. 50–458,- River Bend Station, Unit 1, West Feliciana Parish, Louisiana

Date of amendment request: April 9, 1998.

Description of amendment request: The proposed amendment would revise license condition 2.C(13) to allow Final Feedwater Temperature Reduction (FFWTR) at the River Bend Station, Unit No.1(RBS). FFWTR is to be used at the end of each fuel cycle to allow approximately fourteen additional effective full power days of operation.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed changes do not significantly increase the probability or consequences of an accident previously evaluated.

The abnormal operational occurrences or accidents analyzed in the SAR [Safety Analysis Report] have been examined for impact caused by partial feedwater heating during cycle extension or at coastdown condition. The limiting abnormal operation transients, including the Load Rejection with no Bypass (LRNBP) event and the Feedwater Controller Failure (FWCF) maximum demand event, Turbine Trip with No Bypass (TTNBP) and Pressure Regulator Failure Downscale (PRFD) have been analyzed based upon the core nuclear characteristic at end-of-cycle (EOC) conditions including the effects of increased core flow and the proposed reduction in feedwater temperature with an all-rods-out condition.

The LOCA (Loss of Coolant Accident), fuel loading error, rod drop accident, rod withdrawal error, overpressure protections and ATWS (anticipated transient without scram) analyses have been evaluated for the effects of reduced feedwater temperature operation and found acceptable. In addition, the case of the analyzed operational events the current fuel OLMCPR (operating limit minimum critical power ratio) and MAPLHGR (maximum average planar linear heat generation rate) limits bound those necessary for operation and therefore, are not affected by operation with FFWTR therefore, these events are bounded by the current RBS analysis. Because the accident results are acceptable and the current operating fuel limits are unaffected, the consequence of an event previously evaluated remains unaffected.

The probability of an accident is not affected by the proposed changes since no systems or equipment which could initiate an accident are affected. Therefore, the proposed changes do not significantly increase the probability or consequences of any previously evaluated accident.

2. The request does not create the possibility of occurrence of a new or different kind of accident from any accident previously evaluated.

The FFWTR mode of operation is functionally similar to operation with Feedwater Heaters Out of Service (USAR. (Updated Safety Analysis Report) Section 15.1.7). All abnormal operational transients or accidents have been evaluated and the most limiting cases have been analyzed for applicability for the FFWTR operation. Limits on MAPLHGR and OLMCPR (including the power and flow dependent MCPR) which are included in the Core Operating Limits Report (COLR) as part of the normal reload licensing process will continue to assure that operations are within the assumptions, initial conditions and assumed power distribution and therefore will not create a new type of accident. The proposed changes do not involve new setpoints, new system interactions, or physical modifications to the plant. Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any previous analyzed.

3. The request does not involve a significant reduction in a margin of safety.

The proposed changes do not involve any setpoint changes and would allow steady state power operation at off-rated feedwater temperature conditions as defined in current plant procedures. The transient and accidents described in the SAR are evaluated for effects caused by the reduced feedwater temperature of 100 (degrees) F. As described in Attachment 4 (to the April 9, 1998, amendment request), * * * the FWCF is the most limiting transient under such condition and the required OLMCPR for this event is bounded by the EOC OLMCPR limits set forth in the RBS COLR. The thermal limits MCPR and LHGR curves, and the MAPLHGR limits establish limits on power operation and thereby ensure that the core is operated within the assumptions and initial conditions of the transient or accident analyses.

Operation within these limits set forth by the MCPR limits, the LHGR limits and the MAPLHGR criteria will ensure that the margin of safety will be maintained to the same level described in the Technical Specifications Bases and the SAR. As a result the consequences of postulated transients or accidents are not increased.

The MCPR safety limit, mechanical performance limits and overpressure limits are not exceeded during any transient or postulated accident at normal feedwater temperature or at reduced feedwater temperature condition. Therefore, the proposed changes to allow partial feedwater heating for cycle extension do not involve a significant reduction in margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Government Documents Department, Louisiana State University, Baton Rouge, LA 70803.

NRC Project Director: John N. Hannon.

Illinois Power Company, Docket No. 50–461, Clinton Power Station, Unit 1, DeWitt County, Illinois

Date of amendment request: April 27, 1998.

Description of amendment request: The proposed amendment would change the title of "shift supervisor" to "shift manager" in the Technical Specifications (TS).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

(1) The proposed change replaces the title of "shift supervisor" with the title of "shift manager" as it pertains to the responsibilities of the position described in TS Section 5.1.2. The proposed change does not involve a change to the plant design or to the operation of the plant by qualified operators and senior operators. Although this change involves changes to the Operations department, individuals in those positions comprising the operating crews will continue to have to meet the same licensing, experience, training, and education requirements, notwithstanding the proposed change in the title of the individual with ultimate command authority in the main control room, from "shift supervisor" to "shift manager." Therefore, the operation of CPS is not affected by this change. Further, as also noted, the proposed change does not affect plant design. It therefore would not affect systems, structures, or components important to safety, particularly those associated with the plant accident analyses. As a result, the proposed change does not affect any parameters or conditions that may contribute to the initiation of any accidents previously evaluated, nor does it affect the operation or response of systems, structures, or components assumed to mitigate postulated accidents that have been evaluated/analyzed. On this basis, IP has concluded that the proposed change will not result in a significant increase in the probability or consequences of any accident previously evaluated.

(2) As noted above, the proposed change does not involve a change to design or operation of the plant. As a result, the proposed change, which is only administrative in nature, cannot introduce

any new failure modes or precursors, parameters, or conditions that could cause or contribute to the initiation of any new accidents not previously evaluated. On this basis, IP has concluded that the proposed change will not create the possibility of a new or different kind of accident not previously evaluated.

(3) As noted above, the proposed change is an administrative change that involves no changes to plant design or operation, including the design or operation of systems, components, or structures important to safety. On this basis there are no margins of safety affected by the proposed change. As a result, IP has concluded that the proposed change will not result in a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Vespasian Warner Public Library, 120 West Johnson Street, Clinton, IL 61727.

NRC Project Director: Ronald R. Bellamy, Acting.

Maine Yankee Atomic Power Company, Docket No. 50–309, Maine Yankee Atomic Power Station, Lincoln County, Maine

Date of amendment request: April 13, 1998.

Description of amendment request: The proposed amendment would amend the Technical Specifications to base the Limiting Condition for Operation for the fuel storage pool water level on a revised analysis of the fuel handling accident and on a new analysis for radiological shielding during movement of irradiated fuel.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed change does not:

1. Involve a significant increase in the probability or consequence of an accident previously evaluated.

The proposed restrictions on the water level in the spent fuel pool has no impact on the probability or consequences of the remaining applicable design basis accidents. These restrictions are fulfilled by normal operating conditions, preserve initial conditions assumed in the analyses of postulated DBAs and ensure that the conditions of such DBAs are consistent with the analyses. Revised analysis was performed assuming a fuel handling accident occurs after the spent fuel fission products have decayed at least 1-year. The initial conditions assumed a minimum of 19 feet of water for iodine absorption. No credit was taken for control room or spent fuel pool ventilation filtration. The results of the revised analysis demonstrate that the projected doses resulting from a postulated fuel handling accident are insignificant in comparison to 10 CFR part 100 limits. Therefore, the proposed changes to the Technical Specifications do not involve any increase in the probability or consequences of any accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed restrictions on the water level in the spent fuel pool are fulfilled by normal operating conditions and preserve initial conditions assumed in the analysis of postulated DBAs. These additional restrictions do not involve changes to any structure or equipment affecting the safe storage of irradiated fuel. The results of the revised analysis of a fuel handling accident demonstrate that the projected doses are insignificant in comparison to 10 CFR part 100 limits with a minimum of 19 feet of water for iodine absorption. In addition, maintaining this minimum water level will also provide sufficient shielding for personnel radiation protection during fuel movement. Therefore, the proposed changes to the Technical Specifications would not create the possibility of a new or different accident from any accident previously evaluated.

3. Involve a significant reduction in a margin of safety.

The proposed restrictions on the water level in the spent fuel pool preserve initial conditions assumed in the analyses of postulated DBAs and ensure that margins of safety contained in the analyses are maintained. The margin of safety for the fuel handling accident relates to the acceptance limit which the NRC approved during its review of the license. The fuel handling accident acceptance limit defined in the basis for the Maine Yankee Technical Specification (formerly specified as TS 3.13.D.10) is 10% of 10 CFR part 100 limits. A reduction in margin of safety occurs when the acceptance limit would no longer be met as a result of a proposed change. Since the acceptance limit is met, there is no reduction in margin of safety. The projected dose rates at the specified Fuel Storage Pool water level during fuel movement with a fuel assembly raised to its highest allowable height would result in personnel exposures within that previously assumed. There is no reduction in a margin of safety. The NRC acceptance limit which is that combination of occupancy time and dose rate that maintains personnel doses within 10 CFR 20.1201 limits is not exceeded. Therefore, the proposed changes to the MYTS would not involve a significant reduction in any margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Wiscasset Public Library, High Street, PO Box 367, Wiscasset, ME 04578.

Attorney for licensee: Mary Ann Lynch, Esquire, Maine Yankee Atomic Power Company, PO Box 408, Wiscasset, ME 04578.

NRC Project Director: Seymour H. Weiss.

Northern States Power Company, Docket Nos. 50–282 and 50–306, Prairie Island Nuclear Generating Plant, Units 1 and 2, Goodhue County, Minnesota.

Date of amendment requests: March 2, 1998.

Description of amendment requests: The proposed amendments would remove the spent fuel pool special ventilation system operability-based restriction on crane operations in the spent fuel pool enclosure, while maintaining that restriction during spent fuel handling operations.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed amendment[s] will not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change does not affect any system that is a contributor to initiating events for previously evaluated anticipated operational occurrences and design basis accidents. Therefore, the proposed change will not increase the probability of any previously evaluated accident.

The proposed change does not impact the required availability of the spent fuel pool special ventilation system during spent fuel handling operations to mitigate the consequences of a fuel handling accident.

The proposed change does impact the required availability of the spent fuel pool special ventilation system during heavy load handling operations. However, this system is not required to mitigate the consequences of a heavy load dropping onto a spent fuel assembly. Such a requirement is not applicable at Prairie Island, because the heavy loads in the spent fuel pool enclosure are either handled with single-failure-proof cranes, rigging and plant procedures implementing Prairie Island commitments to NUREG–0612, or handled with spent fuel pool protective covers in place as described in the Prairie Island USAR (updated safety analysis report). The use of a single-failure-proof crane with rigging and procedures that implement the requirements of NUREG–0612 assures that the potential for a heavy load

drop is extremely small and therefore consideration of the effects of heavy load drops is not required. Spent fuel pool covers prevent dropped loads* (*The covers do have a limit on the weight load they are analyzed to withstand.) from falling into the spent fuel pool and therefore consideration of the effects of heavy load drops is also not required. These actions taken to reduce the accident initiator probabilities to insignificant magnitudes negate any theoretically small increase in the consequence of a postulated heavy load drop accident resulting from the removal of a requirement to have one train of the spent fuel pool special ventilation system operable during crane operations. It is concluded in summary that the proposed change does not involve a significant increase in the consequences of any accident previously evaluated.

2. The proposed amendment[s] will not create the possibility of a new or different kind of accident from any accident previously analyzed.

The proposed change does impact the required availability of the spent fuel pool special ventilation system during heavy load handling operations. Load drop events over spent fuel are well understood and have been thoroughly evaluated. The proposed change will not create any new accident scenarios or create the possibility of a new or different kind of accident from any accident previously analyzed.

3. The proposed amendment[s] will not involve a significant reduction in the margin of safety.

The proposed change does not impact the required availability of the spent fuel pool special ventilation system during spent fuel handling operations to mitigate the consequences of a fuel handling accident as described in the USAR. As a result the safety margin inherent in the 10 CFR part 100 dose limits is not reduced.

The proposed change does impact the required availability of the spent fuel pool special ventilation system during heavy load handling operations. However, this system is not required to mitigate the consequences of a heavy load dropping onto a spent fuel assembly because the potential for a load drop is extremely small. Provision of single-failure-proof equipment and compliance with the other requirements of NUREG–0612 (provide) a defense-in-depth approach to assure the safe handling of heavy loads which would otherwise be demonstrated to be safe by the deterministic analysis of the radiological effects of dropped heavy loads.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment requests involve no significant hazards consideration.

Local Public Document Room location: Minneapolis Public Library, Technology and Science Department, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

Attorney for licensee: Jay Silberg, Esq., Shaw, Pittman, Potts, and Trowbridge, 2300 N Street, NW, Washington, DC 20037.

NRC Project Director: Cynthia A. Carpenter.

Pennsylvania Power and Light Company, Docket Nos. 50–387 and 50–388 Susquehanna Steam Electric Station, Units 1 and 2, Luzerne County, Pennsylvania

Date of amendment request: November 26, 1997.

Description of amendment request. The amendments to the Units 1 and 2 Technical Specifications Surveillance Requirement Section 4.7.1.3.a involve lowering the Ultimate Heat Sink (UHS) surveillance requirement maximum acceptable spray pond average temperature from 88 °F to 85 °F. This temperature is specified to assure that the post design basic accident (DBA) loss-of-coolant (LOCA) accident/loss of offsite power maximum UHS temperature will be maintained less than the UHS design temperature.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

This proposal does not involve an increase in the probability or consequences of an accident previously evaluated. The proposed change lowers the UHS temperature surveillance requirement so that the maximum post DBA UHS temperature is maintained less than that reported previously.

The UHS provides cooling to equipment and systems required for the safe shutdown of the plant following an accident with radiological consequence potential, such as a LOCA. The change in UHS initial temperature limit to 85 °F assures that the peak temperature will remain less than that reported previously. Therefore, the components cooled by the UHS will not be impacted and will be capable of performing their function as designed.

Based upon the analysis presented above, PP&L (Pennsylvania Power and Light Company) concludes that the proposed action does not involve an increase in the probability or consequences of an accident previously evaluated.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

This proposal does not create the probability of a new or different type of accident from any accident previously evaluated. The proposed change lowers the UHS surveillance requirement temperature so that the maximum post DBA UHS temperature is maintained less than that reported previously. Therefore the operation of the components cooled by the UHS will not be impacted and will be capable of performing their design function.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed change does not involve a significant reduction in the margin of safety.

The change does not involve a reduction in the margin of safety. The proposed change lowers the UHS surveillance temperature so that the maximum post DBA UHS temperature is maintained less than that reported previously. The margin of safety is unaffected since the maximum post DBA UHS temperature is not affected. Performance of equipment cooled by the UHS is unaffected.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, PA 18701.

NRC Project Director: Robert A. Capra.

Pennsylvania Power and Light Company, Docket Nos. 50–387 and 50–388, Susquehanna Steam Electric Station, Units 1 and 2, Luzerne County, Pennsylvania

Date of amendment request: March 16, 1998.

Description of amendment request: The proposed amendment would change the design basis and Technical Specifications to support the implementation of Hydrogen Water Chemistry.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

No Design Basis Event requiring functioning of the Main Steam Line Radiation monitors is defined in the FSAR. FSAR Section 7.2.1.1.4.2.(i) describing Main Steam Line Radiation monitoring states that for accidents resulting in gross fission

product release "the primary variables for trip initiation would be reactor vessel low level, reactor vessel high pressure, or high neutron flux". Because the Main Steam Line Radiation Monitors [MSLRM] trip function is not used in any accident analyses this proposed setpoint change does not involve an increase in the probability or consequences of an accident previously evaluated.

In conformance to SRP 15.4.9, the analysis of the design basis CRDA assumed release of activity by leakage from an isolated condenser. As described in the FSAR, the main steam line radiation monitors will shut down the mechanical vacuum pump if operating and close its suction valves, thus isolating the condenser in the event of a Main Steam Line-High Radiation trip. Operation of the mechanical vacuum pump following burst failures of fuel rods insufficient to cause a main steam line radiation monitor trip was evaluated to better understand the potential impacts of raising the setpoint. Doses calculated under conservative conditions were small compared to the acceptance criteria for offsite dose of 25% of 10 CFR part 100 limits for offsite dose for the CRDA and 10 CFR 50 limits for control room dose.

Relocation of the Main Condenser Offgas Treatment System Explosive Gas Monitoring System requirements to the FSAR Section 16.3 (Technical Requirements Manual (TRM)) and procedures involves the use of an alternate regulatory process for controlling the instrumentation requirements. The change does not introduce any new modes of plant operation, make any physical changes, alter any operational setpoints, or change the surveillance requirements. Any change in the Main Condenser Offgas Treatment System Explosive Gas Monitoring System requirements would be evaluated pursuant to the requirements of 10 CFR 50.59.

The Technical Specifications, the Explosive Gas Mixture description contained in LCO/Surveillance 3.11.2.6/4.11.2.6 and associated bases will be moved and retained in TS Section 6.0 "Administrative Controls". The LCO specific limit and program details will be relocated to the FSAR Section 16.3 (TRM) and procedures and any changes controlled by the 10 CFR 50.59 process. Therefore, this change does not involve an increase in the probability or consequences of an accident previously evaluated.

These proposed changes to Technical Specifications do not require physical changes to instrument channels other than the Main Steam Radiation Monitor setpoint, or to any systems or component that interfaces with the instrumentation channels, therefore there is no change in the probability or consequences of any accident analyzed in the FSAR.

Finally, revising the TS index is an administrative change.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed Main Steam Line Radiation setpoint change does not result in any design or physical configuration changes to the instrumentation channels. Operation incorporating the proposed change will not impair the instrumentation channels from performing as provided in the design basis.

Relocation of the Main Condenser Offgas Treatment System Explosive Gas Monitoring System requirements to the FSAR Section 16.3 (TRM) and procedures involves the use of an alternate regulatory process for controlling the instrumentation requirements. Therefore, the above change does not introduce any accident initiators as it does not involve any new modes of plant operation, make any physical changes, alter any operational setpoints, or change the surveillance requirements.

The Technical Specifications, the Explosive Gas Mixture description contained in LCO/Surveillance 3.11.2.6/4.11.2.6 and associated bases will be moved and retained in TS Section 6.0 "Administrative Controls". The LCO specific limit and program details involves the use of an alternate regulatory process for controlling the requirements.

Since the proposed changes to the Technical Specifications do not adversely impact the reliability of the safety required systems, no new or different kind of accident is created.

3. Involve a significant reduction in a margin of safety.

Raising the trip setpoint does not significantly reduce the sensitivity of the MSLRM's to alarm and initiate actions in response to gross fuel failures during power operation or to the design basis control rod drop accident. The source term assumed for the design basis CRDA greatly exceeds that required to initiate the main steam line high radiation trip. Raising the setpoint does not induce a delay in reaching the setpoint that would result in an increase in offsite dose from the design basis control rod drop accident. The delay time from fuel failure to monitor response is determined by the transport time for steam flow from the reactor vessel to the monitor location, which is not changed by either hydrogen water chemistry or by the monitor setpoint. Consequently, raising the trip setpoint will not result in an incremental increase in activity release, control room dose or offsite dose. Therefore, there is no reduction in the margin of safety for the design basis event.

The radiological consequences of small fuel rupture events, that would produce main steam line radiation levels below the proposed trip setpoint, are not significant. These postulated events were evaluated to better understand the potential impacts of raising the setpoint. The potential offsite doses from such an event, in the absence of a trip, would be small compared to the limits of 10 CFR part 50 for control room dose and to the acceptance criteria of 25% of 10 CFR part 100 limits for offsite dose from the design basis CRDA.

Relocation of the Main Condenser Offgas Treatment System Explosive Gas Monitoring System requirements to FSAR Section 16.3 (TRM) involves the use of an alternate regulatory process for controlling the instrumentation requirements. Any change in the Main Condenser Offgas Treatment System Explosive Gas Monitoring System requirements would be evaluated pursuant to the requirements of 10 CFR 50.59. Also, revising the TS index is an administrative change.

The Explosive Gas Mixture description contained in LCO/Surveillance 3.11.2.6/4.11.2.6 and associated bases will be moved and retained in TS Section 6.0 "Administrative Controls". The LCO specific limit and program details will be relocated to the FSAR Section 16.3 (TRM) and procedures and any changes controlled by the 10 CFR 50.59 process.

Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, PA 18701.

Attorney for licensee: Jay Silberg, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037.

NRC Project Director: Robert A. Capra.

STP Nuclear Operating Company, Docket Nos. 50–498 and 50–499, South Texas Project, Units 1 and 2, Matagorda County, Texas

Date of amendment request: February 16, 1998, as supplemented by letter dated April 2, 1998.

Description of amendment request: The proposed amendment request would revise Technical Specification 3/4.4.5, "Steam Generators," and its Bases to allow the implementation of 1-volt voltage-based repair criteria for the steam generator tube support plate-to-tube intersections for Unit 2 in accordance with Generic Letter 95–05, and make related Unit 1 administrative changes for consistency of wording (the NRC had previously approved a similar 1-volt voltage-based repair criteria application for Unit 1). In addition, the proposed amendment would make an administrative change to Bases 3/4.4.6.2, "Operational Leakage," to clarify that the allowable steam generator leakage specification applies to both Unit 1 and Unit 2.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Operation of the facility in accordance with the proposed amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated.

Structural Considerations

Industry testing of model boiler and operating plant tube specimens for free span tubing at room temperature conditions shows typical burst pressures in excess of 5000 psi for indications of ODSCC (outer diameter stress corrosion cracking) with voltage measurements at or below the current structural limit of 5.45 volts. One model boiler specimen with a voltage amplitude of 19 volts also exhibited a burst pressure greater than 5000 psi. Burst testing performed on one intersection pulled from STP (South Texas Project) Unit 1 in 1993 with a 0.51 volt indication yielded a measured burst pressure of 8900 psi at room temperature. Burst testing performed on another intersection pulled from STP Unit 1 in 1995 with a 0.48 volt indication yielded a measured burst pressure of 9950 psi at room temperature.

The next projected end-of-cycle (EOC) voltage compares favorably with the current structural limit considering the voltage growth rate for indications at STP. Using the methodology of Generic Letter 95–05, the structural limit is reduced by allowances for uncertainty and growth to develop a beginning-of-cycle (BOC) repair limit which should preclude EOC indications from growing in excess of the structural limit. The non-destructive examination (NDE) uncertainty to be applied per Generic Letter 95–05 is approximately 20%. The growth allowance will be 30%/EFPY [effective full power year] or a STP Unit 2-specific growth rate, to be calculated in accordance with Generic Letter 95–05, whichever is greater. Where the generator-specific growth rate exceeds both the Unit 2-specific average growth rate and 30%/EFPY, that generator-specific growth rate will be used for that generator. Each succeeding cycle upper voltage repair limit will also be conservatively established based on Generic Letter 95–05 methodology. By adding NDE uncertainty allowances and a growth allowance to the repair limit, the structural limit can be validated.

The upper voltage repair limit could be applied to bobbin coil voltages between the lower and upper repair limits to leave such indications in service independent of RPC [rotating pancake coil] confirmation. However, RPC-confirmed indications will be conservatively removed from service consistent with Generic Letter 95–05.

Leakage Considerations

As part of the implementation of voltage-based repair criteria, the distribution of EOC degradation indications at the TSP (tube support plate) intersections has been used to calculate the primary-to-secondary leakage which is bounded by the maximum leakage required to remain within the applicable dose limits of 10 CFR 100 (10 CFR part 100) and GDC (General Design Criterion) 19. This limit was calculated using the Technical Specification Reactor Coolant System (RCS) Iodine-131 transient spiking values consistent with NUREG–0800. Application of the voltage-based repair criteria requires the projection of postulated Main Steam Line Break (MSLB) leakage based on the projected EOC voltage distribution from the beginning of cycle voltage distribution. Projected EOC voltage distribution is developed using the most recent EOC eddy current results and a voltage measurement uncertainty. Draft NUREG–1477 and Generic Letter 95–05 require that all indications to which voltage-based repair criteria are applied must be included in the leakage projection.

The projected MSLB leakage rate calculation methodology prescribed in Generic Letter 95–05 will be used to calculate the EOC leakage. A Monte Carlo approach will be used to determine the EOC leakage, accounting for all of the bobbin coil eddy current test uncertainties, voltage growth, and an assumed probability of detection of 0.6. The fitted log-logistic probability of leakage correlation will be used to establish the MSLB leak rate for each cycle. This leak rate will be used for comparison with a bounding allowable leak rate in the faulted loop which would result in radiological consequences which are within the dose limits of 10 CFR part 100 for offsite doses and GDC 19 for control room doses. Due to the relatively low voltage levels of indications at STP to date and low voltage growth rates, it is expected that the actual calculated leakage values will be far less than this limit for each successive cycle.

Other Considerations

Those changes associated with grammatical corrections, deleting tube diameter information not applicable to South Texas, and applying the additional reporting requirements to Unit 2, are administrative and do not involve a change to, or the operation of, any safety-related system.

Therefore, implementation of voltage-based repair criteria does not adversely affect steam generator tube integrity and the radiological consequences will remain below the limits of 10 CFR part 100 and GDC 19. Operation of the facility in accordance with the proposed amendment would not result in any increase in the probability or consequences of an accident previously evaluated.

2. Operation of the facility in accordance with the proposed amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated.

Implementation of the proposed steam generator tube voltage-based repair criteria for ODSCC at the TSP intersections does not introduce any significant changes to the plant design basis. Use of the criteria does not provide a mechanism which could result in an accident outside of the region of the TSP elevations because the criteria do not apply outside the thickness of the TSPs. It is therefore expected that for all plant conditions, neither a single nor multiple tube rupture event would likely occur in a steam generator where voltage-based repair criteria has been applied.

Specifically, STP has implemented a maximum leakage rate of 150 gpd [gallons-per-day] per steam generator to help preclude the potential for excessive leakage during all plant conditions. The draft Reg Guide 1.121 criterion for establishing operational leakage rate limits governing plant shutdown is based upon leak-before-break (LBB) considerations to detect a free span crack before potential tube rupture as a result of faulted plant conditions. The 150 gpd limit is intended to provide for leakage detection and plant shutdown in the event of unexpected crack propagation outside the tube support plate thickness resulting in excessive leakage. Draft Reg Guide 1.121 acceptance criteria for establishing operating leakage limits are based on LBB considerations such that plant shutdown is initiated if permissible degradation is exceeded.

Thus, the 150 gpd limit provides for plant shutdown prior to reaching critical degradation lengths. Additionally, the leak-before-break evaluation assumes that the entire crevice area is uncovered during the secondary side blowdown of a MSLB. Typically, it is expected for the vast majority of intersections, that only partial uncovery will occur. Therefore, the proximity of the TSP will enhance the burst capacity of the tube.

Steam generator tube integrity is continually maintained through inservice inspection and primary-to-secondary leakage monitoring. Any tubes falling outside the voltage-based repair criteria limits are removed from service.

Those changes associated with grammatical corrections, deleting tube diameter information not applicable to South Texas, and applying the additional reporting requirements to Unit 2, are administrative and do not involve a change to, or the operation of, any safety-related system.

Therefore, operating the facility in accordance with the proposed amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Operation of the facility in accordance with the proposed amendment would not involve a significant reduction in a margin of safety.

The use of the voltage-based bobbin probe for dispositioning ODSCC degraded tubes within TSP intersections is demonstrated to maintain steam generator tube integrity in accordance with the requirements of draft Reg Guide 1.121. Draft Reg Guide 1.121 describes a method acceptable to the NRC staff for meeting GDCs 14, 15, 31, and 32 by reducing the probability or the consequences of steam generator tube rupture. This is accomplished by determining the limiting conditions of degradation of steam generator tubing, as established by inservice inspection, for which tubes with unacceptable degradation are removed from service. Upon implementation of the criteria, even under the worst case conditions, the occurrence of ODSCC at the TSP elevation is not expected to lead to a steam generator tube rupture event during normal or faulted plant conditions. The EOC distribution of indications at the TSP elevations for each successive cycle will be confirmed to result in acceptable primary-to-secondary leakage during all plant conditions.

In addressing the combined effects of loss of coolant accident (LOCA) and safe shutdown earthquake (SSE) on the steam generators, as required by GDC 2, it has been determined that tube collapse may occur in the steam generators at some plants. This is not the case at STP Unit 2 as the TSPs do not become sufficiently deformed as a result

of lateral loads at the wedge supports at the periphery of the plate due to the combined effects of the leak-before-break-limited LOCA rarefaction wave and SSE loadings to affect tube integrity.

Because the leak-before-break methodology is applicable to the STP reactor coolant loop piping, the probability of breaks in the primary loop piping is sufficiently low that they need not be considered in the structural design of the plant. Implementation practices using the bobbin probe voltage based tube plugging criteria bounds Reg Guide 1.83, Rev. 1, considerations by:

(1) Using enhanced eddy current inspection guidelines consistent with those used by EPRI in developing the correlations. This provides consistency in voltage normalization.

(2) Performing a 100% bobbin coil inspection for all hot leg tube support plate intersections and all cold leg intersections down to the lowest cold leg tube support plate with known ODSCC indications at each cycle. The determination of the tube support plate intersections having ODSCC indications shall be based on the performance of at least a 20% random sampling of tubes inspected over their full length, and

(3) Incorporating rotating pancake coil inspection for all tubes with bobbin voltages greater than 1.0 volt. This further establishes the principal degradation morphology as ODSCC.

Implementation of voltage-based repair criteria at TSP intersections will decrease the number of tubes which must be repaired at each subsequent inspection. Since the installation of tube plugs to remove ODSCC degraded tubes from service reduces the RCS flow margin, voltage-based repair criteria implementation will help preserve the margin of flow.

For each cycle the projected EOC primary-to-secondary leak rate allowed is bounded by a leak rate which limits the radiological consequences of a EOC MSLB to within the dose limits of 10CFR100 for offsite doses and 10CFR50, Appendix A, General Design Criteria (GDC) 19 for control room doses. Therefore, this change does not involve a significant reduction in the margin to safety.

The assessment of radiological consequences of an assumed steam line break applicable to STP Unit 1 was provided in Attachment 2 to ST–HL–AE–5359 on May 2, 1996. The submittal was made in response to questions from the Emergency Preparedness and Radiation Protection Branch and is applicable to Unit 2 as well. The staff concluded that the thyroid doses for the Exclusion Area Boundary (EAB), Low Population Zone (LPZ), and control room are within the acceptance criteria.

Those changes associated with grammatical corrections, deleting tube diameter information not applicable to South Texas, and applying the additional reporting requirements to Unit 2, are administrative and do not involve a change to, or the operation of, any safety-related system.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the request for amendments involves no significant hazards consideration.

Previously Published Notices of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed no Significant Hazards Consideration Determination, and Opportunity For a Hearing

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices either because time did not allow the Commission to wait for this biweekly notice or because the action involved exigent circumstances. They are repeated here because the biweekly notice lists all amendments issued or proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

Carolina Power & Light Company, et al., Docket No. 50–400, Shearon Harris Nuclear Power Plant, Unit 1, Wake and Chatham Counties, North Carolina

Date of amendment request: April 24, 1998.

Brief description of amendment: The proposed amendment would revise Technical Specification 3/4.3.2, "Engineered Safety Features Actuation System Instrumentation" to allow a 2-hour surveillance interval to facilitate testing of the 6.9 kV Emergency Bus Undervoltage relays.

Date of publication of individual notice in the **Federal Register**: May 4, 1998 (63 FR 24574).

Expiration date of individual notice: May 18, 1998 for comments; June 3, 1998 for hearings.

Local Public Document Room location: Cameron Village Regional Library, 1930 Clark Avenue, Raleigh, North Carolina 27605.

Northeast Nuclear Energy Company, . Docket No. 50–423, Millstone Nuclear Power Station, Unit No. 3, New London, County, Connecticut

Date of amendment request: April 7, 1998.

Description of amendment request: The proposed amendment would replace the pressurizer maximizer water inventory requirement with a pressurizer maximizer indicated level requirement.

Date of publication of individual notice in **Federal Register**: April 23, 1998 (63 FR 20219)

Expiration date of individual notice: May 26, 1998.

Local Public Document Room location: Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, Connecticut, and the Waterford Library, ATTN: Vince Juliano, 49 Rope Ferry Road, Waterford, Connecticut.

Northeast Nuclear Energy Company, Docket No. 50–423, Millstone Nuclear Power Station, Unit 3, New London, County, Connecticut

Date of amendment request: April 14, 1998.

Description of amendment request: The proposed amendment addresses an earlier identified condition relating to the plant operators' ability to meet the operator response time of 10 minutes assumed in Chapter 15 of the Final Safety Analysis Report for termination of an Inadvertent Safety Injection event.

Date of publication of individual notice in **Federal Register**: April 20, 1998 (63 FR 19532).

Expiration date of individual notice: May 20, 1998.

Local Public Document Room location: Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, Connecticut, and the Waterford Library, ATTN: Vince Juliano, 49 Rope Ferry Road, Waterford, Connecticut.

Pennsylvania Power and Light Company, Docket Nos. 50–387 and 50–388 Susquehanna Steam Electric Station, Units 1 and 2, Luzerne County, Pennsylvania

Date of amendment request: August 1, 1996, as supplemented on March 2, 1998.

Brief description of amendment request: The proposed amendments would revise the Technical Specifications as follows: (1.n.) Change the surveillance requirement frequency for verification that the average planar

heat generation rate, minimum critical power ratio, linear heat generation rate, and average power range monitor gain and setpoint are within specified limits. Specifically, the frequency would be changed from within 12 hours after completion of a thermal power increase of at least 15 percent of rated thermal power (RTP) to once within 24 hours after greater than or equal to 25 percent RTP, 24 hours thereafter, and prior to exceeding 50 percent RTP; (2.o.) Change the surveillance requirement for the verification of the average power range monitor flow biased simulated thermal power-high time constant from 6 seconds plus or minus 1 second to less than 7 seconds. The lower limit of 5 seconds will be relocated to plant procedures since it is not a condition for operability of this reactor protection system function; (3.p.) Change the frequency of surveillance requirement for rod worth minimizer channel functional test; and (4.q.) Relocate the main steam line radiation monitor reactor protection system and isolation trips from the Technical Specifications to the plant-controlled Technical Requirements Manual.

Date of publication of individual notice in **Federal Register**: 1.n. April 27, 1998 (63 FR 20664); 2.o. April 27, 1998 (63 FR 20669); 3.p. April 27, 1998 (63 FR 20665); 4.q. April 27, 1998 (63 FR 20667).

Expiration date of individual notices: May 27, 1998 (all 4 notices).

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, PA 18701.

Power Authority of The State of New York, Docket No. 50–286, Indian Point Nuclear Generating Unit No. 3, Westchester County, New York

Date of application for amendment: February 27, 1998.

Brief Description of amendment: The amendment revised the Technical Specifications by revising the pressure-temperature and overpressure limits.

Date of publication of individual notice in **Federal Register**: March 9, 1998 (63 FR 11456).

Expiration date of individual notice: April 8, 1998.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10601.

Tennessee Valley Authority, Docket No. 50–390 Watts Bar Nuclear Plant, Unit 1, Rhea County, Tennessee

Date of application for amendment: April 29, 1998.

Brief description of amendments: To amend the Watts Bar Nuclear Plant, Unit 1, Technical Specifications (TS) for the Hydrogen Mitigation System igniters. The amendment revises the TS limiting condition for operation, LCO 3.6.8, to provide temporary requirements for hydrogen ignitors to address the two Train A ignitors which are currently out of service.

Date of publication of individual notice in the **Federal Register**: May 7, 1998 (63 FR 25243).

Expiration date of individual notice: June 8, 1998.

Local Public Document Room location: Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, TN 37402.

Notice of Issuance of Amendments to Facility Operating Licenses

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Ch. I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for A Hearing in connection with these actions was published in the **Federal Register** as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendment, (2) the amendment, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document rooms for the particular facilities involved.

Baltimore Gas and Electric Company, Docket Nos. 50–317 and 50–318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of application for amendments: December 4, 1996, as supplemented March 27, June 9, June 18, July 21, August 14, August 19, September 10, October 6, October 20, October 23, November 5, 1997, and January 12, January 28 and March 16, 1998.

Brief description of amendments: The amendments include the following:

1. The amendments added a new surveillance requirement (SR) 3.4.9.2 to the Improved Technical Specifications (ITS) which requires verification that the capacity of each required bank of pressurizer heaters is equal to or greater than 150 kW every 24 months.

2. The amendments changed the current TS applicability for the pressurizer safety valves for Mode 3 to specify that two safety valves shall be operable with all reactor coolant system (RCS) cold leg temperature ≤365 °F for Unit 1 and >301 °F for Unit 2. This is a less restrictive change.

3. As part of the conversion to the ITS, the amemdment changed a requirement that the power-operated relief valves be demonstrated operable by performing a channel functional test once per 31 days to once per 92 days.

4. The ITS LCO 3.4.1.3 eliminated the limit of 1 gpm total primary-to-secondary leakage through all steam generators and thus will only require a limit of 100 gallons per day through any one steam generator. This is an administrative change.

5. The amendment retains the requirement of SR 4.5.2.f.2 and specifies a frequency of 24 months. The amendment also adds a new SR 3.5.2.7 which requires verification that each LPSI pump stops on an actual or simulated actuation signal.

6. The amendment regarding the control room emergency ventilation system (CREVS) changes the surveillance interval from 18 months to 24 months (each refueling cycle) for SR 4.7.6.1.e.2 requires that each train of CREVS is demonstrated operable at least once every 18 months by verifying that on a control room high radiation test signal, the system automatically switches into a recirculation mode of operation with flow through the HEPA filter and charcoal adsorber banks and that both of the isolation valves in each duct and common exhaust duct, and isolation valve in the toilet exhaust area duct, close. The above change is less restrictive.

7. The amendment changes the surveillance interval regarding the control room emergency temperature system (CRETS) from 62 days on a staggered basis (one train every 31 days) to 24 months (each refueling interval) for SR 4.7.6.1.a.

8. The amendment changes the surveillance interval regarding the spent fuel pool exhaust ventilation system (SFPEVS) from 18 months to 24 months (each refueling interval) for SR 4.9.12.d. This is a less restrictive change.

9. The amendment changes the surveillance interval regarding the penetration room exhaust ventilation system (PREVS) from 18 months to 24 months (each refueling interval) for SR 4.6.6.1.d.2.

Date of issuance: May 4, 1998.

Effective date: As of the date of issuance to be implemented by August 31, 1998.

Amendment Nos.: 227 and 201.

Facility Operating License Nos. DPR–53 and DPR–69: Amendments revised the Technical Specifications in its entirety.

Date of initial notice in **Federal Register**: March 6, 1998 (63 FR 11312) The Commission's related evaluation of these amendments is contained in a Safety Evaluation dated May 4, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland 20678.

Carolina Power & Light Company, et al., Docket Nos. 50–325 and 50–324, Brunswick Steam Electric Plant, Units 1 and 2, Brunswick County, North Carolina

Date of application for amendments: October 29, 1997, as supplemented January 28 and April 20, 1998.

Brief Description of amendments: The amendments update the Technical Specification description of Control Rod Assemblies to allow for boron carbide or hafnium absorber materials, as approved by the NRC staff.

Date of issuance: April 27, 1998.

Effective date: April 27, 1998.

Amendment Nos.: 193 and 224.

Facility Operating License Nos. DPR–71 and DPR–62: Amendments change the Technical Specifications.

Date of initial notice in **Federal Register**: December 17, 1997 (62 FR 66137) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated April 27, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403–3297.

Commonwealth Edison Company, Docket Nos. STN 50–454 and STN 50–455, Byron Station, Unit Nos. 1 and 2, Ogle County, Illinois

Date of application for amendments: November 7, 1997, as supplemented on March 24, 1998, and April 9, 1998.

Brief description of amendments: The amendments defer the next scheduled Type A containment integrated leak rate test for Byron, Unit 2, until the next refueling outage in 1999.

Date of issuance: May 8, 1998.

Effective date: Immediately, to be implemented within 30 days.

Amendment Nos.: 102 and 102.

Facility Operating License Nos. NPF–37 and NPF–66: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: April 7, 1998 (63 FR 17036) The April 9, 1998, supplement provided clarifying information which did not change the staff's initial proposed no significant hazards consideration.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated May 8, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Byron Public Library District, 109 N. Franklin, P.O. Box 434, Byron, Illinois 61010.

Commonwealth Edison Company, Docket Nos. 50–373 and 50–374, LaSalle County Station, Units 1 and 2, LaSalle County, Illinois

Date of application for amendments: September 26, 1997, as supplemented on April 7, 1998.

Brief description of amendments: The amendments revise Technical Specification 3.6.1.8 to prohibit the simultaneous opening of the drywell and suppression chamber purge system isolation valves and revise the surveillance requirements of TS 3/4.6.5.3, "Standby Gas Treatment System" to upgrade the filter testing methods to more current industry standards. This amendment approves only a portion of the request dated September 26, 1997. The remainder of the request will be addressed in separate correspondence.

Date of issuance: April 27, 1998.

Effective date: Immediately, to be implemented prior to startup of LaSalle, Unit 1, from the current outage and prior to restart of LaSalle, Unit 2, from the current outage.

Amendment Nos.: 125 and 110.

Facility Operating License Nos. NPF–11 and NPF–18: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: November 19, 1997 (62 FR 61840) The April 7, 1998, submittal provided additional clarifying information that did not change the initial proposed no significant hazards consideration determination. The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated April 27, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Jacobs Memorial Library, Illinois Valley Community College, Oglesby, Illinois 61348.

Consumers Energy Company, Docket No. 50–255, Palisades Plant, Van Buren County, Michigan

Date of application for amendment: December 11, 1995, as supplemented January 18, September 3, October 2, October 18, and October 25, 1996, and March 28, 1997.

Brief description of amendment: The amendment revises administrative controls technical specifications (TS) and related surveillance requirements. Amendment 174, issued on October 31, 1996, provided a partial response to the licensee's request. This amendment completes action on the request.

NRC has also granted the request of Consumers Energy to withdraw a portion of its December 11, 1996, application. The proposed change would have deleted the requirements of current TS 4.5.4, "Surveillance for Prestressing System," TS 4.5.5, "End Anchorage Concrete Surveillance," and TS 4.5.8, "Dome Delamination Surveillance," and replaced the requirements with proposed TS 6.5.5, "Containment Structural Integrity Surveillance Program." However, by letter dated March 28, 1997, the licensee withdrew the proposed change. In addition, the staff has denied a portion of the amendment request regarding limitations on the dose rates resulting from radioactive material released in gaseous effluents to areas beyond the site boundary. A separate Notice of Partial Denial of Amendment to Facility Operating License and Opportunity for Hearing has been published in the **Federal Register**. For further details with respect to these actions, see the application for amendment dated December 11, 1996, as supplemented above, the licensee's letter dated March 28, 1997, which withdrew this portion of the application for license amendment, and the staff's Safety Evaluation enclosed with the

amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room listed below.

Date of issuance: May 7, 1998.

Effective date: May 7, 1998, to be implemented within 60 days from date of issuance.

Amendment No.: 181.

Facility Operating License No. DPR–20: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register**: September 20, 1996 (61 FR 49493) The October 2, October 18, and October 25, 1996, and March 28, 1997, letters provided clarifying information and updated TS pages that were within the scope of the original **Federal Register** notice and did not change the staff's initial proposed no significant hazards considerations determination.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 7, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Van Wylen Library, Hope College, Holland Michigan 49423.

Consumers Energy Company, Docket No. 50–255, Palisades Plant, Van Buren County, Michigan

Date of application for amendment: December 27, 1995, as supplemented September 4, October 18, and November 26, 1996, June 27 and November 21, 1997, and January 29, and April 10, 1998.

Brief description of amendment: The amendment revises specification requirements and associated bases regarding the electrical power systems to closely emulate the Standard Technical Specifications for Combustion Engineer Plants, NUREG–1432, Revision 1.

Date of issuance: April 29, 1998.

Effective date: The license amendment is effective as of the date of issuance with full implementation within 60 days after Cold Shutdown following completion of the 1998 refueling outage, but no later than October 2, 1998.

Amendment No.: 180.

Facility Operating License No. DPR–20: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register**: April 9, 1997 (62 FR 17229) The June 27 and November 21, 1997, and January 29 and April 10, 1998, letters provided clarifying information that was within the scope of the original **Federal Register** notice and did not change the staff's initial proposed no significant hazards considerations determination.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 29, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Van Wylen Library, Hope College, Holland, Michigan 49423.

Entergy Operations, Inc., System Energy Resources, Inc., South Mississippi Electric Power Association, and Entergy Mississippi, Inc., Docket No. 50–416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of application for amendment: September 18, 1997, as supplemented by letter dated February 24, 1998.

Brief description of amendment: The amendment decreases the safety limit for the minimum critical power ratio (MCPR) from 1.12 to 1.11 for two recirculation loop operation and from 1.14 to 1.12 for single recirculation loop operation in Technical Specification (TS) 2.1.1.2. Because the proposed amendment is for Cycle 10 operation, the amendment would also revise the footnotes to TSs 2.1.1.2 and 5.6.5 to state that the MCPR values and the items 19 and 20, two topical reports being added to the core operating limits report in TS 5.6.5, are "applicable only for Cycle 10 operation." Cycle 10 operation begins at the plant restart from the current refueling outage No. 9.

Date of issuance: May 8, 1998.

Effective date: May 8, 1998.

Amendment No: 136.

Facility Operating License No. NPF–29: Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register**: October 22, 1998 (62 FR 54872) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 8, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Judge George W. Armstrong Library, 220 S. Commerce Street, Natchez, MS 39120.

Florida Power Corporation, et al., Docket No. 50–302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus County, Florida

Date of application for amendment: October 4, 1997.

Brief description of amendment: To revise the Final Safety Analysis Report (FSAR) and the Improved Technical Specification (TS) Bases to reflect the modified reactor building fan control logic for fan AHF–1C.

Date of issuance: April 29, 1998.

Effective date: April 29, 1998.

Amendment No.: 166.

Facility Operating License No. DPR–72: Amendment revised the updated FSAR and TS Bases.

Date of initial notice in **Federal Register**: November 13, 1997 (62 FR 60921) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 29, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Coastal Region Library, 8619 W. Crystal Street, Crystal River, Florida 32629.

Florida Power and Light Company, et al., Docket No. 50–335, St. Lucie Plant, Unit No. 1, St. Lucie County, Florida

Date of application for amendment: July 22, 1997.

Brief description of amendment: The amendment will incorporate a recent evaluation of a postulated inadvertent opening of a main steam safety valve into the current licensing basis for St. Lucie Unit 1.

Date of Issuance: April 30, 1998.

Effective Date: April 30, 1998.

Amendment No.: 154.

Facility Operating License No. NPF–16: Amendment revised the Updated Final Safety Evaluation Report.

Date of initial notice in **Federal Register**: August 27, 1997 (62 FR 45457) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 30, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Indian River Community College Library, 3209 Virginia Avenue, Fort Pierce, Florida 34981–5596.

Northern States Power Company, Docket Nos. 50–282 and 50–306, Prairie Island Nuclear Generating Plant, Units 1 and 2, Goodhue County, Minnesota

Date of application for amendments: March 6, 1998, as supplemented March 30, March 31, and April 13, 1998.

Brief description of amendments: The amendments update the Technical Specification heatup and cooldown rate curves and extend their reactor vessel fluence limit from the current 20 effective full power years (EFPYs) to a new value of 35 EFPYs, incorporate into Technical Specifications the use of a Pressure and Temperature Limits Report, and change the power-operated relief valves temperature requirement for operability.

Date of issuance: May 4, 1998.

Effective date: May 4, 1998, with full implementation within 30 days.

Amendment Nos.: 135, 127.

Facility Operating License Nos. DPR–42 and DPR–60. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: March 27, 1998 (63 FR 14972) The March 30, March 31, and April 13, 1998, letters provided clarifying information and updated Technical Specification pages within the scope of the original **Federal Register** notice and did not change the staff's initial proposed no significant hazards considerations determination.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated May 4, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Minneapolis Public Library, Technology and Science Department, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

Philadelphia Electric Company, Docket No. 50–352, Limerick Generating Station, Unit 1, Montgomery County, Pennsylvania.

Date of application for amendment: February 9, 1998, as supplemented April 8 and 24, 1998.

Brief description of amendment: The amendment revises the minimal critical power ratio safety limits for operation Cycle 8.

Date of issuance: May 4, 1998.

Effective date: As of date of issuance, and shall be implemented within 30 days.

Amendment No.: 127.

Facility Operating License No. NPF–39: This amendment revised the Technical Specifications.

Date of initial notice in **Federal Register**: February 25, 1998 (63 FR 9613) The April 8 and 24, 1998, letters provided clarifying information that did not change the initial proposed no significant hazards consideration determination.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 4, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Pottstown Public Library, 500 High Street, Pottstown, PA 19464.

Southern Nuclear Operating Company, Inc., Docket Nos. 50–348 and 50–364, Joseph M. Farley Nuclear Plant, Units 1 and 2, Houston County, Alabama.

Date of amendments request: February 14, 1997, as supplemented by letters dated June 20, August 5, September 22, November 19, December 9, December 17, and December 31, 1997, January 23, February 12, February 26, March 3, March 6, March 16, April 3, April 13, and two letters on April 17, 1998.

Brief Description of amendments: The amendments change the maximum reactor core power level for facility operation from 2652 megawatts-thermal (MWt) to 2775 MWt for the Joseph M. Farley Nuclear Plant, Units 1 and 2. The amendments also approve changes to the Technical Specifications to implement uprated power operation.

Date of issuance: April 29, 1998.

Effective date: As of the date of issuance to be implemented prior to entering Mode 4 for Cycle 16 (fall 1998) for Unit 1 and prior to entering Mode 4 for Cycle 13 (spring 1998) for Unit 2.

Amendment Nos.: Unit 1—137; Unit 2—129.

Facility Operating License Nos. NPF–2 and NPF–8: Amendments revise the Technical Specifications, Operating Licenses, and adds a new Appendix C to the Operating Licenses.

Date of initial notice in **Federal Register**: October 8, 1997 (62 FR 52588) The November 19, December 9, December 17, and December 31, 1997, January 23, February 12, February 26, March 3, March 6, March 16, April 3, April 13, and two letters on April 17, 1998, provided additional and clarifying information that did not change the scope of the February 14, 1997, application and the initial proposed no significant hazards consideration determination.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated April 29, 1998, and an Environmental Statement was prepared and dated April 17, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: Houston-Love Memorial Library, 212 W. Berdache Street, Post Office Box 1369, Dothan, Alabama.

TU Electric Company, Docket Nos. 50–445 and 50–446, Comanche Peak Steam Electric Station, Unit Nos. 1 and 2, Somervell County, Texas.

Date of amendment request: April 9, 1998 (TXX–98107).

Brief description of amendments: The proposed amendment would allow on a one time basis, the verification of the proper operation of the Unit 2 load shed seal-in contacts and the diesel generator trip bypass contacts at power and crediting performance of Surveillance Requirements (SR) 4.8.1.1.2f.4) and 4.8.1.1.2f.6), at power as opposed to "during shutdown" as currently required by those SR. The proposed amendment would also allow on a one time basis the verification of the proper operation of the Unit 2 lockout relays and contacts to be deferred until the startup from the Unit 2 fourth refueling outage (2RFO4) or earlier outage to at least MODE 3.

Date of issuance: May 8, 1998.

Effective date: May 8, 1998.

Amendment Nos.: Unit 1—Amendment No. 59; Unit 2—Amendment No. 45.

Facility Operating License Nos. NPF–87 and NPF–89: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: April 20, 1998, (63 FR 19534). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated May 8, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of Texas at Arlington Library, Government Publications/Maps, 702 College, P.O. Box 19497, Arlington, TX 76019.

Union Electric Company, Docket No. 50–483, Callaway Plant, Unit 1, Callaway County, Missouri.

Date of application for amendment: August 8, 1997, as supplemented by letter dated November 10, 1997.

Brief description of amendment: The amendment revises the feedwater isolation engineered safety feature actuation system (ESFAS) functions in Technical Specification Tables 3.3–3, 3.3–4, and 4.3–2.

Date of issuance: April 23, 1998.

Effective date: April 23, 1998, to be implemented within 30 days from the date of issuance.

Amendment No.: 126.

Facility Operating License No. NPF–30: The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register**: December 17, 1997 (62 FR 66144) The November 10, 1997, supplemental letter provided additional clarifying information that did not change the staff's original no significant hazards consideration determination. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 23, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of Missouri—Columbia, Elmer Ellis Library, Columbia, Missouri 65201–5149.

Wolf Creek Nuclear Operating Corporation, Docket No. 50–482, Wolf Creek Generating Station, Coffey County, Kansas

Date of amendment request: February 4, 1998.

Brief description of amendment: The amendment would revise Technical Specification 3.2.4, "Quadrant Power Tilt Ratio," (QPTR) and its associated Bases to reflect (1) a change in the action for determining QPTR when QPTR is above 1.02, (2) a change in the completion time for resetting the power range neutron flux-high trip setpoints after QPTR is determined to be above 1.02, and (3) deletion of actions requiring QPTR to be restored within 24 hours, QPTR to be verified during a return to power operation, resetting the power range neutron flux-high trip setpoint to less than 55 percent following a power reduction to 50 percent reactor thermal power or below, and actions for QPTR in excess of 1.09.

Date of issuance: April 27, 1998.

Effective date: April 27, 1998, to be implemented within 60 days from the date of issuance.

Amendment No.: 116.

Facility Operating License No. NPF–42: The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register**: March 25, 1998 (63 FR 14489) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 27, 1998.

No significant hazards consideration comments received: No.

Local Public Document Room locations: Emporia State University, William Allen White Library, 1200 Commercial Street, Emporia, Kansas 66801 and Washburn University School of Law Library, Topeka, Kansas 66621.

Dated at Rockville, MD., this 13th day of May 1998.

For the Nuclear Regulatory Commission.

Elinor G. Adensam,

Acting Director, Division of Reactor Projects—III/IV, Office of Nuclear Reactor Regulation.

OFFICE OF MANAGEMENT AND BUDGET

Cumulative Report on Rescissions and Deferrals

May 1, 1998.

This report is submitted in fulfillment of the requirement of Section 1014(e) of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93–344). Section 1014(e) requires a monthly report listing all budget authority for the current fiscal year for which, as of the first day of the month, a special message had been transmitted to Congress.

This report gives the status, as of May 1, 1998, of 24 rescission proposals and eight deferrals contained in two special messages for FY 1998. These messages were transmitted to Congress on February 3 and February 20, 1998.

Rescissions (Attachments A and C)

As of May 1, 1998, 24 rescission proposals totaling $20 million had been transmitted to the Congress. Congress approved 21 of the Administration's rescission proposals in P.L. 105–174. A total of $17.3 million of the rescissions proposed by the President was rescinded by that measure. Attachment C shows the status of the FY 1998 rescission proposals.

Deferrals (Attachments B and D)

As of May 1, 1998, $3,293 million in budget authority was being deferred from obligation. Attachment D shows the status of each deferral reported during FY 1998.

Information From Special Messages

The special messages containing information on the rescission proposals and deferrals that are covered by this cumulative report are printed in the editions of the **Federal Register** cited below:

63 FR 7004, Wednesday, February 11, 1998

63 FR 10076, Friday, February 27, 1998

Franklin D. Raines,

Director.

BILLING CODE 3110–01–M

PENSION BENEFIT GUARANTY CORPORATION

Approval of Special Withdrawal Liability Rules; International Longshoremen's and Warehousemen's Union-Pacific Maritime Association Pension Plan

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of approval.

SUMMARY: The Pension Benefit Guaranty Corporation ("PBGC"), pursuant to section 4203(f) of the Employee Retirement Income Security Act of 1974, as amended, has granted a request on behalf of the International Longshoremen's and Warehousemen's Union-Pacific Maritime Association Pension Plan for approval of a plan amendment modifying special withdrawal liability rules, which rules were approved by PBGC on January 30, 1984 (See Approval of Special Withdrawal Liability Rules ("Notice of Approval"), 49 FR 6043 (February 16, 1984)). A Notice of Pendency of the Request for Approval was published on February 3, 1998 (63 FR 5573) ("Notice of Pendency"). The effect of this notice is to advise the public of the decision on the request.

ADDRESSES: The request for approval and PBGC's response to the request are available for public inspection between the hours of 9 a.m. and 4 p.m., Monday through Friday, at PBGC's Communications and Public Affairs Department, Suite 240, 1200 K Street, NW., Washington, DC 20005–4026.

FOR FURTHER INFORMATION CONTACT: Gennice D. Brickhouse, Attorney, Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 1200 K Street, NW., Washington, DC 20005–4026; Telephone 202–326–4020 (For TTY and TDD, call the Federal relay service at 1–800–877–8339 and ask to be connected to 202–326–4020).

SUPPLEMENTARY INFORMATION:

Background

Under section 4203(f) of the Employee Retirement Income Security Act of 1974 ("ERISA") as amended, PBGC may prescribe regulations under which plans in industries other than the construction or entertainment industries may be amended to provide for special withdrawal liability rules similar to the

rules prescribed in section 4203 (b) and (c) of ERISA for the construction and entertainment industries. Section 4203(f)(2) of ERISA provides that such regulations shall permit the use of special withdrawal liability rules only in industries (or portions thereof) in which PBGC determines that the characteristics that would make use of such rules appropriate are clearly shown, and that in each instance, the use of such rules will not pose a significant risk to the insurance system under Title IV of ERISA. Section 4208(e)(3) of ERISA provides that PBGC shall prescribe by regulation a procedure by which a plan may by amendment adopt special partial withdrawal liability rules upon a finding by PBGC that the adoption of such rules are consistent with the purposes of Title IV of ERISA.

PBGC's regulation, Extension of Special Withdrawal Liability Rules (29 CFR part 4203), prescribes procedures whereby a multiemployer plan may, pursuant to sections 4203(f) and 4208(e)(3) of ERISA, request PBGC to approve a plan amendment that establishes special complete or partial withdrawal liability rules. Under 29 CFR 4203.3(a), a complete withdrawal rule adopted pursuant to part 4203 must be similar to the rules for the construction and entertainment industries described in section 4203 (b) and (c) of ERISA. A partial withdrawal liability rule adopted pursuant to part 4203 must be consistent with the complete withdrawal rule adopted by the plan. Pursuant to 29 CFR 4203.3(b), a plan amendment adopted pursuant to part 4203 may cover an entire industry or industries, or may be limited to a segment of an industry, and may apply to cessations of the obligation to contribute that occurred prior to the adoption of the amendment.

Each request for approval of a plan amendment establishing special withdrawal liability rules must contain the information specified in 29 CFR 4203.4(d). In acting on such a request, 29 CFR 4203.5(a) provides that PBGC shall approve a plan amendment establishing special withdrawal liability rules if PBGC determines that the plan amendment—

(1) Will apply only to an industry that has characteristics that would make use of the special withdrawal rules appropriate; and

(2) Will not pose a significant risk to the insurance system.

In making these determinations, PBGC will conduct a comprehensive analysis of the request, the actuarial data submitted and other relevant information relating to the industry and the plan. 29 CFR 4203.4. Under 29 CFR 4203.4(d)(7), the plan must provide information on the effects of withdrawals on the plan's contribution base, as well as information sufficient to demonstrate the existence of industry characteristics that would indicate that withdrawals in the industry do not typically have an adverse effect on the plan's contribution base.

Finally, 29 CFR 4203.5(b) requires PBGC to publish a notice of the pendency of a request for approval of a plan amendment containing all the information required under 29 CFR 4203.4(d) in the **Federal Register**, and to provide interested parties with an opportunity to comment on the request.

Request

On February 3, 1998 (63 FR 5573), PBGC published a notice soliciting public comment on a request on behalf of the International Longshoremen's and Warehousemen's Union-Pacific Maritime Association Pension Plan ("Plan") for approval of a modification to a plan amendment providing for special withdrawal liability rules, which rules were approved by PBGC on January 30, 1984 (Notice of Approval, 49 FR 6043 (1984)), pursuant to section 4203(f) of ERISA and 29 CFR part 4203. The comment period ended on March 20, 1998. One comment was received in opposition to the request. After the close of the comment period, PBGC received a response to the comment and additional information supporting the response.

The Plan is a multiemployer plan, with 114 employers contributing in 1996, maintained pursuant to collective bargaining agreements between the International Longshoremen's & Warehousemen's Union ("ILWU") and the Pacific Maritime Association ("PMA"). The Plan, which is located in San Francisco, covers the loading and unloading of all dry cargo for ocean-going vessels arriving at or departing from ports along the Pacific coast of the United States, including all ports in the states of California, Oregon and Washington. The only cargoes not covered by the Plan are petroleum products and other liquid cargoes and certain cargoes handled by inland boatmen.

The PMA is an employer association whose principal business is to negotiate and administer maritime labor agreements with ILWU. The PMA is composed of stevedore companies and terminal operators as well as American and foreign flag vessel carriers who regularly operate from Pacific coast ports.

As of June 30, 1996, the Plan covered 8,185 active workers, was paying benefits to 9,049 pensioners and survivors, and had 87 inactive participants (or survivors) with vested entitlements. For the Plan Year ending June 30, 1996, the Plan received $99.7 million in contributions, and paid $95 million in benefits and $1.9 million in operating expenses. As of June 30, 1996, Plan assets were more than 13 times total Plan disbursements during the July 1, 1995–June 30, 1996 Plan Year. As of June 30, 1997, the market value of Plan assets was approximately $1.631 billion and the present value of vested liabilities was approximately $1.640 billion.

Plan benefit levels are set in negotiations between the PMA and the ILWU. Contribution rates to the Plan, which are on the basis of either hours worked, shipping tonnage or a combination of the two, are determined annually, solely by the PMA. Since December 24, 1983, the hours worked contribution rate has provided 100 percent of the contributions to the Plan.

The total number of contributing employers has remained relatively stable since 1971. There were 110 contributors in 1972, 107 in 1979, and 114 in 1996. Forty-two percent of the 1996 contributors were not contributors in 1979, and nearly 40 percent of the 1979 contributors were no longer contributing by 1996.

According to the request, over the past four decades the west coast shipping industry has grown steadily, and it looks forward to increased growth in the future. Total dry cargo at all covered ports amounted to 29 million tons in calendar year 1960, 114 million tons in 1980, 182 millions tons in 1990 and 216 million tons in 1996. Because of dramatic productivity gains, this increased shipping activity did not result in increased hours worked. For a time, the industry did not require new workers to replace those retiring from the work force. This accounts for the current high ratio of retirees to active employees covered by the Plan. However, the gains in productivity and the consequent drop in unit labor costs did make it possible to increase wages, contribution rates and total contributions during a period in which the utilization of labor decreased.

It now appears that productively gains alone can no longer keep pace with the increase in shipping activity. Covered hours worked have remained relatively consistent with prior periods from less than 16 million in 1975 to more than 18 million in 1980. However, with the recent growth in trade, covered hours worked have increased from fewer than

15.6 million in 1993 to over 18 million in 1996.

As part of the request, copies of six of the Plan's most recent actuarial valuation reports were submitted. Plan costs for funding purposes are determined on the entry age normal, level dollar method. Benefits are subject to collective bargaining, and contributions are allocated among contributing employers on the basis of the ERISA minimum funding requirements.

The reports show that during the 6-year period spanned by the reports (7/1/91–6/30/97), the Plan population was relatively stable. During that period, the number of retirees decreased 1.8 percent, while the number of active participants decreased 3.4 percent. However, during this same period, tonnage handled increased nearly 20 percent. And, as of the end of the June 30, 1996 Plan Year, annual contributions had increased from $71.1 million to $99.7 million, and Plan assets had risen from $747 million to $1.329 billion.

There were three benefit increases under the Plan during the period covered by the reports. The first, effective July 1, 1992, increased the unfunded actuarial accrued liability by $49 million. The second increase, effective July 1, 1993, increased the unfunded actuarial accrued liability by $501 million. Finally, the third increase, effective July 1, 1996, increased the unfunded actuarial accrued liability by $52 million to approximately $534 million. The Plan's monthly accrual rate for each year of service went from $37 to $70. PBGC notes that the Plan's benefit level exceeds the maximum benefit guaranteed by PBGC under section 4022A(c) of ERISA, which is $16.25 per month per year of service. The monthly maximum benefit payable under the Plan increased from $1,295 to $2,450.

From 1991–1995, contributions increased at a faster rate than benefit payouts. In 1991, benefit payouts were 97% of contributions, and in 1995, they were 95% of contributions.

A summary of the six actuarial valuations is set forth below.

SUMMARY OF ACTUARIAL VALUATION RESULTS [1]

	Valuation date					
	7/1/96	7/1/95	7/1/94	7/1/93	7/1/92	7/1/91
Number of active participants	8,185	7,856	7,682	8,141	8,339	8,469
Number of retired participants	9,049	9,236	9,244	8,979	9,132	9,214
Monthly benefit accrual rate	70	69	69	69	39	37
Maximum monthly benefit	2,450	2,415	2,415	2,415	1,365	1,295
Contributions (000)	N/A	99,696	99,023	87,316	74,139	71,074
Benefits (000)	N/A	94,963	92,437	85,293	71,321	68,848
Market value assets (000)	1,329,082	1,143,335	957,661	950,030	835,063	746,993
Net minimum funding charges w/o credit balance (000)	79,154	85,787	81,247	80,034	47,307	43,987
Normal cost, including operating expenses (000)	20,527	19,180	17,831	18,529	12,821	12,334
Unfunded accrued liability (assets at market value) (000)	534,416	637,646	710,802	664,096	341,037	360,009
Unfunded liability—vested benefits (assets at market value) (000)	354,821	462,132	530,092	476,168	N/A	N/A
Valuation interest rate	6.5	6.5	6.5	6.5	6.5	6.5

Approved Special Rules

The complete text of the relevant provisions of the Plan document, the ILWU–PMA Pension Agreement ("Pension Agreement"), containing the approved special withdrawal liability rules is set forth in the Notice of Approval, 49 FR 6043 (1984). Interested persons may obtain a copy of that notice by contacting PBGC. Following is a summary of the special withdrawal liability rules in effect and the text of the approved modification to those rules.

Under the special rules, a complete withdrawal occurs if an employer who makes contributions to the Plan for longshore work permanently ceases to have an obligation to make contributions to the Plan, and: (1) Continues to perform work of the type for which contributions to the Plan are currently or were previously required at any Pacific Coast port in the United States, (2) resumes such work at any time during the Plan Year in which the contribution obligation ceased through the end of the fifth succeeding Plan Year without renewing the contribution obligation, (3) sells or otherwise transfers a substantial portion of its business or assets to another person that performs longshore work without having an obligation to make contributions to the Plan under the collective bargaining agreements under which the Plan is maintained, or (4) ceases to have an obligation to contribute in connection with the withdrawal of every employer from the Plan or substantially all of the employers within the meaning of section 4219(c)(1)(D) of ERISA. A partial withdrawal occurs if an employer incurs a partial withdrawal within the meaning of section 4205 of ERISA and, in addition, at any time from the date of the partial withdrawal through the succeeding five Plan Years: (1) Performs work of the type for which contributions to the Plan are currently or were previously required at any Pacific Coast port in the United States without having an obligation to contribute to the Plan for such work, or (2) sells or otherwise transfers a substantial portion of its business or assets to another person that performs longshore work without having an obligation to make contributions to the Plan under the collective bargaining agreements under which the Plan is maintained.

The amendment adopting the special withdrawal liability rules also added funding requirements to the Agreement. Paragraph 4.042(c) of the Pension Agreement requires a "Special Contribution Amount" and specifies the funding goals that the Plan must meet for Plan Years beginning July 1, 1984:

"(i) The 'Special Contribution Amount' shall be the level annual amount which, on the basis of a Certified Actuarial Projection, the Plan Actuary certifies will, when added to the amounts otherwise required by law (determined without regard to any credit

balance in the funding standard account) * * *, be sufficient to make the Funding Percentage as of the Applicable Funding Goal Date at least equal to the Applicable Funding Goal."

"(ii) The term 'Funding Percentage' shall mean for any Plan Year, the percentage derived by dividing the market value of the assets of the Pension Fund by the present value of the nonforfeitable benefits within the meaning of ERISA section 4213(c)(A), both values to be as determined in the Certified Actuarial Projection as of the end of such Plan Year."

"(iii) For the first through the fifth Plan Years commencing on or after July 1, 1984, the term 'Applicable Funding Goal' for each such Plan Year shall mean 50 percent (50%), and the "Applicable Funding Goal Date" for each such Plan Year shall mean the last day of the tenth such Plan Year; for each succeeding Plan Year, the term 'Applicable Funding Goal' shall mean the percentage set forth in the Accelerated Funding Schedule for the Plan Year commencing four years after the end of the Plan Year in question, and the "Applicable Funding Goal Date" for each such Plan Year shall mean the last day of the Plan Year commencing four years after the end of the Plan Year in question."

"(iv) The 'Accelerated Funding Schedule' shall be the following schedule:

Plan year	Percent
10	50
11	53
12	56
13	59
14	62
15	65
16	68
17	71
18	74
19	77
20 and over	80

"(v) The 'Certified Actuarial Projection' shall be a projection, which is prepared as of each actuarial valuation date so as to derive the Funding Percentage on the Applicable Funding Goal Date, by using the actuarial assumptions and methods utilized in the December 31, 1982 Actuarial Valuation of the Plan and the then current assets and census data, which projection shall be certified to in each Plan Year by the Plan actuary. This projection shall be on the basis of (1) the benefit levels in effect during the Plan Year for which the projection is made and (2) the Contributions required for such Plan Year * * * together with any Special Contribution Amounts. When the Applicable Funding Goal is met for the twentieth or subsequent Plan Year, the Special Contribution Amount may be limited to the amount necessary to maintain such Applicable Funding Goal for each subsequent Plan Year."

Notice of Approval, 49 FR 6043, 6046 (1984).

An additional funding requirement is contained in paragraph 4.011 of the Pension Agreement. That provision requires that: "Notwithstanding any other provision of this Plan, the Contributions for each Plan Year shall be not less than the total administrative costs and benefits to be paid by the Trustee during the Plan Year." Notice of Approval, 49 FR 6043, 6045 (1984).

Modification to Special Rules

On July 21, 1997, the bargaining parties (ILWU and PMA) adopted an amendment to the approved special withdrawal liability rules, which amendment eliminates the requirement under paragraph 4.011 of the Pension Agreement that contributions for each Plan Year shall be at least equal to benefits and administrative costs paid in the year. In lieu of that requirement, the parties signed a Letter of Understanding on July 21, 1997, whereby the parties agree that:

[S]hould the Funding Percentage for the ILWU–PMA Pension Plan (as defined in paragraph 4.042(c)(ii) of the Plan) fall below eighty-five percent (85%) as of the beginning of a particular Plan Year, the Contributions in the following Plan Year shall not be less than the lesser of (a) the total administrative costs and benefits to be paid by the Trustees during said following Plan Year or (b) the amount required to increase the Funding Percentage for said following Plan Year to eighty-five percent (85%).

Because the requirement that contributions be no less than administrative costs and benefits paid in a given year is no longer specifically set out in the Pension Agreement, PBGC indicated in the February 3, 1998 Notice of Pendency that if PBGC should approve the amendment modifying the Plan's special withdrawal liability rules such approval would be under the following condition:

The Plan's special withdrawal liability rules will be void as of the first day of the Plan Year following a Plan Year for which the Plan is not at least eighty-five percent (85%) funded, and during said following Plan Year the Contributions are less than the least of (a) total administrative cost and benefits for said following Plan Year or (b) the amount required to increase the Funding Percentage to eighty-five percent (85%) for said following Plan Year or (c) the maximum tax-deductible contribution to the Plan.

The Plan agreed that it would certify to this condition annually.

No other changes were proposed to the Plan's special withdrawal liability rules.

Decision

To approve a request for an amendment modifying special withdrawal liability rules, PBGC must make two independent determinations, as provided in section 4203(f) of ERISA and 29 CFR 4203.4(a). First, on the basis of a clear showing by the plan, PBGC must determine that the amendment will apply to an industry that has characteristics that would make use of the special rules appropriate. Second, PBGC must determine that the plan amendment will not pose a significant risk to the insurance system. PBGC's discussion on each of those issues follows.

a. Appropriateness

The basic consideration in determining the appropriateness of special withdrawal liability rules is the effect of cessations of contributions by employers on the plan's contribution base. Various characteristics may be indicative of an industry in which cessations typically do not weaken the contribution base. In determining whether an industry has the characteristics that would make an amendment to special rules appropriate, an important line of inquiry is the extent to which the particular industry possesses those characteristics that led Congress to adopt special rules for the construction and entertainment industries. An industry that is similar in terms of those characteristics is generally appropriate for rules similar to the construction and entertainment rules.

The appropriate characteristics include, but are not necessarily limited to, the mobility of the employees, the intermittent nature of the employment, the project-by-project nature of the work, extreme fluctuations in the level of an employer's covered work under the plan, the existence of a consistent pattern of entry and withdrawal by employers, and the local nature of the work performed.

In approving the Plan's request for an amendment providing for special withdrawal liability rules on February 16, 1984, PBGC determined that the industry covered by the Plan clearly evidenced characteristics similar to those of the construction industry, the most important of which was the local nature of the work. The characteristics of the west coast longshore industry that supported approval of special withdrawal liability rules in 1984 continue to apply to the industry today. Specifically, work covered under the Plan is dependent on the comings and goings of ocean-going vessels at west coast ports. Workers are employed by a covered stevedoring company, generally on a daily basis through a dispatch hall system, to work pursuant to contracts with vessel operators. The work must be performed at the port of embarkation or debarkation. Thus, so long as west coast shipping continues, the work performed will continue to be covered by the Plan.

In addition, an employer in this industry cannot withdraw from the Plan while continuing to perform longshore work at Pacific ports, because longshore work along the entire west coast for all ocean-going dry cargo work is covered under collective bargaining agreements that require contributions to the Plan. Because the entire coast is one bargaining unit, and all ports through which ocean-going dry cargo is shipped are completely organized by the ILWU, it is not possible for such cargo to be loaded or unloaded at any point on the coast without contributions being paid to the Plan. Thus, as a practical matter, it is not realistic to expect noncontributory, covered work. Nonetheless, if a former contributing employer were to compete against the Plan's other employers in this way, thereby diminishing the Plan's contribution base, withdrawal liability would be imposed.

Because of the local nature of the work and the requirement that contributions be made to the Plan for all longshore work done on the Pacific coast, the comings and goings of employers do not have an adverse effect on the Plan's contribution base, which is dependent upon the vitality of the west coast shipping industry as a whole, and not upon the continued existence of any particular employers. For these reasons, the covered industry evidences characteristics that indicate that cessations by employers typically do not have a weakening effect on the Plan's contribution base. Thus, PBGC has concluded that the Pacific coast longshore industry continues to evidence characteristics that make the use of special withdrawal liability rules appropriate.

The only comment received in response to the notice questioned the validity of the Plan amendment that is the subject of the request ("Amendment"). Specifically, since the Amendment was not executed and submitted by the Plan's Board of Trustees, the comment questioned whether the Amendment was properly executed and submitted to PBGC. The response to the comment asserts that the process of adopting the Amendment is a settlor function left to the collective bargaining parties, ILWU and PMA. Section 7.02 of the Pension Agreement provides that "[t]he (ILWU) and (PMA) by their mutual agreement in writing may at any time amend, modify, or delete any provisions of the [ILWU–PMA Pension] Agreement." Nothing in the Pension Agreement or the collective bargaining agreement between ILWU and PMA indicates that the Plan's Board of Trustees has the authority to amend the Pension Agreement. The document effecting the Amendment clearly shows that representatives of ILWU and PMA executed it. Thus, based on the Pension Agreement and the executed Amendment, PBGC agrees that the Amendment was properly executed by the appropriate parties, ILWU and PMA.

The comment also questioned whether the Plan's request for approval of the Amendment was properly submitted to PBGC pursuant to PBGC regulation. Pursuant to 29 CFR 4203.4(b), a request for PBGC's approval of a plan amendment must be submitted by the plan sponsor or a duly authorized representative acting on behalf of the plan sponsor. The comment asserts that any request should have been submitted by the Plan sponsor, the Board of Trustees, not PMA or a representative of PMA. Further, the comment asserts that the current Board of Trustees did not approve the request or give PMA the authority to engage a representative to act on behalf of the Board of Trustees in preparing and submitting the request to PBGC. The response to the comment asserts that the Plan's previous Board of Trustees authorized PMA to engage a representative to submit the request on behalf of the Plan. Also, a Plan fiduciary submitted information in support of the position that PMA had the previous Board of Trustees' authorization to proceed with the submission of the request. No information was provided supporting the position that the Plan's previous Board of Trustees failed to authorize PMA to prepare and submit the request. Consequently, PBGC disagrees with the comment and believes that the request was properly submitted for approval by a duly authorized representative of the Plan sponsor.

b. Risk to the Insurance System

In addition to determining that the special withdrawal liability rules are appropriate to this case, PBGC must find that their use will not pose a significant risk to the insurance program.

Copies of the Plan's actuarial reports for the 6-year period (7/1/91–6/30/97) were submitted with the request. The most recent of those reports indicates an unfunded actuarial accrued liability of $534 million, an unfunded liability for vested benefits of $355 million, and assets of $1.329 billion. In the 6-year period, the Plan's unfunded accrued liability increased from $360 million to $534 million, and the monthly accrual rate went from $37 to $70 per month per year of service. These changes increased the monthly maximum benefit from $1,295 to $2,450. The $70 monthly accrual rate exceeds the maximum monthly accrual rate guaranteed by PBGC under section 4022A of ERISA, which is $16.25, or 23.2 percent of the Plan's accrual rate. On the other hand, from 1991–1995, contributions increased at a faster rate than benefit payouts. In 1991, benefit payouts were 97% of contributions, and in 1995, they were 95% of contributions.

In addition to the information already mentioned, the actuarial reports show a stable Plan population, an increase in annual contributions ($71.1 million to $99.7 million), and an increase in Plan assets ($747 million to $1.329 billion). Plan income has also consistently exceeded benefit payouts. The Plan and the covered industry have unique characteristics that suggest that the Plan's contribution base is likely to remain stable. Contributions to the Plan are made with respect to all west coast dry cargo. The industry has had significant growth over the past decades and that growth is expected to continue. The Plan's continuation is dependent only on the continued activity in the west coast shipping industry as a whole. Consequently, the Plan's contribution base is secure and the departure of one employer from the Plan is not likely to have an adverse effect on the contribution base so long as the level of shipping does not decline.

The request states that the main reason that the Plan requests an amendment modifying its special withdrawal liability rules is that the Plan is approaching the point where contributions would no longer be deductible due to ERISA's full funding limit. This has occurred because the Plan's funded status has significantly improved since approval of the amendment establishing special withdrawal liability rules in 1984. The 1984 amendment required that the Plan meet specific funding objectives that were designed to improve the Plan's financial condition. In order for the special rules to apply, the Plan had to meet the objectives each year. At the time that PBGC approved the 1984 amendment establishing the rules, PBGC believed that "meeting these objectives (would) place the Plan on a sound long-term financial basis." The 1984 amendment established a funding objective of fifty percent (50%) in 1984, increasing to eighty percent (80%) in 2004. Every year since the 1984 amendment, the Plan has more than met the funding objectives. Under the proposed Amendment, the Plan's funding goal objective is increased from a projected eighty percent (80%) in 2004 to eighty-five percent (85%) henceforth. If the Amendment is approved, the Plan has agreed that in any Plan Year in

which the Plan's modified funding objectives are not met, the special withdrawal liability rules will be void.

The comment raised concerns relating to the potential for increased risk to the insurance system if the proposed Amendment is approved. According to the comment, "[b]y eliminating the requirement that contributions for each Plan Year be at least equal to benefits and administrative costs, the proposed Plan Amendment would slow the Plan's progress towards a fully funded status while increasing the insurance risk on the (PBGC)." The comment states that the Plan's actuarial projections show that the Plan's full funding limit will not be reached for at least another two years and possibly longer, and that the projections show a gradual decline in contributions, not a sudden drop.

In addressing the comment PBGC has considered the actuarial information provided with the request and the response to the comment. The evidence indicates that the west coast shipping industry covered by the Plan has shown steady growth over the past decades, and the growth is projected to continue. The evidence also indicates that as a result of the steady growth in the industry, the Plan's contribution base has been stable and secure. Due to the nature of the industry, departures of individual employers would not pose a risk to the Plan or the PBGC insurance system. In approving the Plan's special withdrawal liability rules in 1984, PBGC found that meeting the associated funding objectives would place the Plan on a "sound long-term financial basis." Those objectives have been met earlier than projected. The proposed modification to the Plan's special withdrawal liability rules is conditioned on the Plan meeting at least the same funding objectives. Therefore, PBGC has concluded that the proposed modification will not pose a significant risk to the insurance system.

Based on the facts of this case and the representations and statements made in connection with the request for approval, PBGC has determined that the Plan Amendment modifying special withdrawal liability rules (1) will apply only to an industry that has characteristics that would make the use of special withdrawal liability rules appropriate, and (2) will not pose a significant risk to the insurance system. Therefore, PBGC hereby grants the Plan's request for approval of a plan amendment modifying special withdrawal liability rules, as set forth herein. PBGC grants approval under the condition that such approval will expire, and the Plan's special withdrawal liability rules will be void as of the first day of the Plan Year following a Plan Year for which the Plan is not at least eighty-five percent (85%) funded, and during said following Plan Year the Contributions are less than the least of (a) total administrative cost and benefits for said following Plan Year or (b) the amount required to increase the Funding Percentage to eighty-five percent (85%) for said following Plan Year or (c) the maximum tax-deductible contribution to the Plan. The Plan has agreed to certify to these conditions annually. Should the Plan wish to again amend these rules at any time, PBGC approval of the amendment will be required.

Issued at Washington, DC, on this 14th day of May 1998.

David Strauss,

Executive Director.

BILLING CODE 7708–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39987]; File No. SR–CBOE–98–19]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Chicago Board Options Exchange, Inc., Relating to Nominees of Member Organizations

May 12, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("ACT"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 5, 1998, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the CBOE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE proposes to revise CBOE Rule 3.8, "Nominees," to clarify that a nominee trading for his/her own account pursuant to CBOE Rule 3.8(a)(4)(C) may trade as an independent market maker and/or an independent floor broker.[1] The CBOE also proposes to replace a reference in CBOE Rule 3.8(a)(4)(C) to the CBOE's Market Surveillance Department with a reference to the Exchange.

The text of the proposed rule change is available at the Office of the Secretary, CBOE, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

CBOE Rule 3.8(a)(4)(B) provides that a nominee of a member organization may perform floor functions only on behalf of the member organization for which he or she is authorized. However, CBOE Rule 3.8(a)(4)(C) sets forth an exception to this requirement. Specifically, CBOE 3.8(a)(4)(C) provides that, notwithstanding the provisions of CBOE Rule 3.8(a)(4)(B), a nominee may trade for his/her own account provided that the following three requirements are satisfied: (i) the nominee is a registered broker-dealer; (ii) the nominee has the prior written approval of the nominee's member organization to trade for his/her own account; and (iii) the nominee has the prior written approval of the Exchange's Market Surveillance Department to trade for his/her own account. CBOE Rule 3.8(a)(4)(C) also provides that the approval of the nominee's member organization and of the CBOE's Market Surveillance Department must be filed with the CBOE's Membership Department.

In addition, CBOE Rule 3.8(a)(2) requires a nominee's member organization to guaranty all obligations arising out of the nominee's representation of the member organization, including transactions for the nominee's own account as authorized pursuant to CBOE Rule 3.8(a)(4)(C).

The purpose of the proposal is to clarify that authorization of a nominee

[1] A member who wishes to act as a market maker and as a floor broker on the same business day is subject to the restrictions of CBOE Rule 8.8, "Restrictions on Acting as a Market-Maker and a Floor Broker."

to trade for his/her own account pursuant to CBOE Rule 3.8(a)(4)(C) means authorization of the nominee to trade as an independent market maker and/or as an independent floor broker.[2] Accordingly, the proposal amends CBOE Rule 3.8 by replacing the references to trading by a nominee for his/her own account with references to trading by a nominee as an independent market maker and/or as an independent floor broker.

According to the CBOE, this clarification is consistent with the manner in which the CBOE departments that have administered CBOE Rule 3.8(a)(4)(C) have interpreted the rule and is intended to eliminate any potential ambiguity as to whether CBOE Rule 3.8(a)(4)(C) only authorizes a nominee to act as an independent market maker.[3] Additionally, the CBOE believes that, as a matter or regulatory policy, there is no reason to distinguish between a nominee acting as an independent market maker and a nominee acting as an independent floor broker given that, in either instance, the nominee must have prior written authorization to do so from both the nominee's member organization and from the Exchange, the nominee must be a registered broker-dealer, and the nominee's transactions will be guaranteed by the nominee's member organization.

The proposed rule change also replaces the references in CBOE Rule 3.8(a)(4)(C) to the CBOE's Market Surveillance Department with a reference to the Exchange. The reason for this change is twofold. First, the CBOE's Market Surveillance Department recently was combined into the CBOE's Department of Market Regulation. Second, the Exchange body or bodies that grant approvals under CBOE Rule 3.8(a)(4)(C) may change over time. Currently, Exchange approval under CBOE Rule 3.8(a)(4)(C) is required from both the CBOE's Department of Market Regulation and the CBOE's Membership Committee.

Finally, the CBOE notes that all of the provisions in paragraphs (a)(2), (a)(3), and (a)(4) of CBOE Rule 3.8 which are applicable to nominees are also applicable to a person who has registered his or her membership for a member organization because, under Section 2.4 of the CBOE Constitution ("Registration of Individual Memberships for Member Organizations") such a person represents a member organization is lieu of a nominee. Therefore, the requirements of CBOE Rule 3.8(a)(4)(C) also are applicable to a person who has registered his or her membership for a member organization and desires to also act as an independent market maker and/or as an independent floor broker.

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act, in general, and furthers the objectives of Section 6(b)(5), in particular, in that the proposed change will clarify the Exchange's rules and is thus designed to remove impediments to and perfect the mechanism of a free and open market.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The CBOE does not believe that the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change constitutes a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule of the Exchange, it has become effective pursuant to Section 19(b)(3)(A) of the Act[4] and subparagraph (e)(1) of Rule 19b–4 thereunder.[5] At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.[6]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether it is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C., 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other that those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to File No. SR–CBOE–98–19 and should be submitted by June 10, 1998.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[7]

Margaret H. McFarland,

Deputy Secretary.

SMALL BUSINESS ADMINISTRATION

Data Collection Available for Public Comments and Recommendations

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Small Business Administration's intentions to request approval on a new, and/or currently approved information collection.

DATES: Comments should be submitted on or before July 20, 1998.

FOR FURTHER INFORMATION CONTACT: Curtis B. Rich, Management Analyst, Small Business Administration, 409 3rd Street, S.W., Suite 5000, Washington, D.C. 20416. Phone Number: 202–205–6629.

SUPPLEMENTARY INFORMATION:

Title: "Servicing Agent Agreement".

Type of Request: New Request.

Form No: 1506.

Description of Respondents: Persons filling out Servicing Agent Agreement and Certified Development Companies.

Annual Responses: 4,800.

Annual Burden: 800.

Comments: Send all comments regarding this information collection to Gail Hepler, Financial Analyst, Office of Financial Assistance, Small Business Administration, 409 3rd Street, S.W., Suite 8300, Washington, D.C. 20416. Phone No: 202–205–7530. Send comments regarding whether this information collection is necessary for the proper performance of the function of the agency, accuracy of burden estimate, in addition to ways to minimize this estimate, and ways to enhance the quality.

Dated: May 8, 1998.

Jacqueline White,

Chief, Administrative Information Branch.

[FR Doc. 98–13341 Filed 5–19–98; 8:45 am]

BILLING CODE 8025–01–M

DEPARTMENT OF STATE

Bureau of Political-Military Affairs

[Public Notice 2825]

Revocation of Munitions Exports Licenses and Other Approvals for India

AGENCY: Department of State.

ACTION: Notice.

SUMMARY: Notice is hereby given that all licenses and other approvals to export or otherwise transfer defense articles and defense services from the United States to India, or transfer U.S. origin defense articles and defense services from a foreign destination to India, or temporarily import defense articles from India pursuant to Section 38 of the Arms Export Control Act are revoked immediately.

EFFECTIVE: May 13, 1998.

FOR FURTHER INFORMATION CONTACT: Rose Biancaniello, Deputy Director, Department of State, Office of Defense Trade Controls, Department of State, 703–812–2568.

SUPPLEMENTARY INFORMATION: On May 13, 1998, the President determined pursuant to Section 102 of the Arms Export Control Act (22 U.S.C. 2779aa–1) ("the Glenn Amendment") that India a non-nuclear weapons state, detonated nuclear explosive devices on May 11, 1998, and directed the relevant United States Government agencies—and instrumentalities to take the necessary actions to impose the sanctions described in Section 102(b)(2) of that Act. That provision of law provides for the determination to India of sales of defense articles, defense services, or design and construction services under the Arms Export Control Act, and termination of licenses for the export of any item on the United States Munitions List (USML). Consistent with such law and in furtherance of the foreign policy interests of the United States, the Department of State, through publication of this notice, is revoking all licenses and other approvals for the permanent and temporary export and temporary import of defense articles and defense services to or from India and will deny all applications and other requests for approval to export or otherwise transfer or retransfer defense articles and defense services to India. This revocation order includes all types of licenses/authorizations; manufacturing, technical assistance and distribution agreements; the use of any exemption in the International Traffic in Arms Regulations (ITAR); and, any authorization to retransfer from a foreign destination. This order also extends to the activities and authorizations concerning brokering covered by Part 129 of the ITAR. Therefore, in accordance with Section 123.21 of the ITAR, licenses must be returned immediately to the Department of State, Office of Defense Trade Controls.

Dated: May 15, 1998.

Eric D. Newsom,

Acting Assistant Secretary for Political-Military Affairs.

BILLING CODE 4710–25–M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Allocation of the 200,000 Metric Ton Increase in the Amount Available Under the Raw Cane Sugar Tariff-rate Quota

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: The Office of the United States Trade Representative (USTR) is providing notice of the allocation among supplying countries and customs areas for the 200,000 metric ton increase in the amount available under the current raw cane sugar tariff-rate quota triggered by the fact that the stocks to use ratio for sugar reported in the U.S. Department of Agriculture's World Agricultural Supply and Demand Estimates on May 12, 1998, was 14.2 percent.

EFFECTIVE DATE: May 20, 1998.

ADDRESSES: Inquiries may be mailed or delivered to Elizabeth Jones, Economist, Office of Agricultural Affairs (Room 415), Office of the United States Trade Representative, 600 17th Street, NW, Washington, DC 20508.

FOR FURTHER INFORMATION CONTACT: Elizabeth Jones, Office of Agricultural Affairs, 202–395–6127.

SUPPLEMENTARY INFORMATION: Pursuant to Additional U.S. Note 5 to chapter 17 of the Harmonized Tariff Schedule of the United States (HTS), the United States maintains a tariff-rate quota for imports of raw cane sugar. On September 17, 1997, the Secretary of Agriculture announced the in-quota quantity for the tariff-rate quota for raw cane sugar for the period October 1, 1997–September 30, 1998, and announced an administrative plan under which the quantity available would be increased by 200,000 metric tons, raw value, if the stocks-to-use ratio reported in the May 1998 U.S. Department of Agriculture's World Agricultural Supply and Demand Estimates (WASDE) is less than or equal to 15.5 percent. On May 12, 1998, the WASDE reported a stocks to use ratio of 14.2 percent, thereby triggering a 200,000 metric ton increase in the quantity available under the tariff-rate quota.

Section 404(d)(3) of the Uruguay Round Agreements Act (19 U.S.C. 3601(d)(3)) authorizes the President to allocate the in-quota quantity of a tariff-rate quota for any agricultural product among supplying countries or customs areas. The President delegated this authority to the United States Trade Representative under paragraph (3) of Presidential Proclamation No. 6763 (60 FR 1007). Additional U.S. Note 5(b)(i) to chapter 17 of the HTS also provides that the quota amounts established under that note may be allocated among supply countries and areas by the United States Trade Representative.

Raw cane sugar allocation

Accordingly, USTR is allocating the 200,000 metric ton increase in the amount available under the raw can sugar tariff-rate quota to the following countries or areas in metric tons, raw value. This allocation is based on the countries' historical trade to the United States:

County	Current FY 1998 allocation	Additional allocation	New FY 1998 allocation
Argentina	56,832	8,731	65,563
Australia	109,699	16,853	126,552
Barbados	7,830	0	7,830
Belize	14,538	2,234	16,772
Bolivia	10,573	1,624	12,198
Brazil	191,642	29,442	221,084
Colombia	31,720	4,873	36,593
Congo	7,258	0	7,258
Cote d'Ivoire	7,258	0	7,258
Costa Rica	19,825	3,046	22,871
Dominican Republic	232,614	35,736	268,350
Ecuador	14,538	2,234	16,772
El Salvador	34,363	5,279	39,643
Figi	11,895	1,827	13,722
Gabon	7,258	0	7,258
Guatemala	63,440	9,746	73,186
Guyana	15,860	2,437	18,297
Haiti	7,258	0	7,258
Honduras	13,217	2,030	15,247
India	10,573	1,624	12,198
Jamaica	14,538	2,234	16,772
Madagascar	7,258	0	7,258
Malawi	13,217	2,030	15,247
Mauritius	15,860	2,437	18,297
Mexico	25,000	0	25,000
Mozambique	17,182	2,640	19,821
Nicaraque	27,755	4,264	32,019
Panama	38,328	5,888	44,217
Papua New Guinea	7,258	0	7,258
Paraguay	7,258	0	7,258
Peru	54,189	8,325	62,513
Philippines	178,426	27,411	205,837
South Africa	30,398	4,670	35,069
St. Kitts & Nevis	7,258	0	7,258
Swaziland	21,147	3,249	24,395
Taiwan	15,860	2,437	18,297
Thailand	18,503	2,843	21,346
Trinidad-Tobago	9,252	1,421	10,673
Uruguay	7,258	0	7,258
Zimbabwe	15,860	2,437	18,297
Total	1,4000,000	200,000	1,600,000

Each allocation to a country that is a net importer of sugar is conditioned on compliance with the requirements of section 902(c)(1) of the Food Security Act of 1985 (7 U.S.C 1446g note).

Charlene Barshefsky,

United States Trade Representative.

[FR Doc. 98–13378 Filed 5–19–98; 8:45 am]

BILLING CODE 3190–01–M

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

Environmental Impact Statement on the Proposed Urban Rail Project Between the Fullerton Transportation Center and Irvine Transportation Center, Orange County, CA

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Federal Transit Administration (FTA), as lead agency, and the Orange County Transportation Authority (OCTA) intend to prepare an Environmental Impact Statement (EIS) in accordance with the National Environmental Policy Act of 1969 (NEPA) on a proposal by OCTA to further study the proposed implementation of an urban rail system within a corridor 45 kilometers (28 miles) long and 9.7 kilometers (6 miles) wide between the Cities of Fullerton and Irvine, known as the Orange County Urban Rail (Urban Rail) Project. In addition to NEPA, the proposed project is subject to compliance with the California Environmental Quality Act (CEQA), therefore, a joint Environmental Impact Report (EIR)/EIS will be prepared.

The EIR/EIS will evaluate the following alternatives: 1) The Local Preferred Strategy (LPS) Alignment Alternative. This alternative would follow the alignment identified in the Priority Corridor Major Investment Study, June 1997, on an elevated guideway. 2) A Lower Cost Alternative (LCA). This alternative would connect the Fullerton and Irvine Transportation Centers and would serve many of the activity centers in the Corridor along a route which minimizes the distance and number of freeway crossings. The system would be primarily at grade on local streets. 3) A No Build Alternative, which involves no change to transportation services or facilities in the corridor beyond already committed projects. Potential new feasible alternatives generated through the scoping process will also be considered.

Scoping will be accomplished through correspondence with interested

persons, organizations, and Federal, State, and local agencies; and one public scoping meeting

DATES: *Comment Due Date:* Written comments on the scope of alternatives and impacts to be considered should be submitted by June 22, 1998. *Written comments* should be sent to Ms. Cindy Krebs, OCTA, 550 South Main Street, P.O. Box 14184, Orange, CA 92863. *Written comments* may also be made at the public scoping meeting scheduled below. *Scoping Meeting:* The public scoping meeting will take place on: Thursday, June 4, 1998 from 4:30 p.m. to 7:00 p.m. at Fullerton Senior Center. See **ADDRESS** below.

People with special needs should contact Cindy Krebs at OCTA at the address below or by calling (714) 560–5740. A TDD number is also available: (714) 636–4327. The building is accessible to people with disabilities.

The meeting will be held in an "open-house" format, and representatives will be available to discuss the project throughout the time periods given. Informational displays and written material will also be available throughout the time periods given.

ADDRESSES: *Written comments* should be sent to Ms. Cindy Krebs, OCTA, 550 South Main Street, P.O. Box 14184, Orange, CA 92863. *Written comments* may also be made at the public scoping meting as scheduled below. The *Scoping Meeting* will take place at the following location: Thursday, June 4, 1998 from 4:30 p.m. to 7:00 p.m., Fullerton Senior Center, 340 W. Commonwealth Ave., Fullerton, CA 92832.

FOR FURTHER INFORMATION CONTACT: Ms. Cindy Krebs, OCTA, 550 South Main Street, P.O. Box 14184, Orange, CA 92863, (714) 560–5740, or fax (714) 560–5794.

SUPPLEMENTARY INFORMATION:

I. Scoping

FTA and OCTA invite interested individuals, organizations, and Federal, State, and local agencies to participate in defining the alternatives to be evaluated in the EIR/EIS and identifying any significant social, economic, or environmental issues related to the alternatives. An information packet describing the purpose of the project, the location, the proposed alternatives, and the impact areas to be evaluated is being mailed to affected Federal, State, and local agencies. Others may request the scoping materials by contacting Ms. Cindy Krebs, OCTA, 550 South Main Street, P.O. Box 14184, Orange, CA 92863, (714) 560–5740, or fax (714) 560–5794. Scoping comments may be made in writing at the public scoping meeting. See the Scoping Meeting section above for the location and time. During scoping, comments should focus on identifying specific social, economic, or environmental impacts to be evaluated and suggesting alternatives that are less costly or less environmentally damaging while meeting the identified mobility needs. Scoping is not the appropriate time to indicate a preference for a particular alternative. Comments on preferences should be communicated after the Draft EIR/EIS has been completed. If you wish to be placed on the mailing list to receive further information as the project develops, contact: Ms. Cindy Krebs, OCTA, 550 South Main Street, P.O. Box 14184, Orange, CA 92863, (714) 560–5740, or fax (714) 560–5794.

II. Description of Study Area and Project Need

The study area extends from the City of Fullerton in a general southward direction through the Cities of Anaheim, Orange, Garden Grove, Santa Ana, and Costa Mesa and then eastward to the City of Irvine, California. The area is approximately 45 kilometers (28 miles) long and 9.7 kilometers (6 miles) wide.

The study corridor contains key activity, employment, and transportation facilities in Orange County such as: Fullerton College, Downtown Fullerton, Fullerton Transportation Center, Orangefair Mall, Downtown Anaheim, Disneyland, Anaheim Convention Center, Anaheim Stadium (Edison Field), Anaheim Amtrak Station, the Arrowhead Pond, the City Mills, the St. Joseph Children's Hospital, the Main Place Mall, Santa Ana Transportation Center, Downtown Santa Ana, the Federal, County and City Civic Center area, South Coast Plaza/Metro, Orange Coast College, John Wayne Airport, UCI, the Irvine Spectrum and Entertainment Center, and the Irvine Transportation Center.

This EIR/EIS is the logical next step in transportation planning and project development following OCTA's completion of a Major Investment Study (MIS) of the mobility needs in the study area. This MIS employed a far-reaching public involvement program, continuous coordination with affected and interested agencies, and a detailed evaluation of a wide range of alternatives to meet the identified mobility needs. As the MIS process was mode-neutral in nature, the public identified a comprehensive set of bus, road, and urban rail alternatives. Detailed analysis at a conceptual engineering level was completed for a set of alternatives to identify project cost, ridership, cost-effectiveness measurements, and environmental benefits and impacts. The results led to the development of a Locally Preferred Strategy (LPS) that includes: (1) optimization of the present system through expanded bus service and increased Metrolink commuter rail service seats and (2) continued study of a light rail system between the Fullerton and Irvine Transportation Centers. This EIS focuses on the light rail alternative.

An effective multi-modal transportation network within the project study area is necessary to meet the future mobility needs of businesses and residents in Orange County. By the year 2020, despite current and planned transportation system improvements, the magnitude and nature of the County's population and employment growth trends are projected to result in continuing transportation challenges in the corridor area as evidenced by: increasing travel—approximately 1.8 million more daily trips; growing transit-reliant population—doubling of senior population; continuing freeway congestion—73 percent of the freeway system will operate at 30 m.p.h. or less during morning and evening peak periods; increasing arterial congestion—major intersections with delay will grow from four percent to 27 percent; and limited travel options—congested freeway and street system, and financially constrained bus and Metrolink service.

III. Alternatives

The alternatives proposed for evaluation include: (1) LPS Alignment Alternative. This alternative would follow the alignment identified in the Priority Corridor Major Investment Study (June, 1997), which provided for an elevated guideway from end to end within the arterial corridors. The elevated guideway would typically be supported on columns within the median. (2) A Lower Cost Alternative (LCA). This alternative would connect the Fullerton and Irvine Transportation Centers and would serve many of the activity centers in the Corridor along a route which minimizes the distance and number of freeway crossings. The system would be primarily at grade on local streets. (3) A No Build Alternative, which involves no change to transportation services or facilities in the corridor beyond already committed projects. Potential new feasible alternatives generated through the scoping process will also be considered.

IV. Probable Effects

FTA and OCTA will evaluate, in the EIR/EIS, all significant social, economic,

and environmental impacts of the alternatives. The previous MIS study evaluated these impacts at a corridor level of detail for the LPS Alternative alignment. These issues will be evaluated at a project level of detail in the Draft EIR/EIS. Among the primary transit issues to be evaluated are the expected increase in transit ridership, the expected increase in mobility for the corridor's transit dependent, the support of the region's air quality goals, the capital outlays needed to construct the project, the cost of operating and maintaining the facilities created by the project, and the financial impacts on the funding agencies. Potentially affected environmental and social resources proposed for analysis include land use and neighborhood impacts, residential and business displacements and relocations, traffic and parking impacts near stations, traffic circulation, visual impacts, impacts on cultural and archaeological resources, and noise and vibration impacts. Impacts on air and water quality, groundwater, hazardous waste sites, and water resources will also be covered. The impacts will be evaluated both for the construction period and for the long-term period of operation. Measures to mitigate significant adverse impacts will be considered.

V. FTA Procedures

The EIR/EIS and the conceptual engineering for the Urban Rail project will be prepared simultaneously. The EIR/EIS/conceptual engineering process will assess the social, economic, and environmental impacts of the proposed alternatives while refining their design to minimize and mitigate any adverse impacts. After its publication, the Draft EIR/EIS will be available for public and agency review and comment, and a public hearing will be held. On the basis on the Draft EIR/EIS and comments received, OCTA will select a preferred alternative to carry forward into the Final EIR/EIS and complete engineering. Following this action by OCTA, OCTA will request FTA authorization to proceed with the Final EIS/EIR and complete engineering.

Issued: May 15, 1998.

BILLING CODE 4910–57–U

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–98–3782; Notice 1]

Laforza Automobiles, Inc.; Receipt of Application for Temporary Exemption From Federal Motor Vehicle Safety Standard No. 208

Laforza Automobiles, Inc., of Escondido, California, ("Laforza") has applied for a temporary exemption from the automatic restraint requirements of Federal Motor Vehicle Safety Standard No. 208 *Occupant Crash Protection*, as described below. The basis of the application is that compliance would cause substantial economic hardship to a manufacturer that has tried in good faith to comply with the standard.

This notice of receipt of an application is published in accordance with the requirements of 49 U.S.C. 30113(b)(2) and does not represent any judgment of the agency on the merits of the application.

Laforza is a Nevada corporation established in August 1997. To date it has produced no motor vehicles. It intends to purchase chassis from Magnum Industriales s.r.l., an Italian company, "where it will undergo the necessary modifications for the US market." A Ford engine, transmission, and associated emission control systems will be installed, and the end result will be a multipurpose passenger vehicle (sport utility) called the Prima 4X4. Laforza estimates a total production of 400 units between the date of the exemption and December 31, 2000. This is the date that its requested temporary exemption would expire.

Laforza seeks an exemption from S4.2.6.1.1 and S4.2.6.2 of Standard No. 208. Paragraph S4.2.6.1.1, in pertinent part, would require Laforza to provide a driver side airbag on not less than 80 percent of all Primas manufactured before September 1, 1998. Paragraph S4.2.6.2 would require all Primas manufactured on and after September 1, 1998, to be equipped with both driver and right front passenger airbags. Although the passenger side airbag is not required until September 1 of this year, "the airbag development program has to include both the passenger and driver side airbags since the development duration for a driver's side airbag would overlap the time when a passenger's side airbag will be required." Laforza continues, "If the development is not combined, many of these tests would have to be repeated with a significant increase in test and material costs."

In the first 6 months after its agreement with Magnum, Laforza spent "an estimated total of 200 manhours and $15,000" on airbag compliance issues. Lacking the resources to independently develop an airbag system, it "has contacted airbag development companies in the US to assist with the project." Laforza has concluded that it will take 2 years to develop and certify the system. If immediate compliance were required, the cost would be $4,000,000. An exemption would permit Laforza to generate revenues "to meet the costs mandated by the airbag development program" and spread these costs over a period of time. Because the company is less than a year old, it could not submit corporate balance sheets and income statements for the three years immediately preceding the filing of its application, as specified by NHTSA's regulation. Its stockholder equity is $900,000.

Laforza argues that "production of the Laforza Prima 4X4 is in the best interest of the public and the US economy," pointing to the uniqueness of the vehicle, and the American components that it incorporates, the powertrain from Ford Motor Company and the purchase of "other parts * * * from approximately five different US companies." The company currently employs 15 people full-time and three people part time, which will grow as production increases. Further, "in addition, * * * at least 50 employees from other companies are involved in the Laforza project." During the exemption period, the Prima will be "equipped with a conventional retractor type, three-point driver and passenger seatbelt system that meets all requirements of FMVSS No. 208," and the vehicle otherwise complies with all Federal motor vehicle safety standards that apply to it.

Interested persons are invited to submit comments on the application described above. Comments should refer to the docket number and the notice number, and be submitted to: Central Docket Management Facility, room Pl–401, 400 Seventh Street, SW, Washington, DC 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket (from 10 a.m. to 5 p.m.) at the above address both before and after that date. Comments may also be viewed on the internet at web site dms.dot.gov. To the extent possible, comments filed after the

closing date will also be considered. Notice of final action on the application will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: June 9, 1998.

(49 U.S.C. 30113; delegations of authority at 49 CFR 1.50. and 501.8)

Issued: May 15, 1998.

[STB Finance Docket No. 33570]

Oregon Pacific Railroad Company—Acquisition and Operation Exemption—East Portland Traction Co. and Molalla Western Railway

Oregon Pacific Railroad Company (OPR), a noncarrier, has filed a verified notice of exemption under 49 CFR 1150.31 to acquire and operate certain rail lines of East Portland Traction Co. (EPTC) and Molalla Western Railway (MWRL) [1] in Clackamas and Multnomah Counties, OR. The line to be acquired from EPTC extends from EPTC milepost 0.26 (at its connection with Union Pacific Railroad Company's (UP) Portland-Eugene mainline at UP MP 769) at or near East Portland, OR, to milepost 4.54 at Milwaukie, a distance of 4.28 miles, and includes 2.11 miles secondary and yard trackage, for a total trackage of 6.39 miles to be operated in Clackamas County, OR. The line to be acquired from MWRL extends from a connection with the UP main track at UP milepost 747.568 in the city of Canby, OR, to MP 757.50 at Molalla, a distance of 9.93 miles, and includes 1.45 miles of secondary and yard trackage, for a total trackage of 11.38 miles to be operated in Clakamas County, OR. The projected revenues of OPR will not exceed those of a Class III railroad.

Because OPR did not file its verified notice, as amended, until May 4, 1998, the effective STB Finance Docket No. 33570 date of the exemption was May 11, 1998 (7 days after the exemption was filed).[2]

If the verified notice contains false or misleading information, the exemption is void *ab initio*. Petitions to reopen the proceeding to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

An original and 10 copies of all pleadings, referring to STB Finance Docket No. 33570, must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, N. W., Washington, DC 20423–0001. In addition, a copy of each pleading must be served on Richard A. Samuels, President, Oregon Pacific Railroad Company, P.O. Box 22548, Portland, OR 97269.

Board decisions and notices are available on our website at "WWW.STB.DOT.GOV."

Decided: May 12, 1998.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

DEPARTMENT OF THE TREASURY

Fiscal Service

Fee Schedules for the Issuance of Definitive Securities and TREASURY DIRECT Securities Accounts

AGENCY: Bureau of the Public Debt, Fiscal Service, Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury is announcing two schedules of fees for marketable Treasury securities. The schedules are for the fees charged for the issuance of definitive securities and the fees for the annual maintenance of certain TREASURY DIRECT securities accounts.

EFFECTIVE DATE: May 14, 1998.

FOR FURTHER INFORMATION CONTACT: Maureen Parker, Director, Division of Securities Systems, Bureau of the Public Debt, Parkersburg, West Virginia, 26106–1328, (304) 480–7761.

SUPPLEMENTARY INFORMATION:

On January 23, 1995, the Department of the Treasury established fee schedules for the issuance of definitive securities and the maintenance of certain TREASURY DIRECT securities accounts.

The Treasury has decided that the fees for the issuance of definitive securities and the maintenance of certain TREASURY DIRECT Securities Accounts should remain unchanged from the amounts currently in effect.

Schedule of Fees for Definitive Securities

The fee schedule for the issuance of a definitive security is as follows: a fee of $50 will be charged for each definitive security issued on a transfer, reissue, exchange or withdrawal from book-entry form, or as a result of the granting of relief on account of loss, theft, destruction, mutilation or defacement. Payment of the fee must accompany the request for the issues of securities in physical form. If a request results in the issuance of more than one security, the amount of the fee is arrived at by multiplying the number of pieces requested by $50. The fee announced above shall remain in effect until further notice.

Schedule of Fees for TREASURY DIRECT Securities Accounts

The fee schedule for TREASURY DIRECT securities accounts is as follows: each TREASURY DIRECT securities account holding Treasury bonds, notes and bills pursuant to 31 CFR part 357 that exceeds $100,000 in par amount as of a selected date in May of each year will be charged an annual maintenance fee in the amount of $25. This fee shall remain in effect until further notice. Each account holder will be individually billed.

Dated: May 14, 1998.

Van Zeck,

Commissioner of the Public Debt.

BILLING CODE 4810–39–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Forms 1040–ES, 1040–ES (NR), 1040–ES (Espanol)

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form

[1] An agreement was reached among the parties on December 31, 1996, to transfer all assets from both EPTC and MWRL to OPR effective January 1, 1997. Due to oversight, OPR has been operating the rail lines since January 1, 1997, without appropriate authority from the Board.

[2] Under 49 CFR 1150.32(b), a notice of exemption does not become effective until 7 days after filing.

1040–ES, Estimated Tax for Individuals, Form 1040–ES (NR), U.S. Estimated Tax for Nonresident Alien Individuals, and Form 1040–ES (Espanol),
Contribuciones Federales Estimadas Del Trabajo Por Cuenta Propia Y Sobre el Empleo De Empleados Domesticos—Puerto Rico.

DATES: Written comments should be received on or before July 20, 1998 to be assured of consideration.

ADDRESSES: Direct all written comments to Garrick R. Shear, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Martha R. Brinson, (202) 622–3869, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

SUPPLEMENTARY INFORMATION:

Title: Estimated Tax for Individuals (Form 1040–ES), U.S. Estimated Tax for Nonresident Alien Individuals (Form 1040–ES (NR)), and Contribuciones Federales Estimadas Del Trabajo Por Cuenta Propia Y Sobre el Empleo De Empleados Domesticos—Puerto Rico (Form 1040–ES (Espanol)).

OMB Number: 1545–0087.

Form Number: 1040–ES, 1040–ES (NR), 1040–ES (Espanol).

Abstract: Form 1040–ES is used by U.S. citizens and resident aliens to make estimated tax payments of income (and self-employment) tax due in excess of tax withheld. Form 1040–ES (NR) is used by nonresident aliens to pay any income tax due in excess of tax withheld. Form 1040–ES (Espanol) is printed in Spanish for use in Puerto Rico and includes payment vouchers for payment of self-employment tax on a current basis.

Current Actions: There are no changes being made to the forms at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households.

Estimated Number of Responses: 40,991,991.

Estimated Time Per Response: 2 hr., 40 min.

Estimated Total Annual Burden Hours: 109,302,321.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: May 11, 1998.

Garrick R. Shear,

IRS Reports Clearance Officer.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Form 1116

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 1116, Foreign Tax Credit (Individual, Estate, Trust, or Nonresident Alien Individual).

DATES: Written comments should be received on or before July 20, 1998 to be assured of consideration.

ADDRESSES: Direct all written comments to Garrick R. Shear, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Martha R. Brinson, (202) 622–3869, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

SUPPLEMENTARY INFORMATION:

Title: Foreign Tax Credit (Individual, Estate, Trust, or Nonresident Alien Individual).

OMB Number: 1545–0121.

Form Number: 1116.

Abstract: Form 1116 is used by individuals (including nonresident aliens), estates, or trusts who paid foreign income taxes on U.S. taxable income, to compute the foreign tax credit. This information is used by the IRS to determine if the foreign tax credit is properly computed.

Current Actions: There are no changes being made to the form at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households.

Estimated Number of Respondents: 589,900.

Estimated Time Per Respondent: 5 hr., 58 min.

Estimated Total Annual Burden Hours: 3,517,279.

SUPPLEMENTARY INFORMATION:

Title: Expenses for Business Use of Your Home.

OMB Number: 1545–1266.

Form Number: 8829.

Abstract: Internal Revenue Code section 280A limits the deduction for business use of a home to the gross income from the business use minus certain business deductions. Amounts not allowed due to the limitations can be carried over to the following year. Form 8829 is used to compute the allowable deduction and any carryover, and the IRS uses the information to verify that these amounts are properly computed.

Current Actions: There are no changes being made to the form at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households.

Estimated Number of Respondents: 4,000,000.

Estimated Time Per Respondent: 2 hr., 35 min.

Currently, the IRS is soliciting comments concerning Forms 943, Employer's Annual Tax Return for Agricultural Employees, 943–PR, Planilla Para La Declaracion Anual De La Contribucion Del Patrono De Empleados Agricolas, 943–A, Agricultural Employer's Record of Federal Tax Liability, and 943A–PR, Registro De La Obligacion Contributiva Del Patrono Agricola.

DATES: Written comments should be received on or before July 20, 1998 to be assured of consideration.

ADDRESSES: Direct all written comments to Garrick R. Shear, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Martha R. Brinson, (202) 622–3869, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

SUPPLEMENTARY INFORMATION:

Title: Employer's Annual Tax Return for Agricultural Employees (Form 943), Planilla Para La Declaracion Anual De La Contribucion Del Patrono De Empleados Agricolas (Form 943–PR), Agricultural Employer's Record of Federal Tax Liability (Form 943–A), and Registro De La Obligacion Contributiva Del Patrono Agricola (Form 943A–PR).

OMB Number: 1545–0035.

Form Number: 943, 943–PR, 943–A, and 943A–PR.

Abstract: Agricultural employers must prepare and file Form 943 and Form 943–PR (Puerto Rico only) to report and pay FICA taxes and income tax voluntarily withheld (Form 943 only). Agricultural employers may attach Forms 943–A and 943A–PR to Forms 943 and 943–PR to show their tax liabilities for semiweekly periods. The information is used to verify that the correct tax has been paid.

Current Actions: There are no changes being made to the forms at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 392,443.

Estimated Time Per Respondent: 11 hr., 14 min.

Estimated Total Annual Burden Hours: 4,409,010.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: May 8, 1998.

Garrick R. Shear,

IRS Reports Clearance Officer.

BILLING CODE 4830–01–U

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Form 8288–B

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 8288–B, Application for Withholding Certificate for Dispositions by Foreign Persons of U.S. Real Property Interests.

DATES: Written comments should be received on or before July 20, 1998 to be assured of consideration.

ADDRESSES: Direct all written comments to Garrick R. Shear, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Martha R. Brinson, (202) 622–3869, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

SUPPLEMENTARY INFORMATION:

Title: Application for Withholding Certificate for Dispositions by Foreign Persons of U.S. Real Property Interests.

OMB Number: 1545–1060.

Form Number: 8288–B.

Abstract: Section 1445 of the Internal Revenue Code requires transferees to withhold tax on the amount realized from sales or other dispositions by foreign persons of U.S. real property interests. Code sections 1445(b) and (c) allow the withholding to be reduced or eliminated under certain circumstances. Form 8288–B is used to apply for a withholding certificate from IRS to reduce or eliminate the withholding required by Code section 1445.

Current Actions:

Lines 1 through 3 of Form 8288-B have been revised. Line 1 was unclear in its usage and often resulted in duplication of information on lines 2 or 3. In most cases, the filer of the certificate is actually the transferee's or transferor's agent on behalf of the applicant. For this reason, line 1 has been changed to line 4, the header changed to read "Name of withholding agent," and the address block revised so that the requester can inform the IRS where to send the certificate. Also, a separate space on line 4 now requests the name of the estate, trust, or other entity, identification number and phone number. Lines 2 and 3 on the current version are now lines 1 and 2. A box on line 1 of the current version requesting that the applicant identify whether it is the transferee or transferor is now line 3.

Type of Review: Revision of a currently approved collection.

Affected Public: Business or other for-profit organizations and individuals or households.

Estimated Number of Respondents: 5,079.

Estimated Time Per Respondent: 5 hr., 5 min.

Estimated Total Annual Burden Hours: 25,801.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: May 5, 1998.

Part II

Department of Health and Human Services

45 CFR Part 46
Protection of Human Research Subjects; Proposed Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

45 CFR Part 46

RIN 0925–AA14

Protection of Human Research Subjects

AGENCY: Department of Health and Human Services (HHS).

ACTION: Notice of Proposed rulemaking.

SUMMARY: The Department of Health and Human Services (HHS) is proposing to amend its human subjects protection regulations applicable to research conducted or supported by HHS, by replacing the existing Subpart B of the regulations entitled "Additional DHHS Protections Pertaining to Research, Development, and Related Activities Involving Fetuses, Pregnant Women, and Human In Vitro Fertilization" with new regulations entitled "Additional DHHS Protections for Pregnant Women, Human Fetuses, and Newborns Involved as Subjects in Research, and Pertaining to Human In Vitro Fertilization." This revision continues the Department's recognition of the need to provide special protections for the human fetus and newborn in research, while eliminating unnecessary barriers to consent to research that can benefit fetuses or newborns.

Additionally, consistent with recent practices and statutory changes, this proposed regulation provides a mechanism for special ethical reviews on an ad hoc basis as may be deemed appropriate by the Secretary, HHS.

DATES: Comments on the proposed regulation must be received on or before August 18, 1998.

ADDRESSES: Comments must be mailed to: Carol Wigglesworth, Senior Policy Analyst, Office for Protection from Research Risks, 6100 Executive Boulevard, Suite 3B01, MSC–7507, Rockville, MD 20892–7507. The Department invites written comments on the proposed regulations and requests that comments identify the specific regulatory provisions to which they relate.

FOR FURTHER INFORMATION CONTACT: Carol Wigglesworth, Senior Policy Analyst, Office for Protection from Research Risks, 6100 Executive Boulevard, Suite 3B01, MSC–7507, Rockville, MD 20892–7507, (301) 402–5913 (not a toll-free number). Interested persons may obtain a fax copy of the current regulations for the protection of human research subjects (45 CFR 46), including Subpart B as well as Subparts A, C, and D, by telephoning (301) 594–0464 (not a toll free number) and requesting document number 1004.

SUPPLEMENTARY INFORMATION:

Background

On August 8, 1975, The Department of Health and Human Services (HHS) [then the Department of Health, Education, and Welfare (HEW)] published regulations pertaining to research involving fetuses, pregnant women, and human in vitro fertilization. Those regulations were consistent with the recommendations of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research (National Commission) and were codified at Subpart B of Title 45, Part 46, of the Code of Federal Regulations. Along with subsequent secondary changes, incorporated on January 11, 1978 and June 1, 1994, these regulations remain in force today. Both the 1975 Report of the National Commission and the 1975 regulations were published in the **Federal Register** on August 8, 1975 (40 FR 33526 (1975)).

During the last four years, the following pertinent events involving research covered by the 1975 regulations occurred:

- The enactment on June 10, 1993 of the "National Institutes of Health (NIH) Revitalization Act of 1993" (Pub. L. 103–43) nullifying the HHS regulatory requirement for Ethical Advisory Board review of research involving in vitro fertilization of human ova at 45 CFR 46.204(d) (59 FR 28276 (1994)).
- The 1994 recommendations of the Institute of Medicine Committee on the Ethical and Legal Issues Relating to the Inclusion of Women in Clinical Studies urging the Office for Protection from Research Risks (OPRR), HHS, to "* * * revise and reissue subpart B * * *" of the human subject protection regulations consistent with the Committee's recommendations for enhanced inclusion of women in research studies (*Women and Health Research:* Ethical and Legal Issues of Including Women in Clinical Studies, National Academy Press, 1994).
- The issuance of a Food and Drug Administration "Guideline for the Study and Evaluation of Gender Differences in the Clinical Evaluation of Drugs" on July 22, 1993 (58 FR 39406 (1993)), the issuance of NIH "Guidelines on the Inclusion of Women and Minorities as Subjects in Clinical Research" on March 28, 1994 (59 FR 14508 (1994)), and the issuance of a Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry "Policy on the Inclusion of Women and Racial and Ethic Minorities in Externally Awarded Research" on September 15, 1995 (60 FR 47947 (1995)), each designed, in part, to improve the opportunity for women to be included as human subjects in research.
- The enactment on September 30, 1996, of the "Omnibus Consolidated Fiscal Year 1997 Appropriations Act" (Pub. L. 104–208) prohibiting HHS from using funds appropriated by the act for (i) the creation of a human embryo or embryos for research purposes, or (ii) research in which a human embryo or embryos are destroyed, discarded, or knowingly subjected to risk of injury or death greater than that allowed for research on fetuses in utero under 45 CFR 46.208(a)(2) and section 498(b) of the Public Health Service Act (42 U.S.C. 289g(b)). On January 26, 1996, identical language pertinent to FY 1996 funds had been enacted in Pub. L. 104–99.

The impact of these events on research involving pregnant women, fetuses, and in vitro fertilization and the fact that there had been no major review of the regulations applicable to these subjects for nearly two decades, presented a forceful argument for a contemporaneous review of these regulations.

The OPRR, located at NIH, has HHS-wide responsibility for the development, implementation, and compliance oversight of these regulations. The Director, OPRR, convened the Public Health Service Human Subject Regulation Drafting Committee, a committee of representatives of the heads of the pertinent operating components within the Public Health Service, to evaluate Subpart B of 45 CFR Part 46 and to consider if revisions were in order. Beginning in May 1994, this committee met twice monthly over the next 14 months to review the regulations and to make recommendations for any needed revisions.

The Drafting Committee found that the regulations provide adequate protections for women and fetuses. In light of the IOM Report and the NIH guidelines on the Inclusion of Women and Minorities as subjects in Clinical Research, the Drafting Committee concluded that women ought not be unnecessarily excluded from research on the basis of pregnancy.

Accordingly, this proposed rule institutes a policy of presumed opportunity for inclusion of pregnant women in research in place of one of presumed exclusion. Similarly, the proposed rule modifies the consent requirements for fetal research to remove potential barriers to therapeutic research that might provide medical

benefit to a fetus. The Drafting Committee also found that nonsubstantive technical, formatting, and clarifying changes are in order.

In the midst of the Drafting Committee's evaluation and discussion, the National Task Force on AIDS Drug Development, chaired by the Assistant Secretary for Health, recommended that the regulations applicable to pregnant subjects of research be amended to remove any requirement that permission or consent of the father of the fetus be obtained before the woman could become a research subject. The Drafting Committee carefully reviewed the issue of a "paternal consent" requirement for participation of pregnant women and has incorporated into this proposed rule changes which are responsive to the recommendation of the Task Force. The Presidential Advisory Council on HIV/AIDS subsequently addressed the matter of paternal consent during their December 1995 meeting, and recommended that the Secretary, HHS publish for public comment proposed regulations regarding participation of pregnant women in clinical trials, with a revision which will provide that the lack of a written consent from the father of the fetus will not disqualify a pregnant woman from participation in a federally funded clinical trial.

The Drafting Committee approved a proposed rule and recommended that the Assistant Secretary for Health and the Secretary, HHS, publish the proposal for public comment. The notice of proposed rulemaking fulfills that recommendation.

Proposed Changes to Subpart B

See Figure 1 and Table 1.

BILLING CODE 4140-01-P

Figure 1. Relationships Among Selected Terms Employed in Proposed Subpart B.

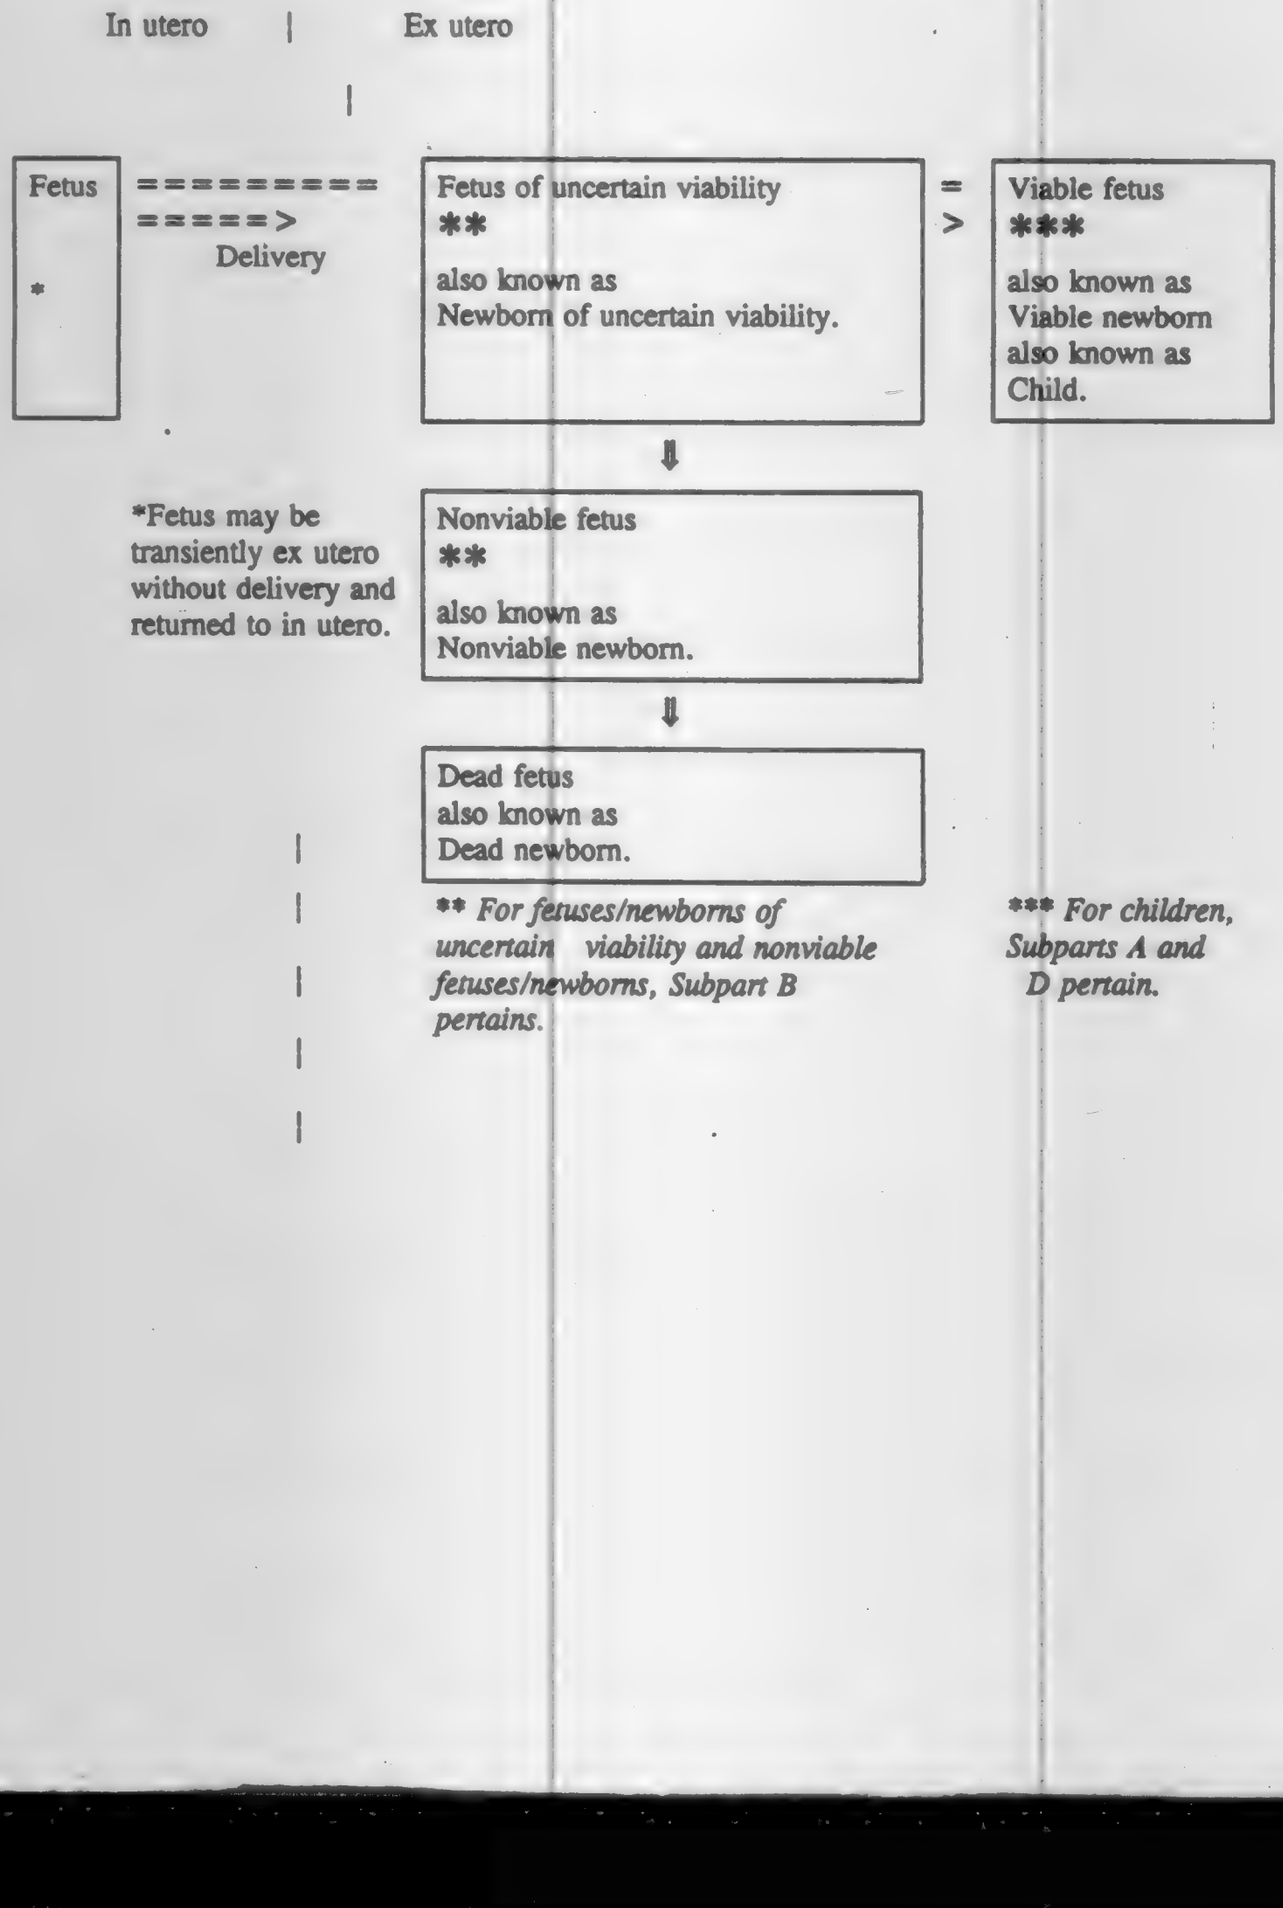

TABLE 1 - Current and Proposed 45CFR46, Subpart B

Content	Current Regulations	Proposed Changes
General limitations.	Appropriate studies on animals and nonpregnant individuals must have been completed. Individuals engaged in research will have no part in any decisions as to the timing, method, and procedures used to terminate the pregnancy, and in determining the viability of the fetus at the termination of the pregnancy. Inducements, monetary or otherwise, may not be offered to abort pregnancy.	*No substantive change.* Language is more explicit about preclinical and clinical studies and resulting data to assess potential risks. *No substantive change.* Redundant language deleted.
Regulatory presumption.	Presumption of *exclusion* of pregnant women from research. Language states "No activity... may be undertaken unless...".	Presumption of *inclusion* of pregnant women in research. Language states "Pregnant women may be involved if all the following conditions are met...".
Definitions:		
"Pregnancy"	From confirmation of implantation until expulsion or extraction of the fetus.	*No substantive change.* Defined as implantation until delivery.
"Fetus"	The product of conception from implantation to an ex utero determination of viability.	*No substantive change.* "[F]rom implantation" replaced with "during pregnancy." "[P]regnancy" defined as implantation until delivery.
"Newborn"	No definition in current rule.	Defined as a fetus after delivery.
"Viable" (current rule) = "viable fetus" or "viable newborn" (proposed)	A fetus that is able to survive, ex utero, to the point of independently maintaining heart beat and respiration.	*No substantive change.* Reference to "newborn" added and reference to "infant" deleted.
"Nonviable fetus" (current rule) = "nonviable fetus" or "nonviable newborn" (proposed)	A fetus, ex utero, which, although living, is not viable.	*No substantive change.* Reference to "newborn" added.
"Dead fetus" (current rule) = "dead fetus" or "dead newborn" (proposed)	A fetus ex utero which exhibits neither heartbeat, spontaneous respiratory activity, spontaneous movement of voluntary muscles, nor pulsation of the umbilical cord (if attached).	*No substantive change.* Reference to "newborn" added.
"Children"	No definition in current rule.	Defined as persons who have not attained the legal age for consent, consistent with 45CFR46, Subpart D.
"In vitro fertilization"	Fertilization of human ova outside of the body.	*No change.*
Research involving in vitro fertilization.	IRB review and approval required.	*No change.*
Exempt research.	No categories of research are exempt.	Exemptions at 46.101(b)(1)-(6) pertain.

Research involving pregnant women.	Any risk to the fetus must be the least possible risk for achieving the objectives of the research. Either (1) the purpose of the activity is to mee.. the health needs of the mother and the fetus will be placed at risk only to the minimum extent necessary to meet such needs, or (2) the risk to the fetus is minimal. Consent of the mother and consent of the father are required unless the purpose is to meet the health needs of the mother, or the father is unknown, unavailable, or the pregnancy resulted from rape.	*No substantive change.* This section combined with section on research involving fetuses. *No substantive change.* The risk to the fetus is not greater than minimal, or any risk to the fetus which is greater than minimal is caused solely by activities designed to meet the health needs of the mother or her fetus. Consent of the father is not required. Consent of the mother *or* her legally authorized representative is required. Mother must be informed of the reasonably foreseeable impact of the research on the fetus.
Research involving fetuses.	Any risk to the fetus must be the least possible risk for achieving the objectives of the research. Either (1) the purpose of the activity is to meet the health needs of the particular fetus and the fetus will be placed at risk only to the minimum extent necessary to meet such needs, or (2) the risk to the fetus imposed by the research is minimal and the purpose of the activity is the development of important biomedical knowledge which cannot be obtained by other means. Consent of the mother *and* consent of the father are required unless the father is unknown, unavailable, or the pregnancy resulted from rape.	*No substantive change.* This section combined with section on research involving pregnant women. *No substantive change.* The risk to the fetus is not greater than minimal, or any risk to the fetus which is greater than minimal is caused solely by activities designed to meet the health needs of the mother or her fetus. The requirement for IRB determination about purpose of activity is obviated by new requirement for mother's determination about participation in the activity after being informed about risk to fetus. Consent of the father is not required. Consent of the mother *or* her legally authorized representative is required. Mother must be informed of the reasonably foreseeable impact of the research on the fetus.
Research involving newborns of uncertain viability.	There may be no added risk from the research activity unless the purpose of the research is to enhance the possibility of survival of the particular fetus to the point of viability. Purpose must be the development of important biomedical knowledge which cannot be obtained by other means. Consent of legally competent mother and consent of legally competent father are required, unless the father is unknown, unavailable, or the pregnancy resulted from rape.	*No change.* Consent of the mother *or* the father is required, *or* that of a legally authorized representative of the mother *or* father if both parents are unavailable, temporarily incapacitated, or incompetent.
Research involving nonviable newborns.	The vital functions of the newborn may not be artificially maintained, the research may not terminate the heartbeat or respiration, and there may be no added risk of injury or death. Purpose must be the development of important biomedical knowledge which cannot be obtained by other means. Consent of legally competent mother and consent of legally competent father are required, unless the father is unknown, unavailable, or the pregnancy resulted from rape.	*No change.* Consent of the mother and father are required, *unless* one is unavailable, incompetent, or temporarily incapacitated. Consent of a legally authorized representative is prohibited.
Research involving viable newborns.	Requires that the research be conducted in accord with requirements of other Subparts.	*No substantive change.* An explicit reference to Subpart D, Additional Protections for Children, is added.

Provision for special review by experts.	Requires one or more HHS Ethical Review Boards (EAB) to render advice on issues raised by applications or proposals. Secretary has authority to establish classes of research that must be reviewed by the EAB.	Requirement for EAB deleted. Provides Secretary, HHS, with the discretion, after consulting, as needed with a panel of experts, to modify or waive requirements for specific projects or classes of research.

BILLING CODE 4140-01-C

Section 46.201 To what do these regulations apply?

Paragraph (a)—There is no substantive change to this paragraph. Consistent with recent revisions of other subparts of Part 46, references to grants and contracts are deleted to demonstrate that these regulations apply to all activities, intramural and extramural, which are conducted or supported by the Department.

Paragraph (b)—It is now proposed that the exemptions at § 46.101(b)(1)–(6) of Subpart A be applicable to Subpart B. These exemptions were proposed, discussed, and promulgated subsequent to the last substantive revision of Subpart B. The proposals, discussions, and promulgations of these exemptions were published in the **Federal Register** on: August 14, 1979 (exemptions first proposed, 44 FR 47688); January 26, 1981 (exemptions first promulgated, 46 FR 8366); March 22, 1982 (new exemption proposed, 47 FR 12276); March 4, 1993 (new exemption promulgated, 48 FR 9276); March 8, 1983 (exemptions added to Subpart D of 45 CFR 46, 48 FR 9814); June 3, 1986 (exemptions proposed for proposed Model Federal Policy for the Protection of Human Subjects, 51 FR 20204); November 10, 1988 (exemptions proposed in revised proposed Federal Policy for the Protection of Human Subjects, 53 FR 45661); and June 18, 1991 (exemptions revised in promulgation of Federal Policy for the Protection of Human Subjects, 56 FR 28003). The Department is particularly interested in comment on the inclusion of these exemptions.

Paragraph (c)—This provision extends the additions, exceptions, and provisions for waiver, as set forth in paragraphs (c) through (i) of § 46.101 of Subpart A of Part 46, to the regulations at Subpart B. The provision is identical to § 46.401(c) of the regulations providing additional protection for research involving children. It does not appear in the existing Subpart B only because the additions, exceptions, and provisions for waiver were not included in Subpart A at the time Subpart B was promulgated.

Paragraphs (c) through (i) of § 46.101 address: the authority of Department and Agency heads to determine the applicability of the regulations to specific research activities or classes of research activities (paragraphs (c), (d), and (i)); the relationship of the regulations to any Federal laws or regulations providing additional protection for human subjects (paragraph (e)); the relationship of the regulations to any state or local laws or regulations which provide additional protection for human subjects (paragraph (f)); the relationship of the regulations to foreign laws or regulations which provide additional protection for human subjects (paragraph (g)); and the authority of Department and Agency heads to determine the applicability of foreign procedures for the protection of human subjects which differ from the requirements of the regulations (paragraph (h)). Note that the proposed § 46.201(c) clarifies that the reference to State or local laws is intended to include the laws of federally recognized American Indian and Alaska Native Tribal Governments.

The authority for determinations by Department and Agency heads under those provisions and the recognition of Federal, State, local, and foreign laws and regulations that provide additional protection for human subjects can and should be applied to the research covered by Subpart B in the same manner as they apply to other research involving human subjects.

Section 46.202 Definitions

The text of the existing § 46.202, "Purpose," is unnecessary because it does not provide any substantive guidance. It is deleted in the proposed regulation. The absence of a "purpose" section is consistent with Subparts A and D of 45 CFR Part 46.

Definitions in existing § 46.203 are moved to § 46.202 in the proposed regulation. The definitions in the proposed regulation are substantively the same as those in the existing regulation; some language has been clarified or simplified and definitions of "newborn" and "children" are provided.

Paragraph (a) *"Secretary"*—no change

Paragraph (b) *"Pregnancy"*—The definition conforms with the standard medical definition of pregnancy. The phrase "expulsion or extraction of the fetus" has been replaced by the commonly used term "delivery" here and throughout Subpart B. The word "confirmation" of implantation has been deleted as unnecessary. (If a woman shows any presumptive sign of pregnancy, such as missed menses, she is considered pregnant until the results of a pregnancy test are negative or until delivery.)

Paragraph (c) *Fetus*—the definition has been simplified by adding the phrase "during pregnancy" and deleting reference to ex utero.

Paragraph (d) *Newborn*—the definition is new and equates to a fetus after delivery.

Paragraph (e) *Nonviable fetus or nonviable newborn*—the definition replaces the current definition of "nonviable fetus" which refers to fetuses ex utero. Both terms (fetus and newborn) are provided because some persons may prefer one term to the other depending on the length of the gestational period. No substantive change is intended.

Paragraph (f) *Dead fetus or dead newborn*—the definition replaces the definition of dead fetus which pertains to a fetus ex utero. Both terms (fetus and newborn) are provided because some persons may prefer one term to the other depending on the length of the gestational period. No substantive change is intended.

Paragraph (g) *Viable fetus or viable newborn*—the definition refers to fetuses after delivery and replaces the current definition which refers to fetuses ex utero. A viable fetus or a viable newborn is a child. Both terms (fetus and newborn) are provided because some persons may prefer one term to the other depending on the length of the gestational period. The meaning of viability is unchanged, and a reference to Subpart D is added.

Paragraph (h) "Children"—the definition in Subpart D is repeated in this subpart for ease of reference.

Paragraph (i) *"In vitro fertilization"*—no change.

Section 46.203 Duties of IRBs in Connection With Research Involving Pregnant Women, Human Fetuses, Newborns and Human in Vitro Fertilization

Definitions in existing § 46.203 are found in § 46.202 in the proposed regulation.

Definitions in existing § 46.203 are found in § 46.202 in the proposed regulation. There is no substantive change to this section; the language is more concise. The proposed § 46.203 would replace the existing § 46.205 regarding IRB duties, which is duplicative of language in Subpart A.

In assessing research involving pregnant women, IRBs must be attentive to the Department's objective that research it supports include pregnant women unless there are compelling reasons to exclude them. In other words, the presumption is one of inclusion, not exclusion.

Pregnant women are not a vulnerable population solely by virtue of pregnancy. IRBs should consider if proposed research has the potential to diminish or interfere with this population's ability to make a decision. That is, in its review, the IRB should note that the intent of "vulnerable" in Subpart A, section 46.111(a)(3) and (b) of these regulations, when applied to pregnant women, is not that pregnant women have less capacity to make autonomous decisions than men or non-pregnant women, but that sometimes the medical management of pregnancy has the potential to apply coercion to a woman due to her concerns for the health of the fetus. This may be particularly relevant in the case where a researcher views a planned research activity as potentially highly beneficial to a pregnant woman with a life-threatening illness or to a fetus and, therefore, the researcher believes that the potential benefit of the planned research should override the autonomy of a pregnant woman. The 1978 report of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research (the *Belmont Report*), and the resulting regulations in 45 CFR 46, stand in direct contrast to that position. *The Belmont Report* shall guide the interpretation of the regulations in section 46.203 so that a pregnant woman's decisionmaking autonomy is always preeminent.

Section 46.204 Research Involving Pregnant Women or Fetuses

The existing § 46.204 entitled "Ethical Advisory Boards" calls for the establishment of one or more standing EABs by the Secretary, HHS. These EABs were to have had broad expertise and advise the Secretary with regard to ethical issues raised by research activities covered by Subpart B. This proposed regulation deletes the text of existing § 46.204 (a)–(c) and proposes a provision for convening an ad hoc panel of expert consultants to review proposals for modification or waiver of the regulation which are raised by individual research proposals. (See proposed § 46.207). An EAB has not existed within the Department since 1980, and § 46.204(d), which required EAB review prior to HHS funding of human in vitro fertilization, was nullified June 10, 1993, by the NIH Revitalization Act of 1993, Pub. L. 103–43.

The obligations and requirements in existing §§ 46.206 (General limitations), 46.207 (Activities directed toward pregnant women as subjects) and 46.208 (Activities directed toward fetuses in utero as subjects), are combined into a single section in the proposed rule, § 46.204, for ease of reference.

From the standpoint of risk to mother or fetus, it is irrelevant whether research is "directed toward" the woman or directed toward the fetus, because research on either affects both. Thus, if a pregnant woman and her fetus are involved in research, regardless of whether she or her fetus is the object of the research, the protections should be essentially identical. Accordingly, the proposed regulation combines all relevant protections for pregnant women and fetuses into a single section and deletes any reference to the object of the research.

The proposed rule adds specificity to the current requirement for preclinical studies on animals and nonpregnant individuals, by calling for "scientifically" appropriate studies, including studies on pregnant animals, that provide data to assess potential risks (proposed § 46.204(a)).

The proposed risk threshold is unchanged. Pregnant women or fetuses may not be involved in research unless the risk to the fetus is not greater than minimal, except when the risk to the fetus is caused solely by research designed to meet the health needs of the mother or the fetus (proposed § 46.204(b)). The existing requirement that any risk be the least possible risk for achieving the objectives of the research is also unchanged in the proposed regulation.

The proposed regulation includes a reminder (proposed § 46.204(f)) that research involving pregnant children is subject to the requirements for research involving children in 45 CFR Part 46, Subpart D, Additional DHHS Protections for Children Involved as Subjects in Research.

The existing prohibition on the involvement of research personnel in decisions regarding the timing, method, or procedures to terminate a pregnancy, and in determinations of viability is unchanged (proposed § 46.204(g)). The phrase "terminate the pregnancy" is replaced by "abort" in the proposed rule. The existing prohibition on inducements to terminate pregnancy is strengthened by deleting the phrase "for purposes of the activity" (i.e., research), thus barring any inducement to abortion regardless of the purpose (proposed § 46.204(h)).

The proposed regulation strengthens the existing requirements for informed consent by requiring that the pregnant woman be informed of the reasonably foreseeable impact on the fetus, irrespective of the focus of the research (proposed § 46.204(d)).

Current regulations require, in most instances, that both parents consent and be legally competent. The Department concurs with recent recommendations of the Presidential Advisory Council on HIV/AIDS and the National Task Force on AIDS Drug Development regarding paternal consent and finds that the fetus is best served by eliminating unnecessary barriers to consent for research that has the possibility of benefitting the fetus. Therefore, the proposed regulation modifies the parental consent requirements by permitting research based on the consent of the mother or her legally authorized representative (proposed § 46.204(e)).

The existing regulation (§§ 46.207(b) and 46.208(b)) permits research involving pregnant women and fetuses only if the mother and father are legally competent and have given their informed consent. The father's consent is not required under certain circumstances: if his identity or whereabouts cannot reasonably be ascertained, if he is not reasonably available, or if the pregnancy resulted from rape. Nor is the father's consent required if the purpose of the research is to meet the health needs of the mother.

When research is directed toward the health needs of the fetus, there is currently no exception to the paternal consent requirement equivalent to the one for the health needs of the mother. Thus, under the existing regulation, there are instances in which research intended to benefit the fetus may not occur because one parent refuses, or because one parent is not legally competent.

The parental consent rules in the existing regulation are based in part on the studies and recommendations of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research. The history of the Commission's consideration of the issue and the resulting regulation is pertinent to the proposed modification. In its Research on the Fetus: Report and Recommendations (May 1975), the Commission proposed that: (1) only the woman's consent be required when the research was directed toward her health needs; and (2) in the other kinds of research, the woman's consent be required and be sufficient if the father does not object (page 73). The final rule published on August 8, 1975 as 45 CFR Part 46, Subpart B, Additional DHHS Protections Pertaining to Research, Development, and Related Activities Involving Fetuses, Pregnant Women, and Human In Vitro Fertilization (the existing rule) incorporated the first part of this recommendation, but with respect to research not directed toward the mother's needs it went beyond the recommendation by requiring explicit consent from the father (with the exceptions described above). The rationale was one of practical implementation: the most effective way of determining that the father did not object was to request his consent (40 FR 33526–33527 (1975)).

The Commission looked again at the role of parental consent in its 1976 report, Research Involving Children: Report and Recommendations. It recommended that: (1) the permission [1] of only one parent be required for research involving children that either was not greater than minimal risk, or presented the prospect of direct benefit to the child; and (2) the permission of both parents be required for any other, more problematic, research (pages 12–14). This recommendation was incorporated into 45 CFR Part 46, Subpart D, Additional DHHS Protections for Children Involved as Subjects in Research.

The Commission's recommendations regarding parental consent differ for fetuses and for children despite the similarities when they are subjects of research. The similarities are striking: neither the fetus nor the child (especially an infant) can give consent; the fetus and the child are both vulnerable; both the mother and father have an interest in and legal responsibility for their fetus or their child. Yet the existing requirements for parental consent, based largely on the Commission's recommendations, treat children and fetuses differently. The Commission did not examine or explain the inconsistency. It acknowledged that its report about the fetus was hurried, was its first task, and was done out of sequence (before first examining research in general) (page 61).

In actual experience, one approach to parental consent has presented no problems, the other several problems. Since the regulation for research on children (Subpart D) was issued in 1983, there has been no reported abuse resulting from the policy of requiring only one parent's permission for a child's participation in research that presents no greater than minimal risk or may be of direct benefit to the child or infant. Although both parents have an interest in and responsibility for their child, no parent has been reported to object that research may be conducted with only one parent's permission. Since the regulation governing research on the fetus (Subpart B) was issued in 1975, however, the required consent of both parents for fetal research has posed some difficulties. For example, in the recent trial of the drug zidovudine (AZT) in pregnant women with HIV infection (showing that the drug reduced the percentage of newborns infected with HIV), the requirement to obtain the father's consent was an obstacle to the participation of some women. Some fathers, while "available" in some literal sense, did not wish to be involved with the woman or her pregnancy in any way. In some situations, asking for the father's consent introduced the possibility of retaliation against the pregnant woman by the father. The result in some instances was that fetuses who could benefit from participating in research were excluded when the paternal consent required by the existing regulation could not be obtained.

The barriers to participation posed by the requirement that both parents consent, and the experience with consent by one parent under the regulation for research on children, suggest that accepting consent by one parent provides effective protection for the interests of the fetus and enhances the opportunities for the fetus to benefit from research. In light of the physical realities of pregnancy, any research involving or directed toward the fetus necessarily involves the pregnant woman, and her consent must be sought. Absent her consent, the research could not take place even if the father did consent. Thus, if the consent of one parent is to be sufficient, that parent must be the mother.

The Department recognizes the father's likely interest in and responsibility for the fetus and strongly encourages paternal involvement in decision-making with respect to offspring. The father can normally be assumed to have as much interest, feeling, and concern for the future well-being of the fetus as the mother.

The basic requirements for consent to research in Subpart A offer a framework for participation of the father. Consent may be sought only under circumstances that provide sufficient opportunity to consider whether or not to participate (§ 46.116). In considering whether to participate, many women would wish to consult with the father. In other situations, to seek the consent of the father could be detrimental to the mother or could be an obstacle to a potential therapy for a fetus. The pregnant woman is in the best situation to determine whether she should consult with the father.

Thus, the Department proposes to modify the regulation to accept consent from the mother alone as a sufficient basis for participation of the fetus in the limited classes of research permitted under this subpart, i.e., minimal risk research or research designed to meet the health needs of the mother or her fetus.

A similar barrier to participation is created by the requirement that both parents be legally competent before their consent can be accepted for a fetus to participate in research. Under the other subparts of 45 CFR Part 46 (including the provisions governing research on children (§ 46.408(b))) consent from a legally authorized representative is adequate for participation in research. Thus, it is proposed that consent from a legally authorized representative of the mother could be used as a substitute for the mother's consent (proposed § 46.204(e)). This permits participation in research, including research directed towards the health needs of the pregnant woman or her fetus, even though the pregnant woman is a minor but not emancipated under state law, or is legally incompetent for other reasons. The authorized representative could in many instances be the father.

The proposed changes would establish a consent process that has choice about the best interests of the fetus as its principal objective. The rights and responsibilities of parents and families are recognized by requiring appropriate review and parental involvement.

[1] The term "permission" as used by the Commission and in Subpart D has the same meaning as "consent" for the purposes of this discussion.

Section 46.205 Research Involving Newborns of Uncertain Viability, Nonviable Newborns, and Viable Newborns

It is proposed that the existing § 46.209 be replaced by this section. A number of clarifications are made and the consent requirement is modified to remove barriers to potentially therapeutic research. The proposed title refers to newborns, rather than "fetuses ex utero," and reflects more clearly the three types of situations that may arise after delivery: (a) Viability of the newborn may not be known, (b) the newborn may be known to be nonviable, or (c) the newborn may be known to be viable. The term "activity" is changed to "research" for consistency with other portions of the subpart and to reflect that the regulation addresses risks associated with research activities in contrast to those associated with therapeutic activities that are part of the accepted standard of care.

a. Proposed § 46.205(a) acknowledges that there is sometimes a period of uncertainty about the viability of a newborn. In accordance with section 498 of the Public Health Service Act, 42 U.S.C. 289g, the proposed section limits research during this period to either research that evaluates activities designed to enhance the probability of survival of that particular newborn to viability or risk free research, the purpose of which is the development of important biomedical knowledge which cannot be obtained by other means. As has been the case under the existing regulations, the application of this condition will permit research activities that, in and of themselves, pose no risk to the newborn, such as observational research using monitors or other devices that are already in place as part of normal therapeutic practice, if the purpose of the research is the development of important biomedical knowledge which cannot be obtained by other means.

It is proposed that the consent requirement for research activities on newborns of uncertain viability be changed from the consent of both parents to the consent of either parent, and that the competency requirement for mother and father, in the existing § 46.209(d), be deleted. It is further proposed that if neither parent is able to consent for the reasons given, then the consent of a legally authorized representative of either is sufficient. This less restrictive consent requirement is appropriate for the limited scope of research activities that either must enhance the possibility of survival to viability or pose no risk and be directed toward the development of important biomedical knowledge that cannot be obtained by other means.

The existing regulation, while generally requiring consent from both parents, also recognizes that there may be circumstances when it is not reasonable to require the father's consent; in those circumstances, it allows consent from only one parent, the mother. For research involving the fetus, the mother must clearly be the one to consent. After delivery, however, if consent is to be required from only one parent, HHS proposes that it is appropriate to allow for consent from either the mother or the father. In formulating the new requirement, it is recognized that there may also be circumstances when it is not possible to obtain the mother's consent, (e.g., the mother is under general anesthesia as a result of a surgical delivery). Because of the critical nature of life-saving interventions performed on newborns of uncertain viability, and the limited time available to make decisions regarding participation in potentially beneficial research to enhance the possibility of their survival, the proposed regulation also allows for consent by a legally authorized representative, if needed.

b. With regard to research on nonviable newborns, the proposed regulation is more restrictive. It does not permit a legally authorized representative to consent, and the provisions for IRB waiver of informed consent in Subpart A of 45 CFR Part 46 are not authorized. Research involving nonviable newborns will continue to be strictly limited (i.e., the proposed regulation retains the requirement that the proposed research poses no added risk to the fetus of suffering injury or death and the purpose of the research activity be the "development of important biomedical knowledge that cannot be obtained by other means," and the prohibition against the use of artificial life support or research that would terminate heartbeat or respiration).

In the existing regulation, the consent of both parents is required for research on the nonviable newborn unless, for the reasons given, consent of the father cannot reasonably be obtained then the mother's consent will suffice. In the proposed regulation, the consent of both parents is also required, but if either parent is unable to consent, then the legally effective consent of the other parent will suffice.

The requirement in the existing regulation that both parents be legally competent is replaced by a requirement that at least one parent be competent and provide consent. If neither parent is able to give consent, whether it is because of incompetence or because of some other reason, the research will not be allowed.

c. No substantive changes are proposed to the existing provisions addressing research involving viable newborns. A reference to Subpart D is included.

Section 46.206 Research Involving, After Delivery, the Placenta, the Dead Newborn, or Fetal Material

It is proposed that the existing § 46.210 be replaced by this section. No substantive changes are proposed to the current provisions. The intent of the existing regulation, that *all* placentas after delivery are covered by this section, is clarified.

The Department notes that for cultural reasons, many ascribe special value and significance to the placenta. Further, State, local, or tribal jurisdictions that have laws or regulations concerning research involving the placenta do not necessarily distinguish between the placentas of living or dead fetuses or newborns.

Paragraph (b) of § 46.206 is proposed as a reminder that if, in the course of using the placenta, the dead newborn, or fetal material, a living person (e.g., the mother) is identified in the research, then that living person (e.g., the mother) is a research subject (see definition of human subject at 45 CFR 46.102(f)). In that case, the other subparts of 45 CFR Part 46 are applicable and the researcher is responsible for obtaining any necessary review, assurance, approval, and informed consent.

Section 46.207 Modification or Waiver of Specific Requirements

This proposed section, to replace the existing § 46.211, is parallel to the waiver provisions of Subpart C at § 46.306(a)(2)(C) and (D) and Subpart D at § 46.407. This provision allows the Secretary, HHS, to modify or waive requirements after consultation with appropriate experts and opportunity for public review and comment. In making such a decision, the Secretary must consider whether the risks to the subjects are so outweighed by the sum of the benefits to the subjects and the importance of the knowledge to be gained as to warrant the modification or waiver.

The proposed rule removes the requirement for an EAB, consistent with the NIH Revitalization Act of 1993 (Public Law 103–43).

The following statements are provided for the information of the public.

Executive Order 12866

Executive Order 12866 requires that all regulatory actions reflect consideration of the costs and benefits they generate, and that they meet certain standards, such as avoiding the imposition of unnecessary burdens on the affected public. If a regulatory action is deemed to fall within the scope of the definition of the term "significant regulatory action" contained in § 3 (f) of the Order, pre-publication review by the Office of Management and Budget's (OMB's) Office of Information and Regulatory Affairs (OIRA) is necessary. OMB deemed this proposed rule a "significant regulatory action," as defined under Executive order 12866. Therefore, the proposed rule was submitted to OIRA for review prior to its publication in the **Federal Register**.

Regulatory Flexibility Act

This proposed rule primarily affects individual persons. None of the changes proposed will have the effect of imposing costs on universities, other research institutions, or other small entities. Therefore, the Secretary certifies that this rule will not have significant impact on a substantial number of small entities and that preparation of an initial regulatory flexibility analysis is not required.

Paperwork Reduction Act

This proposed rule does not contain any new information collection requirements which are subject to Office of Management and Budget (OMB) approval under the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

List of Subjects in 42 CFR Part 46

Health—clinical research, Medical research.

Dated: April 3, 1997.

Harold E. Varmus,

Director, National Institutes of Health.

Approved: September 16, 1997.

Donna E. Shalala,

Secretary.

Editorial Note: This document was received at the Office of The Federal Register May 13, 1998.

For reasons presented in the preamble, it is proposed to amend part 46 of title 45 of the Code of Federal Regulations as set forth below.

PART 46—PROTECTION OF HUMAN SUBJECTS

1. The authority citation for 45 CFR part 46 would be revised to read as follows:

Authority: 5 U.S.C. 301; 42 U.S.C. 289(a).

2. Subpart B of 45 CFR part 46 would be revised to read as follows:

Subpart B—Additional DHHS Protections for Pregnant Women, Human Fetuses, and Newborns Involved as Subjects in Research, and Pertaining to Human In Vitro Fertilization

Sec.

46.201 To what do these regulations apply?
46.202 Definitions.
46.203 Duties of IRBs in connection with research involving pregnant women, human fetuses, newborns, and human in vitro fertilization.
46.204 Research involving pregnant women or fetuses.
46.205 Research involving newborns of uncertain viability, nonviable newborns, and viable newborns.
46.206 Research involving after delivery, the placenta, the dead newborn, or fetal material.
46.207 Modification or waiver of specific requirements.

§ 46.201 To what do these regulations apply?

(a) Except as provided in paragraph (b) of this section, this subpart applies to all research involving pregnant women, human fetuses, and newborns as subjects, and to all research involving the in vitro fertilization of human ova, conducted or supported by the Department of Health and Human Services. This includes all research conducted in Department facilities by any person and all research conducted in any facility by Department employees.

(b) The exemptions at § 46.101(b) (1) through (6) are applicable to this subpart.

(c) The additions, exceptions, and provisions for waiver as they appear in § 46.101(c) through (i) are applicable to this subpart. Reference to State or local laws in this subpart and in § 46.101(f) is intended to include the laws of federally recognized American Indian and Alaska Native Tribal Governments.

§ 46.202 Definitions.

The definitions in § 46.102 shall be applicable to this subpart as well. In addition, as used in this subpart:

(a) *Secretary* means the Secretary of Health and Human Services and any other officer or employee of the Department of Health and Human Services (DHHS) to whom authority has been delegated.

(b) *Pregnancy* encompasses the period of time from implantation until delivery. A woman shall be assumed to be pregnant if she exhibits any of the pertinent presumptive signs of pregnancy, such as missed menses, until the results of a pregnancy test are negative or until delivery.

(c) *Fetus* means the product of conception during pregnancy until a determination is made after delivery that it is viable.

(d) *Newborn* is a fetus after delivery.

(e) *Nonviable fetus* or *nonviable newborn* means a newborn or fetus after delivery that, although living, is not viable.

(f) *Dead fetus* or *dead newborn* means a newborn or fetus after delivery which exhibits neither heartbeat, spontaneous respiratory activity, spontaneous movement of voluntary muscles, nor pulsation of the umbilical cord (if still attached).

(g) *Viable fetus* or *viable newborn* means a newborn that is able to survive (given the benefit of available medical therapy) to the point of independently maintaining heartbeat and respiration. The Secretary may from time to time, taking into account medical advances, publish in the **Federal Register** guidelines to assist in determining whether a fetus or newborn is viable for purposes of this subpart. If a newborn is viable then it is a child, and subpart D of this part is applicable.

(h) *Children* are persons who have not attained the legal age for consent to treatments or procedures involved in the research, under the applicable law of the jurisdiction in which the research will be conducted. (See definition of "viable fetus" or "viable newborn" at § 46.202 (g)).

(i) *In vitro fertilization* means any fertilization of human ova which occurs outside the body of a female, either through admixture of donor human sperm and ova or by any other means.

§ 46.203 Duties of IRBs in connection with research involving pregnant women, human fetuses, newborns, and human in vitro fertilization.

In addition to other responsibilities assigned to IRBs under this part, each IRB shall review research covered by this subpart and approve only research which satisfies the conditions of all applicable sections of this subpart and the other subparts of this part.

§ 46.204 Research involving pregnant women or fetuses.

Pregnant women or fetuses may be involved in research if all of the following conditions are met:

(a) Where scientifically appropriate, preclinical studies, including studies on pregnant animals, and clinical studies, including studies on nonpregnant women, have been conducted and provide data for assessing potential risks to pregnant women and fetuses;

(b) The risk to the fetus is not greater than minimal, or any risk to the fetus which is greater than minimal is caused solely by activities designed to meet the health needs of the mother or her fetus;

(c) Any risk is the least possible for achieving the objectives of the research.

(d) The woman is fully informed regarding the reasonably foreseeable impact of the research on the fetus (or a resultant child);

(e) The woman's consent or the consent of her legally authorized representative is obtained in accord with the informed consent provisions of subpart A of this part;

(f) For pregnant children, assent and permission are obtained in accord with the provisions of subpart D of this part;

(g) Individuals engaged in the research will have no part in:

(1) Any decisions as to the timing, method, or procedures used to abort a pregnancy, or

(2) Determining the viability of a newborn; and

(h) No inducements, monetary or otherwise, will be offered to abort a pregnancy.

§ 46.205 Research involving newborns of uncertain viability, nonviable newborns, and viable newborns.

(a) *Newborns of uncertain viability.* After delivery and until it has been ascertained whether or not a newborn is viable, a newborn may not be involved as a subject in research covered by this subpart unless both of the conditions in paragraphs (a)(1) and (2) of this section are met:

(1) The purpose of the research is:

(i) To enhance the possibility of survival of the particular newborn to the point of viability, or

(ii) The development of important biomedical knowledge which cannot be obtained by other means and there will be no risk to the newborn resulting from the research, and

(2) The legally effective informed consent of the mother or the father of the newborn or, if neither parent is able to consent because of unavailability, incompetence, or temporary incapacity, the legally effective informed consent of the mother's or the father's legally authorized representative is obtained in accord with Subpart A of this part.

(b) *Nonviable newborns.* After delivery, a nonviable newborn may not be involved as a subject in research covered by this subpart unless all of the following conditions are met:

(1) Vital functions of the newborn will not be artificially maintained;

(2) The research will not terminate the heartbeat or respiration of the newborn;

(3) There will be no added risk to the fetus of suffering injury or death resulting from the research and the purpose of the research is the development of important biomedical knowledge that cannot be obtained by other means; and

(4) The legally effective informed consents of both the mother and the father of the newborn are obtained in accord with subpart A of this part, except that the waiver and alteration provisions of § 46.116 (c) and (d) do not apply. However, if either parent is unable to consent because of unavailability, incompetence, or temporary incapacity, the informed consent of the other parent of a nonviable newborn will suffice to meet the informed consent requirement of this paragraph (b)(4). The consent of a legally authorized representative of either or both of the parents of a nonviable newborn will not suffice to meet the requirements of this paragraph (b)(4).

(c) *Viable newborns.* A viable newborn is a child and may be included as a subject in research only to the extent permitted by and in accord with the requirements of Subparts A and D of this part.

§ 46.206 Research involving, after delivery, the placenta, the dead newborn, or fetal material.

(a) Research involving, after delivery, the placenta; the dead newborn; macerated fetal material; or cells, tissue, or organs excised from a dead newborn shall be conducted only in accord with any applicable Federal, State or local laws and regulations regarding such activities.

(b) If information associated with material described in paragraph (a) of this section is recorded for research purposes in a manner that living persons can be identified, directly or through identifiers linked to those persons, those persons are research subjects and all pertinent subparts of this part are applicable.

§ 46.207 Modification or waiver of specific requirements.

The Secretary may modify or waive specific requirements of this subpart for specific research projects or classes of research, after consultation with a panel of experts in pertinent disciplines and after opportunity for public review and comment, including a public meeting. In making a decision to modify or waive, the Secretary will consider whether the risks to the subjects are so outweighed by the sum of the benefits to the subjects and the importance of the knowledge to be gained as to warrant such modification or waiver and that such benefits cannot be gained except through a modification or waiver. Any such modifications or waivers will be published as notices in the **Federal Register**.

Department of Education

Systems-Change Projects To Expand Employment Opportunities for Individuals With Mental or Physical Disabilities, or Both, Who Receive Public Support; Notice

DEPARTMENT OF EDUCATION

RIN 1820–ZA11

Systems-Change Projects To Expand Employment Opportunities for Individuals With Mental or Physical Disabilities, or Both, Who Receive Public Support

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Notice of proposed priority and definitions for fiscal year (FY) 1998 and subsequent years.

SUMMARY: The Secretary proposes a priority for fiscal year (FY) 1998 and subsequent years under section 12(a)(3) of the Rehabilitation Act of 1973, as amended (the Act) (29 U.S.C. 762(b)(3)), authorizing the conduct of special projects and demonstrations in carrying out the purposes of the Act. The priority would support five-year projects to expand employment outcomes for individuals with mental or physical disabilities, or both, who receive public support. The priority is intended to enhance collaboration in existing systems to increase competitive employment opportunities for individuals with disabilities who are participants in public support programs funded by Federal, State, and local agencies.

DATES: Comments must be received by the Department on or before June 19, 1998.

ADDRESSES: All comments concerning this proposed priority should be addressed to Dr. Thomas Finch, U.S. Department of Education, 600 Independence Avenue, SW., Room 3038, MES Building, Washington, DC. 20202–2650. Comments may also be sent through the Internet to: comments@ed.gov

You must include the term "Systems-Change Projects" in the subject line of your electronic message.

FOR FURTHER INFORMATION CONTACT: Pedro Romero, U.S. Department of Education, 600 Independence Avenue, SW., Room 3316, MES Building, Washington, DC. 20202–2650. Telephone: (202) 205–9797. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

Individuals with disabilities may obtain this document in an alternate format (e.g., Braille, large print, audiotape, or computer diskette) on request to the contact person listed in the preceding paragraph.

Electronic Access to This Document

Anyone may view this document, as well as all other Department of Education documents published in the **Federal Register**, in text or portable document format (pdf) on the World Wide Web at either of the following sites:

http://ocfo.ed.gov/fedreg.htm
http://www.ed.gov/news.html

To use the pdf you must have the Adobe Acrobat Reader Program with Search, which is available free at either of the previous sites. If you have questions about using the pdf, call the U.S. Government Printing Office toll free at 1–888–293–6498.

Anyone may also view these documents in text copy only on an electronic bulletin board of the Department. Telephone: (202) 219–1511 or, toll free, 1–800–222–4922. The documents are located under option G—Files/Announcements, Bulletins and Press Releases.

Note: The official version of this document is the document published in the **Federal Register**.

Goals 2000: Educate America Act

The Goals 2000: Educate America Act (Goals 2000) focuses the Nation's education reform efforts on the eight National Education Goals and provides a framework for meeting them. Goals 2000 promotes new partnerships to strengthen schools and expands the Department's capacities for helping communities to exchange ideas and obtain information needed to achieve the goals.

This proposed priority would address the National Education Goal that every adult American, including individuals with disabilities, will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.

The Secretary will announce the final priority in a notice in the **Federal Register**. The final priority will be determined by responses to this notice, available funds, and other considerations. Funding of particular projects depends on the availability of funds, the nature of the final priority, and the quality of the applications received. The publication of this proposed priority does not preclude the Secretary from proposing or funding additional priorities, subject to meeting applicable rulemaking requirements.

Note: This notice of proposed priority does *not* solicit applications. In any year in which the Secretary chooses to use this proposed priority, the Secretary invites applications through a notice in the **Federal Register**.

Priority

Background

According to the 1994 Harris Survey of Americans with Disabilities, two-thirds of individuals with disabilities between the ages of 16 and 64 are not working. Many of these individuals receive financial support or services through programs funded by Federal, State, and local agencies. Examples of these programs include Temporary Aid to Needy Families (TANF), Supplemental Security Income (SSI), Social Security Disability Income (SSDI), Medicaid (including Medicaid waiver programs), Medicare, subsidized housing, and food stamps.

Statistical data reveal that of the 32 percent of adult recipients of Aid to Families with Dependent Children (AFDC) who had a work or functional disability, 15 percent were able to work despite their functional limitations (National Health Interview Survey on Disability, U.S. Department of Health and Human Services, 1994). Studies conducted in Kansas and Washington indicate that up to 60 percent of the current TANF recipients in those States have some type of disability. At the same time, the TANF program requires recipients to work and also limits the length of TANF assistance—recent developments that further underscore the need to reduce barriers to employment confronted by individuals with disabilities on public support.

In addition, the proportion of individuals with disabilities receiving public support through SSI or SSDI continues to increase. Over the past decade, the total number of SSI and SSDI beneficiaries has doubled, and cash payments for these individuals increased to over $55 billion (World Institute on Disability, 1996). Social Security recipients often do not work since they would lose their Social Security and Medicaid benefits if their earnings increased beyond a threshold level. Thus, few individuals leave the Social Security system. New adult SSI recipients receive benefits for an average of 10 years, whereas individuals who receive SSI benefits as children remain on the rolls for an average of approximately 27 years (Rupp and Scott, 1995).

Many individuals participating in public support programs, including the programs discussed previously, are unable to obtain the services or supports they need to become competitively employed and achieve economic independence. Employment training

programs that serve the general population, as well as employers themselves, are often unable to meet the specialized needs of these individuals. In addition, individuals with disabilities who are not eligible for State vocational rehabilitation services, or who do not believe that they need a comprehensive rehabilitation program, are still unlikely to receive work-related services from employment training programs that serve the general population. Consequently, many individuals with disabilities who are capable of working essentially "fall between the cracks." The Secretary expects that the models developed under the proposed priority will demonstrate how employment training and other related programs can more effectively coordinate services so that individuals with disabilities can obtain employment.

Seventy-nine percent of unemployed individuals with disabilities have indicated that they would prefer to be working (Harris Survey, 1994). The combination of the high costs associated with living with a disability, work-related expenses, and the reduction in public supports available to persons once they become employed often dissuade individuals with disabilities from pursuing competitive work. Some of the specific barriers to the employment that individuals with disabilities commonly confront include—

- Lack of adequate health insurance (e.g., individuals' fear of losing public health care coverage, inability to obtain private medical insurance, or limited access to treatment and prescription services);
- Underutilization of existing work incentives from Social Security and other State and local agencies (e.g., Plan for Achieving Self Support (PASS), and Impairment Related Work Expenses, section 1619a and b of the Social Security Act);
- Lack of affordable, accessible housing and transportation;
- Insufficient education and training services;
- Lack of child care;
- Inadequate supports for employees with disabilities (e.g., onsite and offsite job accommodations and long-term follow-along services); and
- Inadequate supports for employers (e.g., incentives for hiring, retaining, and promoting individuals with disabilities and technical assistance and follow-along consultation to assist employers in addressing the ongoing needs of employees with disabilities and to clarify employer misperceptions and misinformation).

Lack of information and coordination of public support programs can cause program-related barriers that inhibit individuals with disabilities from effectively using available services. In many instances, individuals with disabilities are simply unaware of existing employment-related programs, work incentives, or available services. Another common barrier is the lack of coordination between separate programs with separate eligibility criteria even though the same individuals often require services from each program. The Secretary expects projects to address these types of program-related barriers, as well as any other type of barrier that impedes individuals with disabilities from becoming employed and self-sufficient.

There is a critical need for greater coordination between multiple public programs that support individuals with disabilities that would foster increased economic self-sufficiency and a more efficient use of public resources. In an effort to address this need, the Secretary proposes the following priority in order to provide a framework for assisting individuals with disabilities to reduce their reliance on various public support programs and obtain and maintain employment in the competitive labor market.

The requirements in the priority are designed to facilitate systems-change projects that eliminate barriers to employment for individuals with disabilities and are based on existing studies and reports, the experiences of State vocational rehabilitation agencies in working with individuals participating in other public support programs, and on information provided by other Federal agencies that administer disability-related programs. These Federal agencies were particularly helpful in assisting the Secretary to identify the employment-related barriers confronted by individuals with disabilities that the Secretary proposes to target through this priority and to identify the types of State agencies whose participation in the project would be most critical to eliminating those barriers. The identified State agencies would serve as members of a consortium that the systems-change project would establish under paragraph (A) of the priority.

The Secretary emphasizes that the model systems-change projects that would be supported under this priority are part of a larger effort on the part of the Federal Government to create a coordinated and aggressive national policy to reduce the unemployment rate of individuals with disabilities and to assist those individuals in obtaining competitive jobs. This effort is directly reflected in Executive Order 13078, signed on March 13, 1998, entitled "Increasing Employment of Adults With Disabilities" (63 FR 13111, March 18, 1998). For example, Executive Order 13078, in part, calls for an analysis of existing programs and policies to determine what modifications and innovations may be necessary to remove work-related barriers experienced by individuals with disabilities; the development and recommendation of options for eliminating barriers to health insurance coverage for those with disabilities; and an analysis of work-related youth programs and the outcomes of these programs for young people with disabilities. The Secretary proposes the following priority as one means of addressing the purposes of Executive Order 13078. As other Federal agencies design and carry out activities in response to the Executive order, it is expected that many of those activities will complement the systems-change projects funded under this priority.

The Secretary also emphasizes the need for projects supported under this priority to begin implementing strategies for removing barriers early in the project period in order for the project to have a measurable effect on the rate by which individuals with disabilities become competitively employed. For that reason, the Secretary expects project recipients to work with Rehabilitation Services Administration staff to ensure that planning steps, including development of partnership agreements and, if appropriate, submission of Medicaid waiver requests under paragraph (C) of the priority, are promptly completed and that projects begin implementing their barrier-removal strategies as soon as possible.

The purpose of the proposed absolute priority is to establish five-year model demonstration projects that stimulate and advance systems-change in order to expand employment outcomes for individuals with mental or physical disabilities, or both, who are participants in Federal, State, and local public support programs (e.g., TANF, SSI, SSDI, Medicaid, Medicare, subsidized housing, and food stamps, etc.)

Absolute Priority

Under 34 CFR 75.105(c)(3) and section 12(a)(3) of the Act, the Secretary proposes to give an absolute preference to applications that meet the following priority. The Secretary proposes to fund under this competition only applications that meet this absolute priority:

A. General Requirements for Applicants

Applicants under this priority shall satisfy the following requirements:

(1) Applicants shall form a consortium of, at a minimum, the State vocational rehabilitation agency, the State welfare agency, the State educational agency, the State agency responsible for administering the Medicaid program, and an agency administering an employment or employment training program supported by the U.S. Department of Labor. Additional entities (e.g., public and private nonprofit organizations) that could effectively assist in removing barriers to employment for individuals with disabilities also may be included as part of the consortium.

(2) The members of the consortium shall either designate one of their members to apply for the grant or establish a separate, eligible legal entity to apply for the grant. The designated applicant shall serve as the grantee and be legally responsible for the use of all grant funds, overall fiscal and programmatic oversight of the project, and for ensuring that the project is carried out by consortium members in accordance with Federal requirements.

(3) Consortium members shall be substantially involved in the development of the application. Each consortium member's advisory council, if the member has such a council, shall also participate in the development of the application.

(4) The members of the consortium shall enter into an agreement that details the activities that each member plans to perform and that binds each member to the statements and assurances included in the application. Each member is legally responsible for carrying out the activities it agrees to perform and for using the funds that it receives under the agreement in accordance with Federal requirements that apply to the grant. The agreement must be submitted as part of the application.

(5) The application submitted under this priority also must identify the specific locality or region that would be served by the project.

B. Project Objectives

Projects supported under this priority must—

(1) Identify systemic barriers, including State or local agency policies, practices, procedures, or rules that inhibit individuals with disabilities who are participants in public support programs from becoming employed.

(2) Develop and implement replicable strategies to remove identified barriers, including, at a minimum, strategies for—

(a) Establishing effective collaborative working relationships among project consortium members and their partners as described in paragraph (C)(1) of this priority (e.g., providing interagency staff training and technical assistance on program requirements and services or collaboratively using labor market and job vacancy information);

(b) Establishing coordinated service delivery systems (e.g., common intake and referral procedures, customer databases, and resource information) and developing innovative services and service approaches that address service gaps (e.g., developing employee and employer support networks);

(c) Improving access to health insurance for individuals with disabilities who become employed;

(d) Increasing the use of existing resources by State and local agencies (e.g., Medicaid waivers, Home Community Based Services waivers, Job Training Partnership Act income exemptions, and work incentive provisions such as Plan for Achieving Self Support);

(3) Design and implement an internal evaluation plan for which—

(a) The methods of evaluation are thorough, feasible, and appropriate to the goals, objectives, and outcomes of the project;

(b) The methods of evaluation provide for examining the effectiveness of project implementation strategies;

(c) The methods of evaluation include the use of objective performance measures that are clearly related to the intended outcomes of the project and will produce quantitative and qualitative data to the extent possible;

(d) The methods of evaluation will provide performance feedback and permit periodic assessment of progress toward achieving intended outcomes; and

(e) The evaluation will provide guidance about effective strategies suitable for replication or testing in other settings; and

(4) Disseminate information on effective systems-change approaches developed under these projects to Federal, State, and local stakeholders and facilitate the use of systems-change models in other geographic areas. As examples, consortia may make presentations before national, State, or local conferences, consult with and provide technical assistance to other States or localities, develop Internet web sites, and distribute project publications.

C. Project Requirements

In carrying out the priority, the projects must—

(1) Develop partnership agreements, as described under DEFINITIONS, with the local district offices of the Social Security Administration; the State agency or agencies responsible for mental retardation, developmental disabilities, and mental health services; existing transportation or paratransit service providers; and appropriate public and private sector employers. Partnerships also may be formed with other appropriate entities identified by the consortium, including, but not limited to, Centers for Independent Living, consumer advocacy organizations, economic development councils, Private Industry Councils, Governor's committees on the employment of persons with disabilities, developmental disabilities councils, mental health centers, community rehabilitation programs, Indian Tribes, labor unions, and employment and training organizations funded by the U.S. Department of Labor;

(2) Make timely, formal requests for Medicaid waivers if necessary for projects to be able to implement developed strategies;

(3) Implement, in a timely manner, the strategies developed by the project to expand employment outcomes for individuals with mental or physical disabilities, or both;

(4) Participate, as appropriate, in meetings of a Federal Interagency Employment Initiative Workgroup and inform workgroup members of project activities; and

(5) Participate in, and provide data for, an external evaluation of the systems-change projects as directed by the Commissioner of the Rehabilitation Services Administration. The evaluation would examine—(a) The effect of specific innovative systems-change approaches and strategies on State or local agency policies, practices, or rules affecting the employment of individuals with disabilities; (b) The effect of specific innovative systems-change approaches and strategies on increasing the number of individuals with disabilities who obtain competitive employment, including job retention, promotion, satisfaction, and wage growth; and (c) The cost effectiveness of employment supports and services implemented by the project.

Proposed Definitions

Consortium means a group of eligible parties formed by the applicant seeking a Federal award under this priority. Members of the consortium shall enter

into an agreement and carry out their responsibilities consistent with the requirements in paragraph (A) of the priority. Members of the consortium shall also ensure that project partners carry out their agreed-upon activities.

Disability with respect to an individual means a physical or mental impairment that substantially limits one or more of the major life activities of that individual, having a record of such an impairment, or being regarded as having such an impairment.

Locality means specific geographical areas within a State or States.

Partner means an entity with which the consortium has entered into an agreement to carry out specific activities, goals, and objectives of the project.

Partnership agreement means a written arrangement between a consortium and its partners to carry out specific activities related to the project.

Public Support means Federal, State, and local public programs that provide resources or services to individuals with disabilities. These programs include, but are not limited to, Temporary Aid to Needy Families (TANF), Supplemental Security Income (SSI), Social Security Disability Income (SSDI), Medicaid (including Medicaid waiver programs), Medicare, subsidized housing, and food stamps.

Region means two or more States participating in the project.

Selection Criteria

In evaluating an application for a new grant under this competition, the Secretary uses selection criteria chosen from the general selection criteria in § 75.210 of the Education Department General Administrative Regulations. The selection criteria to be used for this competition will be provided in the application package for this competition.

Executive Order 12866

This proposed priority has been reviewed in accordance with Executive Order 12866. Under the terms of the order the Secretary has assessed the potential costs and benefits of this regulatory action.

The Secretary has determined that there are no costs associated with this priority. Announcement of the priority would not result in costs to State and local governments, recipients of grant funds, or to individuals with disabilities and their families. The benefit from this priority would be to focus activities and Federal assistance on increasing competitive employment outcomes for individuals with disabilities who are participants in public support programs through enhanced collaboration and coordination.

The Secretary has also determined that this regulatory action does not unduly interfere with State, local, and tribal governments in the exercise of their governmental functions.

To assist the Department in complying with the specific requirements of Executive Order 12866, the Secretary invites comment on whether there may be opportunities to increase potential benefits resulting from this proposed priority without impeding the effective and efficient administration of the program.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding this proposed priority. The Secretary is particularly interested in receiving comments on the composition of the consortium and other consortium requirements. In addition, the Secretary invites comment on whether it is appropriate or feasible for a consortium to serve more than one State.

All comments submitted in response to this proposed priority will be available for public inspection, during and after the comment period, in Room 3038, MES Building, 330 C Street, S.W., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Eastern time, Monday through Friday of each week except Federal holidays.

On request the Department supplies an appropriate aid, such as a reader or print magnifier, to an individual with a disability who needs assistance to review the comments or other documents in the public rulemaking docket for this proposed priority. An individual with a disability who wants to schedule an appointment for this type of aid may call (202) 205–8113 or (202) 260–9895. An individual who uses a TDD may call the Federal Information Relay Service at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

Program Authority: 29 U.S.C. 762(b)(3).

(Catalog of Federal Domestic Assistance Number has not been assigned)

Dated: March 24, 1998.

Judith E. Heumann,

Assistant Secretary for Special Education and Rehabilitative Services.

Title 3—

The President

Proclamation 7097 of May 15, 1998

World Trade Week, 1998

By the President of the United States of America

A Proclamation

The American economy is experiencing its longest period of sustained growth in more than a generation, with more than 15 million new jobs, the lowest unemployment rate since 1970, and the lowest inflation rate in more than 30 years. Much of this economic expansion can be attributed to our overseas trade. Today, America is the world's leading exporter. Our exports sustain 12 million jobs—jobs that on average, pay more than jobs not tied to exports. The extraordinary vigor of America's economy reflects the 1998 theme of World Trade Week: "Exporting Pays Off."

Our unparalleled capacity to develop and market high-technology products and processes has given us a strong competitive edge in the international marketplace in everything from aerospace to agriculture. Americans have led the world into the Information Age, and we are poised to lead it into an exciting new era of electronic commerce. Also central to our success in the global economy has been our ability to open foreign markets for American goods and services. During the past 5 years, my Administration has negotiated more than 240 new trade agreements and strengthened efforts to eliminate unfair trading practices in order to help American workers and businesses compete in an international arena that is open and fair and where trade rules are enforced.

To keep America growing, and to maintain our leadership in the global economy, we must expand our exports. We must sustain our advantage in information and other technologies by creating a business climate that encourages investment, by continuing our support of education and research in basic science and technology, and by ensuring that American workers are the best-educated and best-trained work force in the world. The Bureau of Labor Statistics estimates that we will need more than a million new high-skilled workers during the next 10 years to power the information technology field. We must provide working Americans with the skills and training they need to seize these promising employment opportunities.

Our exports and our economic strength depend upon our access to an open, stable, and growing world market. The nations of the world are becoming increasingly intertwined in a global economy. We must continue our efforts to remove foreign barriers to American goods and services, to open new markets, and to keep them open. This week, I will travel to Geneva, Switzerland and address the World Trade Organization to underline just how important free and open trade is to our future prosperity. Fast-track trade authority has been a crucial tool in this endeavor in the past, and it will become increasingly important to our ability to compete in the future with other countries for new markets, new contracts, and new jobs. This traditional trading authority will empower us to negotiate pro-growth, pro-American trade agreements that will maintain the momentum of our economy and ensure that American workers and American businesses can compete on a level playing field with the rest of the world.

VOL 63 ISS 97 MY 20 1998 UMI

America's leadership in building an open, fair world trade system is paying off in rewards for entrepreneurial initiative, higher wages for working Americans, incentives for technological advances and artistic creation, and prosperity for our Nation. By embracing the challenges of competing in the global marketplace in the 21st century, we can ensure continued growth for American businesses, prosperity for working Americans, and a brighter future for us all.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim May 17 through May 23, 1998, as World Trade Week. I invite the people of the United States to observe this week with ceremonies, activities, and programs that celebrate the potential of international trade.

IN WITNESS WHEREOF, I have hereunto set my hand this fifteenth day of May, in the year of our Lord nineteen hundred and ninety-eight, and of the Independence of the United States of America the two hundred and twenty-second.

William J. Clinton

Strategic petroleum reserve; standard sales provisions; comments due by 5-26-98; published 4-8-98
ENVIRONMENTAL PROTECTION AGENCY
Air pollutants, hazardous; national emission standards:
Portland cement manufacturing industry; comments due by 5-26-98; published 3-24-98
Air pollution; hazardous; national emission standards:
Aerospace manufacturing and rework facilities; comments due by 5-26-98; published 3-27-98
Air programs:
Fuels and fuel additives—
Diesel fuel sulfur requirement; Alaska exemption petition; comments due by 5-28-98; published 4-28-98
Air programs; approval and promulgation; State plans for designated facilitiesand pollutants:
Missouri; comments due by 5-26-98; published 4-24-98
Air quality implementation plans; approval and promulgation; various States:
Connecticut; comments due by 5-26-98; published 4-24-98
Georgia; comments due by 5-29-98; published 4-29-98
Wisconsin; comments due by 5-28-98; published 4-28-98
Air quality planning purposes; designation of areas:
Iowa; comments due by 5-26-98; published 4-23-98
Clean Air Act:
Clean fuel fleet program; State implementation plans; comments due by 5-26-98; published 4-23-98
Federal and State operating permits programs; draft rules and accompanying information availability; comments due by 5-26-98; published 4-28-98
CleanAir Act:
Clean fuel fleet program; State implementation plans; comments due by 5-26-98; published 4-23-98
Hazardous waste program authorizations:
New Mexico; comments due by 5-28-98; published 4-28-98
Pesticides; tolerances in food, animal feeds, and raw agricultural commodities:
Imidacloprid; comments due by 5-26-98; published 3-25-98
Superfund program:
National oil and hazardous substances contingency plan—
National priorities list update; comments due by 5-26-98; published 4-24-98
National priorities list update; comments due by 5-28-98; published 4-28-98
Toxic substances:
Testing requirements—
Diethanolamine; comments due by 5-29-98; published 3-30-98
Ethylene glycol; comments due by 5-29-98; published 3-30-98
Hydrogen fluoride; comments due by 5-26-98; published 3-27-98
Maleic anhydride; comments due by 5-26-98; published 3-27-98
Phthalic anhydride; comments due by 5-26-98; published 3-27-98
FEDERAL COMMUNICATIONS COMMISSION
Common carrier services:
Alternative incentive based regulation; policies and rules; reclassification of Comsat Corp. as nondominant carrier; comments due by 5-26-98; published 5-11-98
FEDERAL LABOR RELATIONS AUTHORITY

The Federal Register: What It Is and How to Use It

A Guide for the User of the Federal Register—Code of Federal Regulations System

This handbook is used for the educational workshops conducted by the Office of the Federal Register. For those persons unable to attend a workshop, this handbook will provide guidelines for using the *Federal Register* and related publications, as well as an explanation of how to solve a sample research problem.

Price $7.00

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$27 per year.

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$25 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register

INFORMATION ABOUT THE SUPERINTENDENT OF DOCUMENTS' SUBSCRIPTION SERVICE

Know when to expect your renewal notice and keep a good thing coming. To keep our subscription prices down, the Government Printing Office mails each subscriber *only one renewal notice*. You can learn when you will get your renewal notice by checking the number that follows month/year code on the top line of your label *as shown in this example*:

A renewal notice will be sent approximately 90 days **before the shown date.**

```
AFR  SMITH212J                DEC97 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

A renewal notice will be sent approximately 90 days **before the shown date.**

```
AFRDO  SMITH212J              DEC97 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402–9372 with the proper remittance. Your service will be reinstated.

To change your address: Please SEND YOUR MAILING LABEL, along with your new address to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To inquire about your subscription service: Please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9375.

To order a new subscription: Please use the order form provided below.

Briefings on how to use the Federal Register
For information on briefings in Washington, DC, and Chicago, IL, see announcement on the inside cover of this issue.

Now Available Online via
GPO Access

Free online access to the official editions of the *Federal Register, the Code of Federal Regulations* and other Federal Register publications is available on *GPO Access*, a service of the U.S. Government Printing Office at:

http://www.access.gpo.gov/nara/index.html

For additional information on *GPO Access* products, services and access methods, see page II or contact the *GPO Access* User Support Team via:

- ★ Phone: toll-free: 1-888-293-6498
- ★ Email: gpoaccess@gpo.gov

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512-1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $555, or $607 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $220. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 63 FR 12345.

Printed on recycled paper containing 100% post consumer waste

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: June 16, 1998 at 9:00 am.

WHERE: Office of the Federal Register
Conference Room
800 North Capitol Street, NW.
Washington, DC

Rules and Regulations

Federal Register
Vol. 63, No. 98
Thursday, May 21, 1998

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 982

[Docket No. FV98–982–1 FIR]

Hazelnuts Grown in Oregon and Washington; Establishment of Interim and Final Free and Restricted Percentages for the 1997–98 Marketing Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture (Department) is adopting, as a final rule, without change, the provisions of an interim final rule which established interim and final free and restricted percentages for domestic inshell hazelnuts for the 1997–98 marketing year under the Federal marketing order for hazelnuts grown in Oregon and Washington. The percentages allocate the quantity of domestically produced hazelnuts which may be marketed in the domestic inshell market. The percentages are intended to stabilize the supply of domestic inshell hazelnuts to meet the limited domestic demand for such hazelnuts and provide reasonable returns to producers. This rule was recommended unanimously by the Hazelnut Marketing Board (Board), which is the agency responsible for local administration of the order.

EFFECTIVE DATE: June 22, 1998.

FOR FURTHER INFORMATION CONTACT: Teresa L. Hutchinson, Marketing Specialist, Northwest Marketing Field Office, Fruit and Vegetable Programs, Agricultural Marketing Service, USDA, 1220 SW Third Avenue, Room 369, Portland, OR 97204; telephone: (503) 326–2724, Fax: (503) 326–7440 or George J. Kelhart, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, Room 2525–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 720–2491, Fax: (202) 205–6632. Small businesses may request information on compliance with this regulation by contacting: Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456; telephone: (202) 720–2491, Fax: (202) 205–6632.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement No. 115 and Order No. 982 (7 CFR Part 982), both as amended, regulating the handling of hazelnuts grown in Oregon and Washington, hereinafter referred to as the "order." The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (Department) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is intended that this action apply to all merchantable hazelnuts handled during the 1997–98 marketing year (July 1, 1997, through June 30, 1998). This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing, the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review the Secretary's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule continues in effect marketing percentages which allocate the quantity of inshell hazelnuts that may be marketed in domestic markets. The Board is required to meet prior to September 20 of each marketing year to compute its marketing policy for that year and compute and announce an inshell trade demand if it determines that volume regulations would tend to effectuate the declared policy of the Act. The Board also computes and announces preliminary free and restricted percentages for that year.

The inshell trade demand is the amount of inshell hazelnuts that handlers may ship to the domestic market throughout the marketing season. The order specifies that the inshell trade demand be computed by averaging the preceding three "normal" years' trade acquisitions of inshell hazelnuts, rounded to the nearest whole number. The Board may increase the three-year average by up to 25 percent, if market conditions warrant an increase. The Board's authority to recommend volume regulations and the computations used to determine released percentages are specified in section 982.40 of the order.

The National Agricultural Statistics Service (NASS) estimated hazelnut production at 40,000 tons for the Oregon and Washington area.

The majority of domestic inshell hazelnuts are marketed in October, November, and December. By November, the marketing season is well under way.

The quantity marketed is broken down into free and restricted percentage portions to make available hazelnuts which may be marketed in domestic inshell markets (free) and hazelnuts which must be exported, shelled or otherwise disposed of (restricted). The preliminary free percentage releases 80 percent of the adjusted inshell trade demand. The preliminary free percentage is expressed as a percentage of the total supply subject to regulation (supply) and is based on the preliminary crop estimate.

At its August 28, 1997, meeting, the Board computed and announced preliminary free and restricted percentages of 8 percent and 92 percent, respectively. The Board used the NASS crop estimate of 40,000 tons. The purpose of releasing only 80 percent of the inshell trade demand under the preliminary percentage was to guard against an underestimate of crop size.

The preliminary free percentage released 3,003 tons of hazelnuts from the 1997 supply for domestic inshell use. The preliminary restricted percentage portion of the 1997 supply for export and kernel markets totaled 34,296 tons.

Under the order, the Board must meet a second time, on or before November 15, to recommend interim final and final percentages. The Board uses current crop estimates to calculate the interim final and final percentages. The interim final percentages are calculated in the same way as the preliminary percentages and release the remaining 20 percent (to total 100 percent of the inshell trade demand) previously computed by the Board. Final free and restricted percentages may release up to an additional 15 percent of the average of the preceding three years' trade acquisitions to provide an adequate carryover into the following season. The final free and restricted percentages must be effective by June 1, at least 30 days prior to the end of the marketing year, June 30. The final free and restricted percentages can be made effective earlier, if recommended by the Board and approved by the Secretary. Revisions in the marketing policy can be made until February 15 of each marketing year, but the inshell trade demand can only be revised upward, consistent with section 982.40(e).

The Board met on November 13, 1997, and reviewed and approved an amended marketing policy. The Board recommended that the three-year average trade acquisition figure of 4,279 tons be increased by 214 tons for market expansion. The Board also recommended the establishment of interim final and final free and restricted percentages. Interim final percentages were recommended at 10 percent free and 90 percent restricted. The interim final percentage made an additional 965 tons of inshell hazelnuts available for the domestic inshell market, including product for market expansion. The interim final marketing percentages were based on the Board's final production estimate (42,000 tons) and released 3,968 tons to the domestic inshell market from the 1997 supply subject to regulation. The interim final restricted percentage resulted in a restricted obligation of 35,173 tons.

The final free and restricted percentages were recommended at 12 percent and 88 percent, respectively. The Board also recommended that the final percentages be effective on April 30, 1997. The established final marketing percentages release for domestic inshell use an additional 642 tons from the supply subject to regulation. Thus, a total of 4,610 tons of inshell hazelnuts will be released from the 1997 supply for domestic inshell use. The final restricted percentage resulted in a restricted obligation of 34,531 tons.

The marketing percentages are based on the Board's production estimates and the following supply and demand information for the 1997–98 marketing year:

			Tons
	Inshell Supply Tons		
(1)	Total production (Board's estimate)		42,000
(2)	Less substandard, farm use (disappearance)		2,860
(3)	Merchantable production (Board's adjusted crop estimate)		39,140
(4)	Plus undeclared carryin as of July 1, 1997, subject to regulation		1
(5)	Supply subject to regulation (Item 3 plus Item 4)		39,141
	Inshell Trade Demand		
(6)	Average trade acquisitions of inshell hazelnuts for three prior years		4,279
(7)	Increase to encourage increased sales (5 percent of Item 6)		214
(8)	Less declared carryin as of July 1, 1996, not subject to regulation		525
(9)	Adjusted Inshell Trade Demand		3,968
(10)	15 percent of the average trade acquisitions of inshell hazelnuts for three prior years (Item 6)		642
(11)	Adjusted Inshell Trade Demand plus 15 percent for carryout (Item 9 plus Item 10)		4,610
	Percentages		
		Free	Restricted
(12)	Interim final percentages (Item 9 divided by Item 5) × 100	10	90
(13)	Final percentages (Item 11 divided by Item 5) × 100	12	88

In addition to complying with the provisions of the order, the Board also considered the Department's 1982 "Guidelines for Fruit, Vegetable, and Specialty Crop Marketing Orders" (Guidelines) when making its computations in the marketing policy. This volume control regulation provides a method to collectively limit the supply of inshell hazelnuts available for sale in domestic markets. The Guidelines provide that the domestic inshell market has available a quantity equal to 110 percent of prior years' shipments before secondary market allocations are approved. This provides for plentiful supplies for consumers and for market expansion, while retaining the mechanism for dealing with oversupply situations. At its November 13, 1997, meeting, the Board recommended that an increase of 5 percent (214 tons) for market expansion be included in the inshell trade demand which was used to compute the interim percentages. The established final percentages are based on the final inshell trade demand, and will make available an additional 642 tons for desirable carryout. The total free supply for the 1997–98 marketing year is 5,135 tons of hazelnuts, which is the final trade demand of 4,610 tons plus the declared carryin of 525 tons. This amount is 120 percent of prior years' sales and exceeds the goal of the Guidelines.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially

small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 1,000 producers of hazelnuts in the production area and approximately 23 handlers subject to regulation under the marketing order. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $5,000,000. Using these criteria, virtually all of the producers are small agricultural producers and an estimated 20 of the 23 handlers are small agricultural service firms. Thus, the great majority of hazelnut producers and handlers may be classified as small entities.

Board meetings are widely publicized in advance of the meetings and are held in a location central to the production area. The meetings are open to all industry members and other interested persons who are encouraged to participate in the deliberations and voice their opinions on topics under discussion. Thus, Board recommendations can be considered to represent the interests of small business entities in the industry.

Many years of marketing experience led to the development of the current volume control procedures. These procedures have helped the industry solve its marketing problems by keeping inshell supplies in balance with domestic needs. The current volume control procedures fully supply the domestic inshell market, provide for market expansion, and help prevent oversupplies in that market.
